PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact. The Pilot boards at Hatteberget Light Tower. Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA pilot station and destination.

ANCHORAGES: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Max. draft in channel 13.0 m. Night navigation is decided by individual case.

Bridge height at Tjornbron is 43 m.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Statoil Havden: Max. LOA 240 m. Max. draft 14.0 m. Distance bow to manifold 99.0 m.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

HEALTH: No special Pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge. Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned East/West located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (Lat. 58° 05.3′ N., Long. 11° 49.2′ E.). It is shown on B.A. Chart 890. It is used for the import of fuel oil for the power station located 0.5 miles away and for the import of products, solvents and LPG for oil companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05′ N., Long. 11° 48.5′ E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good fresh water is available ex-jetty by hose, rate 25 t.p.h.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

GARBAGE DISPOSAL: Container available for garbage, free of charge.

WASTE OIL DISPOSAL: Reception facilities for engine slops only up to a maximum of 15 cu.m. at a time.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.15.

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3′ N., Long. 11° 49.2′ E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North of Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side of the jetty and port side alongside on the South side. The offshore anchor is often used when berthing.

On the North Berth, vessels should be well secured at the stern when S./S.W. winds are blowing and well secured at the South Berth when N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havden Peninsula, to the West of Stenungsund. Vessels are swung to starboard and then pushed slowly into the berth. The stern overhangs when alongside, so good moorings are required aft when S./S.W. winds are blowing. The leads for the after moorings are poor and the leads for the headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of the jetty, dependent on the receiver. Neste use the North side and Statoil use the South side. The North side berth is equipped with an 8 in. hydraulic arm (150 ASA) with clamps and automatic disconnect mechanism. The South side berth is also equipped with an 8 in. (150 ASA) hydraulic arm, but without clamps. Shore supply the necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each tank in turn, so that samples can be taken on the jetty. Analysis takes about 2 hours. The cargo temperature is to be at least −100°C. and usually colder temperatures required. If the temperatures are correct, the shore facility can usually handle rates up to 500 cu.m.p.h. on the North side and 200 cu.m.p.h. on the South side. Hot gas required on completion. It usually takes about 20 minutes to clear line, so about 40 mb. is required in the tanks. The jetty has a steam/hot water line for de-icing. Local surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 in. (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, no VRL. Samples are taken prior to arm being connected. Analysis takes 3 hours. Once lines are cool, the rate can be increased to maximum. Cargo goes into cavern storage so any rate can be accepted without difficulty. There was very little contact with the shore once discharge had commenced.

A surveyor from the terminal and SGS are available for figures. Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 ton SWL on the North side. No trucks allowed on jetty. Trolleys available for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-70670. *Telex:* 2408 Svvstd S. *FAX:* 46-303-88947, 70841. *Cables:* Kraftverket. *Contact:* S. Mukkulainen, Harbour Master.

Statoil Petrokemi AB, S-44481 Stenungsund. *Tel:* 0303-87000. *FAX:* 0303-87444. *Contact:* Morgan Hermansson or Anders Ranswall, General Managers.

Norsk Hydroplast AB, S-44483 Stenungsund. *Tel:* 0303-71560. *Telex:* 21206. *FAX:* 0303-84756. *Contact:* Stig Grunden, General Manager.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan)

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*

(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 400 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 400 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Tankers with gross tonnage exceeding 22,000 tons must be accompanied by a tug through the Archipelago to Stockholm and nearby ports.

Ships with a gross tonnage exceeding 400 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 9.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships:

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Dalaro/Langgarn	185.0	26.0	18,000	10.0
Furusund/Soderarm	185.0	26.0	18,000	7.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 215 m. to be assisted by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*

Rasta	10.9 m.	213 m.
Vartan	7.4 m. – 10.4 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 pilot stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BERTHING: Services of boatmen available any time day or night. Boatmen are ordered from Stockholm Port Authority. Tel: 08/6635500 or by VHF Channel 12.

Vartan (Esso/Shell)	3	20 – 60,000	24 08 – 36 00	8 – 10

DENSITY: Salt content of 0.5%. No variations.

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.

CERTIFICATES:

Tonnage Certificate.
Certificate of Nationality.
Derat Certificate not more than 6 months old.
Ship's articles, Crew List or similar document listing all persons signed on aboard.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.

FRESH WATER: Fresh water may be obtained from quayside. 1,000 cu.ft./hr. can be delivered from quayside. At Loudden max. 3,500 cu.ft./hr. can be delivered.

FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.

REPAIRS: All types of deck and machinery repairs can be carried out.

DRY DOCKS: None.

AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saints' Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.

POLICE/AMBULANCE/FIRE: Tel: 90 000.

TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.

SERVICES: Electric current can be laid on at some quays. Port is responsible for collection of oil residues. Licensed compass adjusters available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Passport or Seaman's Discharge Book with photograph.

GARBAGE DISPOSAL: A collection service is available. Containers are provided alongside. Charges are included in the port dues. For service call 08-6702600, and ask for Traffic Central.

WASTE OIL DISPOSAL: Collection service available by tanker trucks at any berth. Charges are included in port dues. Call Traffic Central (see above) for service.

SEAMAN'S CLUBS: Available.

DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.

AUTHORITY: Port of Stockholm, P.O.Box 27314, S-10254 Stockholm. *Tel:* 08-6702600. *Telex:* 10612. *FAX:* 08-6650838. *Cables:* Capitalport. *Contact:* Thomas Krokstedt, Harbour Master.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E. **(See Plan)**

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.

DOCUMENTS: Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Derat Certificate), not older than 6 months.
Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns Harbour Radio).

Vessels may not berth without permission of the Company.

PILOTAGE: Pilot boards in the outer approaches and should be ordered at least 5 hours in advance by Tel: 0498/227010 (Storugns) or 210138 (Visby). Pilots keep watch on VHF Channel 16.

ANCHORAGES: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hindrance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.

Prohibited Anchorage: See "Plan".

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.

HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.

RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, or by telephone 0498/227100 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude.

Between 0500 hrs. and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).

VHF: Storugns Harbour Radio VHF Channel 16.

TUGS: Rederi AB Gute. Tel: 0498-223000. On the island of Gotland.

BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone, which is of high purity and has a very low percentage of impurities, is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu.m.

The stowage factor varies between 17 and 26 (17 – 18 for grades 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 24 for grades above 120 mm.).

Quay	*Length*		*Depth*
Quay 1 outside	140 m.	outside	9.5 m.
inside	120 m.	inside	7.0 m.
Quay 2	48 m. (no loading)		5.0 m.
Quay 3	110 m.	outer	7.0 m.
		inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels can obtain boatmen service through their Agents or by calling the boatmen service firm "Trossvakt" on Tel: 0498/225433. Booking should be done at least 2 hours before ETA. Shipper/NordKalk AB cannot offer boatmen service.

BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 is about 500 – 1,000 t.p.h and on Quay 3 about 300 – 600 t.p.h.

Shipmaster's Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday-Thursday 0530 – 2230 hrs. and Friday 0530 – 1830 hrs. Overtime working to complete loading is available to a limited degree, as is loading on Saturdays and Sundays. Vessels requiring overtime loading Saturday/Sunday must give notice not later than Friday 1100 hrs.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.
FRESH WATER: Not available.
FUEL: Most grades available from Visby subject prior notice.
CONSULS: Nearest consuls at Visby for Denmark, Finland, Norway and Germany.
REPAIRS: Only minor repairs possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not compulsory but available.
OPENING/CLOSING HATCHES: Ship's crew open and close.
CUSTOMS ALLOWANCES: Presently 200 cigarettes per head/week. Practically no spirits allowed out of bond.
REPATRIATION: Good possibilities for changing crew.
AIRPORT: Visby.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel: 90 000.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book or Passport if travelling outside port area.
AUTHORITY: NordKalk AB, Storugns, S-620 34 Laerbro, Sweden. *Tel:* 0498-227100. *Telex:* 4150 Nkalk S. *FAX:* 0498-227227.
Contact: Bjoern Mathiasson, Harbour Master.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".
ANCHORAGES: Available within port for vessels up to and including 3,000 d.w.t.
MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.
BERTHING: No particular restrictions for berthing within the port.
FRESH WATER: Available.
FUEL: Not available.
CONSULS: Norway: Bertil Alen, Hjartagatan 13.
REPAIRS: Repairs possible.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.
HOLIDAYS: Cargo work cannot be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 90000.
TELEPHONES: No arrangements exist for placing telephones on board.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
IDENTIFICATION CARDS: Needed.
DELAYS: No delays in load or discharge.
AUTHORITY: Hamnforvaltningen Stromstad.

SUNDSVALL: 62.25 N. 17.20 E. (See Plan)

DOCUMENTS:
3 copies Crew Lists.
3 copies Passenger Lists (if passengers onboard only).
2 copies Crew Declaration on tobacco, liqueur, cigarettes and spirit, etc.
2 copies Ship's Stores List.
1 copy Cargo Declaration.
Derat Certificate.
Tonnage Certificate.
Register.
Swedish Light Dues.
Manifest and/or Bill of Lading.

PILOTAGE: Pilot station (Tel: 060-58 60 00/7) at Spikarna Southern Point of Alno Island VHF Channel 16. For communication and instructions Channel 13.

Pilot boarding from pilot cutter 2.5 miles East of Gubben Lighthouse in position Lat. 62° 21′ N., Long. 17° 40′ E.

Entrance passage Gubben Light – Spikarna – Draghallan Light all 14 m. deep.

ANCHORAGES: Between islands of Tjufholmen and Alno and also in Svartvik Bay.
MAX. SIZE: See "Berthing".
RADIO: Cable Agents giving ETA, draft and cash requirements either via Hernosand Radio SAH or Stockholm Radio SDJ. At least 24 hours' notice required. Change in ETA to be given at least 5 hours before ETA Pilot.
TUGS: Available, ordered by Agent. Compulsory at Sundsvall Oil Terminal for tankers of more than 10,000 d.w.t.
BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Kubikenborg: Lat. 62° 22.7′ N., Long. 17° 22′ E.
Length of quay 150 m. Max. length 192 m. Max. draft 10.5 m. 1 shore crane, capacity 5 tons. 1 suction-installation, capacity 150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ortviken: Lat. 62° 23.8′ N., Long. 17° 21.8′ E.
Oil Berth: Quay length 140 m. Max. draft at max. 200 m. length is 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: Lat. 62° 29′ N., Long. 17° 21′ E.
Oil Berth: Tankers berthed outside a steel barge, max. LOA 200 m., max. draft 7 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 15 km.

Soraker: Lat. 62° 30.5′ N., Long. 17° 30′ E.
Length of quay 150 m. Max. LOA 90 m. Max. draft 5.8 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the Alno Island). Pilot distance 20 nautical miles (West of the Alno Island). Distance from Sundsvall Town 34 km.

Stockvik: Lat. 62° 20′ N., Long. 17° 22′ E.
Length of quay 190 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall Town 9 km.

Sundsvall Town Quay:* Lat. 62° 23.5′ N., Long. 17° 19.5′ E.

1 Berth:	Length 90 m. Max. draft 7.8 m.
1 Berth:	Length 175 m. Max. draft 5 m. – 7 m.
1 Ferry/Ro-Ro Berth:	Max. beam 15 m. Max. draft 7.5 m.

No cargo is handled on Sundsvall Town Quay. Pilot distance 12 nautical miles.

Sundsvall Oil Berth:* (Vindskarsudde) Lat. 62° 23.2′ N., Long. 17° 21.8′ E.
Length of quay 100 m. Depth 12.0 m. Max. LOA 250 m. Max. draft 11.3 m. Max. d.w.t. 70,000. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall Town 3 km. Vessels berth port side to.

Svartvik:* Lat. 62° 19′ N., Long. 17° 22′ E.
Length of quay 140 m. Max. draft at 100 m. length is 4.5 m.
Distance from Sundsvall Town 11 km.

Port of Sundsvall* (Tunadalshamnen): Lat. 62° 25′ N., Long. 17° 23′ E.
Length of quay 450 m. Max. draft 9.1 m. 3 shore cranes, capacity 10 tons – 20 tons. Additional berth: Length of quay 200 m. Max. draft 12.5 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.
Ro/Ro Berth: Depth 9.4 m. Max. beam 30 m. Max. draft 9.2 m.
LPG Berth: Quay for discharge of LPG. Storage capacity 8,000 tons. Depth alongside 11.0 m. Max. draft 10.5 m.

Tunadal Sawmill: Lat. 62° 25′ N., Long. 17° 23′ E.
Length of quay 195 m. Max. draft at 80 m. length is 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Vivstavarv: Lat. 62° 29′ N., Long. 17° 28′ E.
Length of quay 160 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 18 km.

*These ports are administered by Sundsvall Port Authority.

CRANES: 3 cranes available 10 – 20 ton. At Tunadalshamnen cargo is also handled by mobile cranes. Also see "Berthing".
STEVEDORES:
Ordinary working hours Monday – Friday 0700 – 1600 hrs.
Overtime on Saturdays 0700 – 1330 hrs. at 100% additional cost.
MEDICAL: First class medical attention and dental care available.
TANKERS: See "Berthing".
CUSTOMS ALLOWANCES: See "Stockholm".
DENSITY: Nearly fresh, 1002 – 1005.
FRESH WATER: Supplied at Sundsvall, Kubikenborg, Stockvik and Tunadal.
FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down at weekends.
CONSULS: Finland, Germany, Iceland, Netherlands, Norway.
REPAIRS: Most repairs possible through local repair shops.
DRY DOCKS: Lunde Varv outside Kramfors.

SURVEYORS: Cargo inspectors available through Sundsvall Control Service or Lloyd's Agency for cargo or vessel.

Surveyors available from Stockholm in most cases. Call Agents for details at time.

AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel: 90 000.

EMERGENCY: CO-ORDINATION CENTRE: Tel: 90 000 giving full details of situation or call Harnosand Coast Radio Station VHF or MF.

SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at oil terminals only.

STORING: Vessels stored by truck only, through assistance of stevedores and forklifts. Can be done close alongside ship.

GARBAGE DISPOSAL: Container available at no charge.

WASTE OIL DISPOSAL: Sludge is collected free of charge if ordered 24 hours in advance.

There are no facilities for dirty ballast.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kroner (SEK). U.S.$ 1.00 = 5.93 SEK (28.2.92).

GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port Authorities in advance of nature, quantity and IMO code number of goods concerned.

Wintertime: Ice-breaker service available if needed (Wintertime December to April).

AUTHORITY: Sundsvalls Hamnforvaltning, Hamnplan 4, S-851 85 Sundsvall, Sweden. *Tel:* (060) 19 10 00. *FAX:* 060-120998. *Contact:* Eeik Westerlund, Harbour Master, Tel: (060) 19 21 91, 19 21 86.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Available day and night. To obtain Harbour Pilot report 5 hours in advance. To obtain outward Pilot report 24 hours in advance of departure. Pilot meets inward-bound ships on Roads at Trelleborg Light Buoy (Lat. 55° 20′ N., Long. 13° 08.5′ E.). Outward-bound Pilot obtained from pilot station of Malmo. Tel: 040-115269, 040-978315. Pilot boats provided with short-wave radio telephone. Also see "Stockholm".

ANCHORAGES: Recommended West of entrance fairway between Fairway Buoy and No. 1 Light Buoy. Depth varies from 7 m. – 14 m. Anchor ground good – clay and sand.

RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 96 m.)

HEALTH: See "Stockholm".

VHF: Port and pilot station on Channels 16 and 9.

TUGS: Tug-boats can be obtained promptly from Malmo.

BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by 1 bridge crane (6.2 tons) and 1 mobile crane of 36 tons. Western Harbour Basin has depth of 8 m. Eastern Harbour Basin has depth of 8.0 m. Oil Quay 230 ft. long, depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. Five berths equipped for Ro/Ro traffic.

STEVEDORES: Available (Tel: 43135).

FRESH WATER: Available on all quays at request to Harbour Office.

FUEL: All grades bunker oils supplied at oil quay through direct pipeline from sea depot. Order on phone Trelleborg 107 76.

REPAIRS: Available through private firms. Tel: Trelleborg 150 60, 109 66 or 124 50.

CONSULS: Denmark, Norway and Germany.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: Ship's telephone available at Oil Quay, Tel: 148 28, and at the Harbour Bridge, Tel: 147 67. Order is made through Harbour Office.

SERVICES: Divers available through the Harbour Office.

GARBAGE DISPOSAL: Drums or skips available alongside. Contact Port Office (Tel: 0410-53900) during daytime (0700 hrs. – 1600 hrs.). Normally there is no charge.

WASTE OIL DISPOSAL: Tanker trucks with capacity 25 cu.m. are available at 24 hours notice. Call Port Office for service (Tel: 0410-53900, Fax: 0410-14129). Normally no charge for service.

SEAMAN'S CLUBS: None.

AUTHORITY: Trelleborgs Hamn, Box 26, 23121 Trelleborg, Sweden. *Tel:* 0410-53900. *FAX:* 0410-14129. *Contact:* Lars Dahlstrom, Port Captain.

UDDEVALLA (including Froland): 58.21 N. 11.56 E. (See Plan)

DOCUMENTS:

- 3 Crew Lists.
- 3 Passenger Lists.
- 3 Manifests.
- 1 copy of Bill of Lading.
- Tonnage Certificate.
- Nationality Certificate.
- Derat Certificate.
- 2 Crew Effects Declarations.
- 2 Ship's Stores Declaration.
- 1 Declaration of Living Animals (if any).

PILOTAGE: Pilotage at Marstrand. Address "Marstrand Pilotstation". Required ETA 5 hours. VHF 16 and 11. Pilot boat S.W. of Hatteberget Lighthouse (Lat. 57° 51.8′ N., Long. 11° 27.65′ E). (Also see "Stockholm".)

MAX. SIZE: Draft 11 m., airdraft 43 m.

Bado Quay: Max. LOA 190 m. Max. draft 9.0 m. (MLW).

HEALTH: Cable to Agent and he will arrange with Health Authorities.

RADIO: SAG. Gothenburg Radio (Goteborg Radio).

RADAR/VHF: No port radar service, VHF Channels 16, 11 and (working channel) 14.

TUGS: 2 Tugs up to 3,200 h.p. available. Can be ordered through Pilot or Agent.

BERTHING: Depths alongside (at MW) as follows:

		Length (m.)	*Depth* (m.)
Skeppsholm Quay		340	10.7 – 11.2
Bado Quay		430	6.0 – 9.5
Bave Quay		180	7.0
Skans Quay		180	6.0
Thule Quay		105	4.0
Juno Quay		200	6.0
Froland		225	12.0
Kasen –	K1	200	5.0–6.0
	K2	200	5.0
	K3	260	5.0–9.0
Sorvik –	K6	250	10.3

CARGO HANDLING FACILITIES:

Skeppsholmspiren: 5 electric cranes of 12 to 35 tons capacity. Warehouse of 3,500 sq.m. Very large storage areas. 1 berth equipped for Ro-Ro traffic.

Bado Quay: 6 electric cranes with capacities of 7 – 12 tons. 16,000 sq.m. of warehouses and 20,000 sq.m. of storage. 2 silos for grain owned by private companies.

Bave Quay: 1 electric crane with capacity of 12 tons. 3,400 sq.m. of warehouse and 14,000 sq.m. of storage.

Froland: (Lat. 58° 20′ N., Long 11° 52′ E.) Total length 225 m., depth alongside 12 m., 1 electric crane with capacity of 35 tons, 35,000 sq.m. of storage. One berth equipped for Ro/Ro traffic, depth 8.0 m., 1 conveyor belt 500 t.p.h. – 800 t.p.h. This berth is specially constructed to handle the loading/unloading of bulk cargo.

Also see "Developments".

STEVEDORES: Arranged by Agent.

TANKERS: Draft in the Skeppsviken Oilport, 10.7 m.; at the Bado Oilport, 9.5 m.

FRESH WATER: Available at all quays.

FUEL: All grades available.

FIRE PRECAUTIONS: Watchmen necessary when loading or discharging oils by pipe-lines.

CONSULS:

Barbados	Tel: 738 54	Netherlands	Tel: 144 60
Germany	Tel: 360 00	Norway	Tel: 353 71

REPAIRS: Facilities available.

SURVEYORS: All kinds of cargo inspectors and surveyors available.

GANGWAY/DECK WATCHMAN: Watchman accepted by Harbour and Fire Authorities on vessels loaded with explosives.

OPENING/CLOSING HATCHES: Preferably by crew. Can be arranged by stevedores.

Foreningsbanken Uddevalla, N. Drottninggatan 12, Box 251, 451 17 Uddevalla. Tel. 0522–143 80.

STORING: See "Prelims".

1. Vessel can be stored by barge or truck.
2. Before storing the Port Authority must be contacted.
3. Trucks can proceed alongside at every berth.
4. Fork lift can be used.
5. Storing under Customs supervision.
6. Local riggers can be employed.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Garbage container provided alongside.

WASTE OIL DISPOSAL: Reception by tanker trucks on all berths. Application for delivery to be given 24 hours before delivery. Vessel pumping a minimum of 5 cu.m./hr. Destruction Declaration to be given to receivers, stating quantity, type and kind of emulsion used. Delivery only within working hours (0700 hrs. – 1600 hrs.). Max. quantity 10 cu.m. per vessel. All extra costs will be charged (ex. overtime, pumps, extra quantities, etc.). Ordering through local Agent.

SEAMAN'S CLUBS: Seamen's Church in Uddevalla. Tel: (Nat.) 0522-35526, (Int'l) +46524-35526. Transportation with minibus from outer harbours only (Froland and Sorvik Harbour).

Facilities at Church: Pool table, table tennis, television with satellite channels (English and German), telephone service, mail service, exchange, Summertime sightseeing tours can be arranged (price 100 SEK/minibus). Opening times: Weekdays 1600 hrs. – 2200 hrs. Saturdays, Sundays and holy-days 1800 hrs. – 2200 hrs.

CURRENCY: Swedish Kroner (SEK). U.S.$ 1.00 = 5.75 SEK (12.2.92).

DEVELOPMENTS: Storage area at Froland to be extended by 20,000 sq.m.

AUTHORITY: Uddevalla Hamn Terminal AB, Box 543, 451 21 Uddevalla, Sweden. *Tel:* 0522-91200. *FAX:* 0522-33630. *Contact:* Mr. Morgan Lexberg, Traffic Manager.

UMEA: 63.49 N. 20.16 E. (See Plan)

DOCUMENTS:

Ship's Documents:

Tonnage Certificate.
Certificate of Nationality.
Derat Certificate (not older than 6 months).

Supplied by Master on arrival:

1 copy of each Manifest.
1 copy of each Bill of Lading.

Supplied by Agent and signed by the Master on arrival from foreign ports:

1 Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
2 Crew Effects Declarations.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).

Furthermore on arrival from any port:

1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.

On departure to a Foreign Port:

4 Reports of Departure.

PILOTAGE: Umea Pilot Station: Hillskar. Tel: 090-41622 and 090-40372. Telegraphic address "Pilotstation Umea".

At least 5 hours' advance notice of ETA at pilot station, stating time and pilot station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel. All pilot boats orange with flag "H" and equipped with radar.

Boarding point, Lat. 63° 36.5′ N., Long. 20° 25.5′ E., 1.0 nautical miles 145° (T) from Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the pilot station.

Anchorage for vessels awaiting Pilot: Lat. 63° 36′ N., Long. 20° 28′ E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 m. to 30 m.

ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea Hamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of Lat. 63° 42.3′ N., Long. 20° 21.0′ E. and with a depth of 12 m. to 22 m.

Anchorage is forbidden around position Lat. 63° 40.5′ N., Long. 20° 20.0′ E.

Cables and fresh water pipe-line on Osterfjarden roadstead passing East-West around Lat. 63° 42.5′ N.

RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 17,000 d.w.t. and a max. draft of 9.0 m., and dry cargo vessels with a draft not exceeding 9.2 m.

During unsuitable weather conditions, according to the Pilot on duty. Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.

MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft* (m.)	*Depth* (m.)
Ferry Station No. 1-2	7.6	6.0
Ferry Station No. 3	9.7	7.0
Stormskar Oil Berth and Obbola	9.7	
Holmsund Oil Jetty	5.5	
Umea Inner Harbour and Gimonas Oil Jetty	3.0	

No tide.

HEALTH: Free Pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents").

RADIO: Harnosands Radio (SAH) on 2182 kHz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port Radio: Umea Port Radio keeps watch, Monday to Friday, 0600 – 1500 hrs. on VHF Channel 16. Working Channels 11 and 13. At other times Umea Pilot Station. No port radar service, but Umea Pilot Station and the pilot boats are equipped with VHF and can assist on request.

TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.

BERTHING: Depth alongside (at MW) as follows:

Umea Outport	*Depth* (m.)
Ferry Stations	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	11.0
North Quay, Berth Nos. 2 to 6	7.87
North Quay, Berth Nos. 1 to 2	6.0

CRANES:

North Quay: 1 crane, 2 – 5.0 tons and 1 mobile crane 36 tons.
Pier Quay: 3 cranes, 3 – 7.5 tons.
South Quay: 1 crane of 40 tons.
Ferry Station No. 3: 1 crane 3 – 5 tons.

STEVEDORES: Holmsunds Stuveri AB. Tel. 090-40970. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday to Friday 0600 – 1500 hrs., meal hour 1000 – 1100 hrs. Coffee breaks 0800 – 0810 hrs.; 1300 – 1310 hrs.

MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.

TANKERS: Oil berths at Port of Umea.

Stormskar: Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses. Max. LOA 215 m., max. beam 30.0 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.) Max. d.w.t. 42,000. Vessels usually berth starboard side to.

Obbola: Oil Jetty, depth 11.0 m. Max. LOA 200 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.). Max. d.w.t. 40,000. Vessels berth port side to.

DENSITY: Nearly fresh water.

FRESH WATER: Delivered from water posts in Port of Umea at Ferry Station No. 1, Oil Berth, Berth Nos. 1 – 10 and in Umea Inner Harbour.

FUEL: All kinds and grades of fuel oil available in Port of Umea. Bunkering at Berths 1 – 10 possible during normal loading or unloading from pipe-line. At Ferry Station Nos. 1 and 2 and the Oil Berth also bunkering from pipe-line. Fuel can also be delivered from lorries. Notice as early as possible.

FIRE PRECAUTIONS: Security watchmen from Port of Umea while alongside the Oil Berth. Alarm regulations in writing will be delivered on arrival.

CONSULS: Following countries have representatives in Umea: Denmark, Finland, Netherlands, Norway.

REPAIRS: Most deck and engine repairs.

SURVEYORS: Lloyd's Agent: Iwan Lundstedts Eftr. AB, Tel: 090-24700. Telex: 54036. Fax: 090-23649. Contact: Torsten Lundberg, Managing Director.

GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.

OPENING/CLOSING HATCHES: Can be done by stevedores if necessary, except patent hatches.

CUSTOMS ALLOWANCES: *Tobacco:* 200 cigarettes or 250 grammes of tobacco (7 ozs.)

Spirits and Wine: 1 bottle of each (1 litre), minimum age 20 years.

Above mentioned quantities are per crew member and per week in Sweden. After a week quantities are taken out after request to the Customs Office.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Umea, approx. 20 km. away, served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Saturday in November); Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.

TELEPHONES: Available for placing on board at Berths 1 – 10 and Oil Berth at Stormskar.

IDENTIFICATION CARDS: Not required. Seaman's Book sufficient.

GARBAGE DISPOSAL: Collection service is available during working hours. Tel: 090-163285.

WASTE OIL DISPOSAL: Collection service is available during working hours at no charge. Notice to be given 24 hours before arrival. Tel: (090) 163285. Fax: (090) 24306.

The ship has to discharge the waste oil at a capacity of at least 5 cu.m./hr., otherwise overtime is charged.

SEAMAN'S CLUBS: Seaman's Home, Port of Umea, S-91300 Holmsund. Tel: (090) 40151. Facilities: Shop, international telephone service, postage and games.

CURRENCY: Swedish Kroner (SEK). One Swedish Kroner = 100 ore. U.S.$ 1.00 = 5.72 SEK. DM 1.00 = 3.64 SEK (12.2.92).

AUTHORITY: Umea Hamnforvaltning, Umea Hamn, Box 83, S-91300 Holmsund, Sweden. *Tel:* 090-163280. *FAX:* 090-24306. *Contact:* Per Ove Englund, Port Director.

VALLVIK: 61.11 N. 17.11 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Soderhamn (Ljusne Station).
ANCHORAGES: *(a)* Ljusne bight sheltered from West, North to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun Island sheltered from South to S.W. winds, depths 10 to 12 fathoms.
RESTRICTIONS: No direct restrictions. Ships of about 5,000 d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to Pilot and weather conditions).
HEALTH: No special action except if suspected disease. In that case contact Agent.
MAX. SIZE: Max. draft in fairway 7.5 m. Length of loading pier is 200 m. Berthing possible on both sides.

East Side (from outer end):

Distance	Depth MWL (m.)
0 – 80 m.	8.3
80 – 85 m.	7.7
85 – 110 m.	7.2
110 – 140 m.	6.7
140 – 175 m.	5.8
175 – 195 m.	5.7
195 – 200 m.	5.2

West Side (from outer end):

Distance	Depth MWL (m.)
0 – 40 m.	7.6
40 – 70 m.	5.8
70 – 90 m.	5.5
90 – 140 m.	4.6

RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.
RADAR/VHF: No port radar service. There is a radar station at Ljusne. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channels 16 and 13.
BERTHING: Ship's Agent keeps contact with Port Authorities.
STEVEDORES: Agent arranges required or available gangs according to the Shipmaster's wishes.
TANKERS: 10 in. diameter discharging hoses and pipe-line. Tanker berth at loading pier, 3 different connecting points.
FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.
FUEL: Tanker lorries ordered through Agent, available with a few hours' notice.
CONSULS: Danish, Dutch and French Consuls in Soderhamn.
REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.
OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.
CARGO GEAR: Cargo gear certificates valid.
REPATRIATION: Facilities for crew changes available.
AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Soderhamn".
POLICE/AMBULANCE/FIRE: See "Soderhamn".
TELEPHONES: No arrangements for placing telephones on board. Telephone for ship's use available in Harbour Master's Office.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: No service available.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
AUTHORITY: NCB-Vallvik, Vallviks Hamn, 82021 Vallvik, Sweden. *Tel:* 0270-62000. *Telex:* 47011. *FAX:* 0270-69210. *Contact:* Ewa Andersson.

VARBERG: 57.07 N. 12.15 E. (See Plan)

DOCUMENTS:
- Crew List.
- Passenger List.
- Maritime Declaration of Health (including Derat Certificate).
- Ship's Certificate of Registry.
- Manifests and B/L copies.

PILOTAGE: Application for Sea Pilot through ship's Agent. Telephone to Pilot station 0340/10300. Pilot to board vessel on the road about 0.5 nautical miles off Varberg. (Also see "Stockholm".)
ANCHORAGE: On the roads 10.0 m. depth.
RESTRICTIONS: No tide or other entry restrictions.
MAX. SIZE: Length 180 m., breadth 25 m., draft 7.0 m. No tide.
HEALTH: Vessel to be kept in quarantine if disease on board suspected.
RADIO: Gothenburg Radio, SAG. VHF Channels 16 and 26.
TUGS: Tugs to be ordered in advance.
STEVEDORES: Gangs to be ordered in advance through ship's Agent.
MEDICAL: Hospital facilities available. Desirable to give advance notice.
TANKERS: 1 tanker berth, max. draft 7.0 m.
FRESH WATER: Available all docks 35 t.p.h.
FUEL: Fuel Oil No. 1 – 5 available from tank trucks.
FIRE PRECAUTIONS: Oil and petrol to be discharged under supervision of watchman.
CONSULS:
- Vice-Consul of Finland, Tel: 0340/16000
- Vice-Consul of Netherland, Tel: 0340/16270
- Vice-Consul of Denmark, Tel: 0340/16130

REPAIRS: Only minor repairs.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Generally done by stevedores.
CERTIFICATES: Certificate of Registry, Derat and also Crew List.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes per man. (Wine/Spirits), 1 bottle per man.
REPATRIATION: Can be effected.
AIRPORT: Nearest airport with regular airlines, Landvetter/Gothenburg, 60 miles North of Varberg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Principal Swedish Holidays – when no cargo work is obtainable: New Year's Day; Good Friday; Easter Day; 2nd Easter Day; Labour Day (May 1st); Whitsun Day; 2nd Whitsun Day; Midsummer Day; All Saint's Day (November); Christmas Day; 2nd Christmas Day.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Available on dock and one for placing on board.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Garbage containers situated on quay. No charges, except for collection which is ordered via ship's agent.
WASTE OIL DISPOSAL: Tanker trucks at loading/unloading quay. To be ordered via ship's agent. No charges for waste oil generated normally during voyage.
SEAMAN'S CLUBS: Lasrum for Sjoman, Tullhuset, 43244 Varberg, Sweden. Tel: 0340-12147.
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.05 (April 1991).
DEVELOPMENTS: Planned increases of draft at the entrance to 9 m. = 29 ft. and in the harbour to 8 m. = 26 ft.
AUTHORITY: Port Authority of Varberg, Hamnkontoret, 43244 Varberg, Sweden. *Tel:* 0340-88526. *FAX:* 0340-80955. *Contact:* Tore Gustavsson, General Manager.

VASTERAS: 59.37 N. 16.33 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- 2 Crew Lists.
- 1 Tobacco List, signed by all hands on board.
- 1 Valid Derat Certificate.
- 1 copy of Manifest or Bill of Lading for each Swedish port of call.
- Light dues receipts, if on board.

PILOTAGE: Incoming ships receive Pilot from Landsort. Pilot ordered by VHF Channel 16 or by RT. Pilot boats fitted with VHF. Give order 5 hours before Pilot required. Pilots meet ships about 2 nautical miles outside Landsort. Light and signals in accordance with the international rules. (Also see "Stockholm".)
ANCHORAGES: Within harbour area. Depth 9 m. – 10 m.
RESTRICTIONS: None. No tides.
MAX. SIZE: Vessels reach port through two deep navigable channels – through Sodertalje Ship Channel or via Stockholm through Hammarby Ship Canal. Least depth of channels at average water level is 7.3 m. (24 ft. 1 in.).

Sizes of Locks:

	Length	*Width*	*Depth*
Sodertalje	136 m.	20 m.	7.5 m.
Hammarby	115 m.	17.4 m.	7.0 m.

Limitation of Vessels: For Sodertalje: With beam of 18 m. max. draft 6.5 m. With beam of 17 m. max. draft 6.8 m. Max. LOA 124 m.
HEALTH: No special requirements or health documents, only valid Derat Certificate. Disease or fever on board must be declared before entering port.
RADIO: Stockholm Radio.
VHF: Harbour Office, VHF Channels 16 and 14, Monday-Friday 0800 – 1600 hrs. Traffic – Channel 11.
TUGS: 1 tug for unberthing. Ship's lines. Boatmen can be ordered via VHF Channel 16. Tug can be used as icebreaker.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
Djuphamnskajen	660	7.6	2 jib cranes 12 tons – 33 tons 1 crane × 12 tons 3 cranes × 8 tons 1 crane × 5 tons 1 crane × 22 tons
Oljekajen	125	7.6	
Kolkajen (Ro/Ro)	120 plus dolphins	7.6	2 jib cranes 12 tons – 33 tons
Ostra Kajen	527	5.0 – 7.6	1 jib crane 25 tons jib crane 12 tons-33 tons 4 cranes × 5 tons 1 heavy lift crane 210 tons
Lillakajen	120	7.6	2 cranes × 6 tons
Silokajen	130	7.3	1 loader, rate 750 t.p.h.
Tullhuskajen	483		

BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 – 1830 hrs. weekdays and 1300 – 1500 hrs. Saturday or day before a holiday.
STEVEDORES: Stevedores for next working day ordered by at least 1500 hrs. day before and ETA to be given in due time. Tel: 021-12 71 20.

MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.
FRESH WATER: Ordered through Port Administration.
FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.
FIRE PRECAUTIONS: Accordance harbour regulations.
CONSULS: Denmark, Finland and Norway.
REPAIRS: Most deck and engine repairs, as well as electrical.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.
OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.
CERTIFICATES: Measurement Certificate and all gear test certificates required, if ship's gear to be used.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes or 200 gm. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.
REPATRIATION: Possible. Accommodation to be ordered in good time.
AIRPORT: Arlanda, 120 km. International lines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: In oil and deep-water harbour, most quays fitted with telephones.
SERVICES: Compass adjusting. Small radio repairs by local radio men.
SHORE LEAVE: Crew can leave vessel after Customs clearance and Immigration control.
IDENTIFICATION CARDS: None required.
GARBAGE DISPOSAL: Ordered through Port Administration.
WASTE OIL DISPOSAL: Ordered through Port Administration.
DEVELOPMENTS: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.
AUTHORITY: Vasteras Hamn, Sigurdsgatan 1, P.O.Box 256, S-721 06 Vasteras, Sweden. *Tel:* 021-180100. *FAX:* 021–180656. *Contact:* Ingmar Gynt, Port Director. Gunnar Kofod, Port Captain. Stig Jansson, Traffic Manager.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Compulsory. Pilot boards in Lat. 57° 45.1′ N., Long. 16° 57.3′ E., available day and night. Tel: 0490-28041. Call sign "Lotsarna Ido".
BERTHING: *Outer Harbour:* Djuphamnskajen Lucernakajen, length 200 m., depth 8.3 m.

Oil Quay (North part of Lucernakajen): Depth 8.3 m., equipped with 3×8 in. pipe-lines.

Ferry Harbour: Quay length 100 m., depth 6.3 m.

Inner Harbour: Quay length 900 m., depth alongside from 4 m. to 6 m.

Oil berth: Length 15.0 m., depth alongside 6 m.

FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn, Box 3093, 593 03 Vastervik, Sweden. *Tel:* 0490-88860. *Contact:* Olof Lindroos, Harbour Master.

VISBY: 57.38 N. 18.17 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot stationed at Visby Pilot Station. Pilot boards in Visby Roads and is available between 0600 hrs. and 2200 hrs. 12 hours' notice of ETA is required. Pilot listens out on VHF between 0600 hrs. and 2200 hrs. Tel: (0498) 10138.
ANCHORAGES: Outside harbour, water depth 30 m. to 50 m. Clay bottom. No mooring buoys.

Restrictions: It is forbidden to anchor within the marked area outside Visby port entrance (for limits see chart).

At Hogklint, which is approximately 4 miles South of Visby, there are several sea cables, amongst which is the "Gotland Cable" which supplies Gotland with electricity. Anchoring is not permitted within 300 m. either side of the "Gotland Cable".

RESTRICTIONS: No tide in harbour. Currents outside harbour up to 4 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W. – W., which when strong produces swell along the piers.

Fairway: This passes from the sea between the breakwaters to the oil harbour and is dredged to approximately 9.0 m., permitting vessels with drafts of 7.2 m. to enter.

There are leading lights (4 lights) for entrance into Visby Harbour, also red day markers.

Water Levels: High water level +0.8 m.
Normal high water level +0.5 m.
Normal low water level −0.4 m.
Low water level −0.7 m.

MAX. SIZE: Maximum draft permitted for vessel proceeding to the oil harbour is 7.2 m., to the outer harbour 6.3 m. and to the inner harbour 5.6 m.
TUGS: None available.

BERTHING:

Harbour	*Length* (m.)	*Depth* (m.)	*Remarks*
Outer Harbour			
Ferry Berth No. 6	160	7.0	Ferry berth with fixed 32 m. width ramp. Terminal Building serves both Berths No. 5 and 6.
Ferry Berth No. 5	200	7.0	Same as Berth No. 6.
Outer Oil Quay	60	8.0	3 ton crane for hose lifting. 8 in. hose connections. Capacity 250-300 cu.m.p.h.
Southern Small Boat Harbour	300	2.0	Small boat harbour with 2 bridges. Entry to the West of Fish Harbour.
Inner Harbour			
Outer Part North Breakwater	350	6.0	Ferry Berth No. 3 at quay's inner part (quay length 130 m.) Ro/Ro berth with fixed 20 m. width ramp. Remaining quay length used mainly for timber and pulp loading.
Holmen			
West Quay	220	6.0	Ferry Berth No. 4 with fixed 18 m. ramp. 1×5 ton rail mounted gantry crane, movable along 125 m. of quay length.
Eastern Quay	120	6.0	Fixed electric crane (max. 15 ton). Sawdust loading via nozzle (capacity 120 t.p.h.)
G:a Oil Quay	42	6.0	Quay with support dolphin.
Fishing Harbour	390	3.0	
Inner Part			
Ferry Berth No. 1	110	6.0	Fixed 16 m. wide Ro/Ro ramp.
Ferry Berth No. 2	115	6.0	Fixed 30 m. wide Ro/Ro ramp.
Fish and Small Boat Harbour	240	4.0-3.0	Visitors' Harbour 3 m. deep (approx.)

BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.
TANKERS: See "Berthing".
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegren, Harbour Master.

WALLHAMN: 58.01 N. 11.42 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Tobacco and/or Stores List.
2 Crew Effects Declaration.

PILOTAGE: Pilot boards at Hatteberget. Telegraphic Address "Pilotstation Marstrand", Tel: 0303–60004. VHF Channel 16.

5 hours' notice to be given through Agent.
2 hours' notice to be given by vessel.

ANCHORAGE: As advised by Pilot Station.
MAX. SIZE: Max. draft 10.0 m. Max. length – no restriction. Berth No. 6: Max. draft 5.5 m., max. length 110.0 m.
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
VHF: Wallhamn Harbour Radio – Channel 16.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for Roll-on/Roll-off: (1) 180 m. × 10.8 m. depth. (2) 130 m. × 10.8 m. depth. (3) 160 m. × 8.5 m. depth (4) 240 m. × 8.5 m. depth.

One berth for loading stone products. Length 110 m. Depth 6.0 m.

CRANES: 2 container gantry cranes.
STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FUEL: Most grades of bunker oil available with short notice.
CONSULS: In Gothenburg, 60 km. away.
REPAIRS: Can be arranged.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
REPATRIATION: All facilities available.
AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: Permitted within limits laid down by police.

IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passport should be carried.
GARBAGE DISPOSAL: Service available. Dustbins provided on quay, free of charge when quantities are reasonable.
WASTE OIL DISPOSAL: Service available and provided through port authorities. Free of charge if certain conditions are fulfilled. Contact Port Authority for details.
SEAMAN'S CLUBS: None.
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.10 (9.4.91).
AUTHORITY: Wallhamn Terminal AB, S-440 60 Skarhamn, Sweden. *Tel:* 46-304-60720. *FAX:* 46-304-60977. *Telex:* 2429. *Cables:* Wallhamn. *Contact:* U. Andersson, Agency Manager. C. Frisk, Port Director.
Agency: Fax: 304-60473. Telex: 2308.

YSTAD: 55.26 N. 13.50 E. (See Plan)

DOCUMENTS:
Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.
TRAFFIC WARNING SYSTEM: Vessels approaching Ystad listen on Channel 16 for broadcast announcing ferry departures. All inward bound vessels have to make contact.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Malmo at least 5 hours before pilotage due to commence. Tel: 040-115269 or 040-978315 or VHF (Channel 16), stating tonnage, draft and destination. VHF call sign "Lotsarna" plus name of pilot's station. (Also see "Stockholm".) Pilot boards at Ystad Roads Lightbuoy (Lat. 55° 23.5′ N., Long. 13° 47.5′ E.).
ANCHORAGES: Road: 1.0 nautical mile S.W. harbour entrance, 9 m. - 10 m. depth; sand and clay, good anchorage ground. The road is open to winds from S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t. Depth 7.2 m., max. draft 6.7 m. (22 ft.)
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Malmo pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours (0700 – 2400 hrs.).
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 150 m. length and 20 m. breadth can enter harbour. Max. draft 22 ft. at MWL.
Ro/Ro Berth: Three movable ramps for lorries/goods. Breadth 8 m., 10 m. and 12 m. One railway ferry ramp with a fixed car ramp to upper deck.
CRANES: 2×6 tons (9 ton with double gear), 1×5 ton, 1×3 ton. All cranes are rail-mounted and electric. 1×36 ton mobile crane.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB, Tel: 0411-18080. Working hours Monday – Friday 0700 – 1630 hrs. Meal intervals 0900 – 0930 hrs. and 1200 – 1230 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter. (Tankfarm of 40,000 cu.m.)
DENSITY: Density in harbour is 1006-1010.
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
CONSULS: Danish Consul, Tel: 72840. Finnish Consul, Tel: 18400. Norwegian Consul, Tel: 11635.
REPAIRS: Mechanical workshop.
SURVEYORS: Surveyor appointed by the Swedish National Administration of Shipping and Navigation at the Port Office.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: Tobacco, about 200 cigarettes or 200 gram of tobacco for each member of crew. Spirits, 1 bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and Roll-on/Roll-off ramps.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police, Tel: 13620; Ambulance and Fire, Tel: 90000.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Containers about 7 cu.m. capacity for firm garbage can be placed alongside. The charge will be about SEK 600 (container delivery and emptying included). Call Port Office or agent, for further information.
WASTE OIL DISPOSAL: Sludge can be collected by tank lorry, free of charge. Other kinds of oil contaminated water can be delivered to a 500 cu.m. tank. Charge SEK 75/cu.m. Port Office can supply further information.
SEAMAN'S CLUBS: None.
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.10 (9.4.91).
GENERAL: *Refuse Disposal:*
Contaminated Water: To the reception station at Revhuskajen (max. 500 cu.m.).
Waste Oil: Via a tank-truck (max. 10 cu.m.).
Solid Garbage: Via a motorised container to a refuse dump (max. 12 cu.m.).
AUTHORITY: Ystads Hamn, Hamnkontoret, Hamngatan 18, S-27100 Ystad, Sweden. *Tel:* 0411-77263, 77000. *FAX:* 0411-74950. *Cables:* Southport. *Contact:* Torsti Lehtinen, Harbour Master.

Switzerland

BASLE: 47.33 N. 7.34 E. (See Plan)

PORT LIMITS: A line drawn 50 m. off the shore.
DOCUMENTS:
1 Rhine-Manifest or "T"-Paper.
1 Provisions List.
The respective documents, mentioned in No. 1.10 of the Rhine Shipping Police Regulation have to be on board. Where possible, cargo manifests and stowage plans should be forwarded ahead of the vessel to the local Agent.
PILOTAGE: Holders of a High Rhine Shippers Licence have to Pilot the vessel between Basle and Birsfelden. Such licence-holders can be ordered at Signal-station (VHF Channel 18 or telephone 65 44 00).
ANCHORAGES: Vessels moored at riverside quays have to use anchors.
RESTRICTIONS: Shipping is blocked from high water mark II (gauge Rheinfelden 430 cm. up– resp. 450 cm. downstream of the Middle Bridge at Basle). Other restrictions will be announced by the Port Authority.
MAX. SIZE: Water Depth: 3.50 m.
Air Draft: 5.70 m. to basin II, port of Kleinhuningen; 7.00 m. to all the other port areas of Basle Town; 4.80 m. to 7.00 m. to the ports of Basle Country.
Beam: 11.40 m. to basin II, port of Kleinhuningen and through the locks of Birsfelden.
Length: 110 m. for the section between the Middle Bridge at Basle and the locks of Birsfelden.
VHF: Port Authority on Channel 18 (call: Signalstation). Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
TUGS: Only one private tug/pushboat is available (call: BRAGTANK, Tel: 65 44 22 or from ship to ship on VHF Channel 10: Vogel Gryff). Tug assistance is necessary for the section between Basle and Birsfelden from High Water Mark I (gauge Rheinfelden 350 cm.) for single engine vessels.
BERTHING: Two artificial basins at Kleinhuningen, riverside quays at Kleinhuningen (Klybeckquai), St. John, Birsfelden and Au.
Load/discharge of dry cargo is done by shore equipment.
Also see "Max. Size".
CRANES: 62 shore cranes with lifting capacities up to 2×300 tons.
SPECIALISED CARGO HANDLING FACILITIES: 2 container terminals. No LPG berth.
BRIDGES: Railway bridges across the channel to basin II, port of Kleinhuningen, permit a max. air draft of 5.70 m.
STEVEDORES: Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
MEDICAL: Hospital facilities available.
TANKERS: Tanker piers at Kleinhuningen (Klybeck Quay and Basin I; the last one for oil only), St. John (vegetable oil and stove oil), Birsfelden and Au.
Tankers with dangerous goods (K1 and K2 products) are not allowed to enter the basins. Load/discharge done by vessel's pumps.
FRESH WATER: Good quality potable water available.
FUEL: Diesel oil available.
CONSULS:

Austria
Belgium
Benin
Brazil
Cape Verde
Denmark
Finland
France
Germany
Italy
Jamaica
Luxembourg
Mali
Mexico
Monaco
Netherlands
Norway
Uruguay
Sweden
Spain
Thailand

REPAIRS: Deck and engine repairs are possible as well as those to electric installations and electronic equipment.
DRY DOCKS: No dry dock, no slip.
SURVEYORS: Agents of Surveillance and Classification Societies are nearby.
GANGWAY/DECK WATCHMEN: At least one member of the crew has to stay aboard as watchman.
HATCHES: Opening/closing carried out by ship's crew before arrival or alongside the quay.
CUSTOMS ALLOWANCES: Swiss Regulations apply.
REPATRIATION: Scheduled aircraft connect Basle-Mulhouse Airport daily with most important European airports. Also good railway connections.
AIRPORT: See "Repatriation".
HOLIDAYS: The ports are closed for work on New Year's Day, Carnival (two half days in February or March), Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Emergency services are available through the Port Authority (VHF Channel 18) or direct by telephone:
Ambulance: 144
Police: 117
Fire: 118
TELEPHONES: This service is available aboard ships at the berths for passenger boats by prior arrangement through the Agents.
SERVICES: Oily waste disposal boat available from Monday to Friday 0700 – 1700 hrs.
SHORE LEAVE: Permitted when Immigration and Customs requirements have been satisfied, as long as the crew rejoin the vessel before departure.
IDENTIFICATION CARDS: It is recommended to carry an identification card or a Passport. Shore passes are not issued.
GARBAGE DISPOSAL: Garbage drums and containers placed alongside.
WASTE OIL DISPOSAL: Call Bibo Regio, ship to ship VHF Channel 10.
SEAMAN'S CLUBS: Seemannsclub der Schweiz, Westquaistrasse 30, Basel. Tel: 655818.
CURRENCY: Swiss Franc (SFr.). U.S.$ 1.00 = SFr.1.41 (6.4.91).
REGULATIONS: All the Rhine Shipping Regulations, recommended by the Central Commission for the Navigation on the Rhine, are valid.
AUTHORITY: Rheinschiffahrtsdirektion Basel, P.O.Box CH-4019 Basel, Switzerland. *Tel:* 061-654545. *FAX:* 061-654594. *Telex:* 997130 SBB CH. *Contact:* R. Hardmeier, Director.

NOTES

Syrian Arab Republic

GENERAL

PORT REGULATIONS:

In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63 cm.×126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before Free Pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after Free Pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port Co. and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

	Signals	
Case	*Sound*	*Lights*
(a) Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
(b) Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
(c) Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
(d) Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.

2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.

3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

NOTICE: Vessels proceeding to Syrian ports are required to signal the following to the port radio station when 50 miles from the port of destination.

(a) ETA.
(b) Nationality.
(c) Name.

BANIAS: 35.14 N. 35.56 E. (See Plan)

DOCUMENTS:

5 copies Crew List.
1 copy Vaccination List.
1 copy Stores List.
1 copy Private Stores List.
1 copy Slop Chest.
In case of cargo to be discharged, Original and 2 copies Manifest and 3 copies Bill of Lading.

APPROACHES: Vessels approaching the port should keep to the authorised passage, defined by the following co-ordinates:

(a)	Lat. 35° 13′ 00″ N.,	Long. 35° 42′ 00″ E.
(b)	Lat. 35° 13′ 00″ N.,	Long. 35° 56′ 00″ E.
(c)	Lat. 35° 16′ 00″ N.,	Long. 35° 55′ 24″ E.
(d)	Lat. 35° 16′ 00″ N.,	Long. 35° 40′ 34″ E.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged abaft the accommodation ladder, to within 4 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules is relevant.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 7″ N., Long. 35° 54′ 46″ E. It is important to maintain a listening watch on VHF, Channel 16 or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13′ 25″ N., Long. 35° 57′ 00″ E. and recognised at night by lozenge shaped lights, in order to avoid delays.

Vessels awaiting at anchorage for confirmation or other reasons, will be boarded by Mooring Master within 4 hours after berthing is decided.

MAX. SIZE:

Berth No.	*Draft Winter (ft.)*	*Draft Summer (ft.)*	*Length of Vessel (ft.)*	*Purposes*
2	48	50	900	Discharging Crude Oil
	50	52	925	Loading Crude Oil
3	48	50	900	Discharging Crude Oil
	51	53	925	Loading Crude Oil
4	42	42	750	Loading Heavy Fuel
5	41	43	800	Fuel Oil and White Products
6	32	34	700	Fuel Oil and White Products
7	24	24	700	Liquid Gas
	26	28	700	Jet

Danger Marker: Positioned South of Berth No. 7, Lat. 35° 13′ 03″ N., Long. 35° 56′ 03″ E.

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E.), where the Mooring Master, who is the Company's Representative, will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain Free Pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO/VHF: Syrian Company for Oil Transport, Banias Terminal must be informed 72, 48 and 24 hours prior to arrival of a vessel's ETA, quantity of cargo required if in a state to load and maximum loading rate required. All times to be given in GMT.

Banias Terminal Radio Station – Call sign: "YKM 5". Frequency: 500 kHz and 442 kHz and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications: Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 MHz. Simplex Operation. Call sign: "Banias". On arrival, ship's radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias – Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 MHz. Receiving 159.1 MHz. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station – Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 MHz. Receiving 163.6 MHz. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station Banias Syria
Private station for communication
with tankers bound for Banias, Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias Radio Station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030 (GMT) receives on ship frequencies 425, 454, 468, 480 and 512 kHz –

also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 MHz Band	4351 kHz	0410
05 – 06	8 MHz Band	8667 kHz	0510
08 – 09	6 MHz Band	6493 kHz	0810
09 – 10	12 MHz Band	12987 kHz	0910
12 – 13	8 MHz Band	8667 kHz	1210
13 – 14	16 MHz Band	16967 kHz	1310
16 – 17	16 MHz Band	16967 kHz	1610
17 – 18	6 MHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on 156.8 MHz (Channel 16). This has a range of approximately 40 miles and its call sign is "Banias".

Confirmation of ETA's: It is essential that tankers, bound Banias, communicate with YKM5 at least 48 hours prior to arrival and thereafter maintain contact, stating cargo quantity and grade, maximum loading/discharging rate and pressure at ship's manifold, SWL of derrick capacity, n.r.t. and d.w.t. and actual draft.

Failure to give any notice at least 24 hours prior to arrival will increase the laytime allowed by an amount equal to the difference between 24 hours and the number of hours prior to arrival.

Note 1: YKM5 deals only with TFC. For:
S.C.O.T., Banias
QSJ Nil.

Note 2: YKM5 uses only two frequencies out of HF Schedule until further notice.
0500 – 0600 8667 kHz
0800 – 0900 6493 kHz
1700 – 1800 6493 kHz

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS: For tankers loading/discharging at Banias are as follows:

Forward:
Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Aft:
4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes
To be rigged on either side of ship, and of not less than 4.5 in. circumference.

BERTHING: At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

Berthing Operations: Berthing Operations will take place:

(a) Loading/discharging crude oil and products: Only between 0700 hrs. and 1600 hrs. local time in Winter and between 0600 hrs. and 1800 hrs. local time in Summer, SHinc and weather permitting.

(b) Loading/Discharging Products: According to "Mahroukat" and "Banias Refinery" instructions.

HOSES:
Berth No. 2: 2×20 in./16 in. hoses.
Berth No. 3: 2×20 in./16 in. hoses.
Berth No. 4: 2×20 in. hoses with 12 in. butterfly valve.
} End in 12 in. reducers

Berths No. 5 and 6: 2 submarine pipes of 24 in. each connected with 2 strings of 7 hoses by 16 in. each ended with 12 in. reducers and butterfly valve.

Berth No. 7: One liquid gas line of 10 in. connected with 1 string of hoses by 8 in. ending with butterfly valve and Camlock.

One balance line of 6 in. connected with 1 string of 7 hoses by 4 in. ending with butterfly valve and Camlock.

One kerosene line of 20 in. conncted with 1 string of 7 hoses by 12 in. ending with 12 in. butterfly valve for 150 ASA flange.

SWL of Derricks:
Berths No. 2, 3, 4, 5 and 6: Minimum 7.5 tons.
Berth No. 7: Minimum 3 tons for LPG and 5 tons for jet.

BALLAST: Banias Terminal accepts tankers with non-segregated ballast when the discharging time of this ballast does not exceed 6 hours from Notice of Readiness tendered (N.O.R.) to the Mooring Master.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the Official Committee in the future.

In the light of the above and to avoid any delay to vessels, Owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

LOADING: Ships' Personnel are solely responsible for the loading operation, i.e. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to the shore control. It is in vessel's interest to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading. Order to start will be taken as final.

The Mooring Master must be advised when ship estimates 1,000 tons to go for completion of loading.

Ensure scuppers are effectively plugged. On no account are plugs to be removed.

A complete watch on deck must be maintained throughout the operation, especially towards the shore signal station, to ensure safe loading and avoid delays.

Discharging pressure which should be maintained during the operation at ship's manifold is to be according to Terminal Requirements which will be handed over to the Master at each call of vessel.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

TANKERS: See "Hoses". Slops (residue) are not allowed to be discharged as no facilities for treating same are available.

FRESH WATER: Available through Agents by means of barges, cost U.S.$10.00 per ton.

FUEL: Bunkers are not available at Banias.

SURVEYORS: Through Agents – Shipco.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Usual local facilities.

CURRENCY: Syrian Pound. U.S.$ 1.00 = Syrian Pound 1.42 (11.4.91).

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in Berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, Etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Boarding: The boarding of a vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Syrian Company of Oil Transport (SCOT) on application to ship's Agents and authorised chandlers.

This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

DELAYS: Confirmation, restricted berthing hours, unsuitable weather and free berths.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

AUTHORITY: Syrian Company for Oil Transport (S.C.O.T.), P.O.Box 13, Banias (Tartous), Syrian Arab Republic. *Tel:* 06963-421-22300/1/2/3. *Telex:* Scot 441012 Sy. *Cables:* Scot, Banias. *Contact:* Terminal Superintendent in charge.

BORJ ISLAM: 35.40 N. 35.48 E. (See Plan)

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40′ N. Long. 35° 47′ 35″ E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promontory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGES: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the South or S.W. and West or N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks.

The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
Stores List.
Passengers List.
Health Certificates and International Inoculation Certificates.
All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognised flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag (letter "H").

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised of proper directions to follow and when he is to lower the pilot ladder to the lee side, by the Pilot.

Traffic List: Broadcast twice daily on VHF Channel 16:

Meeting takes place at 1100 hrs.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a depth of 20 m. – 25 m., and all Masters waiting there have to keep listening on VHF Channel 16, from 0600 until 2200 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point outside the breakwater.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Derat Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free Pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kHz or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio" and "Pilotage".

TUGS: 16 tugs up to 1,100 h.p. Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length* (m.)	*Depth* (ft.)	*Remarks*
Khahaleh Quay	600	31	28 ft. 6 in. at the root.
Silo Quay	185	25	27 ft. 6 in. at the root.
Passenger Quay	240*	22 – 31	
*East Division	55	—	21 ft. at the root.
*West Division	185	—	25 ft. at the root.
Eastern Quay	270	22	
Northern Quay	276	13	
Others	530	—	For Port Services.

None of these quays is a specialised one. Cargo is loaded or discharged either by the ship's gear or Port Co. cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

CRANES: Electric quay cranes: 16×3-6 tons (18×6-16 tons electric cranes will be available on the extension in 1990 – see "Developments"). Mobile cranes: 58×3-12 tons, 4×15 tons, 6×70 tons. Floating cranes: 1×100 tons, 1×32 tons. Forklifts: 2×30 tons (containers), 92×2-6 tons, 4×8 tons. Straddle carriers: 4×32 tons.

2 floating cranes, 100 ton and 32 ton.

BULK CARGO FACILITIES: *Grain Silos:* In the silo, there are 72 storage bins, the capacity of each is 45,000 tons of grain in which operations of sieving, fumigation, drying and filling can be carried out.

Grain is shipped automatically onboard vessels at a rate of 150 t.p.h. This rate can be doubled when the repairs are completed. Grain is discharged ex-vessels by sucking devices, the total capacity of which reaches 200 t.p.h. A study is being carried out to provide grain silos with automatic intake equipment and to develop the silos quay.

STEVEDORES: 24 hours' ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: 1033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge (capacity 170 tons).

FUEL: All types of marine fuels are available, may be delivered in any quantity from tank trucks alongside quay. 48 hours' notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open Roads.

CONSULS: Sweden, Finland, Netherlands, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyd's, German Lloyd and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCES: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Two floating cranes are available – one of 100 tons capacity and the other of 32 tons. Both may be used at the entire discretion of the Lattakia Port Company. Also one mobile crane of 25 tons capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours.

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police Tel. No. 93; Ambulance Tel. No. 93; Fire Tel. No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore to visit the city with shore passes issued by the Police Authorities in the port.

IDENTIFICATION CARDS: Shore passes in addition to the Seaman's Book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage underway and it will cover the following new facilities:

Specialised container and Ro/Ro quays.

	Length	*Draft*
Containers	260 m.	13.3 m
Containers	190 m.	11.8 m.
Ro/Ro.	200 m.	11.8 m.
General Cargo	350 m.	11.8 m.
General Cargo	425 m.	10.5 m.
General Cargo	450 m.	7.0 m.

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

In its planning, the Company has provided for the import of equipment and machinery in a way that meets the needs of the enlarged area. Same will be supplied in accordance with fixed time schedules corresponding to the progress of execution.

There have been calls for tenders for the supply of the following equipment:

16 mobile quay cranes of 6 tons capacity (contract presently being negotiated).

2 mobile quay cranes of 16 tons capacity (contract presently being negotiated).

2 tug boats 1,500 tons (under contract).

3 passenger boats, each can accommodate 15 passengers (under contract).

Gantry cranes 45 tons capacity (under contract).

10 forklift trucks 10 tons capacity (under contract).

2 forklift trucks 30 tons – 35 tons capacity (under contract).

4 straddle carriers (under contract).

A call for tender for the supply of the following equipment is presently being prepared:

Diesel mobile crane 10 tons capacity.

A pilot boat.

VHF station and equipment.

SHIPMASTER'S REPORT: December 1979.
Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Load line and Radio Certificates.
Pilotage: Compulsory. Pilot boards in the Roads. Normal ETAs required.
Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.
Restrictions: Vessel may enter and leave at any stage of the tide; day or night.
Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft. required.
Health: Vessel anchors on arrival. Free Pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.
Radio: Lattakia Radio or Banias Radio.
VHF: Pilot and Port Authority on Channel 16.
Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.
Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. size (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in. The least depth of water in the channel from sea to the berth is 30 ft. Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.
Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay. There are 2 floating cranes, 1 of 35 tons capacity and the other 100 tons capacity.

There is limited storage space for containers, however this is to be increased. There is equipment for handling 20 ft. and 40 ft. containers.
Facilities: The following are available: Fresh water (poor quality), fresh provisions (poor quality), minor repairs, airport (at Damascus 340 km.), Lloyd's Surveyor (Agency), Salvage Surveyor (Agency), ship's laundry (good but expensive), bunker fuel oil and diesel oil (by truck), doctor and hospital, groceries and meats.
Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

SHIPMASTER'S REPORT: January 1982.
Approaches to Lattakia: The entrance to Lattakia Harbour is well defined but vessels must approach the Green Buoy near breakwater with extreme caution. A wreck is located in position: Lat. 35° 32′ N., Long. 35° 43′ E., approximately on a bearing of 275° – 1.8 miles from the Green Buoy. A wide berth must be given on entry to Lattakia to this wreck (m.v. "Bravo Neck") with full load of cargo.

The harbour is generally congested and a long delay, at outer anchorage must be anticipated. It is advisable for ships to register in advance if this is feasible, to avoid delay. The outer anchorage does not afford good holding ground and during near gale force winds ships are liable to drag anchor.

A traffic list is generally broadcast on VHF Channel 16 at 0600 hrs. and 1800 hrs. daily.

Logistic supplies are poor and water is a difficult commodity to obtain. Ships are advised to top up with water and fuel before arrival at Lattakia.

A prominent land mark (whitish hotel) is visible approximately 1 mile West of Rasibin Hani Light.

AUTHORITY: Lattakia General Port Company, P.O.Box 220, Baghdad Street, Lattakia, Syrian Arab Republic. *Tel:* 23900/1/2/3/6. *Telex:* 451008 Lapoco Sy. *Cables:* Latakia Port. *Contact:* Madhat Abul Shamlat, General Manager.

TARTOUS: 34.53 N. 35.45 E. (See Plan)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Stores List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Derat Certificate – Valid certificate required and no extension can be obtained.

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N., Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N., Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N., Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N., Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N., Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N., Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

RESTRICTIONS: *Terminal Regulations:* All tankers must be equipped with S.B.T., I.G.S. and C.O.W. and not be more than 20 years old.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: *Confirmation of ETA:* Before arriving at Tartous terminal, tankers must inform Tartous Control (T.T.C.) of their ETA, 72 hours and 24 hours in advance, stating: Discharging port and quantity of cargo required. Also must make contact with T.T.C. at least 2 hours before ETA at Tartous anchorage area to receive loading instructions.
Procedures for Coast Station Communication: All times in GMT.

1. After general call on 500 kHz, terminal broadcasts traffic lists on 479 kHz at 0730, 1130, 1430 and 2030 hrs., and keeps watch on 500 kHz from 0500 hrs. till 2130 hours. Answers on 479 kHz.

2. After general call, transmits its traffic lists simultaneously on 8472 and 12699 kHz at 0830, 1330 and 1930 hrs.

Keeps watch on the 8354 – 8374 kHz band from 1100 – 1130 hrs.
from 1500 – 1530 hrs.
from 1800 – 1830 hrs.

And answers simultaneously on 8472 and 12699 kHz.

3. Keeps watch on Channel 16 for 24 hours.

4. Keeps watch, calls and replies on 2182 kHz from 1100 – 1130 hrs.
from 1430 – 1500 hrs.

5.Land station charge free for motor tankers.

Tartous Terminal Station, Lat. 34° 57′ N., Long. 35° 52′ E.:
FC YKI 500 A1 600 watt. Hours 0700 – 2300 hrs.
479 A2
427 A2
8472 A1
12699 A1

BERTHING: Mooring Masters are temporarily supplied by Lattakia Port and vessels should therefore contact Agents at Lattakia giving them their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 m. – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 m. – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 m. – 4 m., 300 m. with 8 m. and 200 m. with 9 m. to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

POLLUTION: See "Banias".

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 280 m.

Maximum safe draft of tankers acceptable – 52 ft.

Maximum deadweight of tankers acceptable – 35,000 – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	1×28 in.	2×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. connections.
Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 56′ 42″ N., Long. 35° 49′ 30″ where the Mooring Master, who is Company's representative, will board and receive vessel and remain on board throughout the entire operation.
Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.
Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.
Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.
Boat Ropes: To be rigged on either side and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in all operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible Ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in Case of Emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each
on whistle or siren supplemented by a continuous ringing
of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a) Lat. 34° 59′ 00″ N., Long. 35° 50′ 00″ E.
(b) Lat. 34° 59′ 00″ N., Long. 35° 52′ 36″ E.
(c) Lat. 34° 56′ 24″ N., Long. 35° 38′ 36″ E.
(d) Lat. 34° 56′ 24″ N., Long. 35° 38′ 00″ E.
(e) Lat. 34° 54′ 24″ N., Long. 35° 37′ 48″ E.
(f) Lat. 34° 54′ 24″ N., Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. One shiploader, rate 1,000 t.p.h.

A dry dock will soon be under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Papers Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provisions List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54′ 24″ N. and 34° 56′ 24″ N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The pilot station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the pilot station on Channel 16, possibly in the evening before berthing, or in the morning about half an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing Southwesterly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administration, *Telex:* 20562.

Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 52, Tartous, Syrian Arab Republic. *Tel:* 22840, 22841 and 22843. *Telex:* 470002 SY. *Cables:* Petsyria - Tartous. *Contact:* S. Mualla, Terminal Superintendent.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: Cambodia, The People's Republic of China, Albania, Rumania, Cuba, Vietnam and the C.I.S. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:
(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.
(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan)

PORT LIMITS:
(A) Lat. 23° 56′ 28″ N., Long. 121° 36′ 13″ E.
(B) Lat. 23° 56′ 29″ N., Long. 121° 36′ 48″ E.
(C) Lat. 24° 00′ 20″ N., Long. 121° 38′ 45″ E.
(D) Lat. 24° 00′ 47″ N., Long. 121° 38′ 18.1″ E.

DOCUMENTS:
Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

Certificates:
Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:		
	(A) Lat. 23° 57′ 25.5″ N.,	Long. 121° 36′ 15.5″ E.
	(B) Lat. 23° 57′ 18″ N.	Long. 121° 36′ 33.5″ E.
	(C) Lat. 23° 57′ 53.3″ N.	Long. 121° 36′ 52.5″ E.
	(D) Lat. 23° 58′ 01″ N.	Long. 121° 36′ 34.1″ E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 12.0 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. If the vessel receiving a notice of Radio Pratique can take up a berth; it need not hoist "Q" flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 4 tugs, 1×2,400 h.p., 1×1,600 h.p., 1×1,320 h.p. and 1×3,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (20 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000 2×30,000 and 2×60,000 ton vessels at the same time.

Berth No.	*Length* (m.)	*Max. Draft* (m.)	*Remarks*
1	123	7.5	General Cargo
2	153	7.5	General Cargo
3	134	7.5	General Cargo
4	160	9.5	Sugar
5	160	9.5	Gravel
6	160	8.5	General Cargo
7	120	6.5	Gravel
8	220	10.0	Gravel
9	103	9.5	—
10	183	9.5	Cement Clinker
11	185	9.5	Minerals
12	150	7.5	Construction Ship use
13	185	9.5	Logs and Woodchips
14	185	9.5	Logs and Woodchips
15	100	9.5	Logs and Woodchips
16	144	7.5	Not in use at present
17	200	10.5	Open yard
18	200	10.5	Open yard
19	300	14.0	Cement
20	300	14.0	General Cargo

CRANES: There are mobile cranes: 1×45 tons, 2×25 tons and 1×2 tons. There are 25 fork lift trucks (with 2 tons – 20 tons lifting capacity) and 10 mini-tractors.

BULK CARGO FACILITIES: At Berths No. 5, 7 and 8 there is a conveyor system for loading gravel. At Berth No. 10 two cement silos (12,000 tons) with a conveyor system owned by Asia Cement Co., for loading bulk cement and Kiln Fresh Cement Clinker. At Berth No. 11 there is a conveyor system owned by China Steel Corp. for loading dolomite and crystalline limestone.

There are 21 single rope hook-on type grabs; 4 grabs at Berth No. 15 owned by Chung Hwa Pulp and Paper Corp. for discharging woodchips into trucks, 7 grabs at Berth No. 18 owned by Asia Cement Co., for discharging coal and 22 grabs belonging to Hualien Harbour Bureau for discharging gypsum, coal, metal and ores, etc. into trucks.

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

There are 4 hoppers at Berths No. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Daytime Work: 0800 – 1700 hrs. (0800 – 1730 hrs. in Summer).

Night Work: After completion of 8 hours daytime work till 24 hours.

Morning Work: 0600 – 0800 hrs.

General Cargo: 200-250 tons per day with only 1 gang.

Bulk: Cement loader at Berth No. 10 can load 600 t.p.h. Dolomite elevator at Berth No. 11 can load 1,200 – 1,500 t.p.h. Gravel elevators at Berth Nos. 5, 7 and 8 can load 500 t.p.h. each. Coal, ores, gypsum etc. grab buckets can unload 80 t.p.h. with only 1 gang.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent. Rate 30 t.p.h.

FUEL: 6 grades obtainable from Chinese Petroleum Corporation:
1. Marine Gas Oil: SUS at 100°F, max. 38.
2. Marine Diesel Oil: SUS at 100°F, 35 – 45.
3. MF-80 (MD-600) C.S. at 122°F, max. 80 (RD No. 1, 100°F, max. 600).
4. MF-280 (MD-2700) C.S. at 122°F, max. 280 (RD No. 1, 100°F max. 2700).
5. MF-380 (MD-4000) C.S. at 122°F, max. 380 (RD No. 1, 100°F max. 4000).
6. Bunker C: SFS at 122°F, max. 200, C.S. at 122°F, max. 400.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CARGO GEAR: Loading/unloading normally effected by ship's gear.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's Book required.

GARBAGE DISPOSAL: Garbage collection service is available. This service is provided by the Port Authority. The garbage truck goes around the wharves at 0900 hrs. to collect garbage. Charges per day as follows:

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of 15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: Not available at present.

SEAMAN'S CLUBS: Hualien Harbour Seamen's Club, Tel: 224633/223171. Facilities include postage and telephone service, food and beverages, foreign exchange, tourist information and recreation room. Open Monday to Saturday 0900 – 1200 hrs. and 1300 – 1800 hrs.

CURRENCY: New Taiwan Dollars (NT$). U.S.$ 1.00 = NT$ 27.41 (27.4.91).

DEVELOPMENTS: The outer harbour extension underway. The project will increase the berthing capacity to 25 ship berths.

AUTHORITY: Hualien Harbour Bureau, Hualien, Taiwan, Republic of China. *Tel:* 038-325131. *Telex:* 3609. *FAX:* 038-333757. *Contact:* Yung-Piao Lee, Director. Lee Chao-Min, Harbour Master.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cable: "Jarocean Taipei". Fax: (02) 3413168, 3920435, 3931160.

Associated with Jardine Shipping Agencies.

KAOHSIUNG: 22.37 N. 120.16 E. (See Plan)

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern Anchorage: Within 2 miles radius off Kaohsiung Lighthouse (Lat. 22° 37′ 01″ N., Long. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.

2. Southern Anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (Lat. 22° 33′ 21″ N., Long. 120° 18′ 28″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.

3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. SBM No. 2 position Lat. 22° 29′ 45″ N., Long. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the No. 2 SBM as directed by Agents.

DOCUMENTS:

10 copies Crew List.
1 copy Crew Effects Declaration (include cameras, radio, etc.).
1 copy Passenger List.
1 copy Stores List (including provisions, engine, deck and bonded stores).
1 copy *Arms and Ammunition List.
1 copy *Foreign Currency List (Ship's Money List and Private Currency List).
1 copy *Narcotics List.
2 copies Import Cargo Manifest.
1 copy Through Cargo Manifest.
1 copy List of Ports of Call.
1 copy Mail List.
1 copy †Parcels List (parcels to be landed).
1 copy †Parcels List (through parcels).
1 copy Specimen signature of Master, Chief Engineer and Chief Officer.

* These items are to be sealed upon arrival.
† Articles on these 2 lists may be sealed upon arrival as warranted by conditions.

Also see "Certificates".

Advise agent by telex prior to arrival full crew list, giving name, nationality, date of birth, Discharge Book number and Passport number.

APPROACHES: The First Harbour Entrance is dredged to 11 m. MLWS. The Second Harbour Entrance, dredged to 16 m., can accommodate vessels up to 100,000 d.w.t.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Container ships over 15,000 g.r.t. and other freighters or tankers over 15,000 g.r.t and 200 m. LOA must take 2 Pilots at double pilotage.

ANCHORAGES: To avoid being charged double pilotage fees, arriving vessels should anchor within a 2 miles radius of Chihoushan Lighthouse (Lat. 22° 38′ N., Long. 120° 15.4′ E.) unless instructed to wait off the Second Harbour Entrance, in which case they should anchor within a 2.5 mile radius of the Second Harbour Entrance Signal Station (Lat. 22° 33.4′ N., Long. 120° 18.4′ E.). The holding ground at both anchorages is good, and they are sheltered from the worst of the N.E. monsoon winds in Winter. Vessels may have to vacate the anchorages and proceed to sea should a typhoon approach.

Tankers arriving at the SBM terminals should anchor 1.5 miles West of the Buoy No. 2 to await arrival clearance, quarantine, Immigration, Agent and Cargo Supervisor who will board by Agent's launch. CPC Pilot, Loading Master and Watchmen will board by CPC tug. After discharge, the vessel should proceed to the Northern Anchorage to await clearance for sailing.

Also see "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. if not through the Second Harbour Entrance, must await high water to enter via the First Harbour Entrance.

MAX. SIZE: Length and breadth no restriction (largest container ship entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 52 ft. during high tide. Tankers with draft over 50 ft. (2 ft. keel clearance) discharge at Monobuoy outside.

HEALTH: Free Pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. Radio Pratique available (see "Keelung"). No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents when cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 1 hour before arrival to report ETA at Kaohsiung Roads.

Also see "Documents".

TUGS: Harbour tugs usually join vessel after entry and while berthing. Ship's lines always used. 20 tugs, 300 h.p. – 3,300 h.p. available.

BERTHING: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. via the First Harbour Entrance, must berth during high tide.

*Length of each berth. †Total length.

Wharves: There are at present 87 wharves with a total length of 18,900 m. and 27 mooring buoys capable of accommodating 129 ships.

CRANES: 39 mobile cranes × 15-80 tonnes capacity, 14 stationary derricks, 41 tractors, 117 towing tractors, 271 forklifts, 18 container gantries, 2 P&H container gantries, 21 straddle carriers, 19 container tractors, 2 railtainers, 8 transtainers, 84 grab buckets, 60 hoppers and 1,381 small trailers. The CSBC shipyard has 2×350 ton cranes.

4 floating cranes (30 ton, 60 ton, 100 ton and 200 ton), other floating equipment includes 5 dredgers, 5 mud barges, 17 barges and 70 small craft of various descriptions.

BULK HANDLING FACILITIES: *Coal:* China Steel Berth: Max. Size 130,000 d.w.t. Max. LOA 320 m. Max. Draft 14 m. 2 cranes, 2 grabs and conveyors. Daily rate 10,000 tonnes.

Berths No. 52 – 57: Max. LOA 200m. Max. Draft 10.5 m. Discharge by grabs and ship's gear. Rate 3,500 tonnes per day.

Grain: There are 3 silos, 2×40,000 tons capacity and 1×80,000 tons capacity, unloading rate 300 – 500 t.p.h. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40 – 50 tons per gang/hour.

CONTAINER HANDLING FACILITIES: No. 1 – total length 848 m. consists of 4 berths, Nos. 40 – 43. Berths No. 42 – 43 served by 3 gantry cranes with capacity 30-35 tonnes. 5 straddle-carriers available for 20 ft. – 40 ft. containers. Storage yard of 10 hectares for 2,500 containers (TEU).

No. 2 – Includes 4 berths total length 1,025 m., Nos. 63 – 66. Berths No. 64 – 66 are leased to lines for exclusive use. Berth No. 63 is the only common user berth. Container handling equipment includes 8 gantry cranes with capacity 30-35 tonnes and 16 straddle-carriers for handling 20 ft. – 40 ft. containers. Storage yard of 45 hectares for 12,000 containers (TEU).

No. 3 – Includes 3 berths, Nos. 68 – 70, with total length of 960 m. and a depth of 14 m. The terminal has 9 container cranes with capacity 40 tonnes, 5 transtainers and a 60 hectares container yard for 17,000 containers (TEU).

No. 4 Container Terminal No. 4 is located at Chung-Hsing Commercial Harbour Area. The project is to build 7 deepwater container wharves from No. 116 to No. 122 with a total quay length of 2,280 m. The 92 hectare container yard is capable of storing 32,000 containers (TEU). The first Berth No. 116, completed in February 1985, has 320 m. length, 14 m. depth and 4,900 container (TEU) capacity. Its container handling equipment includes 3×40 tonnes container cranes and 3 transtainers for handling 20 ft. – 40 ft. containers. Berth No. 117 is equipped with 2×40 tonne capacity gantry cranes, 4×35 ton transtainers and 1×15 tonne forklift. Berths No. 118 and 119 are equipped with 3×40 tonnes capacity gantry cranes and 3×40 tonne transtainers. Berths No. 120 – 122 (each 320 m.) will be completed by late 1991.

STEVEDORES: All Government stevedores ordered by Agents as required.

Cargo Working Hours:

General Cargo:
0800 – 1200
1230 – 1800
1830 – 2400 (1600 – 2400 plus 100%)
0030 – 0700 (plus 150%) { Night shifts only by special arrangement with Harbour Bureau and cargo receivers.

Containers:
0800 – 1200
1230 – 1800
1830 – 2400
0300 – 0700

N.B.: For quick despatch, relief gangs can be hired to work through meal breaks.

Port Performance:

Containers: 25 crane moves per hour.
General: 35 CBM/gang/hour or 420 tons/gang/day.
Bulk (except at special berths): 50 tons/gang/hour.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against cholera inoculation (6 months) required. See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are 3 Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 66 ft. and can accommodate tankers up to 250,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – Lat. 22° 29′ 45″ N. Long. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCCs programmed to use the SBM Terminal are required to anchor 1.5 miles West of the No. 2 SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this area from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

SBM No. 3: Max. size 300,000 d.w.t., depth 105 ft. Also see "Shipmaster's Report" dated August 1992.

Petrochemical Storage Centre – Berth No. 61: Max. LOA 232 m. (225 m. preferred) Max. Draft 10.0 m. The berth is being extended and is soon to be equipped with 4 new Chicksans.

LPG: At Talinpu at Southern entrance to Kaohsiung Harbour.

LOA – Maximum 250 m., minimum 130 m. Chicksan flange 23.0 m. above LWL. Liquid line 16 in. Vapour line 8 in. Max. Depth 14.0 m. Discharge rate up to 2,000 kl.p.h. Tank capacity: (C3) 30,000 kl, (C4) 30,000 kl.

Berth	*Shore Lines (in.)*	*Hoses (in.)*	*Grades Handled*	*Max. p.s.i.*	*Rate t.p.h.*
18 – 20	4 – 16	4 – 8	Asphalt, FO, DO, Avgas, JP4, JP5	100	700
60 – 62	4 – 10	4 – 8	Petrochemicals, LPG, liquid NH_3	100	680
Talin E, W	10 – 24	8 – 12	Crude, FO, DO, Naphtha, JP4, JP5	100	3,000
SBM No. 1	1×34	2×12	Crude	100	5,000
SBM No. 2	1×42	2×12	Crude	100	7,000

N.B.: At SBM derricks/cranes of 10 tons SWL required. There are no tank cleaning or ballast disposal facilities.

Also see "Shipmaster's Report" dated April 1990.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge (500 tonnes – 100 tonnes capacity) paying additional lighterage. Advise agent 24 hours in advance by telex of vessel's requirements.

FUEL: All grades, mostly received from 3 barges (capacity 500 tonnes each). Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding Corp. provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390 180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

SURVEYORS: S.G.S., Tel: (07) 561-1281. BV in Taipei, Tel: (02) 731-4218.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's Registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy, I.O.P.P. and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCES: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: Cargo Gear Certificate must be valid.

REPATRIATION: Crew changes can be arranged.

AIRPORT: Kaohsiung Airport has frequent scheduled flights to major cities in Taiwan as well as regular international flights to Hong Kong, Singapore and Japan. For other international destinations, travellers must use C.K.S. International Airport which can be reached by motorway (3.5 – 4 hours) or via Taipei by domestic flight (40 minutes) and motorway (40 minutes).

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: New Year's Day (Jan. 1st – 2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 5612311 Ext. 441 or 2613000 Ext. 2717; Fire: 5612311 Ext. 443 or 2613000 Ext. 2731.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHIP SUPPLY SERVICE: Off-limits deliveries can be arranged, although they are the exception rather than the norm.

SHORE LEAVE: Normally can be arranged.

IDENTIFICATION CARDS: Shore passes are issued and must be returned prior to departure.

GARBAGE DISPOSAL: A collection service is available. PVC garbage bags are provided on board. Ordinary collecting time is from 0800 - 1200 hrs. on weekdays (Monday through Saturday). Any ship in port requiring immediate collection service should either call the following telephone numbers: 5519620, 5622104 and hoist the "CD8" flag, or communicate through her agent with the harbour section of the Kaohsiung Harbour Bureau.

Charges: Every vessel whether moored at wharfs, buoys or in the anchorage, shall be charged as hereunder stipulated for harbour cleaning maintenance during its stay, commencing at anchorage until departure from harbour.

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: A collection service is not yet available.

SEAMAN'S CLUBS: Seamen's Club Kaohsiung, 30 Peng Lai Road, Kaohsiung, Taiwan, R.O.C. Tel: 07-521-5400. Services available include general information service, postage stamps, foreign exchange, rooms for reading and recreation including bridge games, billiards and MTV, and field tours can be arranged. The Club also offers beer, cigarettes, beverages in the music room, as well as all kinds of local souvenirs.

CURRENCY: New Taiwan Dollar (NT$). U.S.$ 1.00 = NT$ 27.47 (23.4.91). NT$ 8,000 may be brought in or taken out of the ROC. Unlimited foreign currency may be brought in and if declared on arrival, may be taken out. Without a declaration, not more than U.S.$ 5,000 in cash or the equivalent in any other foreign currency may be taken out.

REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. For vessels, having dangerous cargo on board, and super ore carrier (beyond Panama Max.) desiring of docking at China Steel Corporation's Berth No. 97, between sunrise and sunset only. Vessels flying flag of nations without diplomatic relations with the Republic of China must send 1 copy each of ship's photo (4 in.×6 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit. The application must be made 1 week before their arrival.

DELAYS: With rapid extension of the harbour and more new wharves and container terminals built, delay has been considerably reduced and very rarely occurs.

DEVELOPMENTS: An 80,000 ton silo will be built at the rear of Berth No. 72, which, includes continuous mechanical unloaders, take-in and take-out conveying systems, truck-loading device and railway car-loading device.

Construction of Container Terminal No. 5 due for completion in 1997. Terminal will have a length of 2,320 m., providing 3 berths with 16.0 m. depth and 4 berths with 14.0 m. depth.

SHIPMASTER'S REPORT: June 1983 (updated 1986).

Pilotage: Normal pilotage fees are charged from sunrise to sunset; a 50% surcharge is levied from sunset to 2400 hrs., and from 0500 hrs. to sunrise, and 100% surcharge from 2400 hrs. to 0500 hrs. If the Pilot(s) is/are embarked 2 miles or more from the breakwater at the First Harbour Entrance the above charges are doubled.

Immigration: Immigration Officials board with the Pilot/s off the First Harbour Entrance, and will join at any time between 0800 hrs. and 1800 hrs. Between 1800 hrs. and 2400 hrs. they only leave their office on the odd hour, and between 2400 hrs. and 0800 hrs. they only leave on the even hour. Time from leaving office to boarding is approximately 30 minutes.

SHIPMASTER'S REPORT: April 1990.

Berth No. 61:

Operator: CPC.

Max. draft 10.36 m.

Berth either side alongside.

LPG and petrochemicals handled.

LPG arms are 21 m. above water.

Maximum manifold pressure 7 bar.

Maximum ship's tank pressure 0.04 bar.

Cargo temperature required: Propane −42° C. Butane −4° C.

Butane liquid 10 in. Propane liquid 12 in. Vapour for both products 8 in.

Arrangement of arms: Vapour, Liquid, Liquid, Vapour.

VCM liquid 6 in. VCM vapour 4 in.

Berthing and unberthing from sunrise to sunset only.

Berth No. 104:

Operator: CPC.

Max. draft 14.50 m.

Berth port side to.

LPG and oil handled.

1×16 in. arm for liquid, 1×8 in. arm for vapour. Liquid arm is aft of vapour arm.

Cargo temperatures required: Propane −41° C. Butane −3° C.

All communication with the shore is by boat. No ship's personnel allowed through terminal.

Stores, etc., taken from boat during discharge.

Berthing and unberthing from sunrise to sunset only.

Berth No. 25:

Anhydrous ammonia discharged at this berth.

1×8 in. arm for liquid and 1×4 in. arm for vapour.

SHIPMASTER'S REPORT: August 1992.

SBM No. 3: Operator: China Petroleum Company.

Anchorage is West to W.N.W. of SBM No. 2. Upon anchoring, report time of arrival to Kaohsiung Port Control on VHF Channel 16, the time being required by the Agent for Inward Clearance. Pilots are arranged by the Agent, and vessel is informed of boarding time by Agent. No amount of calling on the VHF will get any response.

Pilot boards from a tug together with Surveyors, Mooring Master and hose handling gang, who also assist with mooring to the SBM.

Mooring is only undertaken in daylight hours. The latest time for a Pilot to board and be underway is 1700 hrs.

Unmooring is carried out at any time day or night.

Agent will board at the SBM with Customs, and requires a Crew List to be faxed to them at least a week before arrival for preparation of passes.

Shore leave is dependent on the frequency of the Ferry boat, about two a day.

A tug is normally moored aft whilst at the SBM, but is only done if a tug is available, and weather conditions merit it.

The area is fairly sheltered, but a heavy swell can affect the area, when there is bad weather in the China Sea.

Upon departure, report time to Kaohsiung Port Control.

AUTHORITY: Kaohsiung Harbour Bureau, 62 Lin Hai 2nd Road, Kaohsiung, Taiwan. *Tel:* (07) 561-2311, Ext. 200, 551-3445. *Telex:* 71219 KHB. *FAX:* 07-561-1694. *Contact:* Admiral C. Y. Yuan, Harbour Director. S. I. Ma, Deputy Harbour Director. M. W. Chen, Harbour Master.

AGENT: Jardine, Matheson & Co., Ltd., 5th Floor, No. 21, Cathay Foremost Tower, Chung Hwa 3rd Road, Kaohsiung. Tel: (07) 231-7141. Telex: 81957 Jardines. FAX: (07) 201-5492.

Associated with Jardines Shipping Agencies.

KEELUNG: 25.09 N. 121.44 E. (See Plan)

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Port Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack of adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.

LOCATION: Exact position of Port – Lat. 25° 09′ 26.5″ N., Long. 121° 44′ 22.5″ E.

DOCUMENTS:

Ship's Registry.

International Load Line Certificate.

International Safety Certificates.

Cargo Ships: Safety Equipment, Safety Construction, Safety Radio Telegraphy.

Passenger Ships: Passenger Safety.

Last Port Clearance.

Crew List.

Fumigation Certificate.

Import Manifests.

Through Cargo List.

Stores List.

Arms and Ammunition List.

Narcotics List.

Foreign Currency List.

Parcel List.

Passenger List.

Yellowbook for every person on board (Vaccination Certificate).

Shipmaster's Report: November 1988.

Customs:

1 Arms and Ammunition List.

1 Foreign Currency List.

1 Narcotics List (will be sealed).

1 Parcels List.

1 Crew List.

1 Mail List.

1 Passenger List.

2 Import Cargo Manifests.

1 Through Cargo Manifest.

1 Crew Personal Effects List.

1 List of Signatures.

Agent:	All Certificates (originals). Last Port Clearance.
Quarantine:	1 Maritime Declaration of Health. 1 Crew List.
Immigration:	2 Crew Lists. Shore Passes (obligatory).

HARBOUR APPROACHES: At a location of 1.5 nautical miles N.N.W. from Keelung Isle ships should take Wan Jen Tsui Pi lighthouse and Chiu Tzu Shan lighthouse as coordinates and sail in on course of true bearing 201°. When 2 nautical miles North from harbour entrance, ship's course should be adjusted for entry. Ships should allow adjustment for their planned course and speed and should pay special attention to Hsin Lai Reef, East Breakwater, wind and current.

PILOTAGE: Compulsory from anchorage to dock and any other movements in port. Pilot may also meet ships within 1 or 2 nautical miles North of breakwaters, commencing sunrise till sunset upon ship's/Agent's request. While waiting outside breakwaters for a Pilot, vessels shall keep adequate space and take care of both ship's and Pilot's safety. Before arrival, vessels shall contact Keelung Port Radio Station (Lat. 25° 09′ 42.5″ N., Long. 121° 44′ 57.5″ E.) via VHF on Channel 16 to ascertain Pilot's exact boarding time.

ANCHORAGES: Area in outer harbour is 13.0 m. to 13.5 m. in depth and can only contain 4 ocean-going vessels at a time. Vessels may also anchor outside breakwaters for Pilots or entry instructions.

RESTRICTIONS: Keelung Port Radio Station consists of Naval Harbour Control Signal Station and Harbour Bureau Signal Station. The former controls the entry and exit of all the vessels with the latter's assistance. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Port Radio Station and shall not leave dock nor weigh anchor nor sail and remain close to harbour entrance before obtaining from Naval Harbour Control Signal Station the signal permit to enter or leave.

Pilots berth vessels 0700 hrs. – 2300 hrs. Unberthing at any time.

MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.

HEALTH: Radio Pratique possible, vessel should advise Number of Certificate of Sanitary Inspection. Pratique will be granted when vessel is in anchorage. Three measures will have to be conducted by ship, these are: disinfection of ship, sampling of food and water, tetracycline drug for person, if the vessel arrives from an affected area within 5 days.

1. To obtain Free Pratique by radio, the Master is required to cable the following information to Agent within 6 to 36 hours prior to the vessel's arrival at the port.
   - (1) Ship's name.
   - (2) First port of the voyage and date/time of sailing.
   - (3) Name(s) of port(s) and respective departure time, where the vessel called within the last 10 days prior to arrival at Republic of China ports.
   - (4) ETA.
   - (5) Kind of Derat Certificate, place and date of issue.
   - (6) Number of crew and passengers on board.
   - (7) If any illness or death occurred within 10 days prior to the vessel's arrival, and if so, give a detailed report.
   - (8) If any rat or abnormal death of rats is found on board within 10 days before the vessel's arrival.
   - (9) If there is any shipment of foodstuff on board from an infected area.
   - (10) Any other information (if any doctor on board, etc.)

   (Example:)

   mv " . . . . " (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger Nil/7 to 10 None

2. Vessels under the following conditions are not allowed to apply for the Radio Pratique:
   (1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Republic of China port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for plague and yellow fever.
   (2) Infectious disease and/or suspected infectious disease and death occurred within 10 days prior to the vessel's arrival in the Republic of China.
   (3) When any inactive rat is found or abnormal death of rats is found on board within 10 days prior to the vessel's arrival in the Republic of China.
   (4) When the vessel possesses no valid Derat/Exemption Certificate.
3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the Radio Free Pratique is granted.

If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the Radio Pratique for one to three voyages.

4. Fumigation by hydrocyanic acid gas (discoids) and methyl bromide is carried out by quarantine station. Derat Certificate or Derat Exemption Certificate issued also by quarantine station.

RADIO:

1. Call Name: Keelung Port Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   (1) Channel 14 (156.7 MHz.) is used for longer communications after making contact on Channel 16.
   (2) Channel 12 (156.6 MHz.) is a spare Channel, used for emergency.
3. Communication Contents:
   (1) Messages for vessels to enter or leave.
   (2) Matters concerning navigation and anchorage.
   (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   (1) Emergency salvage at sea.
   (2) Messages for vessels departing.
   (3) Messages for vessels waiting outside breakwaters for entry instructions.
   (4) Messages for vessels at anchor in outer harbour.
6. Languages to be used:
   (1) Mandarin.
   (2) English.
7. Remarks: Communications always in plain language. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Port Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   (1) Nationality.
   (2) Vessel's Name.
   (3) Call Letters.
   (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Port Radio Station (25° 09′ 42.5″ N., 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Port Radio Station) in the waters outside the harbour. The report includes:
    (1) Nationality.
    (2) Vessel's Name.
    (3) Call Letters.
    (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

Keelung Radio (XSW) 500 kHz and 460 kHz. Also on 8 MHz.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

TUGS: The Harbour Bureau operates 9 tugs viz., 2×2,800 h.p. 1×2,400 h.p., 4×1,600 h.p. China Petroleum Corporation (CPC) operate 2×2,200 h.p. at their Shen Ao Terminal.

BERTHING: Docking during daytime, and also during night-time if weather permits.

Berths (all 200 m. length)	*Depth* (m.)	*Remarks*

W32	11.50	
W33	10.85	Oil Tanker berth.
W33B	8.20	Oil Tanker berth.

In total there are 37 deep water berths and 21 shallow water berths.

Four mooring buoys can accommodate 6 vessels of up to 10,000 tons and length overall 215 m.

CRANES: 22 mobile cranes, capacity 10 tons – 250 tons, 17 wharf cranes, capacity 3 – 30 tons. 10 container cranes, capacity 35 tons, 4 floating cranes, capacity 110 tons, 60 tons, 30 tons and 30 tons.

Other equipment: 194 forklifts, capacity 1 ton – 25 tons; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 15 excavators.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 2, 3, 14, 15, 16, 17 and 18 equipped with 3 ton cranes. Wharf No. 4 equipped with a stationary 30 ton shore crane. Other wharves can be served by 10 tons – 100 tons mobile cranes, and No. 19 to No. 26 wharves can be served by 250 tons mobile crane.

Wharves No. 19 to No. 26 and East No. 10, for container ships, Ro/Ro ships, and "LASH" vessels, equipment includes 10 gantry cranes, capacity 35 tons; 12 straddle carriers for 20 ft. – 40 ft. containers; 2 port stackers, capacity 35 tons; 2 transtainers, capacity 35 tons; 5 forklifts (2×35 ton, 2×15 tons and 1×10 tons capacity) and 9 yard trucks.

Wharves No. 30, 3 pneumatic unloaders for grain in bulk, max. capacity 600 t.p.h. average capacity 480 t.p.h. Silo capacity 50,500 tons.

Wharf No. 31-32: Max. LOA 120 m. Max. draft 10.5 m. Coal discharged into trucks by ship's gear and shore grabs. Average discharge rate 3,000 tonnes per day. Working Hours: 0800 – 1800 hrs., 1900 – 0300 hrs. and 0300 – 0500 hrs.

STEVEDORES: According to the stowage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift.

Cargo Working Hours:

General Cargo and Bulk Wharves.	Container Terminal.
0800 – 1200 hrs.	0800 – 1220 hrs.
1300 – 1800 hrs.	1300 – 1820 hrs.
1900 – 2300 hrs.	1900 – 2320 hrs. – 100% Extra Charge.
0001 – 0300 hrs.	0001 – 0620 hrs. – 150% Extra Charge.

Port Performance:

General cargo up to 30 tons/gang/hr.

Average rate per day 480 tons.

Coal up to 60 tons/gang/hr. Rate per day 1,500-2,500 tons depending on availability of trucks.

China Steel's berth – 10,000 – 15,000 tons/day.

Containers – 25 per crane/hr. excluding waiting time.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors. Modern hospitals available in Taipei, 30 km. away.

TANKERS: Bulk oil is discharged at Berth No. 33 and No. 33B which are fitted with 8 in. and 4 in. pipe-lines. Length: 210 m. and 100 m., maximum draft: 10.85 m. at No. 33 and 8.2 m. at No. 33B.

Monobuoys are also situated at Sha Lun, (W. Taiwan), connected to Taoyuan Refinery, at positions:

No. 1 Lat. 25° 09′ 00″ N., Long. 121° 11′ 27″ E.
No. 2 Lat. 25° 08′ 32.4″ N., Long. 121° 10′ 06.3″ E.

Discharge is possible at Sha Lun only under good weather conditions. Pilot boards 1 mile off the S.B.M.

Also see "Shipmaster's Report" dated April 1990.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. 4 water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$39.00 (current exchange rate NT$38.00 to U.S.$1.00) per ton.
   (2) Water supplied by barges at NT$74.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities. 5 bunker barges available.
FIRE PRECAUTIONS: Special wharves for tankers, Wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.
CONSULS: None. Mostly stationed at Taipei.
REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under Administration Regulations on Harbour Business for Taiwan Provincial Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp. Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

There are over 400 m. of repair wharves, cranes up to 60 tons, plate and machine shops and foundry and a full staff of skilled tradesmen.

Repairs to radio, navigational and electronic equipment can be effected.
DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dry docks, 2 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.
SURVEYORS: Surveys of all types can be arranged. Major classification societies are represented.
GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.
OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.
CUSTOMS ALLOWANCES: (1) Each crew member allowed 200 cigarettes in bulk or half a pound of tobacco. (2) Each crew member allowed 1 opened bottle of wine and 12 cans of beer.
REPATRIATION: Crew repatriation usually carried out through International Airport in Taoyung, and Immigration prefer either individual or group visa for landing crew from ship.
AIRPORT: Taiwan's international airport C.K.S. is 65 km. from Keelung via the motorway. Travelling time approx. 1 hour. Flights are available direct to U.S.A., South Africa and most Asian destinations, and for Europe/Australia via Hong Kong. Taipei domestic airport (30-40 minutes travelling time) has frequent scheduled flights to most major cities in Taiwan.
TIME: GMT plus 8 hours. No alterations.
HOLIDAYS: New Year's Day (1st–2nd Jan.); Chinese Lunar New Year's Eve and Day (3 days in Jan. and Feb.); Youth Day (29th Mar.); Ancestor Memorial Day (1 day in April); Labour Day (not a national holiday but only for labourers) (1st May); Dragon Boat Day (1 day in June); Mid-Autumn Day (1 day in September); Confucius' Birthday or Teachers' Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25th Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthday (12th Nov.); Constitution Day (25th Dec.).
POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies.
TELEPHONE: Local telephones available to be placed on board.
SHORE LEAVE: Crew allowed ashore except for crew members from Communist countries.
IDENTIFICATION CARDS: Passport or other identification papers are needed.
REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.
DELAYS: Keelung has rainfall on about 210 days in a year, port is sometimes congested after continuous rain.
GENERAL: Shore pass issued by Immigration for each crew member on ship's arrival and will be collected on ship's departure. Anyone who loses a shore pass is subject to fine.
DEVELOPMENTS: 100,000 tonne grain silo to be built.

SHIPMASTER'S REPORT: April 1990.
Berth: Shen Ao.
Operator: CPC.
Maximum draft 10.80 m. (Winter) and 11.80 m. (Summer).
Max. LOA 225 m.
Max. Displacement 50,000 tonnes.
Berth starboard side alongside.
Port anchor used for berthing.
Tugs come from Keelung.

The berth is exposed to the N.E. monsoon (October to March) and delays due to winds (up to Force 9), and heavy swell can be expected in this period.

Sunrise to sunset movements only. The area is subject to fog in the mornings which can cause delays.

Arrangement of discharge arms for LPG said to be, from forward, Propane vapour, Propane liquid, Butane liquid, Butane vapour, but in practice the products are interchangeable.

Storing at this berth is not recommended as the long, narrow walkway makes transport difficult.

AUTHORITY: Keelung Harbour Bureau, No. 1 Chung Cheng Road, Keelung, Taiwan, Republic of China. *Tel:* (032) 231111. *Cables:* Kehbroc Keelung. *Contact:* Y. C. Chu, Harbour Master, S. C. Teng, Director.
AGENT: Jardine, Matheson & Co. Ltd, 4, Second Floor, Chung Cheng Road, Keelung. Tel: (032) 230161. Telex: 32187 Jardines. Fax: (032) 266371.

Associated with Jardine Shipping Agencies.

SUAO: 24.36 N. 121.52 E. (See Plan)

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.
DOCUMENTS: Ship's Register, Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, Manifest of Inward Cargo, Manifest of Through Cargo, Mail and Parcels List. Also see "General".
Distribution:

Quarantine Station: One copy each of Health Declaration, Crew List, Ports of Call, Manifest of Inward Cargo, Manifest of Through Cargo.

Customs Office: One copy each of Arms and Ammunition List, Narcotics List, Foreign Currency List, Parcels List (including Landing Parcels and Through Parcels), Stores List, Crew List, Specimen Signatures of Master and Chief Officer, Taiwan Customs Tonnage Dues (can be purchased from the Customs Office), and 3 copies each of Manifest of Inward Cargo and Manifest of Through Cargo.

Immigration Office: One copy each of Crew List, Arms and Ammunition List, Manifest of Inward Cargo, Ports of Call List.

Port Authority: One copy each of Crew List, Manifest of Inward Cargo, Manifest of Through Cargo.

Local Shipping Agent: One copy each of Ship's Particulars, Crew List, Manifest of Inward Cargo, Manifest of Through Cargo, Ports of Call.
Certificates: International certificates, Register, Safety Equipment, Safety Construction, Safety Radio, Load Line, Cargo Gear, etc.
APPROACHES: If approaching from the North or East, Kui Shan (Turtle Shaped) Island, 15 miles N.N.E. of the harbour entrance, provides a good landmark, with its 408 m. elevation.

San-Shien-Tai Island (30 m.), 1 mile E.N.E. of the entrance, is a good leading mark, and vessels should make their approach from the S.E., clearing the island by half a mile, before turning to enter. A 4.7 m. shoal exists about 450 m. S.W. of the island and another lies to the N.W. A red light sector marks danger areas near the entrance. The channel depth at the entrance is 22 m. The inner channels have depths of 15 m. to the North and 10 m. to the South.
PILOTAGE: Compulsory. Pilot boards at outside anchorage position (Lat. 24° 35′ 20″ N., Long. 121° 52′ 30″ E.). Hoist "G" flag. Daytime service only available.
ANCHORAGES: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater when waiting for Pilot or entry instructions.
RESTRICTIONS: Permission to enter must be granted by both the Port Authority and the Navy Joint Commision, ship's Agent should give ship's ETA to Port Authority of Suao 24 hours before arrival. Port closes from 2301 hrs. to 0200 hrs. daily.
MAX. SIZE: Max. draft 14 m. and LOA less than 290 m.
HEALTH: Radio Pratique possible (see "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within 5 days.
RADIO: Radio Suao, send cables to Harbour Master Suao, or Agent. Report ETA, draft, etc.
VHF: Channel 14 – 156.7 MHz for calling. Call sign "Suao Harbour Radio".
TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 5 tugs, 2×2,400 h.p., 1×1,600 h.p., 1×1,200 h.p. and 1×1,000 h.p.
BERTHING: Docking during daytime, departure also during daytime, but sometimes at night time if permission granted from Authorities. Pilot compulsory. Vessel usually anchors in outer harbour for Pratique and inspection.

Deep water wharf 2,705 m. (13 berths) capable of accommodating vessels up to 298,000 d.w.t.

Wharf No.	*Length (m.)*	*Depth (m.)*	*Designed Depth (m.)*	*Uses*
1W	210	7.0	7.5	Service Craft
2W	170	10.5	11.0	Breakbulk
3W	215	10.5	11.0	Breakbulk
4W	300	10.5	11.0	Breakbulk
5W	200	10.5	11.0	Breakbulk
6W	290	14.0	15.0	Containers and Breakbulk
7W	240	12.5	13.0	Containers and Breakbulk
8W	125	7.0	7.5	Timber
9W	125	7.0	7.5	Timber
10W	175	8.5	9.0	General Cargo
11W	175	8.5	9.0	General Cargo
12W	200	8.5	9.0	Breakbulk
13W	180	8.5	9.0	Breakbulk

CARGO HANDLING FACILITIES: The port has no special facilities, 1 gantry crane for handling container cargoes. For the present time ship's derrick only for logs, timber, cement and general cargo.

Grabs:	6×3.5 cu.m. (3.5 tonnes each). 13×2.2 cu.m. (1.8 tonnes each). 6×4.5 cu.m.
Fork Lifts:	8×3 tonnes. 2×2 tonnes. 2×7.5 tonnes. 1×15 tonnes.
Mobile Cranes:	3×25 tons 1×30 tons 1×8 tons 2×10 tons
Shovels:	2×3 tons (Bulldozer) 2×1.2 tons 2×1.7 tons.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, (St. Mary's Hospital, sponsored by Catholic Society) Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700, 1800 – 2300 and 0000 – 0600.
DENSITY: 1025.
FRESH WATER: Available by barge or alongside, subject 24 hours' advance notice.
FUEL: Supplied by one self-propelled barge.
CONSULS: None.
REPAIRS: Minor repairs can be carried out in port.
DRY DOCKS: Length 165 m., width 23.7 m., depth 7.7 m. Vessels under 10,000 g.r.t. can be accommodated.
GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes for own use and 1 bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.
REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei. Application to be made to Keelung Harbour Bureau.
AIRPORT: International airport in Taoyuan, 3.5 hours by car from port.
TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).
HOLIDAYS: New Year's Day (January 1st), Youth's Day (March 29th), Late President Chiang Kai-Shek's Death – Memorial Day (April 5th), Labour Day (May 1st), Dragon-Boat Day (May 5th of Lunar Calendar), Mid-Autumn Festival (August 15th of Lunar Calendar), Birthday of Confucius (September 28th), Double Tenth Day (October 10th), Recovery Day of Taiwan (October 25th), Late President Chiang Kai-Shek's Birthday (October 31st), Birthday of Dr. Sun Yet-Shen (November 12th), Constitution Day (December 25th), Eve of Chinese New Year's Day (December 29th or 30th of Lunar Calendar), Chinese New Year's Day (first day of Lunar Calendar).
POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.
TELEPHONE: Local telephones available to be placed on board.
SHORE LEAVE: Crew allowed ashore, except for crew members from Communist countries.
IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.
REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.
DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.
GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by Immigration Office for each crew member on ship's arrival and will be collected on ship's departure.
AUTHORITY: Suao Harbour Bureau, 3rd Floor, Suao Port Building, Suao, Ilan, Taiwan, Republic of China. *Tel:* 039-972001, 965121. *Contact:* F. N. Chen, Port Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cables: "Jarocean Taipei". Fax: (02) 3413168, 3920435, 3931160.

Associated with Jardine Shipping Agencies.

TAICHUNG: 24.18 N. 120.29 E. (See Plan)

PORT LIMITS: In radius of 1.5 miles from centre of the entrance between North and South Breakwater.
LOCATION: Exact position of Port – Lat. 24° 17′ 40.3″ N., Long. 120° 29′ 27.3″ E.
DOCUMENTS: *Required by Quarantine Station:*
1 copy Health Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
1 copy Manifest of Inward Cargo.
1 copy Manifest of Through Cargo.
1 copy Derat Certificate.
Required by Customs Office:
1 copy Arms and Ammunition List.
1 copy Narcotics List.
2 copies Foreign Currency List.
3 copies Parcels List (1 for landing parcel, 2 for through parcels).
1 copy Stores List.
2 copies Crew List.
2 copies Mail List.
2 copies Passenger List.
4 copies Manifest of Inward Cargo.
4 copies Manifest of Through Cargo.
1 copy Personal Effects List.
1 copy Log List (for log ships only).
1 copy Ship's Register.
Required by Immigration Office:
2 copies Crew List.
2 copies Passenger List.
2 copies Arms and Ammunition List.
2 copies Narcotics List.
2 copies Manifest of Inward Cargo.
4 Photographs of each Chinese Crew Member (only for first arrival).
Required by Port Authority:
1 copy Crew List.
1 copy Passenger List.

Besides above documents, ship's Master should present Certificates of Ship's Registry, Safety Equipment, Safety Construction, Safety Radio and Load Line to the Port Authority for inspection.
Required by Local Shipping Agent: One each of Ship's Particulars, Crew List. Last Port's Name and Leaving (Last Port) time should be forwarded by airmail to the local Agent.
APPROACHES: Daytime entry only.

The entrance channel has a minimum depth of 13 m. (MLWS), is 1,600 m. long and 300 m. wide in a direction of 115° (T). Sometimes strong cross currents exist outside the breakwaters. In strong winds, the pilot vessel may be unable to leave the shelter of the breakwaters and vessels must pick up the Pilot inside the harbour entrance (see "Pilotage"). There have been groundings outside the harbour but these all appear to have been the result of bad navigation or the neglect of basic precautions.
PILOTAGE: Compulsory. At anchorage hoist "G" flag, contact Taichung Port Radio on VHF Channel 14. Pilots board about 1 mile off the end of the breakwaters. In the winter, however, the pilot launch is sometimes unable to leave the shelter of the breakwaters, and the Pilot must embark inside the breakwaters. Alternatively, if sufficient notice is given, vessels may pick up a Taichung Pilot off either Keelung or Kaohsiung. When it is known that bad weather exists off Taichung, this latter course of action is recommended to avoid possible berthing delays and danger to the ship.
ANCHORAGE: Water area in port limits, except entrance channel can be used for anchoring, depth from 12 m. to 20 m. Ship may anchor and remain outside breakwater when waiting for Pilot.
RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival.
MAX. SIZE: Max. draft 13 m., LOA no limit.
HEALTH: Radio Pratique acceptable, also quarantine will clear vessel at anchorage. Special quarantine will be conducted if vessel arrives from a cholera affected area within 5 days.

Also see "Keelung".
RADIO: Via Radio Taichung (XSW2) or Radio Keelung and Radio Kaohsiung. Send cables to Agent or Harbour Master Taichung for reporting ETA, draft, etc.
RADAR: No radar service to assist navigation in port.
VHF: Call sign "Taichung Port Radio", Channel 16 (156.8 MHz) for calling purpose, Channel 14 (156.7 MHz) for message exchange, Channel 12 (156.6 MHz) for harbour craft and pilot on duty. Pilots use walkie-talkies to communicate with tugs and mooring men.
TUGS: Authority tugs assist mooring and unmooring, ship's line used. 7 tugs, 800 h.p. – 3,400 h.p.
BERTHING: Wharves 1 and 3, depth 13 m., each length 250 m., total 500 m. for grain cargo, discharged by shore grain unloaders.

Wharf 2, depth 13 m., 250 m., for bulk cargo.

Wharf 4, depth 11 m., length 200 m., for liquid cargo.

Wharf 4A, depth 9 m., length 185 m., for logs and cement.

Wharves 5A, 5, 6, 7 and 8, depth 11 m., length 1,000 m., for general cargo.

Wharf 8A, depth 11 m., length 260 m. for general cargo.

Wharf 9, depth 14 m., length 260 m., for containers.

Wharves 10 and 11, depth 13 m., length 640 m., for containers (See "Shipmaster's Report" – 1982).

Wharves 12 and 13, depth 11 m., length 400 m. Wharves 14 and 15, depth 10 m., length 360 m. for general cargo.

Wharves 23 and 24, depth 10 m., length 360 m. Wharf 25, depth 11 m., length 200 m. for general cargo.

Wharves 26 and 27, depth 11 m., length 400 m., for general cargo.

Wharf 28, depth 11 m., length 145 m., for general cargo.

Wharf 29, depth 14 m., length 250 m., for coal (coal unloader is planned) (See "Shipmasters' Reports" – 1982 and 1987).

Wharves 31 and 32, depth 14 m., length 600 m., for containers.

Wharves W1 and W2, depth 13 m., length 250 m. each, for petroleum and chemical products.

(For their locations see "Plan").
CRANES: 1 mobile crane up to 40 tons capacity, 3 mobile cranes of 35 tons capacity, 1 mobile crane of 30 tons capacity, 1 mobile crane of 140 tons capacity. Large supply of forklifts, hoppers, grabs, electro magnets, conveyors, etc.
SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: Wharves 10 and 11. Each has 1×35 ton quay-side container crane.
Grain: Grain Elevators installed at Wharves 1 and 3, each silo capacity 60,000 tons. 2 unloaders, 400 t.p.h. each at Wharf 1 and 2 unloaders, 650 t.p.h. each at Wharf 3.
STEVEDORES: Stevedores and equipment can be hired from the Taichung Harbour Warehousing & Stevedoring Co., Teh-Long Warehousing & Stevedoring Co. and Taichung Harbour Bureau Marine Terminal Operations.
Cargo Working Hours:
0800 – 1200
1300 – 1700
1800 – 2300 (plus 100%)
0000 – 0600 (plus 150%)
Port Performance: General cargo 200 tons/gang/day. Bulk (other than grain silo) 300 tons/gang/day.
MEDICAL: Clinics and hospital with English speaking doctors available at town of Wuchi near the port.
DENSITY/TIDE: 1025/High tide and low tide average difference 3.74 m., when alongside pier keep watch on moorings.
FRESH WATER: Available alongside and by water tender with capacity 300 tons. No limitation on quantity.
FUEL: Ordinary bunkers available but 24 hours' advance notice required. Fuel barge (550 tons) operated by C.P.C.
CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authority at gangway free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, except new designs on modern vessels.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes and 1 bottle of wine for own use. Bonded store will be sealed on arrival.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan near Taipei, or Kaohsiung, about 200 km. from this port.

TIME: GMT plus 8 hours. For correct local time dial Tel: 117, time report in Chinese, free of charge.

HOLIDAYS: Commemoration Day of the Republic of China and New Year's Day (1st and 2nd January), Lunar New Year's Eve and Spring Festival (3 days late in January or early February), Youth Day and Chinese Martyrs' Day (29th March), National Tombs' Sweeping Day and Death of President Chiang Kai-shek (5th April), Labour Day (1st May, for labourers only), Dragon Boat Festival (one day in June), Mid-Autumn Festival (one day in September), Confucius' Birthday and Teacher Day (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Chiang Kai-shek's Birthday (31st October), Dr. Sun Yat Sen's Birthday (12th November), Constitution Day (25th December).

Cargo work can be arranged on holidays except Lunar New Year's Day, Labour Day, Dragon Boat Festival (only afternoon) and Mid-Autumn Festival (only afternoon).

POLLUTION: Discharge of tank washings, etc., in port is prohibited (Also see "Regulations – Harbour Bureau Notice").

POLICE/AMBULANCE/FIRE: Call Taichung Harbour Police Tel: 6562174-5 or Liaison Centre of Taichung Harbour Bureau Tel: 6562164.

TELEPHONE: Local telephone available to be placed onboard.

SHORE LEAVE: Crew allowed ashore except for crew members from communist countries.

IDENTIFICATION CARDS: Not required, however passports or other identification papers must be submitted for request of a shore pass.

GARBAGE DISPOSAL:

(1) This port owns a garbage truck for garbage and waste disposal. The service starts from dawn.

(2) The garbage truck will collect the garbage from the galley or trash from crew's quarters only. The waste from the ship's holds or repair work shall be cleaned and transported out by truck at ship's own expense.

(3) Ship applying for garbage collection must put garbage into sealed bags and piled up for the convenience of handling.

(4) For service Tel: (04) 656-2611, Extension 256 or 356.

WASTE OIL DISPOSAL: See "above".

Ships are strictly prohibited to dump waste or bilge oil into the sea while in the port. The violator will be prosecuted according to the regulations for ship's waste disposal control.

SEAMAN'S CLUBS: Seaman's Service Centre may be consulted about seaman's affairs. Tel: (04) 656-6119.

CURRENCY: New Taiwan Dollar. U.S.$ 1.00 = NT$ 25.44 (16.3.92).

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carried articles to the gangway guard when going ashore and to the gate police when coming aboard.

2. Photographing of the harbour, storing of explosive articles and displaying of fire crackers in the harbour area are prohibited.

3. Before obtaining a boarding pass which can be applied for you by your ship's agency, you are not allowed to board another ship with your shore pass.

4. Before going ashore, read over carefully the notice on your crew shore pass and comply with it.

5. Be sure not to lose your shore pass, nor should it be used by others, since it is an important official document. The expense of announcing the loss of shore pass for 3 days in the local newspapers is to be on loser's account.

6. To avoid getting lost, keep in your mind the number and location of the wharf at which your ship is alongside, and in case the location of the ship is shifted contact your ship's Agent.

7. Always maintain aboard your ship a sufficient number of crew in case of emergency.

8. For the prevention of stowaways, thefts and accidents, crew quarters and passenger cabins should be kept locked before their shore leave.

9. Pumping wasted oil and throwing rubbish into the water, or exhausting thick smoke in the port area shall be subjected to a heavy fine.

10. For the protection of foreign copyrights, pirated editions of foreign books and records are not exportable.

11. Unless an application is approved by the Customs, any taxable article should not be taken off the ship, while each crew member is allowed to carry ashore 2 opened packs of duty free cigarettes, 10 cigars or 2 ounces of tobacco.

12. Each crew member may carry ashore no more than 2,000 New Taiwan Dollars (NT $2,000).

13. Each crew member is allowed purchases not exceeding U.S.$200 in value in local products or handicrafts which can be carried aboard by the buyer with purchasing invoice; a Customs permit should be shown to the guard if exceeded.

14. Whenever you need assistance, please feel free to call 562394, 564334 or 565849 ext. 275 upon which the Foreign Affairs Division of the Harbour Police is obliged to serve you.

15. For further information, please consult directly with your Agency or Authorities concerned, as the rules contained in this notice may be revised at any time.

Thank you very much for your co-operation.

GENERAL: Recommended chart: Chinese Navy Chart No. 0357, Tai-Chung Kang.

DEVELOPMENTS: The 2nd phase project with an expansion of the commercial harbour and a new industrial harbour will be carried out soon. The North breakwater is being extended by 850 m., completion 1995.

SHIPMASTER'S REPORT: November 1982 (updated 1992).

Stevedores: Cargo work: Around the clock. 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. and 0000 – 0600 hrs.

Health: Cholera still declared in Radio Pratique message but no action taken if certificates are out of date.

Customs: Issues can be made after 5 days.

VHF: Pilots and Port Radio also officially work Channel 16 but we only make contact on Channel 14.

Berthing: No. 11 (Container Berth) is completed (Extension of No. 9 and 10)

Consuls: No British Consul.

Airport: Nearest airport at Taoyuan.

Report: This is a new port midway up the West coast of Taiwan. Plans for very extensive developments are at present in hand, stage one has been completed.

The Western coast is low lying and exposed. During N.E. monsoon season, when cold front comes from mainland China, the wind can be very strong, ships are advised to go South or North so that the Pilot may be taken off at Kaohsiung and Keelung. The water shelves fairly slowly and I am given to understand that in bad weather Panamax vessels anchor 2 miles West of port entrance, holding conditions not known. We were fortunate with calm conditions and anchored 5 cables S.W. of Breakwater South Light for a short period with no difficulties.

Pilot boards from launch outside and 1 tug is normally taken outside. VHF Channel 14 is used. They also use walkie-talkies to contact Harbour Control and tugs. Panamax vessels normally berth during daylight hours but may sail at any time. Pilot seemed competent and had an Assistant/Trainee Pilot with him. (September 1987: Pilot disembarks inside breakwater. Vessel must attain good speed and allow for set and N'ly wind when passing between Inner Breakwater and Outer Breakwater.)

Depth of Water: Vessel berthed at half tide with 12 m. draft. Grain silo 13 m. Berth No. 10 depth 13 m. Berth No. 9 depth 14 m. Dredging being carried out. Rise and fall of tide 3.5 m. depth 4.0 m. Dock water density Berth No. 10 found to be 1023.

Tugs: 7 tugs 1,600 h.p. – 3,400 h.p. Ship's ropes used. Normal conditions for Panamax, 1 tug each end.

Berths: Berth No. 10 (Berth No. 9 is similar) is a brand new container berth with 2 gantries for containers. Berth used for bulk coal discharge into lorries until new coal berth constructed. (Berth still not constructed in September 1987). Large flat area. Mooring bollards set at jetty edge every 23 m. A further set of unequally spaced large bollards are set along line 34 m. in from jetty. When mooring 4 head/stern lines, 2 springs and 2 long breasts each end are recommended. We experienced winds of over 30 knots off berth for short period, nobody seemed at all surprised, so would suggest this is reasonable tie-up.

Discharge: As stated this is a container berth. Panamax vessel with side opening hatches, port side to. Hatch centre stops and minor hatch fittings burnt off. Centre piece of hatch rail track tack welded on. Both hatch lids moved to starboard side. Section of ship's side rail in line with hatch burnt off. (This method not used on Berth No. 29). Wood sleepers placed on deck and mobile cranes lifted on board, 1 per hatch. These use small 4 – 5 ton grabs and discharge into lorries. Small bulldozer type vehicle put in each hold to move cargo to port side. Preparation about 1 day, discharge 9 days, replacing of pieces, etc., 1 day.

Bunkers: Heavy oil and diesel available by barge.

Lub. Oils: Most available, plenty of advance notice required.

Fresh Water: Available, from jetty or barge.

Repairs: Ship repairs undertaken with a 10,000 ton dry dock.

Money: Only New Taiwan Dollars available. US Dollars can NOT be obtained. Obtain any other requirements at previous port.

Immigration: For non-Taiwanese crew this is a problem, including Hong Kong, British and Indian. If any crew changes expected give plenty of notice. Visiting Hong Kong shore staff such as Superintendents, etc., required to renew dock pass every 2 days. Crew issued with shore pass (with photo for Chinese ratings) this has to be shown at dock gate outward and inward. Passes collected in on sailing, loss of pass results in fine on holder.

Stores: Victualling, fresh fruit and vegetables, reasonable price and good quality. Milk, meat, European style tinned goods all up to Chinese National Standard (CNS). Chinese dried foods, etc. appear good.

Beer can be obtained but not spirits or foreign cigarettes.

Customs: One person at least, around all the time. Bond and beer locker sealed. Issue will be given after a week in port, but give plenty of notice.

Certificates Required: Register, Loadline, Safety Equipment, Safety Construction, Radio Safety, Derat, Liferaft.

Documents: Crew List, 10 copies. Crew Manifest, watches, etc. and including foreign money. List of Stores. Deck, Engine, Victualling, Bond, Arms & Ammunition List, Narcotics List, Arrival Report, Declaration of Health, Departure Report (these three their forms). Specimen signature Master and Mate, General paperwork, large amount for any purpose. If landing spares or items for overhaul (motors rewound, etc.) give plenty of notice.

Medical Facilities: All available.

Drugs: Do not appear to be a problem in this port.

Grain Silo: I was informed that usual discharge rate is 5,500 – 6,000 tonnes per day.

Radio Station: Taichung Local. 24 hour watch M/F, W/T no difficulties encountered.

Cameras: Not to be taken ashore.

Walport: Possible to change video tapes. NOT films.

Telephone: Placed on board.

SHIPMASTER'S REPORT: September 1987 (Updated 1990).

Vessel berthed at Berth No. 29.

There are still no bulk discharge facilities at the port.

The method used in the Shipmaster's Report (November 1982) for Berth No. 11 is still used, but the ship's rails were not cut away. Rigging and cutting took about 12 hours, and all 7 mobile cranes in operation from the deck after 24 hours.

On completion of discharge, hatches were completed at irregular intervals, due to machine downtime, etc. Rewelding and rigging carried out as discharge continued and the interval between completion of discharge and completion of hatch repairs was about 2 hours.

Arrangements were made for Class Surveyor to inspect and issue certificate at end of work but this was not done efficiently.

The rate of discharge varied between 5,500 t.p.h. – 6,000 t.p.h., variation being due to very heavy rain and typhoon. The average rate per hatch per day was approximately 800-900 tons.

SHIPMASTER'S REPORT: January 1990.

There are no gantry cranes for discharging of coal cargoes at the port. For a Panamax size vessel both the hatch covers, port and starboard, are shifted to one side. As we were starboard side alongside both our hatch covers were shifted towards extreme portside. In this case only half hatch was open throughout cargo operations.

Mobile cranes were placed on the main deck with dunnage underneath. Each crane had a 2 tonne lifting capacity and discharge is in to lorries on the quay. The discharge rate is about 1,000 tonnes/day per crane. This method of discharging will be used until the new berth, which will be equipped with cranes and conveyors, is ready in 1992.

The outgoing pilot disembarks inside the inner breakwater. Ships must pick up sufficient speed to counteract the wind/current between the inner and outer breakwaters.

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required to call for clearance by Port Officals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.
ANCHORAGES: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length, 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E. (See Plan)

PORT LIMITS: The Port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the City of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msasani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.
DOCUMENTS:

Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ship's Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).

Shipmaster's Report: March 1981.

Declaration of Health.
1 Set of Vaccination Lists.
7 Crew Lists.
6 Passenger Lists.
Clearance from Last Port.
Ship's Register (Copy).
Dangerous Cargo Manifest.
Stores List (Form C-7).
Crew Declarations (Form C-8).
Parcel List (Form C-3).
Ship's Record & Master's Report (Form EAH-6007) (To Pilot).
Entry Report (Nasaco Form).
Departure Report (Nasaco Form).
Shore Pass (Form TIF 10).

PILOTAGE: Compulsory South of Makatumbe Lighthouse for all vessels over 200 n.r.t. The pilot launch shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks.
ANCHORAGES: Anchorage outside in 7 – 8 fathoms, sheltered by Makatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.
Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light on bearing 250° True.
RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50′ S., Long. 39° 18′ E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.
MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m. at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT, and single-screw vessels not exceeding 175 m. Tankers LOA 182.87 m., 36,000 d.w.t., and draft 9.8 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health Officer giving ETA, name last port and health condition of passengers and crew. "Q" flag to be displayed until Free Pratique given. Radio Pratique not available.
TUGS: 4 tugs available.
BERTHING: In the Inner Harbour there are mooring and anchorage berths for up to 9 deep-sea ships ranging from 350 ft. to 600 ft. (106.48 m. – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 m. – 9.14 m.) in draft.

Deep water quays total length 2,016 m. comprising Berths No. 1-11 with 10.06 m. in depth at LWOST.

The port has completed major developments which should significantly affect its capacity and efficency. No new berths are being constructed but all existing berths (excluding the SPM Oil Terminal) have been modified, modernised or rehabitated.

Berths No. 9, 10 and 11 have been converted into a dedicated container terminal (2 berths × 280 m.) with a capacity of about 100,000 TEU per annum. The terminal has 2 × 35 ton gantry guay cranes, 5 × 35 ton rubber tyred gantry yard cranes and a rail container terminal (for both Tazara and TRC Railways) with 1 × 35 ton rail mounted gantry crane.

Backing up the port terminal are 2 inland container depots in the Dar-es-Salaam area (Kurasini IDC, adjacent to the port and Ubungo IDC, about 15 km. along the port access road).

Also see "Developments".
Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tidal basin and Southern Creek, the latter having 11 deep-water berths. Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	8.0 m.	175 m.
"G"	Buoys	9.2 m.	175 m.
"H"	Buoys	9.2 m.	175 m.

In addition there are 2 coaster anchorages. The Southern Creek, at the S.E. corner of the basin has a navigable distance of 1.5 miles for ships drawing up to 30 ft. of water.
CARGO HANDLING FACILITIES: *Grain:* A new bulk grain silo of 30,000 tonnes capacity has been constructed in the port to facilitate grain imports.
Ro-Ro: Ro-Ro vessels berth stern to at Berth No. 6/7.
Equipment and Other Facilities:

Deep water vessels berthed in stream are loaded and discharged by lighters. At the lighter quay there are 8 electric portal cranes for working lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port has 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stacking yards as per details below:

(a)	Belbase (AMI)	—	2 × 10 ton cranes.
(b)	Tanzania	—	3 × 5 ton cranes.

Main Quay Cranes: Berths No. 1 – 8 have between them 24 portal cranes of 7 tons capacity each.
Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton and 1 × 120 ton floating crane – "Ndovu". These are moved between deep-water quays, lighterage quays and any other points of work on the stacking yards as and when required.

Also see "Developments".
STEVEDORES: Week days (except Saturday) 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break), 2200 – 0600 hrs. (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 hrs. (no break). Sundays and public holidays 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break).
MEDICAL: Facilities available.
TANKERS: Kurasini Oil Jetty at which tankers up to 182.87 m. LOA, 9.8 m. draft and 36,000 d.w.t. can discharge refined products to tanks ashore. There is a refinery on the opposite side of the creek to the Kurasini Oil Jetty; the tankers serving the refinery are not to exceed 35,000 s.d.w.t. capacity. Also refer to "Mjimwema" where crude oil imports for Tanzania and Zambia are received.
DENSITY: 1025.
FRESH WATER: Available at deep-water berths, and a water barge supplies water to ships at anchorage. All water is chlorinated but should be boiled and filtered. Water for boiler requires feed treatment (formal solutions adequate).
FUEL: Fuel oil, diesel oil and gas oil available.
REPAIRS: Several light engineering workshops. There is a Tanzania Harbour Authority Dockyard for construction and maintenance of Tanzania Harbour Authorities' lighters and other small craft. This has a slipway for vessels up to 100 ft., lifting power 100 tons. The Port Administration employs scuba divers.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.

All cabins are inspected by Customs.
REPATRIATION: Can be arranged.
AIRPORT: International airport with daily connections to all parts of the world.
TIME: GMT plus 3 hours. No alterations.
HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).
SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Drums are provided on the quays.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: Missions to Seamen, Dock Gate 3, Kurasini. Tel: 20887. Hours: 0800 – 2200. Facilities: International telephone, postal service, bar, restaurant, shop, library, video, swimming pool, football, table tennis, darts, badminton, tennis and dances.
CURRENCY: Tanzania Shilling. U.S.$ 1.00 = 301 Shillings (6.5.92).
DEVELOPMENTS: The rehabitation of Berths No. 1 – 8 is well underway and will provide a better lay-out, refurbished buildings and new heavy duty paving throughout for handling all general cargo traffic in the port.

The second phase of the repaving of the Container Terminal berths 9 – 11 is expected to commence in 1991 and will run for 2 years.

The Lighter Wharf modernisation, which was interrupted, is due for completion with the provision of new paving and services but no completion date is known.

New navigation lights and buoys to be installed (Daphne Reef, Hammond Rock and N.W. of Buoy No. 2).
Among future developments which are under consideration are:
1. Improvements to the dockyard.
2. Improvements to the entrance channel.
3. New crude oil import facility.
4. Improvements to fendering at berths 9 – 11.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 25839, 30204. *Telex:* 41346 Portreeve. *Cables:* Bandari, Dar es Salaam. *Contact:* P.Cholobi, Port Manager.

Tanzania Harbours Authority, P.O.Box 1300, Dar-es-Salaam, Tanzania. *Tel:* 25839. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 32064. *Contact:* Captain J.K.Kwayu, Senior Harbour Master.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".
LOCATION: The position of the Monobuoy is Lat. 6° 48.8′ South, Long., 39° 22.1′ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.
PILOTAGE: Mooring Master/Pilot boards at position Lat. 6° 46.5′ N., Long. 39° 22.1′ E., subject to advice from Signal Station. Should the Pilot not be available on arrival, vessels are advised to anchor 1.5 miles N.E. of Outer Makatumbe Lighthouse to await the pilot.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided. Accommodation also required for 2 divers.
RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.
MAX. SIZE: Monobuoy accommodates tankers up to 100,000 d.w.t. (part discharge) and 125,000 d.w.t. (complete discharge). Minimum length allowed 650 ft. Max. draft allowed 55 ft.
HEALTH: Customs, Port Health and Immigration will board vessels on arrival.
RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:
- *(a)* Name of Ship.
- *(b)* Name of last port from which the vessel cleared and the loading port if different from above.
- *(c)* Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
- *(d)* Cargo loaded.
- *(e)* API gravity.
- *(f)* Arrival draft, fore and aft.
- *(g)* Lifting capacity of derricks.
- *(h)* Size of manifolds.
- *(i)* Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:
- *(a)* Name of ship.
- *(b)* Amended time of arrival.
- *(c)* Names of crew leaving the vessel (if any).
- *(d)* Requirements of doctor and dentist.
- *(e)* Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of the terminal vessel should call Dar-es-Salaam Signal Station on Channel 12 VHF. Channel 16 is available but is not continuously monitored.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.
READINESS: Notice of Readiness will be accepted by the Receivers Representative when the ship is berthed and connected.

Any vessel which is not, in the opinion of the Berth Controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.
MOORING: The following equipment is supplied by Tanzania Harbours Authority. 2×10 in. circumference nylon ropes, 100 ft. long with 2 joining shackles. These will be hoisted aboard from the launch using the Starboard boom.

The vessel approaches the buoy head to wind and tide or the resultant of these forces, and should have one ship's mooring rope lowered through the centre Panama Lead down to the water level with 15 ft. of 3 in. rope lashed to the eye. As the vessel approaches the buoy the launch will connect the ship's rope to the floating pick-up rope, which is hauled aboard until the mooring chain is through the Panama Lead. The 2 shore ropes are then shackled to the chain and made fast aboard.
BERTH: The Monobuoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.
HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the starboard side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang-off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.
UNMOORING: On sailing, hoses will already have been disconnected and towed clear by the attendant launch. The weight of the moorings is taken off the pick-up rope, the shackles disconnected, and the chain and pick-up rope lowered into the water. The shore ropes and shackles are then lowered into the launch, usually from the port bow.

The Pilot will then disembark, using a combination gangway/pilot ladder on the port side.
BALLAST: Ballasting will be allowed during discharge but only with the express permission of the Discharging Master. In the case of ballasting into dirty tanks a Dry Tank Certificate must be first obtained. Vessels will be allowed to carry out Crude Oil Washing, but no other form of tank cleaning. There are no sludge tanks ashore.
FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.
FRESH WATER: Up to 300 tonnes of fresh water is available by water barge. A pumping rate of approximately 10 tonnes per hour may be expected. Approximate cost is U.S.$4.60 per ton.
STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Monobuoy. Transport of stores to the buoy will be the responsibility of the Agent.
REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.
SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Monobuoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.
POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.
REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or faciility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.
STOWAWAYS: Vessels are warned that stowaways remain a serious problem at the Terminal. All exterior doors should be kept locked, especially in the forecastle, and, if possible, the chain lockers should be sealed on deck. A thorough search prior to departure is essential. Stowaways found aboard will be escorted ashore by the Port Police or the Pilot when he disembarks (contact Signal Station on VHF Channel 12).
AGENCY: The sole ship's Agency in Tanzania is National Shipping Agencies Co. Ltd (NASACO). The Department dealing with tankers at the Terminal is Ruvuma Department. Tel: Dar-es-Salaam 29425. Telex: 41235. P.O.Box 9082, Dar-es-Salaam.
AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 30204. *Telex:* 41346 Portreeve. *Cables:* Bandari Dar-es-Salaam. *Contact:* Port Manager/Senior Harbour Master.

MKOANI (Kohani): 05.21 S. 39.38 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Zanzibar".
PILOTAGE: Pilot available on request from Zanzibar.
RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.
ANCHORAGES: No mooring buoys. Minimum depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.
MAX. SIZE: Length 250 ft.
TUGS: 2 tugs available.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
DEVELOPMENTS: A jetty, 130.4 m. long, is to be constructed offshore and joined to the shore by a causeway 466 m. long and 4.0 m. wide. Depth alongside 9.0 m. The jetty will be able to accept a vessel 4,000 d.w.t. on the outer side and small domestic steamers and dhows on the inner side.
AUTHORITY: Ministry of Ports and Shipping, Port and Marine Department, P.O.Box 263, Zanzibar. *Tel:* 32858, 32847 (home). *Telex:* 57267 Shipco TZ. *Contact:* Port Officer.

MTWARA: 10.16 S. 40.12 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".
APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo Spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo Spit there is a very good natural harbour with room for two 500 ft. vessels and 1 coaster alongside. There are 2 unmarked anchorages to accommodate vessels of up to 9.5 m. draft.
PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flies to Mtwara when required. Scheduled flights 3 times a week. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (Southbound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from available craft.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0600 hrs. and 2200 hrs.
ANCHORAGES: No safe anchorage outside port.
RESTRICTIONS: Port closed from 1800 hrs. to 0600 hrs. No tidal restrictions.
MAX. SIZE: Length 175 m., draft 9.76 m.
RADIO: Dar-es-Salaam or Mombasa Radio.
TUGS: Join vessel off Signal Station, when available.
BERTHING: Deep-water Quay: 1,248 ft. length; 9.75 m. depth alongside at low water. 2 berths available at quay.

Sheds and Stacking Yards:

The port has 4 sheds for reception and storage of cargo with a total area of about 16,272 sq.m.

Transit shed No. 1 floor area is 3,121.4 sq.m.
Transit shed No. 2 floor area is 3,121 sq.m.
Transit shed No. 3 floor area is 728 sq.m.
B.P. shed floor area is 9,302 sq.m.
Stacking yard area is 9,000 sq.m.

Cargo Handling Appliances:

2 Jones mobile cranes (11 tons).
7 Fork lift trucks (2.5 tons and 5 tons).
5 Tractor trailers.
2 Tractors.

Marine Craft:

The port owns 2 launches and 1 pilot boat.
CARGO GEAR: Vessels load/discharge using ship's gear.
STEVEDORES: Stowage plan required, preferably 2 weeks prior to arrival. Gang arrangements to be made 24 hours before arrival.

Normal Working Hours:

Weekdays:	1st shift:	0700-1500
	2nd shift:	1445-2215
Saturdays:	1st shift:	0700-1230
	2nd shift:	1230-2030

A maximum of 3 hours overtime is permitted after 2nd shift in order to finish the ship.
MEDICAL: Doctor available. All crew require valid cholera and yellow fever inoculation certificates.
DENSITY: 1025.
FRESH WATER: Not normally available during daytime but available at night in limited quantities.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Arranged by Agents.
HATCHES: Opening/closing carried out by stevedores.
REPATRIATION: Possible.
AIRPORT: 7 miles from the port. 3 scheduled flights a week to Dar-es-Salaam International Airport.
TIME: GMT plus 3 hours.
HOLIDAYS: All holidays worked as Sunday except following days when no work done: Christmas Day and 1st May.
POLICE/AMBULANCE/FIRE: Port Police Tel. 059-2182. Port Fire Brigade Tel. 059-2062.
TELEPHONES: Direct connection on board not possible.
BANKS: The National Bank of Commerce (NBC), P.O.Box 142, Mtwara. Tel. 059-2306. Telex: 56296. This bank is within 2 km. of the port.
STORING: Trucks can proceed alongside the quay.
SHORE LEAVE: Crew allowed ashore.
IDENTIFICATION CARDS: Required.
GARBAGE DISPOSAL: Drums are provided alongside the quay. When the ship has sailed, final bills are immediately dispatched to the ship's agent for payment.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.

SHIPMASTER'S REPORT: December 1981 (Updated 1990).

Vessel called at Mtwara on 1st December, 1981. The following facts were obtained from Port Manager and Pilot:
Documents/Health: Refer to Dar-es-Salaam.
Pilotage: Pilot is based at Dar-es-Salaam and flies to Mtwara when required. Early information concerning ETA to "Harbour Master – Dar-es-Salaam". Pilot arrives by Air Tanzania regular flight. He may stay at the Pilot's Rest House or aboard the vessel. Pilot boards 0.5 miles N.W. of Shangani Reef Buoy from tug. Pilot ladder to be 3 ft. above water. Pilotage during daylight hours only. Signal station can be contacted on Channel 12 between 0600 hrs. and 1800 hrs. Channel 16 also available if required.
Approaches: Ras Msamgankuu lighthouse unlit. The entrance is approached by a channel marked by buoys and leading beacons, all unlit. Buoys only weighted and liable to drift. There are 2 unmarked anchorages to accommodate vessels of up to 9.5 m. All buoys and leads unlit.
Radio: "Mombasa Radio".
Tugs: Available from Dar es Salaam.
Cargo Gear: Ship's cranes or derricks used. Shore facilities (not used for discharging) consist of: 12 Hyster fork lift trucks (max. 3 tons); 2 tractors and 10 trailers SWL 15 tons; 2 Jones mobile cranes × 15 tons each and 5 Coles mobile cranes × 7 tons each.
Stevedores: Stowage Plan required, preferably before ship's arrival.
Medical: Doctor available. Medicine and/or injections in short supply and may not be available. All crew require valid Yellow Fever Certificates and anti-Malaria tablets should be taken on arrival.
Density: 1025.
Fresh Water: Sometimes available from quay in small quantities. No water barge.
Provisions: Fresh fruit and vegetables available in market.
Fuel: Not available.
Repairs: No facilities.
Gangway/Deck Watchmen: Arranged by Agent.
Agent: Only one Agent – National Shipping Agencies. Cable address: "Navigation Mtwara".
Identification Passes: Made out by Immigration Officials on board. Collected by Agent prior to departure.
Repatriation: Daily internal flights to Dar-es-Salaam.
Airport: 7 miles distant by road.
Time: GMT plus 3 hours (permanent).
Holidays: All holidays normally worked except Christmas Day and 1st May when no work possible.
Working Hours: Seven days weekly 0700–1500; 1500–2200 with requested extension from 2200–0100 if to finish vessel (except Heavy Lifts).
Telephones: Direct connection on board not possible.
Telex: One machine in Post Office for general use. Otherwise Agent telephones Dar-es-Salaam Agent who forwards telexes.
Shore Leave: Crew allowed ashore.
Mail: Very slow.
Main Exports: Cashew nuts, sisal, timber, pigcon peas, Casava in bags (not palletised) or bulk (bags slit).
Fenders: Tyre fenders alongside cemented quay. Additional fenders required by ship.
Cargo Security: Though adequate guards, security of cargo on quay is a problem as frequent blackouts due to power failures.
Aero (RC): Strong signal operational 0800–1530 LMT.
Restrictions: Cameras must not be used. Taking of any photographs whatever is strictly prohibited.
Customs Allowances: Officers: 8 cans beer, 1 part bottle spirits. Ratings: 8 cans beer.
Heavy Lifts: Not worked after 1800 hrs. due to darkness.
Notes: (a) All navigation lights in Tanzania (except Zanzibar Island and Pemba Island) are unreliable.

(b) If next port is Dar-es-Salaam, Pilot will remain on board and take vessel into Dar-es-Salaam.

SHIPMASTER'S REPORT: December 1983 (Updated 1990).
Documents/Customs Regulations:

Crew Declaration Form (Form C.8)
Declaration and Advice of Consumable Stores (Form C.7)
Passenger List or Nil List (Form C.6)
Parcels List or Nil List (Form C.3)

One copy of each of the above being required and 1 copy of the Manifest. (Company Manifest not acceptable, Form supplied locally.)
Dutiable goods allowance:

Each member of the crew including the Master is allowed 1 ounce of tobacco or 25 cigarettes per day. The Master and officers are also allowed a quarter pint of potable spirits and 1 quart of wine or beer. The other members of crew are allowed either a third of a pint of spirits or one sixth gallon of beer or one sixth gallon of wines. Dutiable stores are issued to a limit of 8 days (cigarettes) and 4 days (beer and spirits).
Quarantine Regulations:

1 copy of Maritime Declaration of Health.
1 Crew List with valid dates for Cholera and Yellow Fever.
Pratique not granted by radio.

Pilotage: Compulsory. Pilot is available between 0600 – 1800 hrs. and boards in an approximate position 1 to 2 miles North of Shangani Shoal.

Pilot boat (VHF Channels 12 and 16) – Pilots have hand set.

Anchorages: No recommended sea anchorage. If arriving off Mikindani Bay at night, it is prudent to cruise WELL OFF until daylight, currents are strong and set onshore.

A sheltered anchorage exists in the inner bay with reported good holding ground in about 12 fathoms.

Approaches to Berth(s): From the pilot station passing S.W. of Shoal Buoy into channel marked by an unlit buoy. The sharp bend around Msemo Spit requires very careful navigation and steering.

Radio: Standard instructions/communications.

VHF: Channels 12 and 16 available between 0800 – 1200 hrs. and 1400 – 1600 hrs. local time Mtwara Signal Station.

Tugs: Possibly available (on prior notice) from Dar-es-Salaam.

Description of Berth(s): Berth No. 3 situated on the main wharf which is of stone construction with rubber tyre fendering. Owned by Tanzania Harbours Authority.

Berthing: Night berthing/unberthing is not permitted.

Vessels normally berth starboard side to, 1 tug meets vessel off the signal station.

Mooring wires are permitted: shore gangway is available.

Density: 1025.

Tankers: Shore Lines: 10 in. Connections: 8 in. flexible hose. 65 m. from Eastern end of quay approximately. Grades: M.S., G.O., and K. Maximum Pressure: 75 p.s.i.

Ships' lifting gear required for 1.5 ton lift.

Fuel: Bunkers not available.

Fresh Water: Water supply has been improved but shortages may be felt in the dry season. It is reported to be of poor quality and should not be used for domestic purposes, unless boiled and filtered (See "Laundry and Stores").

Ballast: No ballast disposal or tank cleaning facilities available.

Port Regulations: Immobilisation of engines not permitted alongside.

Laundry and Stores Facilities: Reports indicate that fresh water and/or provisions obtained at Mtwara are of very poor quality and may have been the source of a severe infection which affected several ships' crews. Masters are, therefore, warned accordingly.

Repair Facilities: None available.

Crew Identification Cards: Crew require identity cards when proceeding ashore.

Medical: Medical facilities with government hospital available.

Precautions: Be careful of stowaways.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 530, Mtwara. *Tel:* 2155, 2121, 2183. *Telex:* 56076. *Contact:* M.J.Mungure, Port Manager.

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 25839. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 32066. *Contact:* Port Manager/Senior Harbour Master.

TANGA: 05.04 S. 39.08 E. (See Plan)

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15′ E., thence 180° to the parallel of Lat. 5° 05′ S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".

DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.

Shipmaster's Report: March 1981.

Same as Dar-es-Salaam "Shipmaster's Report" except: 7 Passenger Lists, 2 sets Vaccination Lists, Heavy Lift List.

APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° (T). A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a beacon. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° (T) until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High Light. Signals are exhibited to indicate if inner channel to harbour is clear.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun.

PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.

Pilotage is daylight only, but during the N.E. Monsoon, when vessels lie at anchor facing out to sea, Masters with previous experience of Tanga will be granted permission to sail at night without a pilot.

Masters of deep-draft vessels, or Masters who are in any doubt about their approach, may request a pilot in a position approximately one mile S.E. of Buoy No. 1.

ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.

RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 12.

TUGS: Available on request from Dar-es-Salaam.

BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency.

Fertiliser Jetty: A Fertiliser Jetty with a single berth of 16 m. maximum draft is available in the harbour. The jetty has 2 cranes connected to a sophisticated hopper system for handling materials for the fertiliser factory only.

Also see "Cargo Handling Facilities".

Quays: The new Lighter Wharf, 240 m. long, is situated at the Eastern end of the port. It has a depth of 2.44 m. at low tide. The old wharf now under modernisation has a length of 140 m., and has similar depth of 2.44 m. at low tide.

Facilities for harbour dhows and schooners engaged in coastal wise cargo transportation are provided at the end of the old wharf where only 1 schooner or dhow can work at a time. The water alongside has a depth of 2.44 m. at low tide.

CARGO HANDLING FACILITIES: One 20 ton fixed crane and one 40 ton mobile container handling crane are available on lighterage wharf for heavy lifts. 12 cranes of 5 tons capacity also available. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

The port is able to handle 20 ft. containers on 5×20 ton trailers.

The port has 33 fork lifts, 3 tractor, 1 shunter and 2 Coles cranes, 3×16 ton Scamel trailers, 6×8 ton Scamel trailers, 4 Hyster cranes, 1×35 ton front loader for container handling and 4 Scamel hoses. The above equipment is maintained by the Authority's mechanical and electrical workshops at the port.

Sheds and Stacking Yard: There are 3 sheds for reception and storage of cargo.

The main stacking yard which is rail and road served covers a total area of 20,000 sq.m. There is also a new yard which covers an area of about 861 sq.m. Shed Nos. 6 and 8 are mainly for handling exports while Shed No. 7 is for imports. Total floor space of the shed is 10,000 sq.m.

Marine Craft: The transfer of cargo from vessels working at anchor to the wharves and vice-versa is done by means of lighters. There are 30 lighters in use. In addition there are 4 lighter towing tugs, 3 runboats, 4 labour launches and 2 landing pontoons.

PASSENGER FACILITIES: All passengers and visitors to ships pass through the Customs Passenger Terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.

TANKERS: Two buoys are situated in a restricted area at the Western end of the Port for the use of local tankers transhipping oil products from Dar es Salaam.

FRESH WATER: There is no water available, even on the Lighter Wharf, due to very low water pressure.

FUEL: Only available to coasters at the lighter quay.

SURVEYORS: A Lloyd's appointed surveyor is available for cargo, container, on/off hire and draft surveys. Contact Mr.G.R.Blackway, P.O.Box 794, Tanga. Tel: Tanga 43327. Telex: 45033 NOTCO.

REPATRIATION: Repatriation is possible through Tanga, but would be far easier through Mombasa or Dar es Salaam.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Tanzania Shilling (TS.). U.S.$ 1.00 = TS.230 (13.2.92). All foreign exchange must be declared on arrival and may be checked before departure. A maximum of TS.200 may be tanken out of the country.

GENERAL: Refer to "Dar-es-Salaam" for all general information.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 443, Tanga. *Tel:* Tanga 42721. *Telex:* 45000 Harbor TZ. *Contact:* Captain C.J.E.Peason, Harbour Master (Tel: 42952).

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 25839. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 32066. *Contact:* J.R. Bailey, Principal Marine Officer.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.

PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.

ANCHORAGES: No mooring buoys. Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.

MAX. SIZE: 240 ft. length; 25 ft. draft.

TUGS: 2 tugs and 1 labour boat.

LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E. (See Plan)

DOCUMENTS:
Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.
Also Required: Bills of Lading, Ship's Papers, Ship's Certificates, Health Certificates (Yellow Fever and Cholera).

PILOTAGE: Compulsory. Pilot requires ETA 24 hours before arrival. Contact can be made through pilot station (VHF Channel 16 – 24 hours a day). Pilot boat may be contacted on VHF when in operation – pilot boat is painted orange.

Vessels approaching from English Pass embark Pilot at Seagull Buoy, and vessels approaching from South Pass meet Pilot at Penford Buoys. Pilot takes vessel in an out, day and night. Vessels awaiting Pilot anchor at the boarding position.

Recommended time for entry and departure is between 0600 hrs. and 1800 hrs.

ANCHORAGES: 6 anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.

RESTRICTIONS: 2 entrances, English Pass and South Pass. The former is approximately 1 mile wide and has minimum depth of 6 fathoms 4 ft. and a very narrow angular turning corner of 1.7 cables width. South Pass wider and deeper than English Pass. Passes are well buoyed and lit. In English Pass, tidal stream runs North and is stronger on ebb than on rising tide. South Pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide.

MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.
Also see "Developments".

HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid yellow fever and cholera inoculation certificates.

RADIO: No official call sign for the control station, but there is a new radio installation at the Agency on VHF Channel 16 with a call sign ZANSAC (Zanzibar National Shipping and Agency Corporation).

There is also a long-range radio on frequency 8297.3 kHz.

RADAR: No installation.

TUGS: No tugs are required as all vessels work in stream. Tugs are only used for towing barges to and from vessels, transporting labour and other stevedoring activities.

BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.
Also see "Developments".

CRANES: Four old cranes and 1 mobile crane of 7 tons at the Wharf. No heavy lift cranes, however if heavy lift crane required, arrangements are easily made to put the load in a landing craft to be discharged at a point near the port, using lowloader to tow it to its destination. No objection to vessel using its own gear.

BULK CARGO FACILITIES: No berth for foreign vessels, all work carried out in stream.

Discharging Rate: 350 – 400 tons per gang per day in case of bagged stuff or pallets. No facilities for bulk cargo handling or containers, but one or two containers can be handled.

STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700 to 1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.

LIGHTERS:
2 lighters, open at the top for heavy equipment 280 tons each.
2 lighters for bag and general cargo, each with a capacity of 300 tons.
5 lighters for bag and general cargo, each with a capacity of 200 tons.
5 lighters for bag and general cargo, each with a capacity of 150 tons.
6 lighters for bag and general cargo, each with a capacity of 100 tons.

FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by hydrant or at the anchorage in the stream by water barge.

FUEL: Not available.

SURVEYORS: Department of Marine Transport, P.O.Box 263. Tel: 32857.

STORING: See "Prelims".
1. Storage done by barges.
2. There is no restriction in doing so, provided the Master can allow both operations to be done simultaneously.
3. Yes.
4. Yes.
5. Stores have to be checked by the Customs Authority.

GENERAL: Members of the crew who wish to fish around the harbour limits have to notify the Signal Station and the harbour police of direction they are going. If the crew wish to visit the offshore island, they have to contact the Agent who will obtain permission for them and advice.

DEVELOPMENTS: *Malindi Wharf:* Rehabitation of the wharf expected to be completed by early 1990.

The West Wharf: Facing West with a total length of 260 m. This is a combined length of 170 m. on the Northern end with 9.0 m. water depth for longer vessels of up to 30,000 d.w.t. The Southern portion of 90 m. length with 5.5 m. water depth is for smaller vessels berthing.

The North Wharf: Facing North with 130 m. length and 5.5 m. water depth. This will also be used for smaller vessels' berthing.

The new jetty will extend some 10.0 m. further seaward of the existing one, and will have a container storage area located on the Southern end of the West Wharf.

AUTHORITY: Department of Marine Transport, P.O.Box 263, Zanzibar, Tanzania. *Tel:* 32858. *Telex:* 57267 Shipco TZ. *Cables:* Shipping. *Contact:* Captain Ramadham Saleh, Port Officer. Major H. Kh. U. Mlinde, Director, Department of Marine Transport.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

GENERAL:

IMMIGRATION: The Thai Immigration Department has issued a Notification, dated March 15th, 1976 to the following effect:

"Chinese or Hong Kong crew members not in possession of Seamen's Discharge Books, but holding Certificates of Identity only are not recognised as bona fide crew members, and are liable to Immigration Guarantees at 50,000 Baht per person, to be filed upon arrival."

All concerned are kindly requested to check and ensure that all Chinese crew members are in possession of either Passports or valid Seamen's Discharge Books, and not Certificates of Identity, to avoid complicated Immigration procedures involving deposits, etc.

REGULATIONS: Thai Government Regulations: Thai laws relating to the production, possession, distribution and use of narcotic drugs are extremely severe. Penalties for infringement range from prison sentences and fines to life imprisonment and even execution.

The Thai Navigation Act requires Masters of all vessels calling at Thai ports to observe the following:

On preparing to depart Thai waters, vessels shall fly the International Code flag indicating that the vessel is about to proceed to sea (code flag P).

If the vessel is to depart in the morning this flag is to be flown in the afternoon of the previous day, if departure is in the afternoon, code flag 'P' is to be flown in the morning.

Departure shall be notified to the Harbour Master at least 6 hours before expected time of departure.

Documents required by Port Authorities (other than those required for specific ports) include:

Ship's Licence and Safety Equipment Certificate.
Certificate of Registration.
Certificates of Competency (including Radio Officers).
Radio Certificate.
Ship's Articles.
Last Port of Call Clearance.
Log Book.
Load Line Certificate.
Derat or Exemption Certificate.

BANGKOK: 13.26 N. 100.35 E. (See Plan)
KOHSICHANG: 13.10 N. 100.50 E.

PORT LIMITS: A vessel is normally considered to be an "arrived ship" on passing the Paknam Customs Station.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Stores List; List of Arms and Ammunition for ship's use; List of Arms and Ammunition in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage Plan; Inward Cargo Manifest; Transit Cargo Manifest; Through Cargo Manifest; List of Containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

For safety reasons, all dangerous goods such as calcium hypochlorite, butanox (methyl ethyl ketone peroxide), sodium hydrosulphide, nitrocellulose and potassium chlorate, are not allowed to be kept in a godown or dangerous goods warehouse. Such dangerous goods have to be discharged overside into a barge or cargo boat or truck.

APPROACHES: The entrance of the river Chao Phraya is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 100° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 100 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. from MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. (565 ft.). The limiting draft of vessels will be determined by the bar constant plus the depth of water (predicted in the Tide Table published yearly by the Hydrographic Department RTN) from LLW at the Bangkok Bar, but the max. draft of vessels allowed to cross the bar is not over 27 ft.

PILOTAGE: Compulsory at Bangkok (Kohsichang not required); Advance notice required 48 hours prior to arrival.

Bangkok Bar Pilot Station (Red and white structure): Lat. 13° 22.6′ N., Long. 100° 35.9′ E. Pilot boards within 3 cables of the station.

Also see "Shipmaster's Report" dated March 1984.

ANCHORAGES: See "Shipmaster's Report" dated March 1984.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel.

Kohsichang: No restrictions, able to enter day and night.

MAX. SIZE: Bangkok: Not exceeding 172 m. LOA. Max. draft 8.2 m.

Kohsichang: See "Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations Article 36:

Under the responsibility of ship's Master and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through Radio Pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship or anything suspect about health or ship sanitation, the ship's Master is requested, as early as possible, to inform the Port Health Officer at International Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derat or Derat Exemption Certificate.

Vaccination: Vaccination Certificates required: Cholera (only when leaving from infected areas); Yellow fever (only when leaving from infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion that vaccination is contra-indicated on medical grounds, he shall provide the persons with reasons, written in English, underlying that opinion, which Health Authorities should take into account.

Death on Board: In the case of death on board after the ship arrived at the anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Officer if there are cadavers and/or remains on board of persons who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including persons having physical or mental defects who cannot earn their living.

RADIO/VHF: The Port Radio Station located at Lat. 13° 42′ 38″ N., Long. 100° 35′ 58″ E., is operated by the Port Authority of Thailand (P.A.T.) for the use of port business only.

Port Radio "Bangkok Thailand", call sign HSC 61 Station.

The incoming vessels are to communicate with port operators at the distance of between 1,500 – 2,000 miles by radio telegraphy.

HF – Power 1,000 watts.
– Port transmits on 8,466 kHz.
– Port receives on 8,363.2 – 8,367.2 kHz.
– Open 5 times a day at 0700, 1000, 1300, 1600 and 2000 hrs. GMT (About 30 minutes each time).

Information required from the vessel includes:

(1) Vessel's name and nationality.
(2) Last port of call.
(3) Estimated time of arrival at Pilot Station.
(4) Draft (fresh water) in feet or metres.
(5) General cargo tonnage to be discharged.
(6) Dangerous cargo.
(7) Heavy lift required.
(8) Fresh water required.
(9) Number of passengers (landing and transit).
(10) Time of dropping anchor at Pilot Station.

So as to check the time to reach the Pilot Station, when entering the Gulf of Thailand, or at the distance between 400 – 1,000 miles, the vessel has to communicate with port operators again by radio telegraphy.

MF – Power 1,000 watts.
– Working frequency 500, 480, 454, 443, 425 kHz.
– Calling frequency 500 kHz.
– Traffic lists broadcast daily at 0450 hrs. GMT, and the beginning of every hour (2300 – 1700 hrs. GMT).

Upon reaching the Bar Channel, or at the distance of 6 – 10 miles from the Pilot Station, communication by radio telegraphy is to be changed to radio telephony, call sign "Port of Bangkok",

VHF – Power 60 watts,
Calling Channel 16,
– Working Channel 14,

so that the vessel shall be informed of its mooring place.

Communication with the radio station of the Communications Authority of Thailand is required for any other business.

TUGS: Will join when vessel approaches berth, using tug's line without extra charge. 8 tugs available, 1,000 h.p. – 1,200 h.p.

BERTHING: No difficulties in approaching berth. Agents will cable Master to inform when Pilot has been ordered to board vessel.

Final berth allocations are made each day at 1000 hrs. by a committee under the chairmanship of the Deputy-Director (Operation) of the Bangkok Port. The policy is known to be *First Come First Served* within certain conventions. Warships are given first priority in case of necessities.

Ships with break bulk import cargoes are berthed at the West Quay. The dolphins and buoys are used to moor vessels loading exports, or undergoing minor repairs, etc. Vessels, on completion of discharge, and with cargo to load are moved to the dolphins. Container ships, which include combo and feeder ships, are berthed at the East Quay. This is the general pattern of berth allocation, but there may be exceptions from time to time to meet the requirements of the day.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.
2 berths in front of Co-operative Salt wharf for 500 ft. vessels
4 berths in front of Customs boarding station for 300 ft. vessels.
2 berths at Bangplakod for 565 ft. vessels.
1 berth at Bangplakod for 500 ft. vessels.
6 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.
3 berths North Sathupradit for 400 ft. vessels.
4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:
Container terminal has a depth of 11.5 m.
16 berths at the East Quay and the West Quay for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels with 27 ft. draft.
1 berth for imported cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.
2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.
14 berths for imported petroleum products operated by private and government organisations for 150 ft., 350 ft. and 565 ft. vessels.
54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.
36 dolphins in front of Klongtoi Wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi Wharf, to accommodate 7 ocean-going freighters for exported cargo. Max. draft 8.2 m.
25 dolphins at Bang Hua Sua, Samutprakarn to accommodate 8 ocean-going freighters for imported-exported cargoes. Max. draft 8.2 m.

Kohsichang: 7 berths available, no limit on length, max. draft 35 ft. – 47 ft. Kohsichang is not under the jurisdiction of Port Authority of Thailand.

Also see "Shipmaster's Report" dated September 1982.

CRANES: 2 floating cranes of 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

Port Authority Equipment:	*No.*	*Capacity*
Gantry cranes	6	32.5 tons
Terminal tractors	20	45 tons
Semi portal cranes	12	3-5 tons
Mobile cranes	28	5-165 tons
Side loaders	2	35 tons
Top loaders	5	10-35 tons
Forklift trucks	430	5,000-10,000 lbs.
Towing tractors	39	8,000-12,000 lbs. DBP.
Trailers	51	5-30 tons
Yard hustlers	25	30 tons
Tractors (for trailer)	7	30 tons
Fifth wheels	7	—
Full trailer vans	5	5-7 tons
Motor trucks	144	5-7 tons
Container shifters	4	30 tons
Chassis for container	78	30 tons
Pallets	66,550	—

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required. Undertaken by private companies.

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs. – day shift, 1630-1800 – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 hrs. – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: Diameter of shore line various from 6 in. to 20 in. All terminals are able to provide reducers. No slop facilities available.

DENSITY: Bangkok: Minimum 1000, maximum 1011; Kohsichang: 1021.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barge and alongside terminals, no delay on bunkering, advance notice 48 hours.

REPAIRS: Only minor repairs.
DRY DOCKS: One for vessels up to 360 ft. LOA.
GANGWAY/DECK WATCHMEN: Necessary. Theft of wire, paint and tools has occurred.
OPENING/CLOSING HATCHES: In general carried out by stevedores without extra charge. (Ordinary hatch covers, not new hatch cover system.)
CUSTOMS ALLOWANCES: *Customs Regulations:* It is prohibited by law to bring the following articles into Thailand: narcotics: hemp, morphine, cocaine, opium, heroin, marijuana etc.; obscene literature or pictures, firearms or ammunition (except those obtained by permit from the Police Department or the local registration officer).

Following items are permitted to bring into Thailand free of duty: personal effects: accompanied with the owner for his own or professional use in reasonable quantity, except motor vehicle, fireams and ammunition, provisions. As for spirituous liquor, cigarettes, cigars or smoking tobacco, being personal effects and accompanied with the owner, the Director General of Customs may impose any restriction with respect to the exemption from payment of duty at any port as he considers suitable but the quantity must not exceed: (a) cigarettes; two hundred grammes, (b) cigars, smoking tobacco; two hundred and fifty grammes, each or altogether, (c) spirituous liquor; one litre. Photographic/cinematographic apparatus and sound recording machines imported by persons who temporarily visit Thailand for the purpose of taking photographs or recording; but films, plates or articles for recording, imported for such purpose must be in accordance with the condition and quantity specified by the Ministry of Finance: (a) photographic films (roll); not exceed 5 rolls, (b) photographic films (plates); not exceed 40 plates, (c) cinematographic films (8 or 16 mm. in width); not exceed 5 rolls, (to be re-exported within six months from the date of importation).

Permanent residents of Thailand must register their cameras on the outgoing trip to gain duty free status.

The export of Buddha images and antiquities are prohibited except for qualified educational, cultural and archaeological purposes.
CARGO GEAR: Supplied by stevedores except cargo tent and forklift truck.
REPATRIATION: Possible; however, no facilities for crew changes.
AIRPORT: About 25 km. from Bangkok, regular services by airlines.
TIME: GMT plus 7 hours. No change during the year.
HOLIDAYS: Able work all around the year except December 31st and January 1st.
POLICE/AMBULANCE/FIRE: Police (Highway) 816240, 816241, 816250. (C.I.D.) 219111, 225151; Ambulance 811544; Fire 816666, 811544.
TELEPHONE: Available when alongside PAT berths.
SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's, ABS, Veritas, Nippon Kaiji Kentei Kyokai Surveyors available.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required for all crew and officers.
DELAYS: Occasionally congestion, delay 1 to 2 days.
DEVELOPMENTS: 3 Container cranes on order.

SHIPMASTER'S REPORT: September 1980.
During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave pilot station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (Crew List) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

SHIPMASTER'S REPORT: September 1982.

Loading of tapioca products in bulk quantities of 25,000 tons and more at Kohsichang:

There are three ways of loading:

1. Vessel anchors off the N.E. coast of the main island. A number of mobile cranes, 12 to 15, are placed on deck by means of a floating crane. The cargo is brought alongside in barges, shovelled by stevedore-labour in canvas slings and dumped into the cargo holds. An average of approximately 3,500 tons per day can be reached, however, delays are experienced by rain and by too much swell for some of the barges alongside.

Stevedore Labour: An average of 300 persons (men, women, children) are onboard during the whole of the cargo operation. The cooking is done on deck. The daily fresh water consumption will increase by 20 tons to 25 tons. Fresh water is available by barge from the mainland.

This way of loading involves most ships; 7 to 9 ships can be handled simultaneously.

2. At the same anchorage as No. 1 above, the vessel will have alongside two floating elevators. A daily average of 13,000 tons can be reached, also depending on rain/swell. Many less people are involved. One ship at a time can be loaded.

3. Loading alongside a silo based on the mainland. The daily average here will be about 14,000 tons, however at a draft of about 40 ft. – 42 ft. the vessel will have to shift to the anchorage to complete loading as under 1 or 2 above, most probably No. 1. The silo belongs to 2 shippers of cargo only.

Trimming of cargo is done mainly by means of bulldozers but trimming by hand/shovel is often required additionally.

Holding ground at anchorage is good. Ships swing round on a rather strong tide. Wind/rain squalls are experienced.

SHIPMASTER'S REPORT: March 1984.

Pilotage: There is no longer a pilot vessel at the Bar. Instead, a peculiarly shaped red-painted lighthouse type beacon has been erected. This beacon has accommodation for the Pilots, who board vessels using a small grey pilot boat. Position of beacon: Lat. 13° 22.8′ N., Long. 100° 35.9′ E. (BA Chart 1046).

Anchorages: Bangkok Bar Anchorage: Any ship with draft able to enter Bangkok Harbour, can anchor at this anchorage to wait its turn to enter. Limits of this anchorage are shown on BA Chart No. 1046. Ships proceed close to the beacon mentioned under "Pilotage", to pick up the Pilot.

Kohsichang Anchorage: There are no longer any N.E. or S.W. monsoon anchorages. Throughout the year Kohsichang Harbour limits are from the Island, East to Long. 101° 51.5′ E. and between Lat. 13° 08.9′ N. and Lat. 13° 11.3′ N. (Thai Chart No. 114).

AUTHORITY: Port Authority of Thailand, Klongtoi, Bangkok 10110, Thailand. *Tel:* 2490399, 2490362. *Telex:* 72331 Pat Th. *Cables:* Pat Bangkok. *Contact:* Director-General.

AGENT: Jardine, Matheson (Thailand) Ltd., Shipping Agency Division, 1032/1–5 Rama IV Road, GPO Box 40, Bangkok. Tel: 2869951/70. Telex: 82672 Jarthai. Cables: Jarthai. Fax: 2871556, 2872420.

KANTANG: 07.25 N. 99.31 E.

SHIPMASTER'S REPORT: April 1982.

PORT LIMITS: Vessels anchored in the bay between Ko Talibing and Ko Liang Hnua are considered to be "arrived ships".

DOCUMENTS:

6 Crew Lists.
4 Passenger Lists.
2 Stores Lists (including dangerous drugs, explosives, bonded items, ship's wireless sets, TV, radio, etc.).
2 Personal Property Declaration.
2 Cargo Manifests.

PILOTAGE: Not compulsory.

Due to shallow waters and absence of chart it is recommended to take the services of the local Pilot, though he speaks only local language. Pilotage distance is about 15 miles up the river.

Pilot boards at the anchorage and takes the vessel up to Kantang. Berthing is also done by him, but it is recommended that the Master does this himself.

ENTRANCE: No large scale chart is available. The only chart available is B.A. Chart No. 3942.

Keep well clear of Light Ko Liang and after passing Ko Liang Hnua on the starboard side keep equidistant from Ko Talibing and Ko Liang Hnua. Depth of water is about 10 m. up to Ko Liang Hnua Point (bearing 190°×4 miles approx.). This place is good for anchoring.

While going up and down river, there is a Customs check post at the mouth of the river and the vessel has to stop for Customs check and sign the register.

The maximum depth in the river at high water is about 5.5 m. at Springs and as low as 3.5 m. at Neaps.

The loading should be restricted as per the tidal conditions.

HEALTH: No Port Health Officer available. Hence Free Pratique not required.

RADIO: No way of communicating with the port from vessel. ETAs, etc. should be sent from the previous port by cable. On receipt of the ETA the local Agents will arrange berthing, etc.

VHF: Not available.

BERTHING: Berth is approximately 140 m. length. Hand leadline sounding at berth indicated depths minimum 10 ft. and maximum 16.5 ft. at low water and minimum 16 ft. and maximum 22.5 ft. at high water.

While the vessel is being loaded it sits on the bottom at low tide and again floats at high tide. The ground is soft sand. Since the vessel is not afloat at all times the cargo calculations and distribution should be accurate.

The main exports are cement in bags, fish meal and rubber in pellets which is mainly exported in LASH barges. The barges are loaded once a month. Generally half the wharf is occupied by LASH barges.

One oil berth also available. Small tankers with about 4 m. draft can go alongside.

CRANE: One mobile crane of 5 ton capacity is available. Priority given to loading LASH barges.

FRESH WATER: Available. Supplied by a small boat of 4 tons capacity.

FUEL: High speed diesel is available. Price is very high.

CONSULS: No consulates or embassies.

REPAIRS: Small repairs can be effected.

WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: MacGregor hatches opened and closed by Crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: Supplied by the Stevedores.

REPATRIATION: No crew changes possible.

TELEPHONES: Trunk calls can be made from the main Telephone Exchange. Sometimes delays up to 1 hour is normal.

STORES: No ship chandler. Market is very close to the berth where fresh vegetables, pork, fish, beef and chicken available. No mutton available but live goats can be purchased.

KHANOM: 09.12 N. 99.54 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

LOCATION: Khanom, Nakorn Si Thammarat (Sumpun Mining Wharf).

DOCUMENTS: Same documents as Bangkok.

PILOTAGE: Not available. Wharf Foreman will board at anchorage and will give berthing advice.

ANCHORAGE: Lat. 09° 12′ N., Long. 99° 54′ E.

MAX. SIZE: *New jetty:* 25,000 d.w.t. Draft 9.0 m. – 9.5 m.
Old jetty: 15,000 d.w.t. Draft 8.5 m.

TUGS: None available. Small boat assists with running lines.

BERTHING: *New Jetty:* Vessel is moored to 6 buoys (3 forward and 3 aft) and is kept 3.0 m. off the jetty. Vessel is to be equipped with 6 lines of at least 240 m. length each.

LOADING: *Loading:* One belt conveyor for loading gypsum in bulk, rate 500 – 550 tonnes per hour.

Shifting: Good co-operation required with Foreman as vessel had to shift 3 or 4 times for each hatch.

Trimming: By small bulldozer, weight 2,000 kg.

KRABI: 08.04 N. 98.44 E. (See Plan)

DEVELOPMENTS: A deep sea port is to be constructed at Krabi. Construction to be completed between 1991 and 1997. Depth alongside 8.0 m. – 9.0 m.

SHIPMASTER'S REPORT: June 1987.

DOCUMENTS:

6 copies Crew List.
4 copies Crew Personal Effects Lists, including Currency Declaration.
4 copies Bonded Stores List.
4 copies Deck, Engine and Provisions Stores List.
2 copies All electrical items belonging to vessel (T.V., radios, tape recorders, video recorders, refrigerators, etc.).
Certificate of Registry.
Last Port Clearance.
All valid Safety Certificates.

Immigration: On arrival and departure all Crew Members have to sign a Thailand Immigration form in duplicate. All crew members must be in possession of Seaman's Discharge books.

APPROACHES: We used BA. Chart 3941. Berth can be approached from South West between islands of Ko Dok Mai and Ko Kai. Care must be taken of rock 6 ft. high (Him Hmusang), and the dangerous rock (P.D.) 1 mile N.N.W. of Him Hmusang. Coast and islands well defined on radar. It is best to approach in daytime due to the absence of any lights or navigational aids. The only light is East of Phuket (Ko Taphao Noi). The port can also be approached from South, keeping 2 miles to 3 miles East of Ko Kai and setting course 2.5 miles from Ko Ngang. The stockpile of gypsum is clearly visible from a distance of 6 miles. Approach is very picturesque.

PILOTAGE: No pilot available. A Loading Master boards with the Agent at anchorage and advises Master regarding manoeuvring and berthing. At berth vessel uses port anchor with 3 shackles and must have 14 good mooring ropes, minimum length 200 m. each and 70 mm. diameter.

ANCHORAGE: Anchorage when awaiting berthing is about 1.5 miles West of the trestle berth.

MAX. SIZE: Depth alongside at low water is 13.0 m. – 14.0 m.

HEALTH: Pratique granted by boarding party at anchorage. All ships personnel to have valid Health Certificates.

RADIO/VHF: Bangkok Radio (HSA 4) used for contacting Agents and Charterers. VHF via Phuket Radio. Overseas calls can be made via Phuket Radio. Vessel allowed to use ship's radio station while loading.

TUGS: None available.

BERTHING: Vessel berthed at Leamphong Jetty at Krabi (South Thailand) to load Thailand natural gypsum in bulk.

Vessel manoeuvres to within 25 m. – 30 m. of the finger conveyor loading spout, and first drops port anchor. Then 2 lines each are given to bow and stern buoys, also 2 each to port bow and starboard bow and stern buoys. The vessel then breasts on the starboard lines to bring the starboard side to about 5 m. from the dolphin and spout. An extension conveyor is hung from the ship's crane to convey the gypsum into the hold. The vessel then shifts on mooring lines to bring the other holds under the spout. It is advisable to pre-plan loading so as to avoid unnecessary shiftings.

All mooring lines are to have equal strain and are to be kept tight. The bow and stern lines prevent the vessel from getting too close to the loading spout and dolphin.

Vessel must arrive with full ballast as the height from the waterline to the loading conveyor 12.0 m.

Loading rate is approximately 300-400 tonnes per hour.

The vessel's cranes/derricks must be capable of lifting the extension conveyor (approximately 3 tonnes) and bulldozer (approximately 2 tonnes).

MEDICAL: Medical attention only available in the most severe cases. The medical facilities are in Krabi town.

DENSITY: 1022.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None available locally.

REPAIRS: No facilities available.

SURVEYORS: None locally, but may be arranged from Bangkok.

CUSTOMS ALLOWANCES: Normal allowances.

REPATRIATION: Possible through Bangkok.

SHORE LEAVE: Allowed. Nearest town is Krabi, distance 30 km., half the journey is on an uneven dirt road. Crew have to climb a vertical steel ladder fixed to one of the trestle supports of the conveyor.

An excellent beach, safe for swimming, lies very close to the moorings.

GENERAL: There is no need for special watchmen as only personnel required for loading board the vessel. There are about 10 persons on board at any time. Other normal precautions to be taken.

Agent: Thaising Shipping Services Co. Ltd., No. 2/17-19, TSS Building, Soi Sukhumvit 24, Phrakanong, Bangkok 10110, Thailand. Tel: 259-0247 (6 lines). Telex: 84436, 20012 (THAISIN TH). Cables: TSSSCO. Fax: (662)-258-5163.

SHIPMASTER'S REPORT: December 1988.

DOCUMENTS: See "Bangkok".

A large party of Customs and Immigration Officials, etc. will board by launch when moored at the berth. Formalities quite straightforward.

PILOTAGE: No licensed Pilot as such, but a local "Berthing Master" may assist in berthing. This is recommended because the vessel has to pass between the mooring buoys, a number of which are below the sea surface. The ship's Master will have to manoeuvre himself. Depths are in excess of 14.0 m. during the approach manoeuvres.

ANCHORAGE: About 1 mile from the berth in position Lat. 08° 04.4′N., Long. 98° 43.7′E. Depth of water 11 fathoms – 15 fathoms. The holding ground is good.

BERTHING: *Berth Position:* Lat. 08° 04.5′ N., Long. 98° 44.6′ E., about 1.55 nautical miles from Ko Kwang. Name of berth: Leamplong Jetty. Depth at berth: 12 m. minimum at LLWS. The berth consists of 7 mooring buoys.

Mooring Arrangment: Port anchor to be used. The vessel will have to prepare 5 light floating hawsers of 220 m. forward and 6 similar lines aft.

Two launches are used to assist with the mooring operation, which may be quite lengthy, because of the poor condition of some mooring buoys. On our visit 3 of the buoys were half submerged, necessitating the assistance of good swimmers/divers. Therefore, no attempt should be made to moor during a squall or when a strong tidal stream is running, it may reach 2 knots at times. No mooring during night time.

LOADING: *Air Draft:* Strict maximum of 11.0 m., to the top of the hatch coamings.

Loading Facility: The only commodity handled at this port is natural gypsum in bulk. A long flight of conveyor belts terminates on a wooden platform on steel piles. These piles are quite dilapidated and on no account may the ship's side rest against them. The final piece of conveyor belt, about 15 m. long is held aloft by the ship's cranes. Therefore only geared bulk carriers are suitable to load here. Minimum SWL of ship's gear to be 12 tons.

The vessel will have to shift with her mooring lines in order to present each hold in front of the conveyor system. Trimming is done with a small bulldozer.

Loading rate: 350 tonnes per hour (conveyor capacity). The daily loading rate is about 7,000 tonnes, depending on stoppages for shifting the vessel. Regular and careful check of the draft is necessary as there are no weighing facilities ashore.

Working hours: 24 hours per day, Saturday and Sunday included.

Cargo: This natural gypsum has a stowage factor of about 0.82 cu.m./ton and has a water content as it is stowed in the open. Within 24 hours to 48 hours of completion of a hold, the bilges will already be full.

GENERAL:

Facilities/Shore Leave: Small quantities of fresh fish may be purchased locally, but very little else.

All access to and from the vessel is by launch and the starboard gangway.

The small town of Krabi is said to be 35 km. from the Leamplong Jetty, all by dirt road. Access is reportedly difficult during monsoonal rain.

Shore leave is permitted but should be restricted in view of road conditions.

The local agent, charterer's representative and one draft surveyor have to be accommodated on board during the whole stay.

Airport: The nearest airport is on the island resort of Phuket, which is connected by a regular boat service to the small town of Krabi. Phuket has several daily flights to and from Bangkok and several International flights.

Charts: BA. 3941. No large scale chart available.

LAEM CHABANG: 13.05 N. 100.53 E. (See Plan)

DOCUMENTS: See "Sriracha".

PILOTAGE: Pilotage is compulsory and will be provided by official Harbour Department pilots. Procedure for obtaining pilots is the same as for Bangkok.

Pilots can also be contacted by VHF Channel 13, 14 and 16.

ANCHORAGES: Anchorage can be obtained off Laem Chabang in position Lat. 13° 04′ 30″ N., Long. 100° 50′ 30″ E., at a distance of approximately 2.2 – 3.8 nautical miles from the port in depths of 14.0 m.

If necessary, sheltered anchorage can be found off Si Chang Island (Koh Si Chang, about 5 – 6 miles N.W. of Laem Chabang Port).

APPROACHES: The available depth in the Approach Channel is 14.0 m. at M.S.L. (approx. 12 m. at L.L.W.).

Directions: All vessels must obtain berth allocation from Laem Chabang Port prior to entering port. Procedure will generally be arranged through ship's Agent. No vessel should enter without berth having been allocated.

Vessels carrying hazardous cargo should obtain special permission from Laem Chabang Port, either through their Agent or directly.

To facilitate landfall, a light (flash 10 secs.) and racon are exhibited from Khao Krabang VTS Station.

Port should be entered from a position off Buoy F. The direction of approach from sea into port entrance is 131°. Vessels pass between Entrance Buoys No. 1 and 2, and then between port and breakwater. The angle between the centre line of entrance and the port basin is 108°.

MAX. SIZE: 60,000 d.w.t. (approx.).

RADIO/VHF: Port radio services are available on following frequencies:

VHF: Channels 12, 13, 14, 15, 16, 17, 18, 20, 23, 30, 67, 68 and 70.
HF: 8364 kHz, 8466 kHz, A1A, A2A 1 kW and 4145.0, 4420.8, 7949.0, 8292.5 kHz, J3E.
IF: 2182 kHz, A3E, H2E, 1 kW.
MF: 500 kHz, 428 kHz, A1A, A2A, 1 kW.

RADAR: A VTS Station, equipped with 'X' and 'S' band radar, is situated on top of Laem Krabang Hill.

TUGS: 2 tugs of 800 h.p. and 5 tugs of 3,000 h.p. are available. Tugs can be contacted on VHF Channel 13. Tug services are supplied by Laem Chabang Port.

Tugs will make fast upon Master's request, either inside or outside the breakwater.

BERTHING: There are 4 terminals available along the South Quay and they are numbered from landward to seaward.

Terminal No. 1: Multi-purpose Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated by Laem Chabang Port.

Terminal No. 2: Container Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated temporarily by Laem Chabang Port but soon to be leased to a private company.

Terminal No. 3: Identical to Terminal No. 2. Operated by ESCO. Tel./Fax: +66-38-351753.

Terminal No. 4: Identical to Terminal No. 2. Operated by TIPS. Tel./Fax: +66-38-351754.

All Terminals have a height of 3 m. above MSL.

Along the North Quay, 3 terminals are available:

Coastal Terminal: Length 300 m. Height above MSL 3.0 m. Depth alongside MSL 6.5 m. (approx. LLW 4.5 m.). Operated by Laem Chabang Port.

Bulk Terminal No. 6: Jetty structure (to be completed), will probably be leased for export of bulk and bagged sugar and for molasses. Water depth MSL 14.0 m.

Bulk Terminal No. 7: Jetty structure to the West of the North Quay (along the Approach Channel) to be completed. Designed for the export of tapioca. Water depth MSL 14.0 m.

CARGO HANDLING FACILITIES: Each container terminal is equipped with 2 rail mounted quayside container gantry cranes of 40 tons capacity under the spreader, outreach 32 m.

They are also equipped with rubber tyred gantry cranes on the container yard and miscellaneous handling equipment.

The Multi-purpose and Coastal Terminals are equipped with mobile cranes.

The Bulk Terminals are still being developed. They are not yet operational.

CRANES: 6 quayside container gantry cranes with capacity 40 tons under spreader.

Mobile Equipment:

2×60.0 ton mobile cranes.
1×40.0 ton mobile crane.
2×30.5 ton reach stackers.
Forklift truck from 2 tons – 10 tons.
1×30.5 ton top loader.
1×30.5 ton container shifter.

Rubber tyred gantry cranes, yard tractors, chassis and flat-bed semi-trailers and motor trucks.

MEDICAL: Medical services are available at Laem Chabang Polyclinic. Another modern and larger, well equipped hospital is situated about 10 km. to the South of the Port near the famous international seaside resort of Pattaya. Most doctors understand and speak English and other foreign languages.

FRESH WATER: Available at a rate of 60 t.p.h.

FUEL: Fuel can only be supplied by truck. Major oil suppliers can be contacted:

P.T.T. : Petroleum Thai Authority,
5th Floor, Industry Sale Section,
State Enterprise Sale Division,
Lardprao, Bangkok 10900.
Tel: (02) 537-2321-25.
Fax: (02) 537-2323.

Lubricate Products Department,
Sitthivorakich Building,
11th Floor, 5 Soi Pirat,
Silom Road, Bangluk,
Bangkok 10500.
Tel: (02) 235-5855-8.
Fax: (02) 238-5313.

CONSULS: Embassies and Consuls are situated in Bangkok, about 120 km. (approx. 2 hours by road) from Laem Chabang Port.

REPAIRS: Only minor repairs can presently be executed.

An area to the North of the port has been leased for the development of a ship repair yard. It is expected that their services will be available by 1993.

AIRPORT: An international airport is situated at U-Tapao, about 50 km. South of Laem Chabang.

Don Muang International Airport (Bangkok) is situated about 150 km. to the North.

GARBAGE DISPOSAL: Garbage is collected from vessels by truck or garbage boat at vessel's request. Charges are included in Port Dues. No drums or skips are made available (vessel's plastic garbage bags are generally used).

WASTE OIL DISPOSAL: No waste oil disposal service is presently available, but is expected by Mid-1993.

SEAMAN'S CLUBS: No Seaman's Club available. Shops, postage facilities, telephone services, etc., available at Pattaya, which can be reached by pick-up taxi.

CURRENCY: Thai Baht. U.S.$ 1.00 = 25.5 THB (25.2.92). One Baht divided into 100 Satang (almost out of use). Coins of 1 Baht (different sizes are in use), 5 Baht (Copper rim), 10 Baht (Copper inlaid centre) and bills of 10 (brown), 20 (green), 50 (blue), 100 (red) and 500 (purple) Baht available.

GENERAL: *Rescue and Distress:* The port tugs are available for rescue and distress missions. The Royal Thai Navy has a radio system, helicopters and ships available at Sattahip Naval Base for rescue and distress.

Rail Links: A railway links the Port (Container, Multi-purpose and Bulk Terminals) via a marshalling yard at Ao Udom and the Sri Racha Railway Station to the network of the State Railway of Thailand (SRT). It is expected to be operational by Mid-1992.

Small Craft Facilities: Small craft visiting the Port can generally berth at the Coastal Terminal. Alternatively, they can anchor in Laem Chabang Fishing Port, situated to the North of the Port, just South of Khao Laem Chabang.

No special yacht moorings are available.

Deratting: Deratting services are available. Contact Rentokil at 47/35-36 Moo 9, Sukhumvit Road, Banglamung, Chonburi. Tel: (038) 422-686-7. Fax: (038) 426016.

Services: Ship chandlery is available. Contact ship's Agent or Terminal Operator.

Compass adjusting is available. Contact ship's Agent or Terminal Operator.

Tank cleaning services and hull painting services will be available by 1993.

Communication: Laem Chabang Port is connected by road to Bangkok and beyond, to Pattaya, Sattahip, Map Ta Phud and beyond, and to the whole N.E. part of Thailand.

Upon completion of the bridge over the Mekong River in Nongkai (scheduled for 1994), the Port will be connected by road and by rail to Laos.

AUTHORITY: Laem Chabang Port, T.Tungsukla, A.Sriracha, Chonburi 20230, Thailand. *Tel:* (038) 351-761-80, Ext. 103. *FAX:* (038) 351-789. *Telex:* 75814 Lcp Th. *Contact:* Commander Karn Tantivejakul, Port Director.

AGENT: See "Bangkok".

PHUKET: 07.49 N. 98.25 E. (See Plan

LOCATION: The Port of Phuket is located on the Western seaboard o Thailand, on the Andaman Sea in position 07° 49′ N., 98° 24′ 30″ E.

DOCUMENTS:

Entry documents and advance information.

Customs and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket. Sent in advance to the Agent from one of the previous ports together with request for the following informatio required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.

PILOTAGE: There is no official Pilot available.

ANCHORAGES: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from November through March, and periods of strong Easterly winds, vessels are recommended to anchor in position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores, before proceeding to the actual anchorage for loading at position Lat. 7° 57′ N., Long. 98° 33′ E., about 1 mile off Koh Yac Hyai, depth approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods, cargo operation will be carried out at the first mentioned anchorage.

During the S.W. Monsoon season: Prevailing from April through October, and any periods of strong Westerly winds, vessels are recommended to anchor at position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 nautical miles off Laom Mai Pai, depth approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.

RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing Buoy No. 3 on a rising tide (South to North) just before high tide.

Width of Channel: Minimum 230 ft. at Buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Maximum 900 ft. at Buoy No. 4 measured at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between Buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between Buoy No. 6 and Koh Tapao Noi.

(2) The draft at Buoy No. 6 is about 24 ft. 6 in. at Lowest HW.

(3) At Buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pair is about 150 ft. and vessels are required to pass between these mooring buoys.

HEALTH: All crew and passengers must have valid health certificates for cholera.

RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow re-transmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes re-transmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables via the ship's radio re-loading results, etc., subject to the Master's approval. The cost of all such cables is to be borne by the vessel.

TUGS: 1×2,000 h.p.

BERTHING: New Port: *Phuket Ocean Terminal:* C.T.International Line Co.Ltd. entered into an agreement with the Royal Thai Government to manage and operate the port for 10 years from 21st October 1988.

Access:

(1) Access for vessels entering or leaving the port is via a 120 m wide channel, dredged to 9.0 m., and is 1.5 km. in length.
(2) There is a 360 m. turning circle to the North of the quay.
(3) Tidal range at Springs is 2.7 m.

Facilities:

Total Area	65 acres (26 hectares)
Ship Berths	2
Barge Berths	4
Total Berthing Length	1,180 ft. (360 m.)
Depth	10.0 m.

Forklifts	:	8× 2 – 3 tons 1×25 tons
Tow Tractors	:	4×40 tons 2× 5 tons 1×10 tons
Drawbar Trailers	:	4×40 tons 3×10 tons 6× 5 tons
Front Loaders	:	1
Annual Maximum Handling	:	32,000 TEU.
Stacking Capacity	:	5,200 sq.m.
Transit Shed	:	38,736 sq.ft. (3,600 sq.m.)
General Cargo Area	:	55,952 sq.ft.

Old Port: At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position Lat. 7° 48′ 24″ N., Long. 98° 25′ 12″ E. to await loading and favourable tide.

Dimensions of the Pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in addition to which there is 1 fender at each end of the pier with solid rubber buffers.

Mooring Buoys: There are 2 mooring buoys about 700 ft. apart, each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors, and the other is a General Hospital.

FRESH WATER: Limited and difficult to obtain.

FUEL: Limited and difficult to obtain.

CONSULS: None.

SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.

REPAIRS: No facilities.

POLICE/AMBULANCE/FIRE: Police Tel: 212046. Marine Police Tel: 214368, 211883. Police (Emergency) Tel: 211883. Fire Tel: 211111, 212456-7.

DEVELOPMENTS: 2 berths under construction. Depth alongside 10.0 m.

SHIPMASTER'S REPORT: January 1992.

Chart: B.A. Chart No. 3941.

Pilotage: Pilot not required for anchoring. Pilot may be contacted on VHF Channels 16 and 13 during working hours only, which are normally from 0600 hrs. to 1800 hrs.

Anchorage: Vessel anchored near the new fairway buoy off Laen Phan Wa Point (Position Lat. 07° 47.86′ N., Long. 98° 27.24′ E).

The anchorage is exposed to winds from the South and East and vessel dragged anchor when first anchored due to strong tide. The bottom appears to be coral. When it was noticed that the vessel was dragging, 5 shackles were lowered into the water and this held the position of the vessel in a Force 4 wind from the East which was across the tide and with a 2,500 tonne barge alongside.

Approaches: Laen Phan Wa and Ko Tai Phao Noi lights are conspicuous.

There is a dredger working in position Lat. 07° 46.6′ N., Long. 98° 27.2′ E. and it is not very well lit.

Strong currents were experienced when approaching the anchorage and vessel was set rapidly to the North, due to the flood tide.

There are numerous fishing boats to the South and West but the anchorage itself was clear.

The fairway buoy has been moved to position Lat. 07° 47.86′ N., Long. 98° 27.24′ E and it has no light.

Max. Size: Maximum permissable draft 9.0 m.

Tugs: There are two tugs available, one is owned by the port authority and the other is privately owned. Both are 2,500 h.p.

Cargo Operations: Vessel loaded latex from a 2,500 tonne barge which has 10 tanks, each with a capacity of 250 tonnes. The barge is brought to the ship by a harbour tug.

It is possible to load two ships tanks at one time through 1×6 in. hose from the barge which is split into 2×3 in. hoses through a portable manifold. Cargo is loaded over the top. Loading rate is approximately 85 tonnes/hr.

No survey papers are required. The SGS surveyor did his own tank survey.

The surveyor, agent and shipper were on board throughout the operations.

General: Three persons from the agent's office board with customs and immigration and assist with completion of documentation. There is no boarding or clearance between 2100 hrs. and 0700 hrs. Many port officials board the vessel.

Ships papers are generally accepted but an official Crew Manifest is to be completed and all crew members to sign, the ship's Manifest is then attached. A 'nil' Cargo Manifest is required if the vessel has no cargo to discharge.

The airport is 18 miles to the North of the port and has frequent flights to Bangkok. No difficulties were experienced by crew leaving or joining. A boat service can be arranged through the agent.

AUTHORITY: *Operator:* Chaophaya Terminal International Co.Ltd., Tambol Ao Makam, Amphoe Muang, Phuket 83000, Thailand. *Tel:* 391155-60. *Telex:* 69512 Pkport. *FAX:* (076) 391157.

AGENT: See "Bangkok".

SATTAHIP: Chuk Samet Port: 12.35 N. 100.55 E.
(See Plan)

LOCATION: Sattahip Bay is located on the Eastern coast of the Gulf of Thailand about 184 km. from Bangkok in Plutaluang sub-district of Cholburi Province.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.

DOCUMENTS: See "Bangkok".

APPROACHES: The entrance channel is 100 m. wide, 2.7 km. long and the harbour basin 450 m. wide in front of the West quay-wall, having available a depth of about 10 m. below Lowest Low Water (LLW).

The entrance light buoy is at Lat. 12° 35′ 07″ N., Long. 100° 54′ 20″ E.

PILOTAGE: Compulsory for vessels over 50 m. LOA. Working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.). Radio frequency used when handling the vessel is 27125 kHz

ANCHORAGES: Anchorage area for waiting berth and Pilot:

Chuk Samet Port: Capacity: Eight deep-draft ships minimum depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37′ 03″ N.	Lat. 12° 37′ 25″ N.
Long. 100° 55′ 00″ E.	Long. 100° 55′ 00″ E.

Tungprong Port: Capacity: Four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43′ N.	Lat. 12° 45′ N.
Long. 100° 49′ E.	Long. 100° 49′ 30″ E.

Map Pier:

Lat. 12° 41′ 47″ N.	Long. 100° 50′ 31″ E.

RESTRICTIONS: Berthing possible throughout 24 hours.

MAX. SIZE: See "Berthing".

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 kHz	Day time
Portsat	2738 kHz	Day time
	4145 kHz	R/T – SSB
	6220 kHz	R/T – SSB
	8292.5 kHz	R/T – SSB

VHF: Calling Channel 16 (156.8 MHz)
Calling Channel 14 (156.7 MHz)
Interport use 157.5 MHz (Special Channel)

TUGS: 2 tugs available, 3,000 h.p. Join when vessel approaches berth, charge for use of tug's lines. 2 mooring boats available.

BERTHING:

Limitation of Draft:

Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.

(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST

(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft = 30 ft. at LWOST

(3) Draft of the vessel could be increased for the day alongside by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).

Sattahip Commercial Port:

Berth	*Length* (m.)	*No. Berths*	*Max. LOA* (m.)	*Max. Draft* (m.)
West Quay	540	3	180.0	9.0
North Quay	360	2	150.0	7.8

Cruise passenger ships are permitted to berth at Sattahip.

Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.

CARGO HANDLING FACILITIES:

	No.	*Capacity*
Forklift trucks	7	7,000 lb.
Shortmast trucks	7	5,000 lb.
Yard hustlers	5	—
Chassis	15	—
Top loader	1	35 tons
Transtainer	1	
Straddles – 8×40 ft.	3	—
– 8×20 ft.	3	—
Semi-portal cranes	2	23-45 tons
Pallets	1,000	
Van carriers	10	—

Storage Area:
3 transit sheds, total area 11,470 sq.m.
Open storage area of 190,000 sq.m.
1 container freight station.
Container yard of 36,000 sq.m.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable is: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.

194 stevedoring contractors (both liner terms and chartered vessels under F.I.O. terms).

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs – day shift, 1630-1800 hrs – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available.

TANKERS: *POL Jetty:* Max. LOA 600 ft., depth alongside 36 ft. Diameter of shore lines are 6 in., 12 in. and 20 in.

DENSITY: 1021.
FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.
FUEL: Available, supply can be made by barges, advance notice of ETA required.
REPAIRS: Only for minor repairs.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.
CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.
CARGO GEAR: Supplied by stevedores.
TIME: GMT plus 7 hours throughout the year.
POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.
TELEPHONES: Available (U.S. military circuits).
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required for all crew and officers.

SHIPMASTER'S REPORT: July 1981.
CHUK SAMET PORT:
For details concerning navigation, currents, clearance and documents, etc., see "B.A. Pilot No. 30" and "Guide to Port Entry".

Vessels approach on the beacon line at 017.5° (T), along the fairway marked by buoys. The beacons are installed on the pier and are easily visible. When entering and leaving, the cross current should be watched. The fairway buoys appear to be displaced somewhat Westwards.

Entry and Leaving: Only permitted between 0600 hrs. and 1800 hrs.

The Pilot comes from Bangkok. Also Authorities come from Bangkok for clearance.

A local Agent's office is not yet available, but will shortly be installed.

Wireless traffic from the port with Bangkok is permitted.

There are two tugs of 3,600 h.p. available.

Max. Draft: At present 32 ft. is allowed.

The pier running approximately North – South is 500 m. long, and the cross pier 365 m. long. Both are well equipped with rubber type fenders. The free area on the pier in front of the sheds is about 45 m. wide.

Cargo Handling: Both cranes and the tapioca conveyor can run on the crane rails both on the main and cross piers. The large crane lifts up to 40 tonnes at 35 ft. The small crane lifts 23.5 tonnes but is currently out of use, but should be back in service shortly. The port has 20 forklift trucks, 10 at 3.4 tonnes, and 10 at 2.3 tonnes. Also there are 10 lorries type HINO KL 340 at 7 tonnes.

A Sea Container Shifter is already available, capacity 30 tons. For containers there are three 40 ft. and three 20 ft. spreaders in the equipment store.

Water: Any quantity available. Water must be boiled prior to use.
Bunkers: Only by road tanker.
Ship Repairs: None.
Ships' Chandler: Should be available.
Hospital: Available.
VHF: Port Authority on Channel 16.
Weather Conditions: During S.W. monsoon there is a slight swell. From May to July is the rainy season, with storms and typhoons occurring in June and July. Currents are unimportant. The tide rises about 2 m.
General: S.W. from Sattahip, in the Thailand Gulf, natural gas is obtained. A gas pipe-line from there to Sattahip is under construction. The line will then be taken overland from Sattahip to Bangkok.

A railway connection is being built. A road to Bangkok (approx. 180 km. = approx. 3 hours by car) is available.

Further Developments: Dredging and building of new piers will begin.

A large Gottwald crane (mobile at 40 tonnes) is stated to have been ordered, and will be delivered in about 6 months.

It is planned later on to install a IHI container bridge, and sheds 1 and 2 will be demolished to make room for container handling.

AUTHORITY: Port of Thailand Authority, Sattahip Commercial Port. Plutaluang Sub-District, Sriracha District, Chonburi 20180, Thailand. *Tel:* 038-436344/436360. *Telex:* 75702. *FAX:* 038-436565.

From 1st January 1991: Royal Thai Navy.

AGENT: See "Bangkok".

SONGKHLA: 07.14 N. 100.35 E. (See Plan)

APPROACHES: The entrance channel is 4 km. long, and is dredged to 9.0 m. over a width of 120 m.

There is a turning circle with a diameter of 300 m. to the West of the quay.

PILOTAGE: Available. Pilot boards in the vicinity of the Fairway Buoy.
ANCHORAGE: To the West of the leading line (045° – 225°) and 090° from Ko Maeo Island in a depth of 9.3 m.
TUGS: 2×2,000 h.p. and 2×1,600 t.p.h.
BERTHING: *Songkhla Ocean Terminal:*

Total Area	: 24.71 acres (10 hectares)
Ship Berths	: 3
Barge Berths	: 7
Total Berth Length	: 1,673 ft. (510 m.)
Forklifts	: 16×2 – 3 tons, 1×16 tons, 1×40 tons and 2×25 tons
Tow Tractors	: 7×40 tons, 1×10 tons and 4×5 tons
Harbour Launches	: 1
Annual Maximum Handling Capacity (TEU)	: 128,000 TEU
Stacking Capacity	: 16,000 sq.m.
Transit Shed	: 72,307 sq.ft.
General Cargo Area	: 100,000 sq.ft.

MEDICAL: Hospital in city, Tel: 311379, 313160, 311494,311017.
TANKERS: See "Report".
FRESH WATER: Available alongside.
CONSULS: Malaysia, Tel: 312778. U.S.A., Tel: 311826.
AIRPORT: Had Yai Airport close South of the city, (Tel: 244521).
POLICE/AMBULANCE/FIRE: Police, Tel: 311011, 312122, 311019 (Emergency). Fire, Tel: 311016, 311118.

REPORT: November 1991.
Railway Jetty: Old Jetty: Used by Shell, Caltex and Esso.

Max. Displacement	3,600 tonnes.
Max. Draft	5.2 m.
Max. LOA	81.0 m.
Max. Operating Pressure	6.5 kg./sq.cm.
Flowrate	100 – 120 cu.m./hr.
Pipeline/Manifold	
Gas Oil	6 in.
Premium/Regular (common line)	6 in.
Distance from Jetty to Depot	2,000 m.
Other Facilities	
Fresh water	Available.
Fuel	Not available.

PTT Jetty: New jetty located inside the port. Distance from jetty to depot is 1,200 m.
Jetty A: New jetty for LPG and Premium/Regular Mogas.

Max. Displacement	3,000 tonnes.
Max. Draft	6.0 m.
Max. LOA	75.0 m.
Operating Pressure	LPG 15 kg./sq.cm. Mogas 8.0 kg./sq.cm.
Flowrate	LPG 200 cu.m./hr. Mogas 180 cu.m./hr.
Pipeline/Manifold:	
LPG Liquid	6 in.
LPG Vapour	4 in.
Premium/Regular Mogas	6 in.

Jetty B: New jetty for bulk carriers.

Max. Displacement	500 – 30,000 tonnes.
Max. Draft	8.0 m.
Max. LOA	200.0 m.
Operating Pressure	8.0 kg./sq.cm.
Flowrate	180 – 360 cu.m./hr.
Pipeline/Manifold:	
Gas Oil	10 in.
Premium/Regular Mogas	6 in.
Jet – A1	6 in.

Shell Jetty: New jetty designed for vessels of 5,000 d.w.t.

Depth at LLW	7.0 m.
Max. LOA	103.0 m.
Max. Draft	5.5 m.
Distance from jetty to breakwater	100 m.

Jetty located at inner side of PTT Jetty.
Tug required for berthing and unberthing operations.
Pilot works in daytime only.

Maximum LOA for passing Channel	173.0 m.
Maximum beam for passing Channel	25 m.
Tugs:	Vessel LOA 250 ft. – 450 ft. One tug required. Vessel LOA over 450 ft. 2 tugs required.

Communications:
VHF Channel 16 for calling.
VHF Channel 13 for ship-to-ship.
VHF Channel 14 for pilot.

GARBAGE DISPOSAL: Normal garbage collection service is available. Minimum charge is B 200 per order, B 1,000 per truck, 24 hour service. Tel: 331002.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No Seaman's club in the port but there are many services in town. International telephone and postage services are available in the port.
CURRENCY: Thai Bahts (B). U.S.$ 1.00 = B 25.3 (25.4.91).
AUTHORITY: *Operator:* Chaophaya Terminal International Co. Ltd., Tambol Huakao, King Amphoe Singhanakorn, Songkhla 90002 Thailand. *Tel:* 074-331158-63. *Telex:* 60413 SKPORT TH. *FAX:* 074-331009. *Contact:* Tao Jun, Port Director.

AGENT: See "Bangkok".

SRIRACHA: 13.07 N. 100.52 E. (See Plan)

DOCUMENTS:
Boarding of Immigration, Customs and Quarantine Officials:
The Immigration and Customs Officials will board all incoming vessels, whereas the Quarantine Official will board on arrival at berth. If however a vessel comes from an infected port the Quarantine Doctor will board. The Officials demand that the main gangway is lowered.
Order of Clearance and Documentary Requirements:
Customs Authority: (Ship's forms)
12 copies Cargo Manifest (including port and Agent's requirements).
5 copies Transit Cargo Manifest.

10 copies Crew List.
6 copies Ship's Stores List.
6 copies List of Ship's Provisions, Steward, Deck and Engine Departments.
6 copies Foreign Currency List.
6 copies List of Arms and Ammunition for Ship's Use.
6 copies List of Opium and Narcotics.
6 copies List of Ports called.
6 copies List of Passengers.
6 copies List of Mail.
6 copies List of Crew members' Personal Effects stating brands and serial numbers of watches, cameras, TV/radio sets, electronic calculators, refrigerators, typewriters, all sound and electrical equipment, etc.
6 copies List of Ship's Movable Properties, to declare brands and serial numbers as above.

When preparing the list of Crew members' Personal Effects and Ship's Stores' Lists, particular care should be paid to the exact quantities. Crew are allowed 200 cigarettes each, during the vessel's stay in port.

Failure to provide correct quantities on various forms will entail heavy fine and confiscation.

NOTE: Pornographic magazines and materials are prohibited and will be confiscated if found onboard.

Immigration Authority: For vessel having Thai Immigration Forms onboard, please prepare them ready for arrival. Otherwise Agency clerks will bring forms onboard and assist in completing them.

5 copies each of Immigration Form No. 3 (separately for *Landing* passengers and *Transit* passengers).
5 copies of Immigration Form No. 4 (Crew List).
2 copies of Immigration Form No. 35. Make out in duplicate, and 1 line for each name. Leave signature columns blank, where each crew member shall sign in presence of Immigration Officers in port.
1 copy Disembarkation/Embarkation card for each passenger, to be supplied in port.

Repatriation Crew holding valid Passports may be declared as passengers in order to facilitate Immigration Exit papers. Otherwise we need one full working day for preparation of Immigration papers (Sat/Sun/Holiday excepted).

Quarantine Authority:
1 copy of Maritime Declaration of Health (may be supplied in port).
2 copies of lists certifying the date of vaccination against Cholera for each crew member.
1 copy of Derat Certificate.

International Certificates of Vaccination against Cholera for all passengers and crew members.

Important to Master: On first arrival at Roads or berth do not allow any unauthorised people to board the vessel or allow any officers/crew members to disembark before 'Checking In' formalities by Immigration Officers and Customs Searching Party. Offence in this respect is liable to a fine not exceeding Baht. 5,000.00.

Departure: The 'Blue Peter' flag should be hoisted at the foremast of all sea-going vessels about to leave the harbour and shall be kept hoisted until the voyage has begun. In the case of vessels leaving in the afternoon, the flag shall be hoisted in the morning, in case of those leaving in the morning, the flag shall hoisted on the previous afternoon. Failure to comply with the regulations is subject to a fine not exceeding Baht. 5,000.00.

APPROACHES: The recommended courses approaching seaberth through the Southern part of Kohsichang are as follows:

from Junction point named "A"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	True Course =360°
to Junction point named "B"	Lat. 12° 62′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	True Course =022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 462 12″ E.	True Course =037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Long. 100° 51′ 00″ E.	

from Point "D" A/C to 000°(T) up to Anchorage Area or Point "E"

Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.

Refer Admiralty Chart No. 986; the "Hulk" in position Lat. 13° 07.7′ N., Long. 100° 52.8′ E. has been removed.

Vessels should always keep clear of the fairway channel as large bulk carriers sail on deep draft.

PILOTAGE: Compulsory in Sriracha area. Sriracha pilot station is established on "Ban Ao Udom", and can be contacted directly by VHF Channel 16 within 30 miles radius.

Boarding Area: The Government Pilot and Marine Supervisor will board at about 2 miles East of "Koh Thai Ta Mun" which lies South of Kohsichang, or at the position centred on Lat. 13° 07′ N., Long. 100° 51′ E. with a radius of 1 mile.

On receipt of an accurate ETA vessel will be advised by VHF regarding berthing time, whether to anchor and any likely delays. Flags indicating a request for a Pilot or Pilot on board should be flown. Accommodation ladder required (or in conjunction with pilot ladder).

ANCHORAGES: Recommended anchorage for vessels awaiting berth is within 1 mile of the position: Lat. 11° 04.8′ N., Long. 100° 51.0′ E. Refer Admiralty Chart No. 3965 and 986.

MAX. SIZE: MBK Bulk berth: 150,000 d.w.t. Draft 14.3 m.
Also see "Tankers".

HEALTH: See "Documents".

RADIO: *Commercial Radio Telegraphy:* (Tel: 5880842-4, 5882689, 5882683).

"BANGKOK RADIO".

Medium wave: Call sign HSA (Hotel Sierra Alpha).
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 500 kHz and 512 kHz.

Short wave: Call sign HSA 2 and HSA 3.
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 8686 kHz, 8573 kHz and 12800 kHz.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 48 and 24 hours before arrival.

Pilots should be contacted 6 hours prior to arrival and terminals 3 hours prior to arrival.

The first notice of arrival is to contain the following information:
Last Port of Call.
ETA Pilot Station.
Best trimmable arrival S.W. draft.
Number of crew including the Master and his name.
Number of passengers, landing and transit.
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, Passport number).
Cash required, if any.
Crew liberty launch service, if any.

VHF: Vessels calling at PTT should call on Channel 13 and advise Supply Operations Division the following:
(a) Name and call sign of vessel.
(b) Flag.
(c) LOA, draft and beam of vessel.
(d) ETA at Terminal.
(e) Nature of cargo, technical name, UN number (if applicable) and quantity.
(f) Distribution of cargo (and that to be left on board).
(g) Is vessel fitted with an Inert Gas System?
(h) Any defects of vessel or its machinery which may affect navigation, safety or the marine environment.

The terminal will also require technical details to the ship's cargo and cargo handling characteristics.

TUGS: Local company privately operates 3×2,500 h.p. tugs which are available on calling during working hours, and outside working hours when required if advance notice given.

BERTHING: See "Shipmaster's Report".

TANKERS: *Thai Oil Sea Berth:*

1. One conventional buoy mooring, consists of 6 buoys.

2. Position of berth: Lat. 13° 07.5′ N. Long. 100° 52.5′ E., 2.5 miles offshore.

3. Depth of water in berth: 48 ft. plus tidal height of the day above LLW. Minus 2 ft. under keel clearance. Vessel can berth heading either North or South depending on the current.

4. Capacity of berth: Capable of handling vessels of minimum size 30,000 d.w.t. up to max. size 120,000 d.w.t. with max. LOA 900 ft. (Max. distance from bow to manifold 435 ft.).

5. Discharge line: 2×24 in. dia. submarine line with 4 strings of 12 in. hose.

6. Mooring and unmooring of vessel are compulsorily carried out 24 hours by Government Pilot. Night-time berthing at the discretion of the Pilot.

7. Total of 18 ship's mooring lines (rope/wire) are required in good condition, not less than 220 m. in length each line, for 3 head and 3 stern buoy lines.

8. Communication: Thai Oil Company Limited, P.O.Box 2387, Bangkok, Thailand. Telex: THAIOIL TH 85802, 85808. Tel: Sriracha Thailand (038) 351555. Fax: (038) 351554.

Esso: 6 buoy conventional mooring owned and operated by Esso Standard Thailand Ltd. Vessels berth heading in either direction depending on the tide at the time of arrival. Max. size: 90,000 d.w.t.

2 ship's moorings required to each of 2 head and 2 stern buoys and one ship's mooring to each of 2 breast buoys. These are supplemented by 1 shore "preventer" wire from the 2 head and 2 stern buoys.

1×32 in. submarine line for crude oil with 2 strings of 12 in. hoses.

Ballasting is required during discharge to maintain 30% deadweight at all times. Additional ballast may be required during the S.W. monsoon period 1st June to 31st October. Technical test data for winches/wires required on arrival.

PTT: The PTT Sea Berth consists of a concrete platform with two breasting dolphins and mooring buoys for head and stern lines.

Vessels berth heading in either direction depending on current direction, using seaward anchor.

Mooring: 3 head/stern ropes, 3 forward and aft back springs plus one buoy rope to seaward buoy aft.

Night berthing not recommended in view of unlit buoys and platform.

Vessels programmed to this sea island berth are advised that it is to be regarded as an offshore buoy berth as far as shore facilities are concerned. Access to/from the shore should be by accommodation ladder rigged on the offshore side of the vessel.

In common with offshore buoy berths and in the absence of any shore standby craft, the vessel's lifeboats to be used for emergency evacuation of personnel.

PTT Sea Island berth currently only handles high flash point products, i.e. fuel and gas oils.

General: Qatar Crude Discharge: Considerable delay can be encountered in the discharge of Qatar Crude.

In this connection your attention is particularly drawn to any advice given to you on arrival by the Thai Oil Representative.

Back Loading from Coasters: Occasionally vessels are required to load cargo from 2,000/4,000 ton coasters at Sriracha. Loading a full cargo could take 3 to 4 days and Masters should bear this in mind for bunker and fresh water calculations.

Lightening to coasters to make Bangkok Bar draft: On arrival there is no VHF contact with shore, as vessel does not take a Pilot, and so should proceed straight to an anchorage within about half a mile of position 13° 07.6′ N., 100° 50.9′ E. There may be other vessels in this area engaged in ship/ship transfer. Do not rig an accommodation ladder, as four Yokohama rubber fenders are brought straight out to the vessel, and 2 lashed each side midships. Shore officials will board via the pilot ladder to clear the vessel inwards. Accommodation is required for 2 Police Officers (one room) and 2 Supervisors with one Customs Officer (a second room) throughout the vessel's stay. 8 in. hoses are brought out on the first coasters, connected by a seven man hose handling gang, and left connected to the ship's manifold throughout the operations; the gang handles all hose connecting, and mooring, with a crane driver provided by the ship. This gang stays onboard most of the time and need to be allocated a smoking area. The coasters are programmed by Bangkok – copies of the programme being put onboard on arrival – and can be handled simultaneously one each side. If 2 products are involved usually one side is allocated for a particular product. The coasters moor with lightweight polypropylene lines and are well handled and efficient, capable of loading at about 1,250 tonnes/p.h. There are 4×2,000 d.w.tonnes, and 1×3,500 d.w.tonnes coasters with a round trip taking about 24 hours from departure to return alongside.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge at sea berths. 24 hours' notice required to Agent.

FUEL: Can be supplied by barge. 48 hours' notice required.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

CONSULS: See "Bangkok".

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

SHORE LEAVE: No restriction on crews landing after immigration and health formalities have been satisfactorily completed.

IDENTIFICATION CARDS: Required for all officers and crew.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: U.S.$ 1.00 = 25.50 Thai Baht (25.2.92).

DEVELOPMENTS: Thai Oil Co. Ltd. may build 2 new berths for 6,000 d.w.t. product carriers.

Laem Chabang Deep-Sea Port Project: See "Laem Chabang".

SHIPMASTER'S REPORT: March 1984.

Loading of Tapioca Pellets in bulk at MBK berth:

Vessel: LOA 243.6 m., beam 32.3 m., deck over keel 18.6 m., draft 13.51 m., 74,010 tonnes d.w.t., 8 holds.

Silo with a berth called MBK Berth (Mah Boon Krong), operated by Cargill Ltd., has been in existence for about 6 years.

The berth consists of 3 loading towers with sufficient mooring posts at both ends.

Location of berth: Lat. 13° 08.2′ N., Long. 100° 53.1′ E.
Distance from shore: 1.6 miles.
Distance between towers: 50 m.
Radius of loading booms: 32 m.
Total loading range: 166 m.
Depth of water alongside: 12.8 m. at LW.
Loading capacity: Loading with 1 tower 350 t.p.h.
Loading capacity with 2-3 towers 600 t.p.h.

A vessel of our size has to be shifted for loading the end holds.

The loading spouts are equipped with trimming machines. The only connection to the shore is a conveyor belt of 2.8 km. length which cannot be used for traffic. All traffic is carried out by boats. Therefore gangways on both sides to be used.

A Pilot/Berthing Master brings the vessel alongside. Berthing with 2 tugs, bow to the North and starboard side alongside using the port anchor.

AUTHORITY: *Operators:* Thai Oil Company Limited. Refinery: Km. 124.5 Sukhumvit Highway, Au Udom, Sriracha, Cholburi 20230, Thailand. (P.O.Box 2387, Bangkok 10501). *Tel:* (038) 351555. *FAX:* (038) 351554. *Telex:* 85802, 85808 THAIOIL TH. *Contact:* Captain Prasit Khumsribus, Marine Supervisor.

AGENT: See "Bangkok".

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan)

PORT LIMITS: In accordance with the terms of Charter Party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

Shipmaster's Report: April 1986.

Notice of Readiness can be tendered when ship is 1.2 nautical miles from jetty.

DOCUMENTS:

2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last 2 Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests.

APPROACHES: By day the extremity of the jetty (3 artificial islands and 2 loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty. Pilot boards out at the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme Pilot Station" on Channel 16. Pilot boat grey motor boat without special signals.

ANCHORAGE: Good holding ground (sand and mud) between 14 m. and 16 m.

RESTRICTIONS: Vessels should twice signal the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 hrs. – 1530 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. Winches aft to be in perfect order.

MAX. SIZE: Tankers up to 27 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Max. length 220 m. Max. breadth 32 m. Height from waterline to hatch coaming 14.0 m.

HEALTH: Send message for Free Pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16. Also see "Pilotage".

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor first and then the starboard anchor, and wires to 7 buoys which hold the ship parallel to the dolphins and about 20 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

MEDICAL: Doctor of the Office Togolais des Phosphates at the Factory.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses to be ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available. Gas oil available at Lome.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 oz. tobacco; 1 bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: Possible. Mooring boats have to be used for going ashore.

AIRPORT: Nearest Lome – 4 flights a week to Europe.

TIME: GMT.

HOLIDAYS:

Official Holidays in Togo:

1st January, New Year's Day; 24th April, Victory Day; 1st May, Labour Day; * Ascension Day; 15th August, Assumption; 1st November, All Saints' Day; ** Ramadan Day; ** Tabaski (Islamic Holiday).

*Date given by Christian calendar.

**Date given by Islamic calendar.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Allowed, but not advisable. See "Restrictions" and "Repatriation".

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: C.F.A. Franc (CFA Fr). U.S.$ 1.00 = 282.75 CFA Fr (10.4.91). FFr 1.00 = 50 CFA Fr (Fixed Rate).

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

Berthing only performed on an East-going current.

SHIPMASTER'S REPORT: February 1985 (Updated 1992).

Location: Kpeme is situated about 15 miles East of Lome, and about 115 miles West of Lagos, Nigeria. The position of Kpeme Jetty is approximately Lat. 06° 12′ N., Long. 01° 31′ E.

B.A. Chart 1861, Cape St. Paul to Lagos Harbour, with Plan, "Rade de Kpeme".

Approaches: The coast Eastward of Cape St. Paul is practically featureless, but good navigational marks are Port de Lome Breakwater, and Kpeme Jetty, which show well on the radar at distances of up to 20 miles. No dangers in the immediate approach from any direction. The occulting light on Kpeme Jetty Head is difficult to identify, and should not be relied upon, especially in hazy weather.

Documents: The Pilot deals with all port formalities, acting for Customs and Immigration. Documents required are as follows:

2 Crew Lists.
2 Stores Lists, including Bonded Stores.
2 Crew's Effects Declarations.
2 Lists of Ports of Call.
(For the last voyage or last 4 weeks, whichever is longer.)
2 Passenger Lists.
(If Nil, list should be made out with a "Nil" declaration.)

Under normal circumstances the Agent does not visit the vessel until after loading is completed, when he brings all documents and clearance for the ship. (The vessel usually unberths, and drifts off the berth to await arrival of the Agent by boat).

Pilotage: Pilot, sometimes with Assistant Pilot, boards at the Anchorage together with 2 mooring gangs, each under the supervision of a Foreman, who is in constant contact with the Pilot. 2 mooring boats are available to assist with mooring. The Pilots remain on board at all times whilst the vessel is at the Jetty and have to be accommodated and fed.

Anchorages: The anchorage area is from 1.5 to 2 miles S.E. of Kpeme Jetty Head. Good holding ground, sand and mud; in about 20 m. of water.

Restrictions: All berthing and unberthing operations performed on an East going current only. (Due to the configuration of the berth.) If a vessel happens to be at the berth when a West going current should start, she will remain at the berth until such time as the normal East going stream re-establishes itself. In extreme cases unberthing could be accomplished with the assistance of 2 tugs from Lome.

Max. Size: Our vessel, (Panamax) LOA 228 m., breadth 32.2 m., is about the largest vessel handled by Kpeme. Largest vessel normally handled is LOA 220 m., but this vessel was accepted on condition that no cargo was to be loaded into No. 1 hold.

Also see "Loading".

Radio: The usual ETAs and requests for berthing prospects were sent to the Agents, (Office Togolais des Phosphates. Telex: 5214. Cable Address: Phospat Lome).

VHF: Port Control calls on Channel 16, and works Channel 13. Takes all details of the ship, and any requirements on arrival.

Notice of Readiness: Notice of Readiness Time is taken as the time the vessel actually anchors, and within the confines of the Charter Party.

Berthing: From the anchorage, the vessel approaches the berth in a wide sweep, to arrive about 1 cable off the berth, heading in a Westerly direction, when the port anchor is dropped. This is paid out to full scope, then the starboard anchor is let go. A headrope is then led to the buoy on the bow. Meanwhile, a shore after spring wire is hove up on the after mooring winch. Using this and also the main engine, the vessel is manoeuvred into position. This also involves heaving up the port anchor and slacking on the starboard anchor cable, to end up with about 7 shackles on the port anchor and about 4 shackles on the starboard anchor. Vessel then ends up in position for the shiploaders, which is on a heading of about 190° and about 4 m. off a set of small hydraulic fenders which front the islands on which the shiploaders are constructed. The mooring gangs then complete the mooring with shore wires.

Loading: Loading is by 2 shiploaders of 1,300 tonnes/p.h. each. Max. airdraft from Datum to loaders is 14 m. Berth is dredged to 14 m. at Chart Datum. Max. draft allowed at the berth is 38 ft. (11.58 m.) With these various restrictions, large vessels must berth with practically full ballast, and careful deballasting whilst loading is necessary to ensure that the vessel remains within the acceptable limits of draft and airdraft. It has to be remembered that the berth is an open roadstead, and a considerable swell can sometimes run (up to 2 m.). The berth is designed to berth vessel's head directly into the prevailing direction of the swell, to reduce rolling as much as possible, even so, there is still an appreciable movement of the vessel, even with little swell running. Also due to the swell, it is very difficult to read the draft with any accuracy. However, the shore weighing facilities for the phosphate are very accurate, and no real problems were encountered in this direction. (B/L is based on weight recorded by loaders during loading. No draft surveys.)

Liaison with the shore is carried out through the Pilot by telephone.

Terminal staff friendly and very co-operative.

Unberthing: As soon as, or just before the completion of loading, the shore mooring gangs start to single up the shore moorings. As soon as all shore wires are let go, the vessel's stern starts to move away from the berth with the current. The starboard anchor is weighed and then the Port anchor. Whilst swinging clear of the berth, and weighing anchor, an eye should be kept on the port breast line buoy aft, as it can pass quite close to the stern as the ship swings. After the port anchor is aweigh, the vessel is moved a little way from the berth, and drifts waiting for the Agent to bring out the documents; which usually takes about 30 minutes.

Medical: Basic medical treatment is available at Kpeme. Hospitalisation can be effected but it is necessary to go to Lome, where there are adequate facilities.

Fresh Water: Not available.

Fuel: Not available.

Repairs: No repairs can be carried out. If these are required, vessel would have to go to Lome, 15 miles to the Westward.

Repatriation/Airport: There is an International Airport at Lome, and repatriation can be arranged if necessary.

Shore Leave: Although not actually prohibited, shore leave is not really feasible, due to the fact that there are no facilities at Kpeme. Also there are no proper arrangements for a liberty boat to be laid on.
Storing: Fresh provisions are available in limited quantities. Rather expensive and of poor to fair quality. Orders taken by Port Control on vessel's first arrival.

AUTHORITY: Office Togolais des Phosphates, B.P. 379, Lome, Togo. *Tel*: Lome 21.39.01 *Telex*: 5214 Fosfat TG. *Cables:* Phosphates-Lome. *FAX:* 21.71.05. *Contact:* Commandant K.Atefeibu, Harbour Master.

LOME: 06.08 N. 01.17 E. (See Plan)

DOCUMENTS:
- 13 Crew Lists.
- 5 Kroo-boy Lists.
- 5 Passenger Lists.
- 4 Lists Previous Ports of Call.
- 1 Maritime Declaration of Health.
- 1 List of Vaccinations.
- 1 Set Cargo Manifest and Bills of Lading.
- 2 Lists of Arms and Ammunition.
- 1 List of Stowaways onboard.
- 1 List of Animals onboard.

Togo Port is a free-port so no individual Crew Member Declaration is necessary.

APPROACHES: By night, the approach to the port is assisted by the following 4 lights:
Lome Light: Position 06° 08′ N., and 01° 15′ E. On top of the big water tower in the village between Lome City and the harbour. Group Fl. (2) white every 10 sec. Vis. 20 miles.
Baguida Light: Position 06° 09.5′ N., and 01° 19.5′ E. occ. white and red. Light 2.5 sec. occ. 0.5 sec. period 3 sec. Vis. 17 miles. The red light sector (42°) covers the breakwater as well as the old Lome Wharf in position 06° 07′ N., and 01° 13.5′ E.
Togo Port Entrance: On the head of the main breakwater a red tower is situated in position 06° 08′ N., and 01° 17.5′ E. Occ. red light 5 sec. every 6 sec. vis. 5 miles.

On the head of the counter-breakwater a green tower is situated in position 06° 08.2′ N. and 01° 17.4′ E. Occ. green light 5 sec. every 6 sec. vis. 5 miles.
Fairway Buoy: A red buoy with metallic structure, situated in position 06° 07′ N., and 01° 19.94′ E. Quick flash red. Vessels entering the harbour have to leave this buoy on the port side. The buoy marks the beginning of the fairway.

By day, large light coloured transit sheds and a high, grey water tower (30 m.) in position 06° 08′ N., and 01° 16.5′ E. are the first indications of the port from the sea side.

PILOTAGE: Pilots are available 7 days a week and throughout 24 hours. Berthing is possible at anytime on Owners/Master's request, but movements normally commence between 0530 hrs. and 0600 hrs. (sunrise).

The sailing time is not restricted, but ships sailing after midnight have to give a written notice to the pilot station at 2200 hrs. latest. The pilot station is equipped with VHF radio-telephone listening on Channel 16, 14 and 12, throughout 24 hours.

Call and safety Channel 16. Communications on 12 and 14.

Business languages: French and English.

Only simplex operation, no telephone patch.

The pilot cutter is a dark motorboat with yellow-orange superstructure on whose mast the international signal flag "H" flies. Showing pilot lights after sunset. The boat also has VHF telephone and is accessible on Channel 12.

Pilots board the vessel approximately 0.5 to 1.0 mile Southwards of the breakwater.

Pilots are compulsory for all ships of more than 300 g.r.t.

ANCHORAGES: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 15 m., where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida Light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime. Also see "Pilotage".

MAX. SIZE: The max. length of vessels admitted must not exceed 270 m. The max. draft for the general cargo-quay is 9.5 m. (31 ft.), for the bulk berth 11.5 m. (38 ft.) and for the tanker berth 14 m. (45 ft.)

For the West side of the container quay 11 m. (36 ft.) and the East side 12 m. (39 ft.)

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which he will declare vessel Free or not. Vessels entering must fly international quarantine signal "Q".

RADIO/VHF: Lome has a radio coast station. Working frequencies are: 500 and 472 kHz. Call sign "5VA". Also on VHF Radiotelephone Channel 16 and medium wave telephone on 2182 kHz. when requested.

Lome Port has a VHF station working on Channels 16, 14 and 12 day and night. A radio homing transmitter is working on 379 kHz. Signal "LME". Position 06° 10.7′ N. and 01° 16.3′ E.
Notification of Ship's: Ship's agencies should be informed as soon as possible about the vessel's arrival at Lome. The ETA telegram should contain the ship's length, draft, the quantity of cargo to be loaded and discharged and the number of stevedore gangs required. In addition to that the ship's agency should be advised to inform the pilot station as soon as possible.

ETA notification can also be sent by telex directly to the harbour. Telex No. 5243 TGPORT TO.

TUGS: The port has 3 harbour tugs. "Akodessewa", 960 h.p., 17 tonnes bollard pull; "Lome", 1,620 h.p., 24 tonnes bollard pull and "Aneho", 300 h.p., 42 tonnes bollard pull.

For all vessels over 500 g.r.t. the tug service is compulsory. Over 10,000 g.r.t. 2 tugboats are compulsory.

All tugs are equipped with following equipment: Radar, fire fighting equipment and VHF radio-telephone. Working Channel 12. On Master's request, the tug can supply a towing wire.

BERTHING: Vessels berth according to their time of arrival in the roads. Priority is however given to passenger ships, Ro/Ro vessels, container ships as well as to vessels having less than 50 tons of cargo for loading discharging.

The port is protected on the Western side by the main breakwater (1,720 m. long) and on it's East side by the counter breakwater (950 m.)

The general cargo quay is on each side (320 m. long) and has a width of 72 m. 4 berths are available. 3 berths are suitable for ships with max. draft of 9.5 m. (31 ft.) and one for ships up to 7.0 m. (23 ft.) draft and a max. length of 145 m.

The container pier has 2 berths (Berths No. 5 and 6), each 250 m. in length and 145 m. wide. There is 11 m. depth on the West side and 12 m. on the East side.

The bulk berth is situated on the inside of the counter-breakwater. There is space for a vessel of 200 m. with a max. draft of 11.5 m. (38 ft.). There is 6,400 sq.m. of free storage space. A clinker loading installation is able to load 1,000 t.p.h.

A tanker terminal is situated inside the counter-breakwater. Tankers with a max. length of 250 m. and max. draft of 13.50 m. (45 ft.) can berth here. Also see "Tankers".

The fishing port is situated in the Eastern part of the harbour. The length of the quay is 60 m. and the max. draft 4.50 m. This installation has an auction hall of 1,500 sq.m.

The height of the piers at low water is 4.50 m. The average tide difference is 1.20 m.

There is no special Ro/Ro berth available for bow/stern/ramp vessels. Shed "A" (5,000 sq.m.) is situated on the general cargo pier. There are another 4 warehouses "C, D, E and F", each having 7,500 sq.m. of storage space in the vicinity of the piers. One shed of 1,000 sq.m. is available for dangerous cargo.

Burkina Faso have 2 warehouses of their own, each 5,000 sq.m. Mali and Niger each have one of 5,000 sq.m.

The free-storage space for containers and heavy-lift cargo is about 90,000 sq.m.
Equipment/Gear: The port is provided with:
- Mobile cranes from 10 tons – 60 tons.
- Fork-lifts from 2.5 tons – 30 tons.
- Toplifter of 30 tons.
- Platform Trailers of 40 tons.
- Tractors of 60 h.p.
- Grain-elevator and Mobile-gangways.

Also container handling gear, trailers, chassis and spreaders.

There are 3 Pilot boats and 2 line-handling boats. On vessel's request, aluminium gangways are available.
Railway: The Togo-Railway (C.F.T.) which serves large parts of the country has an extension of its network into the port. Quay-sides and sheds are connected.

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required.
Working Hours: In Lome the working time is as follow:
1. Day shift from 0700 hrs. – 1200 hrs. and 14.30 hrs.– 1730 hrs.
2. 1st shift from 0600 hrs. – 1400 hrs.
   2nd shift from 1400 hrs – 2100 hrs.
   3rd shift from 2100 hrs. – 0600 hrs.

Except Saturdays and holidays when work is possible in overtime.

Furthermore, extra labour is available if required for night work in order to complete loading and discharging operation. All work is done by port stevedores.

MEDICAL: Large hospital situated in Lome with doctors in attendance.

TANKERS:
Societe Togolaise des Hydrocarbures:
Max. Size: LOA – 250 m.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.

Restrictions: Berthing and unberthing at any stage of the tide. Berthing during daylight hours only, unberthing anytime.

Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ D'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Hoses Size (in.)*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosene	Yellow-Ash	4200	600		1	8
Benzene	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 30 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FUEL: Diesel/gasoil is available in small quantities. There are 2 bunker spots on the pier. Tank-lorries can supply bunkers at any berth.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place. Ships with dangerous cargo have to engage a watchman.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only carried out by local workshops.

DRY DOCKS: Private slipway with 400 tons.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Either ship's crew or dock workers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCES: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: The port has no shore cranes. Ships have to use their own cargo gear. Only mobile cranes for cargo handling on the pier are available.

AIRPORT: Lome International Airport with flights most days to Europe.

TIME: GMT throughout year.

HOLIDAYS:

1st January	New Year's Day
13th January	National Holiday
24th January	Economic Liberation Day
24th April	Victory Day
1st May	International Labour Day
*	Ascension Day
21st June	Patriots of Pya
15th August	Assumption
23rd September	Agression Day
1st November	All Saints' Day
**	Ramadan Day
**	Tabaski (Islamic Holiday)
25th December	Christmas Day

*Date given by Christian calendar

**Date given by Islamic calendar

All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: A telephone to contact Police, Fire service and Hospital is available day and night at the pilot station or on VHF Channel 16. The port is provided with an ambulance car as well as with a fire engine. Services have to be requested at the control tower of the pilot station.

TELEPHONES: 3 public telephones within the port limits. No telephones on board.

SERVICES: No tank cleaning or compass adjusting available.

IDENTIFICATION CARDS: Shore landing passes issued by port police on exchange of crew I.D. cards at the port gate.

DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.

GENERAL: *Port and Lome Town:* The Port Autonome de Lome is the only harbour of the Republic of Togo. There is a bulk phosphate jetty at Kpeme (position 06° 12′ N., and 01° 31′ E.).

Lome is the capital of the country and has 300,000 inhabitants. The port is situated about 5 km. East of the city. Taxis are available at the entrance of the port.

All shipping agencies and 2 banks maintain offices within the port premises.

On ship's request, a ship chandler comes onboard in order to provide fresh food and bonded stores.

Currency: The money in circulation is the Franc CFA. (100 Frcs. CFA=2 NF).

Seamen's Club: A modern seaman's club with swimming pool, video-room, library, hotel and bar is situated 0.6 km. away from the main gate of the port, and is at ship's crews disposal.

SHIPMASTER'S REPORT: July 1978 (updated 1990).

Documents: A mooring boat is available to Agents for the collection of documents on the Roads given prior notice.

Max. Size: Berth No. 1, depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3, depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6, depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.

Health: Free Pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.

Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.

Tugs: There is an additional tug 3,000 h.p., 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.

Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.

Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.

Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear are in use.

Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.

Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.

Seaman's Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a German pastor and under German control and has a VHF set for communication with vessels in the Roads. It is open to non-seafarers.

Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.

Fresh Provisions: Wide choice and good quality but not cheap. It is advisable to have samples brought onboard before ordering.

Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels in the Roads. Container ships and Ro/Ro ships have a priority.

Working Hours: Gangs work 0600 – 1400 hrs.; 1400 – 2200 hrs. and 2200 – 0600 hrs. daily except, there is no 2200 – 0600 hrs. shift on Sunday nights. Each has a half hour break after 4 hours working.

Surveyors: The Port Captain and Senior Pilot, represents Germanischer Lloyd. There is no Lloyd's representative.

General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors' passes.

AUTHORITY: Port Autonome de Lome. B.P. 1225, Lome, Togo. *Tel:* (228)214742. *Telex:* 5243 TGPORT TO. *Cables:* Togoport. *FAX:* (228)212627, 210248. *Contact:* S. Ottinger, Harbour Master. K. Amouzou, Deputy General Manager.

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan)

DOCUMENTS:

Immigration:

2 Crew Lists.
2 Passenger Lists.

Customs:

2 Crew Lists.
2 Passenger Lists.
1 Bond List.
3 Cargo Manifests.

Quarantine:

1 Crew List.
1 Crew Effects List.

Agents:

1 Crew List.
1 Passenger List.
3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at pilot station. This position is indicated on B.A. Chart (Approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 100 m.

Vessels may anchor in the vicinity of Buoy No. 1 if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Harbour Master.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio Pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: No tugs available.

BERTHING: Queen Salote Wharf, Berths No. 1 and 2 are the only international berths in Nuku'alofa. Berth No. 1 length 93 m. and Berth No. 2 length 110 m.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Harbour Master at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination Certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available Queen Salote Wharf at 25 t.p.h.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

CONSULS:

Embassies and High Commissions:

Australia
United Kingdom
New Zealand
China

Consulates:

France
Germany
Korea
Nauru
Spain
Sweden

REPAIRS: Minor repairs can be carried out in the marine workshop.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. Harbour Master may require to inspect cargo gear record.

CUSTOMS ALLOWANCES: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: 25 km. from town. Flights to and from Suva (Fiji) Tuesdays, Wednesdays, Thursdays and Saturdays. Flights to and from New Zealand Tuesdays and Saturdays. Flights to Apia (Western Samoa) Wednesdays and Fridays. Flights to Hawaii Mondays, Tuesdays and Thursdays.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Public Holidays are: New Years Day; Good Friday; Easter Monday; Anzac Day; Crown Prince's Birthday; Emancipation Day; His Majesty Birthday and Coronation; Constitution Day, His Majesty's Tupold I's Birthday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: In an emergency dial 911.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: The Quarantine Department is responsible for collecting garbage in plastic bags which are then incinerated at the wharf. Charge is T$ 40.00 per vessel more than 25 m. in length. Contact Tel: 24257.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Tongan Pa'anga (T$). U.S.$ 1.00 = T$ 1.287 (6.5.91).

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Ports Administration Department, P.O.Box 144, Nuku'alofa, Tonga. *Tel:* 23-168. *Contact:* S.T.Fotu, Harbour Master.

Trinidad

BRIGHTON: 10.15 N. 61.38 W.

The port will be temporarily closed in 1992 until further notice.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
ANCHORAGE: Good holding ground in roadstead. Loading pier situated Lat. 10° 15′ N., Long. 61° 38′ W., extending in a N.W. direction for 2,010 ft.
RESTRICTIONS/MAX. SIZE: Outer Berth East, 29 ft. 6 in. MLWST; Outer Berth West, 24 ft. 6 in. MLWST; Centre Berth East, 21 ft. 6 in. MLWST; Centre Berth West, 21 ft. 6 in. MLWST; Inner Berth West, 21 ft. 6 in. MLWST.
TUGS: Not used. Launch assists with lines.
STEVEDORES: Supplied by Agent for loading asphalt in drums only.
MEDICAL: All facilities available.
FRESH WATER: Available by barge.
FUEL: All grades of fuel alongside or by barge.
REPAIRS AND DRY DOCKS: At Chaguaramas.
GANGWAY/DECK WATCHMEN: Customs guard on 24 hours duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes and moderate amount of spirits.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Not usual.
AUTHORITY: Lake Asphalt of Trinidad & Tobago (1978) Ltd., Brighton, La Brea, Trinidad, W.I. *Tel:* (809) 648-7556, 648-7477. *FAX:* (809) 648-7433. *Contact:* Bill Ramrattan, General Manager.

CHAGUARAMAS: 10.40 N. 61.39 W. (See Plan)

DOCUMENTS: See "Port of Spain".
PILOTAGE: Compulsory. Pilots board in Chaguaramas Bay, Lat. 10° 46′ N., Long. 61° 43′ W. Minimum ETA of 8 hours. Call Pilot's Office (809) 625-1144 or (809) 625-2376. Contact Pilot on VHF Channel 16.
ANCHORAGES: Call Pilot to receive information about anchorage in Chaguaramas Bay. Average tide 2 ft. Maximum tide 1.3 m.
RESTRICTIONS: No restrictions on night operations.
MAX. SIZE: West Wharf: Max. draft 34 ft. 6 in.
North Wharf: Max. draft 25 ft.
RADIO/VHF: Chaguaramas Terminals monitor Channels 9, 12, 16 and 68. Call sign "Chag Terms". For Pilot use Channel 16.
TUGS: Not normally used by Pilot. Tugs can be made available upon request.
BERTHING: West Wharf: 960 ft. long, depth 34.5 ft.
North Wharf: 400 ft. long, depth 25 ft.
CRANES: As requested.
BULK CARGO FACILITIES: On request.
STEVEDORES: Provided. Minimum notice of 18 hours is required. 24 hour loading and unloading. Load and discharge rates are negotiable. ETA should include particulars of cargo, showing heavy lifts, dangerous or hazardous cargoes, hatch stowage and gang required.
MEDICAL: Small sick bay on site. Hospital and dental facilities within half an hour's drive. For any further medical information see "Port of Spain".
DENSITY: Salinity is 15 – 25 parts per thousand.
FRESH WATER: By hose at 75 t.p.h. maximum (cost in 1992 – U.S.$ 3.00 per metric ton).
FUEL: Minimum notice of 24 hours for fuel.
CONSULS: In Port of Spain:

Austria
Brazil
Canada
China
Colombia
Costa Rica
Denmark
Dominican Republic
El Salvador
Finland
France
Germany
Great Britain
Guyana
India
Italy
Jamaica
Japan
Mexico
Netherlands
New Zealand
Nigeria
Norway
Peru
Portugal
Senegal
South Korea
Spain
Sweden
Switzerland
Syria
Turkey
United States of America
Uruguay
Venezuela

REPAIRS: Wet docking supported by a well equipped machine shop.
SURVEYORS: Cargo Inspectors:
E.W.Saybolt & Co. Tel: 658-4814.
Superintendents Co. Tel: 625-4116.
Surveyors:
American Bureau
Bureau Veritas
Germanischer Lloyd
Lloyd's Register of Shipping. Tel: 623-2536.
Norske Veritas.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
CARGO GEAR: Equipment provided upon request.
REPATRIATION: Can be arranged through Immigration Office at Port of Spain.
AIRPORT: Piarco International Airport is served by several major airlines on a daily basis, distance to Airport 15 km.
TIME: GMT minus 4 hours. There is no daylight savings time in Trinidad.
HOLIDAYS: Cargo can be performed on official holidays with sufficient notice.
Official Holidays: New Year's Day (1st January); Carnival Monday (February-March); Carnival Tuesday (February-March); Good Friday (March-April); Easter Monday (March-April); Whit Monday (May-June); Labour Day (16th June); Emancipation Day (1st August); Eid al-Fitr (varies); Independence Day (31st August); Republic Day (24th September); Dawali (varies); Christmas Day (25th December); Boxing Day (26th December).
POLICE/AMBULANCE/FIRE: Carenage Police Station, Tel: (809) 637-3123; Ambulance Service, Tel: 990; Carenage Fire Station, Tel: (809) 634-4344 or 634-4231.
EMERGENCY CO-ORDINATION CENTRE: Trinidad and Tobago Coast Guard – Staubles Bay, Maritime Emergency, Tel: 634-4440. Regular Tel: 625-4939.
TELEPHONES: Available, depending on berth location.
BANKS:
Bank of Commerce Trinidad & Tobago, 72 Independence Square, Port of Spain, Tel: 627-9325.
Bank of Nova Scotia, Park & Richmond Streets, Port of Spain. Tel: 625-3566.
Citibank, 74 Independence Square, Port of Spain. Tel: 625-1046/9.
National Commercial Bank of Trinidad and Tobago, 60 Independence Square, Port of Spain. Tel: 625-2893.
Republic Bank, 59 Independence Square, Port of Spain. Tel: 625-4412.
Royal Bank, 3B Chancery Lane, Port of Spain. Tel: 623-4291.
STORING: Can be done by truck or launch. Trucks can go alongside the berths. Forklifts can be used on the jetty. Call on site Customs Officer for information about regulations.
SHIP SUPPLY SERVICE: Chaguaramas Terminals Ltd. Tel: (809) 634-4279 or (809) 634-4223. Fax: (809) 625-4083. They will supply ships anchored in Chaguaramas Bay.
SHORE LEAVE: Normally no restrictions, but shore leave is always at the discretion of Immigration (Tel: (809) 623-8147).
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Service is available as requested.
SEAMAN'S CLUBS: The Mariners' Club, Wrightson Road, Port of Spain. Tel: (809) 625-4826 or (809) 627-4873. Most services available.
CURRENCY: Trinidad and Tobago Dollar (TT$). U.S.$ 1.00 = TTS 4.28 (19.2.92).
REGULATIONS: Chaguaramas Terminals is a private port which has limitations on the cargo it can handle.
AUTHORITY: Chaguaramas Terminals Ltd., Chag Terminals Drive, Point Gourde, Trinidad. Mailing address: Chaguaramas Terminals Ltd., P.O.Box 608, Port of Spain, Trinidad. *Tel:* (809) 634-4279/4223. *FAX:* (809) 625-4083. *Contact:* General Manager.

CRONSTADT ISLAND: 10.39 N. 61.38 W. (See Plan)

Terminal owned and operated by Baroid Trinidad Services Ltd., handling bulk barytes and general oilfield supplies.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas Bay for clearance formalities.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 350 ft. length. This size vessel would overhang wharf approx. 80 ft. fore and aft. Depth alongside 13.7 m. Longer vessels can be accommodated with special clearance.
RADIO: North Post Radio Station, call sign "9YL".
VHF: Channel 16.
TUGS: One tug used for berthing if required.
BERTHING: Vessel moored with 2 springs, 3 head and 3 stern lines to dock. Discharging carried out with 80 ton shore crane with 3/4 cu.yd. clam shell bucket with capacity for bulk ore.
FRESH WATER: Available by barge.
FUEL: Available by barge.
GARBAGE DISPOSAL: No service available.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
CURRENCY: Trinidad and Tobago Dollar (TT$). U.S.$ 1.00 = TT$.4.28719.
AUTHORITY: Baroid Trinidad Services Ltd., 59 Sackville Street, P.O.Box 765, Port-of-Spain, Trinidad. *Tel:* (809) 625-1691/2/3, 625-2584. *FAX:* (809) 627-5193. *Cables:* Baroid Trinidad. *Contact:* C. Fuller, General Manager.
AGENT: See "Port of Spain".

CROWN POINT, Tobago: 11.09 N. 60.51 W. (See Plan)

SHIPMASTER'S REPORT: December 1989.

BERTH: National Petroleum Buoy.
CHART: B.A. Chart No. 505.
APPROACHES: Crown Point Lt. and the airport lights make the area easily identifiable at night.

Crown Point Light structure is conspicuous and the hotels at Milford Bay are identifiable.

As vessel approaches Tobago she should beware of the strong W.N.W. set. The current sets to the North West past Sandy Point and the sea mooring. The approach to Sandy Point is made from the North on a South-Easterly course. When Sandy Point is abeam to port, at a distance of 0.5 miles, alter course to about 150° to close mooring buoy.

The buoy should be passed close on the port side on a heading of 150°. When the vessel is about two thirds of the ship's length past the mooring buoy and Crown Point Lt. bears 080° (0.1 miles – 0.13 miles off the shore) drop the port anchor.

The position of the buoy is Lat. 11° 08.75′ N., Long. 60° 50.95′ W.

ANCHORAGE: If waiting for the boatman, or weather to moderate, good anchorage can be obtained in Milford Bay or Great Courland Bay. Cruise ships and a few local fishermen may be encountered in this area.

SHOALS: There is a reef to the South of Crown Point Lt. with a depth of 8 m. at Low Water, which shoals rapidly to 2 cables off Crown Point. Vessels should take great care when departing from the mooring.

RADIO: At the time of arrival National Petroleum's Radio Station was not manned.

MOORING: The boatman has a 'Piroghue', which is a local type boat with a cabin. He comes from the hotel at Pidgeon Point and first appears about 0600 hrs. This is the best time to arrive as it is generally calm at this time.

The vessel backs down to the buoy with the aid of the thruster and sends 2 good stern lines from either quarter with mooring shackles.

When correctly moored, Crown Point Lt. bears 105° and the ship's head is 150°. In this position the vessel is about 250 m. from the shore and will have 3-4 shackles out on the port anchor.

When moored the depth at the mooring is 14 m. at Low Water.

CARGO OPERATIONS: No hose connections are made during the night time, although pumping at night often takes place.

The ship's floating hose of about 320 m. is towed ashore by the boatman to a hut on the beach below Crown Point Lt. structure. A snap connection is used. The pumping rate is about 300 bbls./hr. The capacity of the shore tanks is 1,800 bbls. (200 tonnes in 2 tanks). Gas oil, Aviation Jet Fuel and Motor Fuel are also handled. The ship's Motorola radio was landed ashore to assist with communications during pumping. The "Drogher" Customs Book was landed with the boatman and National Petroleum had entry made at the airport. There is no shore cargo paperwork.

The shore tanks are topped up about every 3 weeks.

AIRPORT: There are local flights between Tobago and Port-of-Spain every 2 hours from 0615 hrs.

International flights are expected to commence in the near future with wide-bodied aircraft, now that the runway has been lengthened.

It is possible to fly from Crown Point Airport to Port-of-Spain at a cost of Trinidad $100, but one often has to wait during the busy periods which are Sunday afternoons and holidays.

WEATHER: There is generally an off-shore wind blowing, which rises to a fresh breeze around midday.

There is generally an off-shore swell which at times can be quite large but it decreases as the vessel gets closer to the shore.

Squalls are often experienced, especially during the rainy season. Sometimes these squalls can be quite violent and dramatic wind changes may occur. They are usually of a short duration and if about to moor or unmoor it is best to wait until they pass.

GENERAL: The boatman will run crew members ashore and collect them at an appointed time.

As large aircraft may be using the airport in the near future, National Petroleum are under pressure to move the mooring buoy 50 m. South from its present position.

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., Long. 60° 59′ 30″ W. The lighthouse, mounted on a lattice steel tower located in Lat. 10° 08′ 32″ N., Long. 60° 59′ 40″ W., exhibits a light 87 m. above sea level which flashes white every 5 secs. and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per sec.), red light, 10 ft. high, and visible for 4 miles through 360°.

DOCUMENTS:
Health Declaration (International Health Form to be filled out by Master on arrival).
Derat or Exemption Certificate.
Crew List (4).
Crew Customs Declaration (2).
Register.
Stores List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Stores List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).

ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.

1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel on mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile S.W. of the buoy.
4. *Tankers to Have Ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tanker's valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety of Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

APPROACHES:
Port Limits: Approaching vessels should never anchor to the East or N.E. of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10′ 24″ N., Long. 60° 39′ 56″ W., enters the Galeota Point area about 0.5 miles Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.

Navigational Aids: Galeota Point Lighthouse is located in Lat. 10° 08′ N., Long. 60° 59′ 30″ W., and exhibits a white flashing light every 5 secs. and is visible for 22 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05′ 47″ N., Long. 61° 00′ 45″ W.

Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 miles Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 miles due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ N., Long. 61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme LW.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1. Teak "A"	Lat. 10° 10′ 24″ N.,	Long. 60° 39′ 56″ W.
2. Teak "B"	Lat. 10° 11′ 41″ N.,	Long. 60° 39′ 55″ W.
3. Teak "C"	Lat. 10° 10′ 29″ N.,	Long. 60° 40′ 36″ W.
4. Teak "D"	Lat. 10° 02′ 12″ N.,	Long. 60° 38′ 54″ W.
5. Teak "E"	Lat. 10° 10′ 26″ N.,	Long. 60° 39′ 55″ W.
6. Samaan "A"	Lat. 10° 20′ 30″ N.,	Long. 60° 40′ 47″ W.
7. Samaan "B"	Lat. 10° 19′ 46″ N.,	Long. 60° 41′ 04″ W.
8. Samaan "C"	Lat. 10° 19′ 47″ N.,	Long. 60° 41′ 35″ W.
9. Poui "A"	Lat. 10° 06′ 35″ N.,	Long. 60° 49′ 47″ W.
10. Poui "B"	Lat. 10° 06′ 55″ N.,	Long. 60° 49′ 02″ W.
11. Tesoro "A"	Lat. 10° 11′ 05″ N.,	Long. 60° 54′ 59″ W.
12. Cassia	Lat. 09° 55′ 00″ N.,	Long. 60° 31′ 53″ W.
13. Mora	Lat. 10° 10′ 49″ N.,	Long. 60° 51′ 32.8″ W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigand Hill (Lat. 10° 29.4′ N., Long. 60° 51′ 32.8″ W.) is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 secs. and visible for 20 miles.

PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota Lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco Representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles N.W. of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*	*Frequency*	*Hours*
North Post Radio	9YL	(HF) 17184 kHz	1200 hrs. – 1530 hrs. (GMT)
		(HF) 12885 kHz	1330 hrs. – 2050 hrs. (GMT)
		(HF) 8710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(HF) 6470 kHz	2300 hrs.
		(MF) 476 kHz	0300 hrs. and every 4 hours thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kHz and operates with Amoco's marine units on 2398 kHz.

Ships equipped with FM/VHF radios may call Galeota Point on Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's Readiness to Load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (see "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipeline from shore to the SBM which is 2.6 miles offshore. The facility for receiving dirty ballast has been permanently terminated. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.8 m. high, and equipped with a navigation light and radar reflector. There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. All vessels are required to arrive at Galeota with clean ballast only, which will be discharged overside.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted*.

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyd's, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 bbls.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Notice of Readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

All Masters will ensure that only clean ballast is discharged overside. Periodically, Masters may be requested to flush the floating hose string with sea water to facilitate loading hose replacement.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. On advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical or hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is 2 hour's drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping
Grell and Company Ltd.,
60 St. Vincent Street,
Port of Spain

Lloyds Register of Shipping
Geo. F. Huggins and Co. Ltd.,
72 – 74 South Quay
Port of Spain

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

SHORE LEAVE: Shore leave for personnel of vessels loading or unloading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the N.E. trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than 1 mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the N.E. and East (about 90% of the time). The mean velocity is about 8 – 12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 ft. – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the N.E. trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 ft. – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the N.W. 53%, North 24%, and N.N.W. 14% The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75°F to 80°F in the Winter months and 80°F to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the S.W. tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Autumn at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It should be noted that Amoco Trinidad Oil Co. does not maintain any specialised fire-fighting vessel. However, workboats with limited fire-fighting capability may be available in event of such emergencies.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

GENERAL:

Government Officials: Trinidad and Tobago Customs Officials will be stationed at Galeota and in most instances the Customs Officer will also handle the duties of the Quarantine and Immigration Officers. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes' drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by a spar topped buoy exhibiting a quick flashing red light located 1,700 ft. Southwestward from the end of the jetty.

Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.

OPERATOR: Amoco Trinidad Oil Company, P.O.Box 714, Port of Spain, Trinidad, Trinidad & Tobago. *Tel:* 62-27331.

AGENT: See "Port of Spain".

POINTE-A-PIERRE (Oil Terminal and Refinery):

10.19 N. 61.29 W. **(See Plan)**

DOCUMENTS:
5 copies Crew List.
4 copies Stores List.
1 copy Unmanifested Cargo List.
2 copies Crew Declaration.
1 copy Declaration of Health.
1 copy Arrival Report.
1 copy Firearms & Ammunition List.
Derat Certificate.

Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot boards from tug. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Pilot boards 1.2 miles S.E. of SPM.

ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipe-lines supported by reinforced concrete piling, located at Lat. 10° 20′ N., Long. 61° 30′ W. and extends in a W.S.W. direction for 6,190 ft. from shore.

RESTRICTIONS: Controlling depth in main channel 42 ft. No entry restrictions day or night. However, Free Pratique must be obtained, Crew Lists, Stores Lists, etc., to be presented to local Agents on arrival. Arriving vessels must contact Trintoc, Pointe-a-Pierre on VHF Channel 16 two hours prior to arrival for berthing instructions, traffic information, cargo nominations, etc.

MAX. SIZE: See "Berthing".

Also see "Shipmaster's Reports".

HEALTH: See "Port-of-Spain".

RADIO: Vessels to send ETA messages 72, 48 and 24 hours prior to arrival to "Trintoc Marine Pointe-a-Pierre". Messages should be sent through one of the following: Chatham (USA), North Post (Trinidad), Barbados or Curacao.

VHF: The Trinidad and Tobago Oil Co. Ltd. maintains their own radio station (24 hours). Call "Trintoc-Marine Pointe-a-Pierre" on Channel 16, working Channel 13.

TUGS: Trintoc maintains 3 tugs to assist in berthing and unberthing.

BERTHING:

	Max. Permissible			
Berth No.	*Draft* (ft.)	*LOA* (ft.)	*D.W.T.*	*Remarks*
1	37.5	720	50,000	
2 (North)	37.0	775	63,000	
2 (South)	22.0	350	7,000	Small vessels and barges only
5 (Sea Island)	41.5	900	100,000	
6 (Sea Island)	54.0	950	120,000	
7	36.0	700	35,000	
8 (General Cargo)	28.5	700 (pier length) 70 (pier width)	25,000	
SPM	73.5	—	286,000	Not operational.

DISCHARGING:

Maximising Cargo Discharge (Squeeze Dry Operations): Due to the current high costs of crude oil the following guidelines should be followed in order to maximise cargo outturn. Special importance should be attached to the discharge immediately preceeding shipyarding. A Representative from the Company will attend vessels periodically in order to advise and assist as required.

General Guidelines for Maximising Cargo Discharge:

1. Inerted vessels capable of Crude Oil Washing must strictly follow the routines set out in their Tank-cleaning Manuals.
2. Stripping operation to be performed twice, first during normal discharge and the second time after all cargo (except partial contents in the aftermost (slop) tank) has been discharged ashore. The Inspector must ensure that vessel is adequately trimmed by the stern during all stripping operations.
3. On completion of normal discharge (except for partial contents in aftermost (slop) tank) and second stripping of all tanks, contents of main deck and drop lines and loading arm connections must be stripped to slop tank. (NB: Air or tank atmosphere must be used to break the vacuum).
4. Line content in all main suction lines must also be dropped into aftermost tanks and all main suction valves in tanks opened to drain suction elbows. On completion of dumping line contents, stripping system to be used to drain cargo remaining in the suction system and pumps back to the slop tank, with tank suction shut.

   This is best achieved by commoning up all main cargo pipe-lines on the suction side of the main cargo pumps, opening the suction valves to these pumps and cross connecting the suction side of the stripping system to the main cargo line.
5. Where available, open by-pass valves connecting discharge side with suction side of main cargo pumps.

   Note: When vacuum starts building up in the suction system, allow tank atmosphere to enter the pipe-lines by opening a suction valve in a forward tank.

   It is recommended that one hose or loading arm remains connected to the manifold to which the small diameter deck stripping line (where available) discharges into. This line discharges outboard of the vessel's manifold valve, which of course is left shut during final discharge ashore of slop tank contents using stripping system.
6. The reasons for stripping back line and final tank contents to the aftermost (slop) tank rather than direct to shore are that:
   (a) Operator has better idea when suction is lost (by seeing no increase in slop tank ullage).
   (b) Accurate measurements can be made of total quantity of cargo recovered by operation "Squeeze Dry".
7. On completion of final line and tank draining, discharge contents of aftermost (slop) tank ashore via small diameter deck stripping line, where fitted, or via main discharge line where not.

Check List for Line Draining – Operation "Squeeze Dry":

1. Are following design features available to improve line draining:
   (a) By-pass to connect discharge side with suction side of main cargo pumps?
   (b) Connections from stripping system to both suction and discharge lines of main cargo pumps?
   (c) Vent valves in deck lines near manifold?
   (d) Suction and discharge pressure gauges and stroke counters in stripping pumps?
   (e) Small diameter deck line, for final draining?
   (f) Block valves in stripping line system?
2. Is cargo discharge *completely* finished and all cargo tanks checked by dipping to be well drained?
3. Have contents of tank washing line that was used for COW been properly dropped into slop tank?
4. Are all manifold valves with shore connection (except one if no small diameter line available) shut?
5. Are all valves in deck, pumproom and drop lines open?
6. Are all valves (except tank valves during line draining) in suction lines open?
7. Are all lines dropped in aftermost (slop) tanks?
8. Has air/inert gas been allowed to enter to vessel's line system both at forward end of bottom lines and in the manifold area?
9. Are stroke counters (where fitted), suction and delivery pressure gauges of drain pumps working correctly?
10. Has dropping operation been checked by measuring oil level in aftermost holding or slop tank/tanks?
11. Have all manifold valves been shut after dropping operation?
12. Has valve in small diameter deck line been opened, or where not fitted, has "final" manifold valve been opened?
13. Have stripping pumps been set correctly to drain holding or slop tank ashore through small diameter line (or deck line)?
14. Have all lines in cargo tanks, on deck and in pumproom been set correctly for line draining to holding or slop tank?
15. Has holding or slop tank been properly drained ashore and checked to be well drained by dipping?
16. Has vacuum been allowed to build-up before air/inert gas was let in and has this been done repeatedly?
17. In addition to checking holding or slop tank ullage, are drain pumps checked to see if actual delivery from line draining/tank draining has stopped?
18. Has shore been asked to check delivery of final holding or slop tank into shore system?
19. Have all valves been shut after line draining?

Note: During draining of discharge lines to holding or slop tank, open the non-return valves in the discharge lines (if movable from the outside).

TRANSHIPPING: *Instructions to VLCC Masters from Trintoc Marine:*

1. Anchor your vessel in designated anchorage with starboard anchor and rig gangway starboard side. Enter and clear vessel in normal manner, co-ordinating all activities via VHF with Trintoc Marine Superintendent at Shipping Office.
2. Gauge all tanks, determine amount of cargo on board and advise Shipping Office along with A.P.I., temperature and other particulars. Re-secure all tanks. Advise Lightering Vessel A.P.I. and temperatures.
3. Barge will come alongside, port midships. Receive on board 6×30 ft. lengths of 12 in. cargo hose along with necessary reducers, blanks, bridles, straps, etc. Ship's crew must rig 2 strings of 90 ft. long hose connected to your manifolds, and supported by your vessel's boom. Hoses will be tended by your vessel's crew throughout transhipment.
4. A string of 4×11 ft.×21 ft. Yokohama fenders, each separated by 100 ft. length wire will be brought alongside (port). Your forward and after main deck wire springs will be lowered down and secured to the ends of the fender string to secure same alongside. Four of the fender positioning wires will then be lowered from your deck and one secured to each of the fenders. The fender string must then be positioned and secured alongside centred on your manifold.
5. Two additional fenders will then be brought alongside and secured approximately 150 ft. forward and aft of the main fender string to provide additional protection to your vessel in mooring and unmooring the lightering vessel. Two positioning wires will be passed up to your deck from each of these fenders to secure them in place.
6. When lightering vessel comes alongside your crew must be stationed fore and aft on deck to handle lines. Your bridge should be manned with engines on standby in the event of emergency. During entire transhipment all fire fighting equipment must be rigged and ready. Additional fire fighting equipment and anti-pollution devices will be on harbour tugs and available if needed.
7. A lightering vessel assisted by tugs will come abeam of your vessel and send synthetic lines, one forward, one aft, by launch.

   Your crew must lower heaving lines or messenger lines to launch, then heave lines on board and secure fore and aft on your vessel. Lightering vessel will then be brought alongside and positioned with her manifold approximately 10 ft. – 40 ft. aft of yours. The lightering vessel will then pass her wires (all containing nylon straps) to your vessel and safely secure alongside.

8. After the lightering vessel is safely secured alongside, to your satisfaction, the two hose strings will be passed to her and secured to her manifolds. The lightering vessel will support the hose ends, however, the main support will remain your vessel's boom. Agreeable handling rates, procedures and signals must be agreed upon between the Masters of the vessels involved and the Trintoc Co-ordinator of the transhipment. Portable VHF radios operating on Channels 16 and 10 will be supplied from ashore. VHF Channel 10 will be used for all ship-to-shore communication.

   Your control room must be manned at all times by a competent individual who must be monitoring Channel 10. Additionally a competent individual (Officer) and a full watch must be maintained on deck to tend hoses, fenders, etc. One man must be stationed at the manifold and in full view of the hoses and other vessel at all times.

   The Trintoc Co-ordinator and Marine Staff will be available and will assist in all ways possible, however, the responsibility for a safe operation rests with you and your vessel.
9. Upon completion of loading the lightering vessel, your tanks must again be gauged and figures passed to Shipping Office. All tanks must then be secured prior to unmooring of lightering vessel. The Marine Office will co-ordinate handling of necessary cargo documents depending on the destination of the lightering vessel.
10. Hoses will be drained to the lightering vessel, then disconnected, blanked and taken back aboard the VLCC.

    Your crew must again be stationed fore and aft, your bridge manned and the lightering vessel unmoored.
11. The procedure will be repeated for the next lightering vessel.
12. It is anticipated ballast will be taken after the second lightering or as soon as one isolated section is stripped of cargo. Prior to ballasting Trintoc Co-ordinator should certify tanks to be ballasted as dry.

ALTHOUGH IT IS IMPORTANT TO MINIMISE DELAYS THIS CONSIDERATION MUST TAKE SECOND PLACE TO PROPER SAFETY PRACTICES AND TO ANY STEPS NECESSARY TO AVOID POLLUTION.

Also see "Discharging".

DENSITY: 1025, (August to November approximately 1023).

FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival). Limited in dry season (January-June).

FUEL: Fuel oil, diesel and gas oil supplied ex-pipeline or by barge. Also see "Shipmaster's Report" dated August 1979.

MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities available.

BALLAST: Vessels to arrive with clean ballast. No dirty ballast facilities.

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: Trinidad Foundry and Fabricating Ltd. located at Chaguaramas.

SURVEYORS: Lloyd's, A.B.S. and N.V.

SPECIAL PRECAUTIONS: *Emergency Alarm:* This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.

Hose Pressure: The max. discharge pressure allowed on the jetty hose is 100 lbs. Pressure of jetty hose for loading shall not exceed 100 lbs.

GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 0.5 lb. tobacco and 1 bottle of spirits.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Piarco International Airport 28 miles (approx.) away from Pointe-a-Pierre, served by international airlines and flights are regular.

TIME: GMT minus 4 hours.

TELEPHONES: On dockside and at all sea berths.

SHORE LEAVE: Regular launch service from ship to Pointe-a-Pierre only, for all crew members.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: Shore facilities can accommodate 2,000 barrels of dirty water ballast (slops) per vessel, or material which does not require heating (low pour point).

SEAMAN'S CLUBS: The Mariner's Club (Missions to Seamen), Wrightson Road, Port of Spain. Tel: 62-5426. The Club is approximately 32 km. from the terminal. Facilities: Chapel, T.V. lounge and video films, telephone service, shop, mail and stamps, bar, darts, pool tables, table tennis and swimming pool. Hours: 0900 hrs. – 2000 hrs. Monday – Friday; 1000 hrs. – 2200 hrs. Saturday, and 1400 hrs. – 2200 hrs. Sunday.

CURRENCY: Trinidad and Tobago Dollar (TT$.). U.S.$ 1.00 = TT$.4.24 (17.3.92).

GENERAL:

Tidal Variation: Rise and fall is approximately 3 ft. 6 in.

Prevailing Winds: N.E. trade winds.

Flags Required: Republic of Trinidad & Tobago and International Code Flags "B", "G", "H" and "Q".

Launches: Launch service to Pointe-a-Pierre for Officers and crew.

Laundry/Provisions: Available.

SHIPMASTER'S REPORT: August 1979 (updated 1986).

Bunkering:

Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.

Good position obtained at a distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.

North coast Trinidad current approximately 1.5 knots West going.

Chupara Point Light not conspicuous during daylight and not seen at night.

Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.

Gulf of Paria can, with moderate sized vessel, be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.

Serpents Mouth not recommended at night.

Gulf of Paria not very busy, many vessels anchored off Port of Spain.

An intense white light (Fl. ev. sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position: Lat. 10° 18′ 38″ N., Long. 61° 27′ 36″ W.). B.A. Chart No. 482 seen at 12 miles.

No appreciable current in Gulf of Paria.

VHF: Called "Trintoc Shipping Office Pointe-a-Pierre" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.

Anchorage: General anchorage along parallel of 10° 19′ North from 3 miles West of Buoy No. 1 (Lat. 10° 19′ 06″ N., Long. 61° 29′ 18″ W.) to 0.5 miles off buoy.

We anchored with Buoy No. 1 - 072°×1.0′, good position in 17 m.

For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.

Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.

Bunkering: Trintoc: Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.

Diesel 6 in. line, 150 ASA, ship's derrick required.

Rate: Up to 200 tonnes p.h. for diesel.

Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979 (updated 1992).

Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage off Pointe-a-Pierre.

Anchorage: Trintoc Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.

Navigational Restriction: VLCCs are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.

Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each 7 days if requested through Agent. Port Health work is carried out by Agent and we renewed Derat Certificate. Shore leave passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Trintoc Club and one for the crew which only allows them to land at Pointe-a-Pierre jetty.

Shore Leave: (Launch cost TT$11.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to Pointe-a-Pierre. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we received better service. Officers wishing to go to the club could get a separate launch arranged by Trintoc Shipping (when available) direct to Pointe-a-Pierre.

Bunkers: Bunkers are supplied by barge of 30,000 bbls. capacity. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 150 t.p.h. The barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economical and better quality than in the official water barge.

Fresh Water: Normal source of supply is by barge from Port of Spain which requires about 4 days' advance notice. Cost of supply is TT$3,000 no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. salt and also tasted oily. It is better to take water when bunkering (See "Bunkers").

Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned beer or minerals are available and all bottles are returnable which increases the price.

Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequently during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharge pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second. Discharge to the SBM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used, and a rate of 2,224 t.p.h. was achieved. All discharging was carried out using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to be connected together and attached to the ship's manifold, then a string of four "Yokohama" type fenders were made fast alongside using the spring wires from forward of No. 1 and from between Nos. 8 and 9 holds. We were instructed to keep the wires slack at all times to prevent the joining wires breaking. All the moorings from the lightening ships have to be fed through "Panama type" fairleads and no open leads used to prevent the rope/wire jumping out of the lead when the lightening ship is completely deballasted. Communications between vessels is via walkie-talkies supplied by Trintoc and a co-ordinator from Trintoc attends the vessel for liaising operations. Bunkering cannot be carried out while lightening but is acceptable at the SBM, we managed to complete it before any cargo operations started. No gangways are used between ships.

Mooring at the SBM was carried out with the assistance of one tug made fast on the starboard side of No. 1. A ship's line is sent away to connect with the SBM port line, as usual, this starting line should be two ropes joined together to ensure adequate length. Once the connecting line is brought on board (a 16 in. nylon) in sufficient quantity it is made fast on the bitts and the starboard connecting line picked up and secured. When connecting hoses, we found that our manifold flanges were too thin to accept their patent clamps and we had to fit 12 in. reducers to our manifolds and also to their pipe-lines to get a good fit. Ship's crew carry out all operations although there are personnel placed on board for mooring to the SBM to advise and assist.

Mooring and unmooring are usually carried out during daylight but for some reason we unmoored during the night, much to the surprise of the Pilot and co-ordinators, being the first vessel to do it for 6 years.

Personnel Changes: We carried out several changes of personnel over the period and in general, the joining people arrived on time without much difficulty but the personnel leaving, unless previously booked in advance, met with delays getting flights. A vessel which arrived the day after us, had eight men delayed ten days before flights were available. Non-crew personnel, such as technicians, who arrived and stated they were coming to do work on the ship were not allowed entry into the country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980 (updated 1986).

Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.

Anchorages: Usually given an anchorage position by Trintoc, Trinidad, and normally use starboard anchor and require starboard accommodation ladder.

Tankers: Advise Agents time of transiting Bocas del Dragon and then North Post Radio will advise all ships. If using SBM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

SHIPMASTER'S REPORT: November 1983 (updated 1986).

Documents:

Agent: P&I 48 (Arrival Report)

Immigration: P&I 10 (Arrival Report), P&I 53 (Arrival Report form in triplicate)

Quarantine: P&I 31 (Maritime Declaration of Health)

Customs: C-1 (Ship's Stores in duplicate)
C-2 (Crew Declaration)
C-3 (List of Unmanifested Cargo)
5 copies of Crew List.

Anchorages: It is necessary to anchor in position given by Trintocmarine otherwise they request you to shift to correct position but also necessary to check there is not another vessel anchored there already.

Radio: We found it very difficult to communicate with North Post Radio from the bay. 'Shipping' or Trintocmarine are very helpful passing messages to agents, etc.

Shore Leave: Apparently the liberty boat rarely goes to San Fernando these days (apparently due to the unsafe state of the jetty).

Currency: Agents require at least 10 days' notice if vessel requires any foreign currency and, apart from this delay, Sterling and U.S. Dollars seemed readily available. 4 days' notice is required for local currency. This 4 days would probably be longer if not using Company Agents.

Mail: Mail took 4 days from arrival at airport to delivery on board.

AUTHORITY: The Trinidad and Tobago Oil Co. Ltd., Pointe-a-Pierre, Trinidad, W.I. *Tel:* (809) 658-4200. *Telex:* 39366/39367 Trintoc Marine. *FAX:* (809) 658-4636. *Cables:* Trintoc, Pointe-a-Pierre. *Contact:* R.F.Jones, Marine Manager. P.J.Lyons, Port Captain.

AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Plan)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12′ N., Long. 61° 42′ W.).

ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.

MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.

TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.

BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.

MEDICAL: All facilities available.

FRESH WATER: Not available at CBM.

FUEL: Not available at CBM.

FIRE PRECAUTIONS: Normal oil terminal safety precautions applicable.

REPAIRS AND DRY DOCKS: At Chaguaramas.

DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) of tank drainings acceptable on jetty and only if fluid at ambient temperature.

GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.

CUSTOMS ALLOWANCES: 200 cigarettes, and a moderate amount of spirits.

REPATRIATION: Can be arranged.

AIRPORT: See "Port of Spain".

TIME: GMT minus 4 hours.

TELEPHONES: No facilities for telephones on board.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: April 1977 (Updated 1990).
The Port of Point Fortin is situated in S.W. Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12′ 05″ N., Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessel's Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of Readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipe-line bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:

Clearance from Last Port.
Derat Certificate.
International Health Certificate.
Declaration and Crew Vaccination Certificate.
Cargo Manifest, if any.
Bill of Lading, if applicable.
List of unmanifested packages, if applicable.
3 copies Arrival Report.
7 copies Crew List.
3 copies Stores List.
3 copies Personal Effects.
Licence for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:

No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.

No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).

No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.

No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).

No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth starboard side alongside. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×12 in. hoses.

AUTHORITY: Trinidad & Tobago Oil Co. Ltd.

AGENT: See "Port of Spain".

POINT LISAS (Fedchem): 10.22 N. 61.29 W. (Plipdeco Marine): 10.24 N. 61.29 W. **(See Plan)**

(A) FEDERATION CHEMICALS LTD.

DOCUMENTS:

7 copies Crew List.
2 copies Ship's Stores List.
2 copies Passenger List.
The following should be on Trinidad Forms:
  2 copies Crew Stores List – Form C2.
  2 copies Ships Stores (Bond) – Form C1.
  3 copies Immigration Arrival Report – Form P&I 10.
  2 copies Unmanifested Cargo – Form C3.
  1 copy Declaration of Health – Form P&I 31.
  2 copies Arrival Report – Form P&I 53.
  1 copy Stowaway List – Form P&I 12.
Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (Lat. 10° 22′ 37″ N., Long. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.

CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs Officer acts for Harbour Master/Port Health. Tel. 636-2020. Immigration Officer boards on arrival.

ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (Lat. 10° 41′ N., Long. 61° 33′ W.) before proceeding Pt. Lisas.

RESTRICTIONS: No restrictions on night entry – departure.

MAX. SIZE: See "Berthing".

HEALTH: For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 636-2311.

VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.

TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.

BERTHING: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA: 550 ft. Maximum draft: 28 ft. LW. Also see "Shipmaster's Reports".

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 250 ft. Maximum draft: 20 ft. LWOST.

STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

FRESH WATER: Only by barge.

FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation (Monday – Friday from 0800 – 1600 hrs.).

FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.

CONSULS: At Port of Spain.

REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.

GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: Piarco International Airport – 30 miles from Point Lisas. Daily flights to world-wide destinations.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st – 22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, Union Anniversary Day and Christmas Day, on these holidays.

POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 62999; Fire – First Aid, 62998.

TELEPHONES: No facilities for telephones on board.

SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.

DEVELOPMENTS: Present depth of channel 28 ft. at MLW.

Berth for LPG tankers up to 137 m. LOA under construction.

SHIPMASTER'S REPORT: August 1988.

Vessel loaded ammonia at the Liquids Pier.

Max. draft 28 ft. at LW and if at this draft, vessel can only sail at HW.

Mooring consisted of 2 head/stern lines and 2 breast lines and 2 springs at each end and with very long leads.

One tug used.

Connections made by ship's crew (6 in. 300 ASA). Max. loading rate 700 t.p.h. at a temperature of −31°C. Vessel allowed to purge alongside with shore providing hot ammonia vapours.

Ship's brow gangway used.

SHIPMASTER'S REPORT: September 1990.

Chart: B.A. Chart No. 482.

Approach: Do not confuse Lisas Fedchem Channel with Savonetta Channel. Fedchem Channel has beacons in line 091° which show up well on radar.

Shoreline between the Point Lisas terminals is not as charted, and tends in a Southerly direction more to seaward than charted.

Anchorage: Not within 1 mile of the end of the channel. Vessels generally anchor to the West of both channels, not North or South as indicated on B.A. Chart No. 482, due to the shallower water.

Gulf of Paria is one of the safest anchorages in the Caribbean with no swell, relatively sheltered, fair holding and plenty of room. Watch out for violent wind shifts during rain squalls, especially during the Summer.

Pilot: Pilot for Fedchem only between 0630 hrs. and 1730 hrs. Definitely no night berthing, possible to sail at night if really necessary.

Generally Pilots come from Port of Spain, although recently a Pilot has been stationed at Plipdeco-Point Lisas. There used to be a Pilot stationed at Trintoc-Pointe-A-Pierre, but this has now been discontinued.

Pilot comes out on Fedchem mooring launch, and likes to board 1 mile West of channel, so as to give room for aligning up.

Expertise very good to poor.

VHF: As per ALRS. Fedchem range is very poor.

Tugs: Either from Plipdeco-Point Lisas or Trintop-Pointe-A-Pierre. Tugs from Trintoc cheaper and better, but not always available.

Generally 2 tugs used with tugs lines. They join outside channel.

Entry: Channel is 250 ft. in width. Charted depth is 12.8 m., but minimum 12.5 m., reduced to C.D., found recently between berth and Beacons No. 3 and 4. Current sets North until approximately 1 hour after H.W. at Port of Spain, and sets South until 1 hour after L.W. at Port of Spain.

Around the turn of the tide, eddies are very prevalent, and it is not the safest time to berth.

When entering channel, if course over 6° different from leading marks, abort entry either before Beacons No. 1 and 2, or between Beacons No. 1 and 2 or Beacons No. 2 and 3, where there is still sufficient depth at 13.0 m. Depth fairly consistent.

Berth: Due to channel restrictions and turning basin, maximum size of vessel at Tringen No. 2 is about 50,000 cu.m.

Always port side alongside, swinging in adjacent basin.

Moorings run by launch, only one launch, so mooring can take a while, especially with wires. Moorings good (3, 2, 2) to dolphins and trestle.

Berth is a concrete trestle with good fenders.

Berth for vessels up to about 15,000 cu.m. in lagoon. This is the original berth before Tringen No. 2 was constructed in 1988.

Cargo: Presently only handles the export of refrigerated ammonia.

One Chicksan (12 in. 150 ASA) with 6 in. VRL attached.

Two loading pumps, each 650 t.p.h., and one small circulating pump, are available.

Generally start at minimum rate for one pump at approximately 100 t.p.h. – 200 t.p.h.

Maximum rate with 2 pumps is 1,250 t.p.h. – 1,300 t.p.h.

Product generally warm at around minus 30.5° C. – always make protest.

If vessel arrives to cool down, vapour to flare at ship's expense until ship's tanks around 97%. NH3 purged, then vessel can use VRL to shore tanks. Loading of ships at Lagoon berth has no effect on ships loading at Tringen No. 2.

The S.G.S. Surveyors were good.

Control House at base of jetty, Loading Master is always in attendance during loading.

Either ship's UHF set or Fedchem set given.

Facilities: Fresh water available on jetty at a low rate of around 15 t.p.h. Also available by barge from Port of Spain at U.S.$ 8.0 per tonne, but only at anchorage during daylight, order well in advance through Agent.

Stores, taxis, etc. can get as far as the Control House, which is about 200 m. from ship.

Local telephone calls can be made from Control House during normal office hours. Otherwise one has to go to main building about 1 mile away. Overseas calls arranged through Agent.

Most facilities available at San Fernando.

Plant has very good machine shop with skilled mechanical and electrical fitters, who are willing to assist in an emergency.

New berth with a depth of approximately 20 ft. is under construction in the Lagoon for export of gas condensate.

Documents: All Trinidad Forms:
2 copies Crew Declaration.
2 copies Unmanifested Cargo.
3 copies Arrival Report.
1 copy Immigration Landing Report.
1 copy Health Declaration.
6 copies Crew List.
3 copies Cargo Manifest.
1 copy Stowaway List.

Curfew: Curfew in operation from 1900 hrs. to 0500 hrs. on this visit.

SHIPMASTER'S REPORT: May 1992.

Berth: Phoenix Park Gas LPG Berth – Norsk Hydro (Fedchem).

Chart: B.A. Chart No. 482.

Location: North side of Point Lisas Fedchem Lagoon. Complex formerly Fedchem/Grace, now owned by Norsk Hydro Ammonia.

Phoenix Park is a joint U.S./Trinidad operation, using Amoco Gas condensate from the Trinidad East Coast fields, as does adjoining Norsk Hydro Plant. Plant and berth situated on land rented from Norsk Hydro. Berth and Plant completed in 1991.

Approximate Plant Position: 10° 22.45′ N., 61° 28.8′ W.

Pilot: As per other Fedchem/Hydro berths.

Channel: As charted (old Fedchem Channel), well buoyed and lighted. Berthing up to about 100 m. LOA – 24 hours, over about 100 m. LOA daylight only. Vessel swung to head out in inner lagoon.

Sailing up to about 8.0 m. draft, virtually 24 hours. Over 8.0 m., 2 hours either side of H.W. and daylight only, which means one period in 24 hours.

Berth, Turning Basin and Inner Channel depth quoted as 28 ft. (L.W.). We actually found minimum of 30 ft.

Tugs: From Point Lisas Industrial Port. Tugs lines used. 6 hours notice required for tugs.

If unavailable, tugs can sometimes be obtained from Pointe-A-Pierre.

Berth: Concrete pier with breasting dolphins and loading platform. Built to basic standards in 1991. Pier extends from North Eastern shore of lagoon in 271° – 091° direction for about 200 m., just North of and in same approximate line as old leading lights. Centred on 10° 22.6′ N., 61° 29.08′ W.

Maximum size of vessel accommodated: About 200 m. LOA, 25.0 m. breadth and 8.5 m. draft.

Fendering: Rubber sprung type.

Moorings: For vessels of maximum length, mooring arrangement is not very good (2 head/stern, 2 breast, 2 springs each end). Mooring handled by mooring boat and gang from Norsk Hydro Plant.

Loading: Butane and Propane through 8 in. (connection) Chicksan arm with 4 in. VRL flexi-hose attached to hard arm.

	Propane		*Butane*	
	(barrels)	(tonnes)	(barrels)	(tonnes)
Storage	150,000	1,200	100,000	9,200
Production (per day)	4,500	360	3,600	330
Loading (per hour)	4,200	330	4,200	380

SG Propane: 60. 0.5064 – 97% Propane, 1% Ethane, residue Butane.

SG Butane: 60. 0.5725 – 97% I/N Butane, 2% Propane, residue Pentane.

Shore UHF set given, but batteries quickly run down. Shore ended up using ship's set.

Terminal personnel are meant to be in shore office on jetty, but rarely in attendance. Nevertheless quite good cooperation.

Tel: 809-636 1522. Fax: 809-636 6810. Telex: 31351.

Phoenix Park Gas Processors Ltd., P.O.Box 225, Savonetta, Point Lisas.

Bills of Lading received about 2 hours after completion.

SGS Surveyors in attendance on arrival and departure.

General: Fresh Water: Not available alongside, only by barge from Port of Spain and taken at Point Lisas Anchorage.

Telephone: Possible to telephone overseas from Norsk Hydro Dock office near berth, but only Monday to Friday from 0800 hrs. to 1600 hrs.

Stores: Friendly talk with Duty Supervisor will allow stores truck onto main pier, which is about 10 m. from ship's side. A fair range available, but watch quality and check all foodstuffs. Prices reasonable if paid in U.S.$ cash.

Gangway: Very poor situation for landing. No shore gangway. We had to use a pilot ladder (always starboard side to).

Airport: About 50 minutes to Piarco International Airport.

AUTHORITY: Federation Chemicals Ltd., P.O.Box 952, Port of Spain, Trinidad, W.I. *Tel:* 636-2020. *Telex:* 3353 Fcl Wg. *Cables:* Fedchem.

(B) POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORP. LTD.

LOCATION: Point Lisas lies on the Western side of Trinidad in the Gulf of Paria, in position Lat. 10° 24.2′ N., Long. 61° 29.6′ W.

DOCUMENTS:

7 copies Crew List.
2 copies Ship's Stores List.
2 copies Crew Stores List.
4 copies Immigration Arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.
Derat Certificate.
Ship's Safety Certificate.
Passports.
Seaman's Identification Cards.

PILOTAGE: Pilotage compulsory. Pilots ordered through Agents. Advice at 120, 96, 72, 48, 24, 12 hours' necessary prior to ETA. Pilots board at entrance of Savonetta Channel Lat. 10° 22′ 57″ N., Long. 61° 31′ 11.2″ W. Pilot ladder must conform to International Safety Regulations. Launch hire arranged through Plipdeco Marine to take Pilot on or off vessels.

CLEARANCE: Point Lisas (Plipdeco) is a Port of Entry. On arrival ships may proceed directly alongside or to anchorage for clearance by resident officers.

ANCHORAGE: In-bound vessels may anchor in the anchorage bounded by:

Lat. 10° 23.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 24′ N.	Long: 61° 32.2′ W.

Out-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 22.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 22′ N.	Long: 61° 30.2′ W.

APPROACHES: *Plipdeco's Channel and Basin Markers:*

No. 10 Starboard Hand Buoy	10° 23′ 52.16″ N., 61° 29′ 44.00″ W.

* Newly established positions.

MAX. SIZE: See "Berthing".

HEALTH: Valid Yellow Fever certificates if last Port of call was in an infected area (or country on Cholera Alert). Quarantine on authentication of certificate available at short notice.

VHF: Plipdeco Marine Channel 16, working frequency Channel 9.

RADAR: Not installed at Plipdeco Marine.

TUGS: 4 Resident tugs available. 2×2,250 h.p. and 2×500 h.p. Towage services ordered by Agent.

BERTHING: The Channel is 1.75 nautical miles long and 152 m. wide. Turning basin 700 m. long and 500 m. wide. Both are dredged to 12.8 m. True course 052.15°. The Channel serves the following terminals:

Berth 1A:	Max. LOA:	100 m.
	Draft:	5.8 m.
	Facilities:	None.
	Dock Length:	24 m.
Berth 2:	Max. LOA:	130 m.
	Draft:	2.5 m.
	Facilities:	None.
	Dock Length:	170 m.×40 m. Ro-Ro ramp.
Berth 3:	Max. LOA:	120 m.
	Draft:	6.7 m.
	Facilities:	None.
	Dock Length:	32.3 m.
Savonetta Pier No. 1 (South):	Max. LOA:	220 m.
	Dock Length:	310 m.
	Max. Draft:	11.6 m.
	Facilities:	Specialised installation for loading Anhydrous Ammonia. Maximum rate 1,000 m/t.p.h. Specialised facilities for loading Methanol (700 t.p.h.) and Urea (800 t.p.h.) in bulk.
Savonetta Pier No. 1 (North):	Max. LOA:	110 m.
	Dock Length:	164 m.
	Max. Draft:	6.7 m.
	Facilities:	None, however ideal for bulk liquids.
ISCOTT Terminal:	Max. LOA:	407 m.
	Draft:	11.6 m.
	Facilities:	Specialised installation for discharge of bulk Iron Ore – Loading Direct Reduced Iron (DRI). Maximum rate 1,200 t.p.h., connected to conveyor system. Two (2) Level Luffing Cranes – Capacity 25 tons.

STEVEDORES: All stevedoring and longshoring labour ordered through Point Lisas Terminals Limited (PLTL).

CRANES: Mobile and track cranes available up to 180 tonnes SWL. Ordered through Agents.

MEDICAL: Advance notice required. Agent will arrange.

FRESH WATER: Available on all berths and ex-barge.

FUEL: Bunkers available ex-barge or road tanker.

FIRE PRECAUTIONS: No smoking at Savonetta Pier No. 1 or on the open decks of vessels alongside.

CONSULS: At Port of Spain.

REPAIRS/DRY DOCKS: A repair facility is available at Chaguaramas. However, competent technicians are available for shipboard repairs. Arrangements made through Agents.

SURVEYORS: (1) Cargo Surveyors: Caleb Brett, Saybolt and Redwood available.

(2) Surveyors such as Lloyd's, ABS, Bureau Veritas are available. Arrangements through Agents.

GANGWAY/DECK WATCHMEN: 2 Customs guards on duty for 24 hours aboard all vessels.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.

HOLIDAYS: Work is possible all year except on Labour Day (June 19th) and Union Anniversary Day (Last Saturday in November) on Break Bulk vessels only.

POLICE/FIRE/AMBULANCE: Accidents, Police help 62 999. Fire and First Aid 62 998. Fire assistance and ambulances also available on the estate by calling 2211, 2215, 2205/7 and 636-8155.

REPATRIATION: Crew changes and repatriation possible. Agent will arrange.

Name *Position*

AIRPORT: Piarco International Airport, 60 km. from Point Lisas. Daily international flights available.

TIME: Local time is GMT minus 4 hours.

TELEPHONES: No facilities for telephone aboard. However international dialling to most countries possible.

BANKS: National Commercial Bank of Trinidad and Tobago (NCB), Southern Main Road, Couva.

STORING: Vessels can be stored by barge or truck.

No storing of vessels while loading at Savonetta Pier No. 1.

All storing must be done with Customs approval.

Local riggers and forklifts are available for storing. These may be ordered through local chandlers.

SHORE LEAVE: No restrictions except, for persons not holding documents which grant entry to Trinidad and Tobago. Prior approval of Ministry of National Security must be arranged through Agents.

IDENTIFICATION CARDS: It is advisable to carry identification when proceeding on shore leave.

GARBAGE DISPOSAL: Presently this service is not available at Point Lisas (15.5.91). However, a service for domestic garbage is under study.

WASTE OIL DISPOSAL: Collection service available. Three tanker trucks, capacity 50 barrels/2250 gallons each. Contact Sirju & Sons. Fax: 653-2217.

SEAMAN'S CLUBS: The Mariners Club, Wrightson Road, P.O.Box 561, Port of Spain, Trinidad, W.I. Tel: 62-54826. Open until 2200 hrs. every day, weekdays from 0900 hrs., Saturday from 1000 hrs. and Sundays from 1400 hrs. Facilities include chapel, TV and video lounge, telephone, shop, postage, bar, games, swimming pool and barbeque.

CURRENCY: Trinidad and Tobago Dollar (TT$). U.S.$ 1.00 = TT$ 4.25 (15.5.91).

DEVELOPMENTS: Extension of Berth No. 3 to 100 m. max. length.

Construction of Berth No. 5, a Ro/Ro dock. Max. draft 7 m.

Construction of Berth No. 4 – Max. LOA 150 m., max. draft 7.5 m.

Construction of Chemical (Bulk) Berth by extending Savonetta Pier No. 1 (South) – Max. LOA 180 m.

AUTHORITY: Point Lisas Industrial Port Development Corporation, P.O.Box 191, Goodrich Bay Road, Point Lisas, Couva. *Tel:* 1809-636-2132, 636-4913. *Fax:* 1809-636-4061. *Cables:* Plipdeco, Couva. *Contact:* Captain Rawle Baddaloo, Port Manager.

PORT-OF-SPAIN: 10.39 N. 61.32 W. (See Plan)

DOCUMENTS:

Immigration:

2 Crew Lists.
2 Passenger Lists.
1 Maritime Declaraton of Health.
*1 Stowaways List.
*4 Arrival Report Forms.

*Supplied by the Immigration Department on boarding the vessel and must be completed by the Master of the vessel.

Customs:

2 Crew Lists.
1 Passenger List.
2 Customs Ship's Stores Lists.
1 Crew Stores List.
1 copy of Cargo Manifest (if cargo vessel).
2 Lists of unmanifested cargo.

Quarantine:

1 Cargo Manifest.

PILOTAGE: It is not compulsory to apply for a Pilot into Port-of-Spain anchorage. However, if required notification must be sent to the Pilot Station (Port-of-Spain) at least 1 hour before arrival at the Station on VHF Channel 16.

The Pilot vessel has a black hull and white housing and is 35 ft. long. The word 'Pilot' is written on the housing. It is equipped with VHF radio and carries an international pilot boat light.

Vessels requiring a Pilot can call Pilot by International Code Flag "G" by day and white light and red light at night or by International Code Signal "G" on whistle.

The Pilot Boarding Station is located within 0.5 miles seaward of the Grier Channel Entrance. The vessel awaiting a pilot may anchor anywhere seaward of the Pilot Boarding Station.

International Requirements are applicable for pilots with respect to Boarding and Safety measures. Gangway or standard type pilot ladder with spreaders about 10 ft. apart is required. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwark at the top of the ladder.

Pilot station is situated at the Western end of the Port-of-Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel Entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb. Rise and fall of tides, variable. Minimum 1 ft. 5 in., maximum 4 ft. Rainy season June-December. Dry season December-June. Rain squalls occur during months of July, August and September up to 30-40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly, normally stronger during daylight.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions on length, but maximum draft in channel, in basin and alongside is 32 ft. MLWOST.

RADIO: Advise through North Post wireless or telephone, call sign 9YL ETA 48 hours and 24 hours with other requirements.

TUGS: All vessels of over 1,000 n.r.t. are required to use a tug. Specifications of the 2 tugs are as follows: g.r.t. 2,961.72 tons, n.r.t. 75 tons, speed 12 knots, engines 2×1,200 b.h.p. Ship's lines are normally used.

BERTHING:

Berth No.	*Length (m.)*	*Depth (m.)*	*Use*
1	90	8.0	Break Bulk, Multi-Purpose, Ro/Ro, Cruise Vessels.
2	152	7.4	Break Bulk, Multi-Purpose, Cruise Vessels.
3	152	8.0	
4	152	8.4	
5	152	8.9	
6	152	9.5	Container vessel using ship's gear or shore crane, cruise ships.
6AE	166	9.9	Container vessel using Portainer crane.
6AW	166	10.0	
*7	182	9.5	Rice, Break Bulk, Multi-Purpose.
8	182	9.5	Rice, Break Bulk, Multi-Purpose, Ro/Ro.
8AW	61	4.0	Rice

*At present this berth is under repair.

In addition to the deep water facilities mentioned above there are shallow draft facilities which are located at the Eastern end of the Port. They provide docking facilities for coastal and regional vessels. The Caricom Berth (for regional vessels) is 45 m. long and 4.0 m. deep.

Loading/discharging can be operated by shore equipment supplied by the Port Authority or ship's gear or both.

CRANES:

Type	*No.*	*Capacity tons*
Portainer–Rail Mounted	2	40
Ferranti rubber tyred gantry	5	40
FMC Linkbelt Mobile Crane	1	200
Demag Mobile Crane	1	100
FMC Linkbelt Mobile Crane	2	75
FMC Linkbelt Mobile Crane	3	50
IMC Linkbelt Mobile Crane	4	30

CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern Wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

In addition to the cranes mentioned above, other cargo handling equipment available is as follows:

5 top lifters × 28 tons capacity.
7 front loaders × 10 tons capacity.
40 Mercury Reliance Haul Majors.
17 Motor trucks.
117 Trailers × 20 ft.
45 Trailers × 40 ft.
79 Forklifts × 5 tons capacity.

STEVEDORES: Integrated longshore and stevedore gangs available on request by Agents. Gang sizes vary from 12 men to 18 men, dependent on the type of operation.

Hours of Work:	Normal Time:	0700 – 2300, Monday to Friday.
	Overtime Hours:	2300 – 0100, Monday to Friday (if necessary to complete an operation).
		0700 – 1900, Saturday, Sunday and Public Holidays.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.

FRESH WATER: Fresh water is available at Berths No. 1 – 6 from hydrants alongside the Pier. Alternative arrangements can be made to supply truck-borne water if necessary.

FUEL: All grades supplied by barge, contact Agent in advance.

CONSULS:

Belgium	6238711	Italy	6236255
Bolivia	6254123	Japan	6232866
Colombia	6236601	Lebanon	6231652

France	6251437	Venezuela	6253872
Germany	6251898		

REPAIRS: Limited facilities available.

DRY DOCKS: See "Chaguaramas".

SURVEYORS: Lloyd's.

HATCHES: Opening/closing of hatches is normally done by the crew where the system is an automatic one. For manual systems, stevedores are used.

CUSTOMS ALLOWANCE: Crew is allowed either 25 grammes or 2 packs or 40 cigarettes or 5 cigars. No alcoholic drinks allowed.
CARGO GEAR: Vessels normally load and discharge break bulk cargo with their own gear but shore cranes and heavy lift cranes are available on dock.

Container vessels using the container berths are required to use the Port's Portainer cranes.
REPATRIATION: Crew changes and repatriation can be arranged through Agents.
AIRPORT: Piarco International Airport (17 miles from Port-of-Spain) has daily flights to worldwide destinations.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (June 19th); Whit Monday; Corpus Christi; Emancipation Day (first Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st/22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th). Any work performed on public holidays will be charged at overtime rates.
POLICE/FIRE/AMBULANCE: Port Security – 6251861, Port Health & Safety – 6253777, Police – 999, Fire – 990, Ambulance (Red Cross) – 6278214, Hospital – 6237715/6232951-6.
EMERGENCY CO-ORDINATION CENTRE: National Emergency Relief Organisation (NERO), Coast Guard Headquarters, Staubles Bay, Chaguaramas. Tel. No. 6254939.

SOBO (Pitch Point): 10.15 N. 61.37 W.

Crude Oil Terminal operated by Trinidad & Tobago Petroleum Company Limited is no longer in operation.

TEMBLADORA (Alcoa Bauxite Terminal): 10.41 N. 61.35 W.

Also refer to "Port of Spain".
DOCUMENTS:

2 Crew Manifest/Stores List for Customs.
2 Ship's Stores List for Customs.
4 Immigration Arrival Report.
8 Crew Lists.
1 Declaration of Health.
1 Stowaway List (if stowaways on board).

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off installation.
ANCHORAGE: Safe anchorage 0.5 – 0.75 miles off head of jetty.
MAX. SIZE: No. 1 (Western berth) for discharging, length of berth 976 ft. Max. draft 23 ft.

No. 2 (Eastern berth) for loading. Length of berth 675 ft. Max. draft 36 ft.
RADIO: ETA should be given at least 36 hours before arrival via North Post Radio " 9YL" or Barbados Radio "8PO" to Alcoa.
TUGS: Alcoa maintain their own tug to assist in docking operations.
BERTHING: There are two wharves: No. 1 with a length of 976 ft. and No. 2 with a length of 675 ft.
STEVEDORES: Not necessary.
MEDICAL: All facilities available. Advance notice of requirements should be given.
FRESH WATER: Supplied at both piers, also by barge.
FUEL: All grades by barge and pipe-line.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
OPENING/CLOSING HATCHES: Handled by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits per man.
CARGO GEAR: Loading: Carried out with travelling tower conveyor system, rate 1,000 t.p.h. Discharging: With travelling tower grab 5 tons capacity, rate 300 t.p.h.
REPAIRS AND DRY DOCKS: At Chaguaramas.
REPATRIATIONS: Can be arranged (Advance notice must be given for citizens from Eastern Bloc countries).
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions (except for citizens of Eastern Bloc countries who need visas or special permission).
IDENTIFICATION CARDS: Required. Vessel must issue I.D. cards to all onboard.
GARBAGE DISPOSAL: Garbage disposal can be arranged on request.
WASTE OIL DISPOSAL: Not available at Tembladora.

NOTES

Please also advise Shipping Guides Ltd.

Tristan da Cunha

NOTES

Please also advise Shipping Guides Ltd.

EDINBURGH (Tristan Island): 37.03 S. 12.18 W.

DOCUMENTS: Cargo Manifest.

APPROACHES: Chart B.A. 1769 Pilot Book Africa Vol. 2 to be used, local knowledge should be sought regarding weather.

Island is good radar target and may be seen visually at 20 miles in good weather.

PILOTAGE: Local Radio Officer will indicate safe anchorage by handheld VHF (Channel 16).

ANCHORAGES: Edinburgh anchorage is on N.W. side of Island. Town is difficult to observe as houses are very low. Leading marks are white triangles in field to right of crayfish factory.

Area most likely for large vessels has depth of 18 fathoms. Vessel to be wary of large amounts of kelp blocking intakes, etc.

In rough weather vessel could shelter to South of Island. Although due to katabatic winds off the mountains it is possible that no shelter will be found around the island.

A quieter anchorage can be found 2 cables East of the 114°T and 213°T transit intersection. Weak tidal currents set East and West through the anchorage, the East going current being the stronger.

HEALTH: Any person suffering a cold will not be allowed ashore; if colds are prevalent aboard then no one will be permitted ashore.

RADIO: Radio contact made via Cape Town who will arrange schedule.

Tristan (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

BERTHING: Calshott Boat Landing (used for all landings) is small (40 ft. – 50 ft. long). Local knowledge required. 1 motor launch and 2 small powered lighters are used for cargo.

GARBAGE DISPOSAL: No garbage disposal facilities.

WASTE OIL DISPOSAL: No waste oil disposal facilities.

SEAMAN'S CLUBS: No seaman's Club. Anglican church. Very limited sports. No telephone. No shore leave overnight.

CURRENCY: Own currency, pounds on par with UK Sterling.

GENERAL: There is a landing fee of £3.00 for any passenger who wishes to land (No Passenger List required).

SHIPMASTER'S REPORT: February 1986 (Updated 1990).

The navigational marks are as per the Pilot Book. These are made of wooden slats. The beacons on the 203° (T) bearing are in a large field behind the new canning factory, just above the boat harbour. The lower of the beacons on the 114° (T) bearing is on the top of a little hillock and the higher is on the cliff side.

When the sun is shining on these beacons they are easily discernable but when the sun is at right angles or behind them they are not easily seen.

There are no lights on the beacons.

There are lights illuminating the entrance to the boat harbour.

All lights are extinguished at 2400 hrs., including the lights at the entrance to the boat harbour.

The soundings that we obtained were as per the chart.

Whilst we were there, with a Force 7 on the starboard beam, we lay with the bow to the shore. When the wind moderated we then lay with our bow into the wind so it would appear that strong Westerly winds cause an offshore current in the anchorage area.

Radio Communications at Tristan Island: The Station has a daily schedule with Cape Town Radio at 0830 hrs. GMT.

Cape Town Radio will arrange schedules for ships as required.

The frequencies used are as follows (all SSB R/T):

Tristan da Cunha (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Whilst at anchor VHF communication on Channel 16 is provided by a hand held walkie talkie on the island.

The manifest of the cargo for Tristan da Cunha only. No documentation of any kind is at present required.

Accommodation ladder not used, pilot ladder and scrambling net preferred.

SHIPMASTER'S REPORT: March 1988 (Updated 1990).

The Report above is correct; but to the East of the settlement, there are a further two small triangular leading marks, which when in transit (114° T), indicate the beam bearing for the safest anchorage. The top mark is part way up the cliff to the left of the land-slip, the lower mark is on top of a small outcrop of rock. There are no lights on these beacons.

AUTHORITY: *Contact:* Curnow Shipping Ltd., The Shipyard, Porthleven, Helston, Cornwall. *Tel:* 0326-563434. *Telex:* 45654.

Tunisia

ASHTART: 34.17 N. 11.23 E. (See Plan)

DOCUMENTS:
Customs: 1 Crew Declaration, 1 Ship's Stores List.
Immigration: 1 Crew List.

PILOTAGE: Compulsory within 3 miles of any installations. To avoid a delay, Owner must report to SEREPT SFAX 48 hours and 24 hours in advance of ETA.

ANCHORAGE: 3 miles South of the storage barge.

HEALTH: Masters must declare on arrival, condition of health of all on board with details of any sickness.

VHF: Call "Ashtart Terminal" on VHF Channels 9 and 16.

TUGS: One tug required to be in attendance while loading.

BERTHING:
(a) *Tanker Berths:*
One SBM for tankers up to a max. size of 150,000 d.w.t. Water depth 66 m. Loading Rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose.

Vessels mooring use one line, and must be able to easily heave on board an anti-chafing chain whose links are 32 cm. wide.

(b) *Storage Barge Berths:*
Starboard side alongside storage barge, tankers up to a max. size of 70,000 d.w.t. Depth 66 m., loading rate 4,500 cu.m.p.h. Max. quantity available 105,000 tons. 2×12 in. hoses.

(c) *Tanker on Storage Barge Berth:*
Tankers up to a max. size of 100,000 d.w.t. Depth 66 m. Loading rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose on starboard side.

MEDICAL: No facilities.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: France and Libya at Sfax.

REPAIRS: No facilities.

REPATRIATION: Not possible.

AIRPORT: At Sfax.

TIME: GMT plus 1 hour.

HOLIDAYS: None.

GENERAL: No dirty ballast facilities. No provisions available. Master supplied with booklet containing special port regulations on arrival.

AUTHORITY: Societe de Recherches et D'exploitation des Petroles en Tunisie – SEREPT, B.P. 246, 3018-SFAX, Tunisia. *Tel:* (04) 35 400. *Telex:* 40859, 40700. Sfax Telex: 13.800 Tn. Tunis Telex: 13.042 Tn. *FAX:* (218) (4) 37102 (Sfax). *Contact:* MM. H. Gharsallan or Mr. R. Hamza.

BIZERTE: 37.17 N. 09.54 E. (See Plan)

PORT LIMITS: Commence 0.5 mile from the Port.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ship's Stores List.
3 copies Bill of Lading.
3 copies Manifest.
Health Declaration.

PILOTAGE: Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board.

ANCHORAGE: The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.

When the wind is blowing from N.W., the best anchorage is off Cap Farina.

RESTRICTIONS: Entry at night is forbidden for tankers.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.

VHF: Channels 16 and 14.

TUGS: The tugs join the vessel at half a mile from the fairway.

Two tugs of 3,600 h.p. are available 24 hours. They are equipped with radar, 2 cables each (48 mm. diameter × 850 m. length) and 2 pumps of 420 cu.m.p.h.

North	156	7.60
South		6.30
Quai Sud Menzel Bourguiba	150	8.55

Load and discharge is carried out by ship's own gear.

CRANES: 2 fork lifts, capacity 3.5 tons. 1 fork lift, capacity 4 tons. 1 fork lift, capacity 8 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.

BULK HANDLING FACILITIES: Grain is handled on the Silo Quay.

SPECIAL CARGO HANDLING FACILITIES: None.

BRIDGES: New bridge (mobile) in operation.

STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours' notice required for Cholera and Yellow Fever inoculations. Advise Agent of requirements.

TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.

FRESH WATER: Available from the quay at most berths. Rate 20 cu.m./hr.

FUEL: Available.

FIRE PRECAUTIONS: The Petroleum Harbour is equipped with fire hydrants. A tug of 3,600 h.p. is required to be permanently standing by when tankers are moored alongside the quay.

CONSULS: Italy Tel: 02.31.747.

REPAIRS: Some types of deck and engine repairs can be effected.

DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

		(m.)
Dry Dock No. 1 & 4	Length	190.90
	Higher width	30.25
	Lower width	26.50
	Draft	8.80
Dry Dock No. 2	Length	247.50
	Higher width	40.60
	Lower width	36.00
	Draft	12.00
Dry Dock No. 3	Length	84.10
	Higher width	14.78
	Lower width	13.00
	Draft	4.15

SURVEYORS: Bureau Veritas, Norsk Veritas and Lloyd's Register.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

REPATRIATION: Can be arranged.

AIRPORT: Tunis/Carthage Airport is situated 65 km. from Bizerte. Served by international airlines.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

POLICE/FIRE/AMBULANCE: Police Tel: (02)31.200; Fire (02)31.022; Ambulance (02)31.422.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Crew Members' Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

GARBAGE DISPOSAL: Nothing organised for garbage disposal. If a ship asks the Port Authority to dispose of her garbage, it must be collected on board and a tractor will go alongside each day and collect it.

WASTE OIL DISPOSAL: The refinery "Stir" can accept only a small quantity of dirty ballast. The organisation "Sotulub" can also receive a small quantity of waste oil. For information contact the Harbour Master.

SEAMAN'S CLUBS: None.

CURRENCY: Dinar Tunisien (Dinar). U.S.$ 1.00 = 0.9286 Dinar.

SHIPMASTER'S REPORT: January 1982 (Updated 1992).
Restrictions: Due to the lift bridge at the Eastern end of the Quai de Commerce there is no entry during a period in the morning and another in the evening when the main flow of traffic is expedited. Opening hours are 0600 – 0630, 1015 – 1045, 1515 – 1545 and 1930 – 0530. Local authorities will open bridge out of these hours with special permission.
Health: Free Pratique will be granted on application by radio.
Berthing: The Western end of the Quai de Commerce showed depths of 9.14 m. along the 600 ft. to the East.

There is 12.0 m. in the entrance channel and as far as the turning basin, but LESS in the basin hence the operation is difficult.

Fresh Water: Using ship's hoses, some 23 tonnes per hour may be attained overall, but pressure can drop at any time and care must be taken to make sure of a large quantity or if proceeding to La Goulette elevator where there is no water to be shipped.
Gangway/Nightwatchmen: Most helpful and able to get results when Agents not available.
Identification Cards: These are sighted by the Immigration Officer and crew passes issued which are valid for all Tunisian ports but which must be collected before the vessel sails from the last port.

AUTHORITY: Direction du Port de Bizerte, 6 Rue de Russie, Bizerte, Tunisia. *Tel:* (02) 31741, 31412, 31139. *Telex:* 21007 Bimpor. *FAX:* (02) 33688. *Contact:* Ben Fadhel Sahbene, Harbour Master.

GABES (Ghannouche): 33.57 N. 10.04 E. (See Plan)

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra, 58 miles S.W. of Sfax and 32 miles to the West of Djerba.

APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.

One can distinguish:

To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.

To the North, the Oasis of Ghannouche and the red and white chimney, 44 m. high, of the power station.

To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

S.E.: The lighthouse of Ras Turguness (flash white 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (flash white 12 secs., range 11 miles).

N.E.: After coming round the belt of lights of the buoys of the Kerkennah Islands; by the mooring buoy N.W. of the channel of the Port of La Skhirra (flash white 10 secs., range 10 miles) and then by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 4 pairs of fixed light buoys, except Buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.

ANCHORAGE: The Roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.

MAX. SIZE: "See Berthing".

TUGS: One tug of 1,200 h.p. and 2 fast pilot launches.

BERTHING:

The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 375 m. long (Berths No. 3 and 4) running approximately E.N.E./W.S.W. and dredged to 10.5 m. This quay can take vessels up to 25,000 tons.

A quay 600 m. long (Berths No. 5, 6 and 7) running approximately N.N.W./S.S.E. and dredged to 10.5 m. This quay will take vessels up to 25,000 tons.

A quay 260 m. long (Berth No. 8) perpendicular to the first, and dredged to 12.5 m. This quay will take vessels up to 50,000 tons.

Port access is possible at all times to vessels with 33 ft. (10.06 m.) max. draft for Berths No. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft for Berth No. 8.

Open storage areas:

The open areas for the storage of goods transitting through the port include in the public zone – a shed of 4,000 sq.m., open areas which are properly surfaced 70,000 sq.m., open areas of rolled earth: 100,000 sq.m.

CARGO HANDLING EQUIPMENT:

Public:

One gantry crane of 20 tons; Lift trucks from 4 tons – 10 tons; Crane on rails of 20 tons (on order); Crane on rubber tyres of 20 tons.

Private:

Cranes on rubber tyres of 10 tons – 25 tons; Lift trucks from 4 tons – 10 tons; Tractors and trailers.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: Possible.

TIME: GMT plus 1 hour throughout the year.

WINDS/TIDES: The winds in the Gulf of Gabes present a seasonal variation with the character of a monsoon.

During the cold season (October – March) winds come from the land, from the West and North.

During the hot season (April – September) the winds come from the sea, from the East to S.E. The strength is then from Force 3 to Force 5, very infrequently reaching Force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The Port of Gabes has been essentially created to serve the chemical industries in the area which process the natural Tunisian phosphates coming from the S.W. of the country. There is some importation of sulphur for use in the various processes, likewise aluminium for production of aluminium fluoride. As the South of the country develops, traffic in various general cargoes, foodstuffs and capital equipment, is increasing.

The port is currently advanced in its 5th Development Plan. The new infrastructural works comprise:

1. Transformation of the current Quay No. 8 into a much lengthened version.
2. Construction of a service quay.
3. Surfacing and equipping of 50,000 sq.m. of open area for storage of goods.
4. A second tug of 1,200 h.p. will be acquired.
5. Fertiliser bulk loading unit of 500 t.p.h. capacity will be installed.
6. An electric crane, on rails, of 20 tons will be acquired.
7. Cranes on tyres of 15 – 20 tons will be purchased.
8. Fork lifts from 4 – 10 tons will be acquired.

SHIPMASTER'S REPORT: The following reports are from the same vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djerba, keeping outside the 9 fathom soundings as the bottom shoals quite steeply.

The 'Fairway' Buoy "O" showed up well on the radar at 8 miles and the channel buoys themselves at 5 – 6 miles. Details of the breakwater were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on either chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not be relied upon. New positions as at 22nd/24th May, have been marked on Chart 372 and a tracing made. The current sets quite strongly across the axis of the channel and care is required when rounding the bend in the channel immediately before the entrance. The Pilot reported that channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel 16 but we did not succeed in making contact until after we had anchored; time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length with white upperworks. Pilot ladder about 1 m. from the water. Pilot boards outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port side to, owing to existence of 10.5 m. shoal in the Southern corner of the harbour. No night time pilotage for vessels of this size.

Only 1 tug is available and only of moderate power; on berthing she pushes according to hand signals and whistles from Pilot (no VHF). When unberthing she takes a ship's line from the stern to swing ship to port clear of berth.

Berth: The berth is a concrete quay in the Southern corner of the harbour about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 m. and 14.2 m. taken by ship's leadline. Communication with shore personnel was not very good with conflicting advice as to whether vessel was in position or not.

The quay is used for the export of fertiliser products which are loaded by means of a large travelling chute. Despite fears, the gangway when swung out did not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to be taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwood's Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations. 3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard. (This is most important, Tunisia is largely Moslem).

2 Lists of ports previously visited.

Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon.

On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 Buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind over Force 4 to 5 and no unberthing over Force 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunrise to Sunset only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside Fairway Buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertiliser/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia Berth, mooring boat used. On Ammonia Berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia Berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia Berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. 2×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 150 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH_3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form at 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur Berths nearest to Ammonia Berth have 2 discharge cranes/gantry. The Grain Berth at the Northern end is worked by ship's gear. Both these are import berths. Sulphur berth direct into fertiliser plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even though it seems vessel cannot due to shiploaders.

Communications: At Ammonia Berth after connection there is little English spoken by personnel ashore. Two watchmen always onboard.

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside berth.

Surveyor: SGS/Redwood in attendance. Does not always appear on arrival.

General: Fresh water available from quay, but salty. If fuel required go to Sfax. Personnel reliefs quite easy through Djerba. Direct flights to Frankfurt 3 times per week. Baggage may go missing. Road and rail communication with Tunis, Sousse and Djerba. STD International telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Health Declaration and Vaccination List. If all in order 'Q' flag is pulled down – Quarantine Pratique granted and Customs and Agent can board. Port Health/Immigration: require all Cholera Certificates up to date, if not Port Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be declared and all Tunisian currency drawn and not used handed back on departure. Bars are particularly subject to inspection. Customs also very carefully check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Master's safe is checked together with dangerous drugs which must be properly declared, every single item and amount of each. Personnel going ashore take their Discharge Books to main gate where a shore pass is issued and Discharge Book collected on return.

Papers required:

3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
3 copies Personal Currency Lists.
2 Stores Lists.
2 Drugs Lists.
2 Bond Lists.
2 Vaccination Lists.
6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and prices reasonable. Cable ahead for chandler as normally does not work at weekends.

Agent: Societe Tunisiene de Transit d'Agencies et de Transports. Cable: STTAT GABES.

Have office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position.

SHIPMASTER'S REPORT: February 1985.

Vessel discharged anhydrous ammonia.

Bow-thruster: It is advisable to inform the Agent well in advance whether vessel is equipped with a bow-thruster or not. When negative, a second tug is required for large vessels, as only 1 tug, small and low powered, is available at Ghannouche. The second tug has to be ordered from Sfax (distance approx. 60 miles). This might cause delay in berthing if Port Control is not aware that the vessel does not have a bow-thruster.

Hoses: The shore connection now consists of a 10 in. 150 ASA hose. Due to the height of our manifold above the water (41 ft.) at 24 ft. draft, extra lengths of hose had to be provided by shore.

Maximum allowable pressure for hoses: 8 bars.

Discharge: Maximum shore receiving capacity approx. 600 tonnes/h. Receivers urgently requested us not to go beyond the 8 bars back pressure.

We discharged approx. 550 tonnes/h. at 7.5 bars back pressure, however, a few hours after commencement of the discharge, the plant requested us to reduce the rate to 400 tonnes/h. as they experienced problems with their compressors.

AUTHORITY: Direction du Port de Gabes, Office des Ports Nationaux, Batiment Administratif, Port de la Goulette, Tunisia. *Tel:* 275300 (6 lines). *Telex:* 12-386 Oporna-Tunis. *Cables:* Ofpornatu. *Contact:* B. Karra, Harbour Manager, P.O.Box 65, Gabes, Tunisia. Tel: (5) 22.9.22.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E.

(See Plan)

DOCUMENTS:

Required by Police:
2 Crew Lists.
2 Passenger Lists.

Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.

Required by Port Health:
1 Crew List.
1 Passenger List.

PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kHz or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the Sea Buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 miles beyond the sea buoy, i.e. the Buoy No. 1 in the entrance channel to the port.

ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 m. – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 m. – 9 m. in the vicinity of Buoys No. 4 and 5 provided that they do not obstruct navigation in the entrance channel.

RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at LW is 32 ft.

MAX. SIZE: *La Goulette:* Up to max. draft 32 ft. Max. length 185 m. *Tunis:* Up to max. draft 20 ft. 6 in.

HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic Free Pratique except in time of epidemic.

RADIO: Tunis Radio 24 hour watch on 2182 kHz; radio-telephone from 0600 to 2200 hrs. on 500 kHz. Goulette Radio call sign 3VW. 24 hour watch on 2182 kHz and VHF Channel 16.

TUGS: Available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of Buoys No. 4 and 6, that is 400 or 500 m. from the berths. Vessel's lines always used. Vessels over 1,500 g.r.t. not equipped with bow-thrusters must use 2 tugs.

BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h.

Also see "Shipmaster's Report" and "Developments".

STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.

MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.

TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.

FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge "El Ain" of 50 tons capacity can supply vessels berthing in "Basin Sud".

FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.

CONSULS: Following countries are represented in Tunisia:

Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the shipyards of Soconema at Menzel Bourguiba 70 miles away.

DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.

GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.

OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores on payment of special premium.

CUSTOMS ALLOWANCES: Each crewman is allowed 2 packets of cigarettes or 4 cigars or 50 gm. of tobacco and 1 opened bottle of alcohol.

REPATRIATION: Can be arranged.

AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and North Africa.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.

POLICE/FIRE/AMBULANCE: Police, Tel: 197. Fire, Tel: 198. Ambulance (express), Tel: 141313. Ambulance (S.O.S.) 341269.

TELEPHONES: Telephones can be connected on board vessels and are compulsory for tankers.

SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.

DEVELOPMENTS: *Port de Rades:* A new commercial port with 7 berths and industrial complex, incorporating container and Ro/Ro facilities (4 Ro/Ro berths in operation), grain silo (discharge rate 1,200 t.p.d.) quays, jetties, transit sheds and back-up services, has been built on reclaimed land, covering approximately 100 ha., immediately inside the Lake of Tunis. Max. draft permissible 9.5 m.

SHIPMASTER'S REPORT: January 1982.

Documents: It is essential to ensure that all arms and ammunition are declared at first port of entry in Tunisia and that the proper authority has them sealed inside the bond during the entire stay in Tunisia.

When coming from another Tunisian port all cash (Dinars) remaining from sums drawn in the previous port must be declared.

Pilotage: The VHF is the only viable communication for the pilot service, the Sea Buoy being too far for either visual or sound signals.

When required to enter, the vessel will be told to proceed inwards down the approach channel which has been dredged to 12.25 m. from Sea Buoy to the moles. This was completed on 20th December, 1981 as the first part of the work for the new port being constructed on the Southern side of the canal to Tunis and some 3 kilometres inside the present port of La Goulette.

Berths: The elevator/silo berth in Basin Sud has a depth of water of over 10 m. throughout its whole length and extending some 80 m. to the seaward end as the actual wharf is short (about 135 m.) and vessels have to warp along the face to ensure all hatches are serviced. Discharge rate 1,200 tons per day.

There is *no water* at this berth either drinking or boiler nor can it be taken at the adjacent tanker berth or the iron ore pier.

Developments: The port appears to be concentrating on the Ro/Ro berths and the new passenger terminal to the exclusion of the more mundane cargoes. The traffic is such that there is reluctance to allow a vessel from the silo that is short of water to take up a berth on the Northern quay. The harbour area is to be dredged in stages so as to give access, eventually, to the new port under active construction.

Telephones: There are no telephones available at the silo berth unless access can be had to the one in the office, while the Oil Berth unit is only available if there is a tanker in the berth.

AUTHORITY: Office des Ports Nationaux, Batiment Adminstratif, Port de la Goulette, C.P. 2060, La Goulette, Tunisia. *Tel:* 730300. *Telex:* 15386 Oporna. *Cables:* Of. Pornatu.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E.

(See Plan)

DOCUMENTS:

5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.

PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.

ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.

MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high water.

HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive Free Pratique at the quay after berthing. Suspect vessels must wait at anchor until Pratique is given.

RADIO: TRAPSA operate coastal station La Skhirra Radio (3VP), vessels to make contact 48 hours before arrival. Messages for TRAPSA passed by other stations should be addressed "Rapetrol Laskhirra".

VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 MHz (calling), 156.6 MHz, 156.7 MHz, 156.55 MHz Contact with tugs can be made on all 4 channels.

TUGS: 2×3,000 h.p. (32 tons bollard pull) and 2×1,500 h.p. 3 tugs required if over 70,000 d.w.t. Lines provided by tugs.

BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of Summer deadweight. Mooring may need to be doubled during months of December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 m. – 16 m. Loading platform is served by 3×30 in. oil pipe-lines and 1×24 in. and 1×18 in. ballast lines. Each berth equipped with 4×12 in. flexible hoses. Max. loading rate 12,000 cu.m./hr.

Paktank: A new tank installation of Paktank Mediterranee S.A. has been constructed for storing fuel oil, gas oil, naphtha and kerosene. 2×12 in. flexible hoses will give a loading/discharging rate of up to about 3,000 t.p.h. Bunker facilities can be expected in the near future.

Phosphoric Acid: New berth for carriers up to 15,000 d.w.t. and max. draft 9.0 m. at H.W. Fresh water available.

MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.

BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m./hr.

FRESH WATER: Available from shore connection.

FUEL: Not available. See "Berthing – Paktank".

CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.

REPAIRS: There are no facilities for repairs. Nearest at Sfax.

CUSTOMS ALLOWANCES: 2 packets cigarettes allowed each Crew member.

REPATRIATION: Can be arranged.

AIRPORT: Airport at Tunis 350 km. away, or Sfax 80 km. away.

TIME: GMT plus 1 hour throughout the year.

SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.

GARBAGE DISPOSAL: Drums will be provided on board.

WASTE OIL DISPOSAL: Dirty ballast pumped ashore.

SEAMAN'S CLUBS: None.

AUTHORITY: Compagnie des Transports par Pipe-line au Sahara (T.R.A.P.S.A.), 3050 La Skhirra, Tunisia. *Tel:* 04-95453, 04-95082. *Telex:* 40811 TN. *Cables:* Rapetrol, La Skhirra. *FAX:* 04-95426. *Contact:* Mr. Maaloul, Port Director.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: On arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:
Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 hours 48 hours beforehand.

ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.

MAX. SIZE: Length 185 m. and draft 32 ft. – 33 ft. at Petrol Pier and Sulphur Pier and 200 m. at all other berths.

HEALTH: To request Free Pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until Pratique is given.

RADIO: Sfax. Port Call – call sign 3VW2, operating 24 hours on 2182 kHz and Channel 16 VHF.

Calling frequency 2182 kHz, working frequency 1743 kHz CR3. Used only for communications with port services. Meteorological information provided on request.

TUGS: Join vessel at outer buoys or according to circumstances in the outer port.

BERTHING: N.E. Quay 820 m. long, phosphate berth.
West Quay 150 m. long, phosphate berth.
Petrol Pier 105 m. long. Max. size: length 185 m., draft 33 ft.
Salicole Pier, salt loading berth.
Sulphur Quay 370 m. long, draft 32 ft.
Also see "Developments".

STEVEDORES: Available, arranged by Agent basis vessel's ETA.

MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.

DENSITY: 1028.

FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.

FUEL: Available by barge.

CONSULS: Local representatives for Belgium, Denmark, France, Greece, Italy, Netherlands, Norway, Portugal, Spain, Sweden and U.K.

REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.

GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.

OPENING/CLOSING HATCHES: Normally performed by crew.

REPATRIATION: Can be arranged.

AIRPORT: 7 km. from the city. Regular services to Tunis, Paris and La Valette.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: 1st January; Aid El Kebir; Hegirian New Year; 20th and 21st March; 9th April; 1st May; Mouled; 25th July; 13th August; 15th October; Aid Es Seghir; Aid El Kebir.

POLICE: Tel. 21-700.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required by all crew.

DEVELOPMENTS: Entrance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.

Since April 1985 the port has been equipped with 3 new berths totalling 517 m. in length, depth 33 ft., max. LOA 200 m., max. draft 33 ft. Included is a Ro/Ro berth with length 135 m., depth 33 ft.

SHIPMASTER'S REPORT: 1976 (Updated 1988).

Documents:
1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16 throughout 24 hours. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kHz.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the Outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the Outer Harbour Basin (Authority state that this is rare and only if vessel visits port regularly).

The Agent told me the channel was 34 ft. deep, although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position Lat. 34° 37.5′ N., Long. 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but sometimes extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Office des Ports Nationaux Tunisiens, Directions du Port de Sfax, Rue Okbaa Ibn Nafaa, 3029 Sfax, Tunisia. *Tel:* (04) 25.644, 25.040 and 25.070. *Telex:* 40847 Porsfa. *Contact:* Mohamed El Mouldi, Port Director. Captain Mokhtar Hedider, Port Captain.

SOUSSE (Soussa): 35.50 N. 10.38 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies Vessel's Particulars Declaration.

PILOTAGE: Contact pilot station on VHF Channel 16 or Tel. 03.24.401 and 03.25.755.

RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 8.70 m., height of tide 0.50 m.

MAX. SIZE: Max. LOA. 170 m.

HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Sousse Control "3VW4" on 2182 kHz and VHF Channel 16.

TUGS: One tug of 900 h.p.

BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.
Length of quays 830 m., 8 berths.
South Basin Quay, length 140 m., dredged to 8.7 m.

CRANES: 1×18 tons and 2×10 tons.

STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

AIRPORT: Skanes Monastir – 13 km. from the port.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: There are 13 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

IDENTIFICATION CARDS: Crew member's Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

AUTHORITY: Office des Ports Nationaux Tunisiens, Rue Abdallah Ibn Zoubair, Sousse, Tunisia. *Tel:* 03.25.755 or 03.24.401. *Telex:* 30960. *Contact:* Zine El Abidine Khalki, Port Director. B. Kalia Mohamed, Harbour Master.

TAZERKA: 36.36 N. 11.41 E. **(See Plan)**

PORT LIMITS: 5 nautical miles radius from Tazerka FPSU.

DOCUMENTS:
4 Crew Lists.
1 Health Declaration.

APPROACHES: There are clear navigation approaches to and from the Tazerka FPSU. From time to time, special work barges and rigs will operate in the vicinity of the Tazerka FPSU. Information on such rigs will be broadcast through Normal Navigation Warnings and also by Tazerka Operations when visiting tankers first make communications contact.

PILOTAGE: A Berthing Master will board the visiting tanker at a location 2 nautical miles downwind of the Tazerka FPSU. He will remain on board the visiting tanker until after departure and will disembark when the visiting tanker is clear of Tazerka FPSU.

The Berthing Pilot/Loading Master will be familiar with pilot/berthing/unberthing vessels at Tazerka and will advise the Master of the visiting tanker accordingly. Throughout the operation, he will be the liaison between the Master of the visiting tanker and the Tazerka SIS (Senior Installation Supervisor). He will advise the Master of the visiting tanker on documentation procedures and carry out any assistance.

ANCHORAGES: None.

RESTRICTIONS: Daylight mooring only.

Weather operating limits will be decided at the time of operations, but are approximately as follows:

(a) Maximum mean hourly wind speed = 20 knots.
(b) Maximum significant wave height = 2.5 m.
(c) Minimum visibility for berthing = 0.5 nautical miles.

MAX. SIZE: Minimum LOA 170 m. Maximum LOA 275 m. Under special circumstances LOA may be extended to 297 m.

No limit on beam and draft.

Minimum deadweight 20,000 tonnes (approx.). Maximum deadweight 140,000 tonnes (approx.).

Maximum displacement during berthing 150,000 tonnes.

RADIO: Vessels to send an initial ETA message to Agent via Tunis Radio on departure from the previous port and updated 72 hours, 48 hours and 24 hours prior to arrival at Tazerka. Thereafter changes greater than 3 hours should be reported. Where a ship departs from a port which is less than 72/48/24 hours' steaming distance away she shall advise her ETA as soon as possible.

ETA messages should include the following information:

(a) Location of cargo manifold in relation to the length overall of ship.
(b) Type of moorings (synthetic rope, wire, wire with synthetic tails, etc.)

VHF: Tazerka Floating Production Storage Unit is equipped with VHF Channels 16/6. Notice of Readiness may be issued when vessels are within 5 nautical miles radius of the Tazerka FPSU.

TUGS: One supply boat available to assist with mooring/unmooring.

BERTHING:

Tanker's Draft: The tanker must be on a suitable draft and trim for the approach run. No hard and fast rules will be applied but Masters of visiting tankers must bear in mind the need for accurate steering with a minimum of speed coupled with good stern power ability.

As a guideline a suitable draft is provided by applying the following criteria:

(i) Moulded draft amidships (dm) in metres to be not less than: dm = 2.0 + 0.02L
(ii) Trim by the stern not greater than 0.015L;
(iii) In any case draft at the after perpendicular not less than that which is necessary to obtain full immersion of the propeller(s).

This is in accordance with the requirements of the "International Conference on Marine Pollution, 1973" Regulation 13. In practice it has been found that ballast required to achieve these criteria typically approximates to 25% of Summer Deadweight.

Vessels berth port side to the starboard side of a Floating Production Storage Unit (a converted VLCC) which is moored to a SPM consisting of a yoke and rigid single anchor leg system. The FPSU is free to rotate through 360°. Vessels will berth against up to 5 inflatable Low Pressure Floating Fenders.

Wire moorings must have synthetic rope tails with a breaking strain at least 5% greater than the minimum breaking load of the wires to which they are attached.

Two long rope messengers to be ready forward and aft. Both anchors home and secured. (If reducers and/or tails are not available on board, advise Tazerka FPSU with initial ETA. Prepare to lift this equipment on board from the pilot boat).

Immobilisation of engines not permitted under any circumstances.

HOSE CONNECTION: Port side midships – 2×12 in. 150 ASA hoses. Port side derricks should be rigged for minimum 5 tonnes SWL.

Cargo manifolds must comply with OCIMF Standards for Tanker Manifolds, 1981 Edition.

LOADING/DISCHARGING: Typical VLCC pipe-line system with special manifold located 225 m. from stem on the starboard side.

2×12 in. hoses for Crude Oil discharge. Maximum loading rate – 7,000 cu.m.p.h.

1×8 in. hose for Fuel Oil receiving. Maximum receiving rate – 1,000 tonnes/h.

1×3 in. hose for Diesel Oil receiving. Maximum receiving rate – 50 tonnes/h.

Concurrent receipt of fuel oil and diesel oil with crude oil discharge is required.

BALLAST: No dirty ballast facilities. It is a condition of loading that vessel's ballast is clean and suitable for discharge to sea as defined in MARPOL 1973, Regulation 13. All other ballast shall be retained on board.

MEDICAL: Emergency cases can be treated.

DENSITY: 1025.

FRESH WATER: Not available.

REPAIRS: Not available.

REPATRIATION: Not possible.

TIME: GMT plus 1 hour throughout the year.

REGULATIONS: Access to FPSU not permitted.

The Authorities of all Arabic Ports subscribe to the Israeli boycott and administer checks on ships. Apart from the usual checks on Log Books, etc., store rooms, can be inspected for evidence of Israeli produce. If found, ships can be fined and/or blacklisted from all countries subscribing to the boycott.

It is recommended that stores be checked to ensure that there are no items which can be interpreted as being of Israeli origin. This includes items which bear trade marks incorporating Hebraic symbols such as the six point star, irrespective of the country of origin.

AUTHORITY: Shell Tunirex, B.P. 349, Tunis, Tunisia. *Tel:* 341.509, 341.510, 341.514, 247.411. *Telex:* TREX 13831 TN, TREX 14393 TN.

ZARZIS: 33.30 N. 11.07 E. **(See Plan)**

APPROACHES: The Approach Channel to the port is 8 miles long 130 m. wide and is dredged to a depth of 13.0 m. From seaward the channel runs W.S.W. then W.N.W.

Manoeuvring Basin: The basin is marked by channel buoys No. 8, 9 10 and 11 and has a diameter of 450 m. The depth is 12.0 m.

Navigation Aids:

Lighthouse: Lat. 33° 28′ 41″ N., Long. 11° 07′ 50″ E. The lighthouse is a masonary structure with red and white horizontal bands. Height 9.4 m. Light: 3 white ev. 15 secs., range 10 miles.

Fairway Buoy: Lat. 33° 29′ 43″ N., Long. 11° 17′ 44″ E. Colour: Red and white vertical stripes. Top Mark: Red sphere. Light: Fl.W.Ev.4 sec. Buoy has a Radar Reflector (this buoy was missing in August 1991).

Channel Buoys:
No. 1: Lat. 33° 29′ 03″ N., Long. 11° 13′ 19″ E.
No. 2: Lat. 33° 28′ 39″ N., Long. 11° 11′ 22″ E.
No. 3: Lat. 33° 28′ 44″ N., Long. 11° 11′ 21″ E.
No. 4: Lat. 33° 28′ 26″ N., Long. 11° 10′ 04″ E.
No. 5: Lat. 33° 28′ 31″ N., Long. 11° 10′ 02″ E.
No. 6: Lat. 33° 28′ 13″ N., Long. 11° 08′ 44″ E.
No. 7: Lat. 33° 28′ 20″ N., Long. 11° 08′ 45″ E.
No. 8: Lat. 33° 28′ 35″ N., Long. 11° 07′ 29″ E.
No. 9: Lat. 33° 28′ 39″ N., Long. 11° 07′ 33″ E.
No.10: Lat. 33° 28′ 40″ N., Long. 11° 07′ 14″ E.
No.11: Lat. 33° 28′ 49″ N., Long. 11° 07′ 23″ E.

The port hand buoys (even numbers) are painted red and have red cylindrical topmarks. Lights are Fl. R. ev. 4 sec., range 6 miles.

The starboard hand buoys (odd numbers) are painted green and have green conical topmarks. Lights are Fl. 2 green ev. 6 sec., range 6 miles.

PILOTAGE: Compulsory.

ANCHORAGE: The anchorage is one mile East of the Fairway Buoy (see "Approaches"). The bottom is mud and sand and the holding ground is good.

MAX. SIZE: The maximum permissible draft in the initial stages will be 10.5 m. and max. LOA 185 m.

TUGS: Compulsory for tankers.

BERTHING: The Petroleum Quay is 640 m. long and has a depth of 12.0 m. The quay is 2.5 m. above chart datum. Rise of tide at Springs is 1.0 m.

There is a bank to the N.E. of quay marked by yellow and black buoys. The distance between quay and bank at the N.W. end is 150 m. and at the S.E. end 240 m.

TANKERS: The facility has been built for the handling of "Ezzaouia" Crude. The typical cargo size is 20,000 tonnes – 25,000 tonnes, due to the LOA and draft restrictions.

IGS, COW and coils are required.

Permanent or segregated ballast vessels only are allowed.

AUTHORITY: Office des Ports Nationaux, Port de la Goulette, P.O.Box 2060, La Goulette, Tunisia. *Tel:* 730.300. *Telex:* 15.386 Oporna. *FAX:* 730.812. *Contact:* M.Klaa, Chairman.

NOTES

Please also advise Shipping Guides Ltd.

Turkey

GENERAL: (See Plan)

On arrival off Canakkale coming from the Aegean, or off Buyukdere coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain Pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canakkale, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to vessels by the Canakkale Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Derat Certificate.
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining Free Sanitary Pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's Passport, Discharge Book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers Landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the Passports.
(6) 1 List of Transit Passengers together with the Passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a List of Passengers Embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Radio transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

RESTRICTIONS:

The Bosphorus – Height of Power Transmission Line: A transmission line with a vertical clearance of 70 m. (B.A. Chart 3930, 229 ft.) has been installed alongside the power transmission line in position 41° 10.4′ N., 29° 04.7′ E. (approx.)

Masters of vessels with a similar masthead height intending to pass beneath this cable must contact the Harbour Authority for permission to pass.

BOSPHORUS BRIDGES:

(1) Bosphorus Bridge (First Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.
(2) Fatih Sultan Mehmet Bridge (Second/New Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.

The height represents the distance between sea level upto line beneath the bridges.

NOTICE:

New Traffic Regulations in Conformity with International Regulations for Preventing Collisions at Sea (IMO Colreg of 1972) are being established in the Strait of Istanbul.

A. It is decided that a new traffic regulation conforming to the international rules of navigation be established in the Strait of Istanbul. The new regulation which will be effective in the Strait of Istanbul as of 1st May 1982, 0900 hrs. GMT (1200 hrs. LMT) is as follows:

1. The existing left side navigation regulation in the Strait of Istanbul which is applicable between Kizkulesi-Ortakoy line in the South and Tarabyaburnu-Umuryeri feneri line in the North will be abolished on 1st May 1982, at 0900 hrs. GMT (1200 hrs. LMT) and then the new regulation in conformity with Rule 9 of International Regulations Preventing Collision at Sea of 1972 will come into force.

2. Ships in their transit from the Sea of Marmara to the Black Sea or from the Black Sea to the Sea of Marmara will, in accordance with Rule 9 of IMO Colreg 72, navigate throughout the Strait of Istanbul on the right side of the median line (traffic separation line) and under no circumstances will they pass to the left of the said line.

3. Ships during their transit in the Strait of Istanbul will not overtake other vessels unless they are forced to do so and will navigate inside the designated traffic lane.

B. Pilotage Services:

The pilotage stations are providing pilotage services on 24 hour basis for ships navigating in the Strait of Istanbul. The location of these stations are given in the international pilotage books and marked in the Strait of Istanbul chart (TR.2921).

C. Amendments to Charts:

"Caution I" on Chart TR.2921 will be cancelled with the coming into effect of the new traffic regulation.

D. Navigational Notices:

Explanatory information and navigational warnings regarding the new traffic regulation in the Strait of Istanbul are broadcast in English and Turkish by the following by Weekly Notices to Mariners and also will be mailed.

Istanbul	(TAH)	(Yesilkoy)	: 441 – 2670 kHz
Izmir	(TAN)		: 458 – 516 – 1850 kHz
Mersin	(TAM)		: 524 – 2820 kHz
Samsun	(TAF)		: 416 – 2760 kHz
Bandirma	(TAA4)	(Meteoroloji)	: 478 – 3636 – 6965 kHz

SHIPMASTER'S REPORT: November 1979.
Dardanelles and Bosphorus:

Vessel bound for Odessa with a full cargo of corn. According to Charterer's orders (Sovfracht Moscow), vessel was to encounter 4 to 5 weeks at anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered 3 days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. 2 days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by Husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcik) Point.

When passing Canakkale, vessel slowed down and an Officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's Officer after vessel having received Free Pratique from the Sanitary Officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Tel: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads, the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:

Certificate of Registry.
Tonnage Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the Officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be 5 to 6 hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West, care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).
Dardanelles and Bosphorus:

Dardanelles:

Pilotage: Compulsory. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Pilot boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 71.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of Strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port.

Navigation: Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult, especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 knot – 2 knots.

Transit takes about 3 hours, dependent on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmara: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:

Pilotage: Compulsory.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the Strait).

Wait North of Rumeli Point until Pilot available.

Cable: 'Kavak' Pilot Station minimum of 6 hours' notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from pilot station.

Control requires: 2 Crew Lists, sights Ship's Register and Derat.

Yellow Immigration form given to Master. An Officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA 1198.

Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of pilot station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

SHIPMASTER'S REPORT: December 1983.

Earlier this year a pilot station was established at Gelibolu at the Eastern end of the Dardanelles. It is served by a 60 ft. fishing boat, painted white. The pilotage fee for Mehmetcik-Gelibolu and Harem-Kavak is 50% of the fee for Mehmetcik-Kavak.

If taking stores/spares when passing the Bosphorus, Agents should be instructed to arrange for the delivery at the Istanbul end as it is highly undesirable to have the Agent's launch alongside at Kavak before the Pilot boards.

REPORT: June 1985 (Updated 1988).

The following was received by a Master from his Agent in Istanbul.

For vessels proceeding and destined to Istanbul (not transitting vessels), the Gulf of Izmit or any other port inside Marmara Sea, pilotage is compulsory through the Dardanelles from the Southern entrance (Mehmetcik Point/Cape Hellas Lat. 40° 02′ N., Long. 26° 11′ E. to the Northern exit (Gelibolu Lat. 40° 24′ N., Long. 26° 41′ E.).

The same applies for vessels coming from a Marmara Sea port and proceeding Southwards.

From Gelibolu to the entrance of Izmit Gulf (Darica Lat. 40° 45′ N., Long. 29° 21′ E.) or vice versa, pilotage is not compulsory.

From Darica inside Izmit Gulf pilotage is again compulsory.

All pilot stations can be contacted by VHF Channel 16, working Channel 71.

For vessels passing, in-transit pilotage through Dardanelles-Marmara Sea-Bosphorus or vice versa is not compulsory. It is, however, strongly recommended to employ pilotage services through the Bosphorus.

Dardanelles Pilot can be picked-up at Mehmetcik Point (Lat. 40° 02′ N., Long. 26° 11′ E.) and dropped at new pilot station at Gelibolu (Lat. 40° 24′ N. Long. 26° 41′ E.) respectively picked up there and on outward voyage, thus saving the open Marmara Sea stretch. Another Pilot can then be requested at Istanbul (Harem) for Bosphorus.

Please make sure to enter into Pilot bills the exact times of services given. Please bear in mind that if part of a service falls into overtime, the whole service is charged as overtime. Service hours are as follows:

0800 – 1700 straight time.
1700 – 0800 overtime charged at 50% extra.
0800 – 1200 Saturday straight time.
After 1200 Saturday overtime till Monday morning 0800 hrs.

For vessels with inflammable, dangerous cargoes, etc. 30% extra is charged on all pilotage services, therefore whenever tankers are gas free this must be inscribed on Pilot bills. Also when tankers are loaded with harmless cargoes.

Whenever Pilots remain onboard after completing their service, as guest-passengers, Pilotage bill should be signed for the service part only.

SHIPMASTER'S REPORT: June 1987.

Pilotage through Dardanelles: Compulsory for all foreign vessels bound to and from a Turkish port. Northbound vessels take a pilot at Mehmetcik and Southbound vessels take a pilot at Gelibolu.

VHF: Pilots on Channels 16 and 71.

Notice: 48 hours notice of arrival required.

REPORTS: The following telexes were received by a tanker owner from agent in Istanbul between May 1990 and October 1990.

MAY 1990:

Re: Tankers Exceeding 200 m. LOA and 90,000 g.r.t. Transiting the Dardanelles and Bosphorus:

Kindly note that 10 day's pre-advice of the ETA Dardanelles is now required by the Canakkale and Istanbul Port Authorities so that they can obtain the approval of the Ministry of Communications and close the Straits to all traffic during the passage of such tankers, for which an escort of 2 tugs (for vessel's a/c) and one Coast Guard launch is allocated.

Daylight passage through both Straits is required, which kindly note.

JUNE 1990:

Re: Transit Passage Through the Straits of Dardanelles/Bosphorus:

Re-passage of vessel with g.r.t. in excess of 90,000 tons and LOA more than 200 m. to be reported to Harbour Master. In addition to above, we have been informed that agents for such tonnage have to provide Harbour Master with Letters of Guarantee stating that in case of accident during passage, all damages/losses will be covered by the agent.

Please inform your Clubs accordingly. FYG local P & I Club informed accordingly.

OCTOBER 1990: Telex from owner to agent.

Re-your May telex concerning tankers exceeding 200 m. LOA and 90,000 g.r.t. transiting the Dardanelles and Bosphorus, grateful you advise whether the discrepancy between length and g.r.t. has yet been resolved.

REPLY:

Regulations now apply to tankers of 90,000 g.r.t. or over without any mention of LOA, however should a vessel's g.r.t. be close to 90,000 please advise us so that we can consult the Captain of the Port re any transit restrictions.

REPORT: November 1991.

The following telex was received from an agent in Istanbul.

Quote:

Re: Transiting Vessels Through the Straits.

This is to inform you that as per strict request of Port Harbour Master and Customs Authorities, we are compelled to give them 24 hours notice of vessels ETA Bosphorus North/Southbound passages together with the following additional information:

(1) Port of Registry/flag/g.r.t./n.r.t./d.w.t.
(2) LOA.
(3) Draft.
(4) Port of arrival.
(5) Port of destination.
(6) Quality of cargo on board.
(7) Quantity of cargo on board.

You are kindly requested therefore to instruct your agents at the relevant ports and also your Masters to keep us closely posted in due time about the above, thereby enabling us to comply with the requirements of our authorities in order to avoid any eventual unpleasant consequences or fines.

Unquote.

REPORT: The following was received from our Agent (G.A.C.) in January 1991:

General Information on Passage through the Straits:

Geographical Locations: Dardanelles (Canakkale Bogazi): Is the strait joining the Aegean Sea and the Sea of Marmara, boundaries of which are between the line joining Mehmetcik Lighthouse and Kumkale Lighthouse in the South and the line between Gelibolu Lighthouse and Zincirbozan Lighthouse in the North.

Bosphorus (Istanbul Bogazi): Is the strait joining the Sea of Marmara and the Black Sea, and is located within the boundaries of the Port of Istanbul, boundaries which are described in the relevant regulations as follows:

> The Port of Istanbul is the sea area (including the Golden Horn) between the lines that join Turkeli Feneri and Anadolu Feneri in the North, and Bababurnu and Yelkenkai Feneri in the South.

General Provision: The vessels, passing the waterway that comprise the two straits (i.e. Dardanelles and Bosphorus) as well as the Sea of Marmara, are passing under the following status:

> Transit vessels are those which are coming from a foreign port in Aegean Sea and bound to a foreign port in Black Sea or vice versa, and passing the above waterway without calling at any Turkish Port, and without having any commercial contact or transaction with any Turkish Port, such vessels are granted with Transit Sanitary Pratique.
>
> Non-transit vessels are those which either coming from any Turkish Port, or bound to any Turkish Port, whether between the straits or outside of the above waterways, or stopping for a while for any purpose such as loading and/or discharging cargo, embarkation/disembarkation/city tours of passengers, crew exchange are non-

transit vessels and granted with Free Pratique during sanitary controls effected at either Southern entrance to Dardanelles or Northern entrance to Bosphorus.

All ships sailing or lying within the boundaries of Dardanelles and the Port of Istanbul are compelled to comply with international rules, with all rules taking place in the regulations and also with all kind of rules, warnings and controls by the Port Authorities or competent authorities, and comply with rules of legislation as to safety of navigation, life and property. All foreign flag vessels are required to fly the Turkish flag during their stay at Turkish Ports or when passing through the Straits.

Navigation through the Straits: In the Dardanelles, vessels should, in accordance with the Rule No. 9 of the Regulations for Prevention of Collisions at Sea, keep to that side of mid-channel which lies on their starboard side, taking care to make the sound signals in accordance with the rule when approaching the narrows of Canakkale and the bend of Nara.

Vessels should also take every precaution to avoid meeting other vessels in the critical areas between Kilitbahir and Canakkale, between Nara and Kilia, and between Gelibolu and Cardak; and, when the current or weather is in their favour, should, in these critical areas, give way to oncoming vessels by stopping or reducing speed.

In the Bosphorus, the area lying between the line connecting the Turkeli Lighthouse to Anadolu Lighthouse in the North, and the line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South and made of 2 traffic lines, suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lines.

The area reserved for crossing the Strait of Bosphorus and lying between the line connecting the Turkeli (ex Rumeli) Lighthouse to Anadolu Lighthouse in the North, and line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South, and made of 2 traffic lanes suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lanes is called the Bosphorus Strait Passage Way.

The said centre line which divides the Bosphorus passage into 2 traffic lanes conjunct the below indicated geographical points:

1. 41° 00′ 10″ N., 21° 09′ 45″ E. 2. 41° 01′ 24″ N., 28° 59′ 48″ E.
3. 41° 01′ 33″ N., 28° 59′ 55″ E. 4. 41° 03′ 02″ N., 29° 02′ 23″ E.
5. 41° 04′ 03″ N., 29° 03′ 04″ E. 6. 41° 04′ 03″ N., 29° 03′ 03″ E.
7. 41° 05′ 00″ N., 29° 03′ 44″ E. 8. 41° 06′ 15″ N., 29° 03′ 40″ E.
9. 41° 07′ 13″ N., 29° 05′ 00″ E. 10. 41° 07′ 22″ N., 29° 05′ 00″ E.
11. 41° 08′ 55″ N., 29° 03′ 33″ E. 12. 41° 09′ 23″ N., 29° 03′ 32″ E.
13. 41° 10′ 52″ N., 29° 05′ 02″ E. 14. 41° 12′ 13″ N., 29° 06′ 50″ E.
15. 41° 13′ 36″ N., 29° 07′ 59″ E.

The area between centre line anad the line that joins the geographical points here below is the Northbound lane:

16. 41° 00′ 00″ N., 29° 00′ 04″ E. 17. 41° 01′ 07″ N., 29° 00′ 04″ E.,
18. 41° 01′ 30″ N., 29° 00′ 12″ E. 19. 41° 03′ 06″ N., 29° 02′ 58″ E.
20. 41° 04′ 00″ N., 29° 03′ 15″ E. 21. 41° 04′ 29″ N., 29° 03′ 15″ E.
22. 41° 04′ 58″ N., 29° 03′ 55″ E. 23. 41° 06′ 15″ N., 29° 03′ 51″ E.
24. 41° 07′ 12″ N., 29° 05′ 22″ E. 25. 41° 07′ 22″ N., 29° 05′ 22″ E.
26. 41° 08′ 51″ N., 29° 03′ 53″ E. 27. 41° 09′ 28″ N., 29° 03′ 50″ E.
28. 41° 10′ 48″ N., 29° 05′ 12″ E. 29. 41° 11′ 40″ N., 29° 06′ 46″ E.
30. 41° 12′ 09″ N., 29° 06′ 59″ E. 31. 41° 31′ 22″ N., 29° 08′ 34″ E.

The area between centre line and the line that joins the geographical points here below in the Southbound lane:

32. 41° 00′ 18″ N., 28° 59′ 25″ E. 33. 41° 01′ 17″ N., 23° 59′ 27″ E.
34. 41° 01′ 44″ N., 28° 59′ 44″ E. 35. 41° 02′ 58″ N., 29° 02′ 06″ E.
36. 41° 04′ 08″ N., 29° 02′ 56″ E. 37. 41° 04′ 34″ N., 29° 02′ 56″ E.
38. 41° 05′ 02″ N., 29° 03′ 33″ E. 39. 41° 06′ 15″ N., 29° 03′ 30″ E.
40. 41° 07′ 23″ N., 29° 04′ 33″ E. 41. 41° 09′ 02″ N., 29° 03′ 16″ E.
42. 41° 09′ 31″ N., 29° 03′ 17″ E. 43. 41° 10′ 30″ N., 29° 04′ 29″ E.
44. 41° 12′ 00″ N., 29° 06′ 00″ E. 45. 41° 12′ 18″ N., 29° 06′ 38″ E.
46. 41° 13′ 45″ N., 29° 07′ 29″ E.

Speed of Vessels – General: In order to avoid damage to the coast and to small craft, all power-driven vessels must proceed at the slowest speed at which steerage can be maintained, when within the following areas:

(a) In the Dardanelles: Between a line drawn from Mehmetcik Burnu to Kum Burnu, and a line drawn from the town of Gelibolu to Cardak Burnu.

On no account is a speed of 10 knots to be exceeded in the narrows of the Dardanelles between a line joining Nara Burnu and Kilya Lighthouse, and the parallel of latitude passing through Kanlidere Burnu Lighthouse (40° 06′ N., 26° 22′ E.).

(b) In the Bosphorus: Between a line drawn from Ahirkapi Burnu (41° 00′ N., 28° 59′ E.) to Haydarpasa, and a line drawn from Buyukere to Umuryeri Liman.

Unless there are extraordinary or compulsory reasons, a speed of 10 knots is never to be exceeded in the Bosphorus.

Pilotage through Waterway: Pilotage is not compulsory for vessels passing in transit through the straits. However, Turkish Authorities are recommending to take Pilot while passing both straits for a safe passage. Masters of transit vessels have the liberty to take or not to take Pilot while passing the straits.

Pilotage for compulsory non-transit vessels which are bound to any port between the two straits: Such vessels have to take Pilot while passing both straits (i.e. Dardanelles and Bosphorus). Pilotage is also compulsory for vessels calling at any Turkish Port, berthing/unberthing, entering/exiting to/from the harbours, as well as in Gulf of Izmit. Pilotage services are carried out by 7 pilot stations of "Pilot and Towage Services Department", which have been distributed in the area.

Dardanelles:

(a) Mehmetcik (Dardanelles) Pilot Station.
Place: Southern Entrance of Dardanelles (Seddulbahir).
Geographical Position: 40° 02′ 34″ N., 26° 11′ 25″ E.
Telephone: 5 / Canakkale – Seddulbahir.
Cable Address: Canakkale Pilot.

Pilotage services for the ships bound to any port at the Marmara Sea or passing through the Black Sea carried out by that station.

The station continuously effects listening to VHF Channel 16.

(b) Canakkale Pilot Station.
Place: Canakkale.
Geographical Position: 40° 09′ 03″ N., 26° 24′ 03″ E.
Telex: 58187 Plen Tr.
Telephone: 1180 Canakkale.
Cable Address: Canakkale Pilot.

Pilotage at the Canakkale Port and for ships that come alongside and/or depart from quays within Canakkale Port area are carried out by that station. The station continuously effects listening on VHF Channel 16.

In case services at Mehmetcik Station stops, due to bad weather conditions, those are carried out at this station. Ships requiring Pilots from Mehmetcik Station can make their requests through that station.

(c) Istanbul Pilot Station (HAREM).
Place: Southern Entrance of Bosphorus (Harem).
Geographical Position: 41° 00′ 42″ N., 29° 00′ 38″ E.
Telex: 23620 Plhr Tr.
Telephone: 3330533.
Cable Address: Istanbul Pilot.

It carries out the pilotage for ships at the Southern entrance of Bosphorus. The station effects 24 hours listening on VHF Channel 16.

(d) Kavak Pilot Station.
Place: Northern entrance of Bosphorus (Tellitabya).
Geographical Position: 41° 10′ 36″ N., 29° 04′ 24″ E.
Telex: 23711 Plkv Tr.
Telephone: 1420494, 1420374.
Cable Address: Kavak Pilot.

It carries out pilotage for ships at the Northern entrance of Bosphorus. The station continuously listens on VHF Channel 16.

Gulf of Izmit: It is obligatory for Turkish ships of 500 g.r.t. and over, and all foreign ships no matter their tonnage, which come alongside, and up to buoys, at wharves, quays, within the inner, central and outer ports, or leave those places and anchor at and depart from anchorage of the Gulf of Izmit to take Pilots.

(a) Darica Pilot Station.
Place: West entrance of Izmit Bay (Darica).
Geographical Position: 40° 45′ 18″ N., 29° 23′ 20″ E.
Telephone: 2066.
Cable Address: Darica Pilot.

(b) Izmit Pilot Station.
Place: Izmit.
Geographical Position: 40° 45′ 50″ N., 29° 55′ 28″ E.
Telex: 33169 Plkc Tr.
Telephone: 12087.
Cable Address: Izmit Pilot.

Services within the limits of the Izmit Port and demands for ships that will leave the Gulf to be fulfilled by that station. The station continuously listens to VHF Channel 16.

Anchorage of Transit Ships: Article 75, transit ships are allowed to stay 48 hours in order to provide fuel oil, water, provisions, material, to receive documents from and to submit those to agencies without obtaining Free Pratique under the supervision of the Shore Sanitary Organisation at following anchorage areas:

A. The area, lying between 28° 58′ 36″ E. longitude passing from Sultan Ahmet Mosque, and 28° 55′ 00″ E. longitude passing through Yedikule, is the free anchoring place for passenger and dry cargo ships.

B. The area, lying between 28° 55′ 00″ E. longitude passing from Yedikule, and 28° 51′ 00″ E. longitude passing through Bakirkoy, is the anchorage place allocated for tankers and ships carrying dangerous cargo such as explosives, flaring and burning substances.

C. The area, lying between 28° 51′ 30″ E. longitude passing from Bakirkoy, and 28° 50′ 00″ E. longitude passing through Yesilkoy, is the anchoring place for ships subject to quarantine.

REPORT: June 1992.

Agent's Circular to ship's Masters:

Information for Bosphorus:

Please call Bosphorus Pilot Station on VHF Channel 71, when about 6 miles off South entrance (Haydarpasa Breakwater).

Prepare pilot or combination ladder on your starboard side.
Pilot ladder – if freeboard less than 5.0 m.
Combination ladder – if freeboard more than 5.0 m.

Pollution in Turkish Straits:

According to our recent observations, Turkish Port and Environmental Authorities have begun to take stricter measures against occurances of pollution caused by vessels passing Turkish Straits. Regardless of whether pollution is actually caused by any particular vessel, the slightest indication of pollution witnessed by other vessels is immediately reported to the above authorities.

In several cases, some vessels, passing through residue pollution of previous unknown origin, have been accused mistakenly of pollution, whereby, even if vessel is found innocent, it is usually forced to anchor and becomes subject to fines, which must be paid in cash without acceptance of bank or P&I guarantees. Once a vessel has anchored, she will not be permitted to continue voyage, pending P&I procedures or court proceedings. Therefore only the payment of cash will realise the permission of the vessel to sail.

If pollution is found to have been caused due to technical problems of the vessel, a fine of U.S.$ 35,000 (minimum) is charged.

If pollution is found to have been caused by reason of negligence on the part of the vessel, or if ballast/dirty water/slops are discharged, this violation is charged from U.S.$ 40,000 to U.S.$ 160,000.

In light of the above, Owners and Masters are asked to pay special attention, and take precautionary measures when transitting Turkish Straits, as even false occurances beyond the vessel's control may lead to unnecessary delays and fines.

IMPORTANT:

Due to heavy fog, sometimes pilotage at Bosphorus suspended. Please keep close contact with Pilot on VHF Channel 71, and if Bosphorus traffic is closed due to fog, you are free to proceed to Ahirkapi Anchorage for further instructions.

If Pilot will instruct you to anchor due to fog, please listen to VHF Channel 71, and upon receiving instruction that traffic is normal, please heave up anchor and proceed to breakwater, if you order Pilot to come to anchorage, an extra pilotage charge of U.S.$ 750.00 and delays will be incurred.

Anchorage Positions: See "Plan".

Southbound Passage:

Please call Kavak Pilot Station on VHF Channel 71 when about 6 miles off the North Entrance (Rumeli or Anadolu Lighthouse).

Pilot or accommodation ladder to be rigged on starboard side.

Also please have ready following for Sanitary Boat:

Yellow Sanitary Card given to you at Dardanelles.
Tonnage/Derat Register Certificates.
2 copies Crew List.

No other formalities required.

ALANYA: 36.32 N. 32.03 E. (See Plan)

RADIO: Alanya Radio. Call sign TAC4.

BERTHING: Jetty length 277 m., depths alongside 8 m. – 12 m. Can accommodate 4 vessels.

CRANES: No shore cranes available; vessels use their own gear for loading/discharging.

STEVEDORES: Loading/discharging carried out by hired stevedores. Average rate per shift/gang of 150 tons for cotton, bagged and general cargoes.

Working Hours: 0800 hrs – 1630 hrs. Lunch break 1230 hrs.

FRESH WATER: Available.

AIRPORT: At Antalya (150 km.).

CHARGES: Light and sanitary dues.

AUTHORITY: Kerim Saygi, Harbour Master. *Tel:* 1095. *Telex:* 25673.

Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

ALIAGA: 38.50 N. 26.57 E. (See Plan)

LOCATION: *Northern Point:* Lat. 38° 50′ 10″ N., Long. 26° 56′ 33″ E.
Southern Point: Lat. 38° 50′ N., Long. 26° 57′ 36″ E.

DOCUMENTS:

6 copies Crew List.
4 copies Passenger List.
2 copies Manifest of Transit Cargo.
3 copies Manifest of Inward Cargo, one of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

Ship's Particulars Form is to be filled in by Masters upon arrival at Aliaga and remitted to the Port Authorities.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boards 2 to 3 miles West of Tasli Burnu Light.

Notice of ETA must be reported 3 days before arrival, followed by successive notices confirming or amending previous notice.

The ETA message must include the following information:

1. Name and call sign of vessel.
2. Nationality.
3. Agency.
4. Length, draft and gross tonnage.
5. Kind and quantity of dirty ballast.
6. Deballasting time.

ANCHORAGES: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.

Information on best location of anchorage, if required, will be given by Aliaga Pilot.

READINESS: Notice of Readiness will be received by the Loading Master. It should be tendered at the time of anchoring or pilot boarding. Lay time will commence 6 hours after receipt of Notice of Readiness.

RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17 m. – 18 m.

MAX. SIZE: Crude Oil Berth designed for up to 100,000 d.w.t. Products Berth designed for up to 22,000 d.w.t.

HEALTH: *Customs:* Customs post at refinery.

Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.

Health: No office locally. Officials have to be brought from Izmir.

RADIO: Radio messages to be routed to Agent via Izmir Radio. Call sign of Izmir Radio Station is "TAN", 2,760 kHz.

Also see "Pilotage".

VHF: Communication with Aliaga Pilot Station is possible within 20 miles – 25 miles by VHF Channel 16, manned 24 hours. Call sign: "Aliaga Pilot".

RADAR: No radar facility.

TUGS: A total of 4 tugs (2×2,460 h.p. and 2×2,760 h.p.) and 3 mooring boats are available. All tugs are equipped with fire fighting equipment.

During berthing/unberthing, it is compulsory to take at least:

1 tug – 500 g.r.t. – 4,999 g.r.t.
2 tugs – 5,000 g.r.t. – 24,999 g.r.t.
3 tugs – 25,000 g.r.t. – 49,999 g.r.t.
4 tugs – 50,000 g.r.t. and over.

Depending on weather conditions, or for safety requirements, additional tugs may be assigned by TUPRAS, or by Aliaga Pilot or if requested by vessel.

BERTHING: There are 3 berths:

(a) Aliaga Refinery Terminal.
(b) Aliaga Refinery New Crude Oil Jetty.
(c) Aliaga Refinery Cargo Pier.

(a) Aliaga Refinery Terminal: A "T" type oil jetty having 4 berthing points:

Berth No.	*LOA* (m.)	*Draft* (m.)	*Product*
1	285	16.0	Crude and Fuel
2	180	12.0	White products
3	100	8.0	White products
4	100	6.0	Lube oils

Berthing to No. 1 is possible only during daytime.

(b) Aliaga Refinery New Crude Oil Jetty: VLCC jetty designed for tankers up to 250,000 d.w.t., 19.25 m. even-keel draft and LOA of 260 m. – 340 m.

It has 4×16 in. FMC loading arms for crude oil discharging and 2×12 in. loading arms for bunker loading. Unberthing and berthing is possible only during daytime.

(c) Aliaga Refinery Cargo Pier: LOA 95 m., draft 6.0 m. Pier is for loading of asphalt.

CRANES: Fixed cranes are available at all berthing points, lifting capacities up to 1,500 kg.

MEDICAL: Hospital and medical facilities are available at Izmir and Aliaga. If doctor is required on board, Master should inform Agent by radio or VHF.

TANKERS: See "Berthing".

FIRE PRECAUTIONS: Ship's watchmen to be on duty. All operations involving open fires and sparks are prohibited. Vessel should provide two fire extinguishers and sawdust or sand beside hose connections.

BALLAST: Maximum ballast discharge rate 1,500 cu.m./hr. Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop or ballast tanks or bilges, which is liable to pollute these waters.

DENSITY: 1027 (average).

FRESH WATER: Available at all berths, delivered by hoses at a rate of 20 cu.m./hr. Must be requested by Agent, and Agent must inform the Customs Officer.

FUEL: Available at all berths, delivered by hoses. Gasoil, fuel oil (1,500 sec. or 3,500 sec.). Notice of 48 hours required prior to berthing.

REPAIRS: No facilities available.

DRY DOCKS: None.

SURVEYORS:

SHORE LEAVE: Crew permitted ashore with shore passes. It is forbidden to wander on jetty and in refinery area. Transport vehicle is provided by TUPRAS between jetty and Aliaga.

IDENTIFICATION CARDS: Seamen's Book is needed for crew going ashore.

GARBAGE DISPOSAL: All rubbish must be put in bags and given to gabage collection vessel daily.

Charges: At anchorage – 90×1,000 g.r.t./U.S.$ (subject to change).
In port – 45×1,000 g.r.t./U.S.$ (subject to change).

WASTE OIL DISPOSAL: During berthing, waste oil disposal is taken by refinery to the shore ballast tank.

Charges: At anchorage – 120×1,000 g.r.t./U.S.$ (subject to change).
In port – 60×1,000 g.r.t./U.S.$ (subject to change).

SEAMAN'S CLUBS: None.

CURRENCY: Lira. Currency exchange rates are set by National Central Bank daily, and are subject to change.

SHIPMASTER'S REPORT: October 1990.
First vessel to use the facility.
Vessel: 265,000 tonnes d.w.t. with segregated ballast. LOA 322 m. Summer draft 20.47 m.
Berth: New berth for VLCCs.
General: Vessel needs B.A. Chart No. 1618 (which does not yet show new VLCC berth) and B.A. Pilot Book NP.48. The Terminal management advise that the position of the centre of the jetty (in between the Chicksans) is Lat. 38° 49′ 56″ N., Long. 26° 57′ 01″ E., and the berth lies in a 177°/357° direction. Arrival and berthing draft 19.24 m. even keel.
Approaches: The approaches to the port are hazard-free, and the entrance into the Outer Harbour (between Tavsan Adasi Is. and Ilica Br. Lighthouse) has a navigable width of 1.1 miles for vessels up to 20.0 m. draft.

A slight current setting North was experienced approaching the entrance from about 5 miles out. Pilots (3) boarded from tug when vessel was actually in the entrance to Outer Harbour (3 Pilots used, as this was the port's very first VLCC – normally only one Pilot will be used).
Anchoring: Pilot took ship to anchor, in a position with Tasli Br. Lighthouse bearing 145° × 1.55 miles in a depth of 50.0 m. We used port anchor with 9 shackles on deck. During next 36 hours vessel experienced N.E. winds up to 35 knots, position was maintained without undue strain on the cable. Holding ground very good.
Prior to Berthing: When the Terminal decided weather conditions were satisfactory for berthing (wind N.E. less than 10 knots), the Pilots (again 3) came out to the ship by tug and boarded in the anchorage. Four tugs were made fast *before* weighing anchor.
Proceeding to New Berth: Once anchor aweigh, vessel proceeded inwards at *very* slow speed, using minimal engine movements. The Echo Sounder was run continuously. During this operation, the wind suddenly backed round to N.W. and increased to 15 knots. The Pilots had already stipulated that maximum wind speed for berthing is 10 knots. They were constantly monitoring the ship's wind gauge, but decided (with my agreement) to continue berthing, as we had reached the point where, to abort, would mean towing the ship out stern first, back into Outer Harbour against the wind. The Pilots did not want to use astern engine movements, as the effect of our transverse thrust would swing the bow in towards the berth. In the event the berthing operation proceeded relatively smoothly, and although the N.W. wind increased up to 18 knots, blowing on our starboard quarter, the tugs were well able to counteract it. Vessel was stopped in the water approximately 150 m. abeam of the berth, and 2 tugs began pushing at 90° on our port side, whilst the other 2 tugs began towing at 90° towards the berth.
Berthing: Three mooring boats were available, two small ones and one miniature tug. Only the latter was really capable of carrying our mooring wires to the shore (when still about 70 m. off the berth). The two small mooring boats had great difficulty in carrying our wires, in fact if we had not had the 11.0 m. polyprop tails fitted to the wires, it is doubtful if these two small boats could have carried them at all. First lines were one polyprop stern line to miniature tug, one aft breast wire to small mooring boat, and one polyprop head line to the other small mooring boat forward. The vessel landed on the berth very smoothly and once there, the 4 tugs kept vessel alongside easily, whilst we made fast. The jetty mooring crew were only equipped with light heaving lines instead of sturdy messengers. Their heaving lines parted 3 times whilst trying to heave our mooring wires up from the boat to the quick release hooks on the dolphins (through a height of approximately 10.0 m.). The Pilots assured me this oversight would be rectified before the next VLCC visited the port. Final moorings were as per plan (See "Plan Section").
Berth: A very good shore gangway is installed on the jetty North of the Chicksans (brand new hydraulic variable height 'tower' type). There are 4 × 16 in. Chicksans, only three of which were connected (and this will apparently be standard procedure). VLCCs will always berth starboard side to.

Discharging: The Loading Master advised that the Terminal's maximum receiving rate is 10,500 cu.m./hr. (although they admitted they had never received at this rate before). In the event we actually pumped for a while on bulk at up to 12,000 cu.m./hr., and they were quite happy with this. Full 100% C.O.W. was carried out, and our net discharging time for two grades was 30 hours 40 minutes, totalling 238,000 tonnes. Total time spent on cargo operations (including stoppage for C.O.W. and stripping) was 37 hours 25 minutes.

Unberthing: Our departure drafts were forward 8.60 m. and aft 9.95 m., and due to wind being from the West at 15 knots, the Pilot (only 1) elected to tow the vessel out stern first into Outer Harbour (the alternative is to be towed into Inner Harbour and then turned through 180°, before heading out, but the Pilot said he would only do that in zero wind conditions). Unmooring is done by the shore releasing our lines, under tension, from the quick release hooks on the dolphins, starting from forward and aft and working towards midships. Same 4 tugs secured in same positions then tow vessel stern first using only very short astern engine movements. Once into Outer Harbour, vessel is swung to starboard onto a heading of 275°. Once steady the Pilot departs. Passage out into the Aegean Sea is trouble-free, apart from a few scattered fishing boats in Outer Harbour.

Miscellaneous Information:
(a) Inward Clearance done once alongside, about 12 shore Officials in total, have plenty of chilled soft drinks and beer ready.
(b) Actual papers required: 8 Crew Lists, 7 Vaccination Lists, 2 Crew Declarations, 3 Stores Lists. All other papers supplied by Agent/Officials. Last Port Clearance sighted but not required. Neither Passports or Vaccination Certificates inspected. Only photocopy of Master's Passport required for Agent. (Notary Public purposes).
(c) Agent and Officials come from Izmir (about 45 miles South of Aliaga).
(d) Agent (Boutros Izmir) very helpful and speaks perfect English. Can obtain previous day's British newspapers in Izmir.
(e) Pilots only standby VHF when a vessel is due (Channels 16, 12 and 13).
(f) Pilots and Tug Masters all ex-Turkish Navy and speak excellent English. Pilots very professional and highly competent.
(g) Outward Clearance, after completion of discharge, can take up to 6 hours. Several Port Officials return to ship for this purpose. We were unfortunate that their lunch break occurred 2 hours after finishing cargo, so waited 6 hours.
(h) Had to provide accommodation and meals for 3 surveyors (1 owner's from UK, 1 Charterer's (SGS) from U.K. and 1 local SGS).
(i) Terminal operated by Tupras Aliaga. Notice of Readiness to be made out to this Company. N.O.R. will be signed by Loading Master (speaks excellent English). Acceptance time is that of "All Fast".
(j) Terminal management very friendly and co-operative. We were visited several times by various managers requesting a look at their very first VLCC.
(k) Intention is to berth VLCCs during daylight only. Departure during hours of darkness will only be possible if wind speed less than 10 knots.

AUTHORITY: TUPRAS, Turkiye Petrol Rafinerileri A.S., Aliaga, Izmir, Turkey. *Tel:* (91) (51) 138778. *Telex:* 51704. *FAX:* (91) (543) 62249. *Contact:* Tevfik Alok, Deputy Refinery Manager.

AGENT: See "Izmir".

ANTALYA: 36.50 N. 30.37 E. (See Plan)

PILOTAGE: Compulsory. 1 pilot boat and 1 service boat available.
ANCHORAGE: 925 m. S.E. of Outer breakwater.
MAX. SIZE: Max. draft 9.5 m.
RADIO: Antalya Radio. Call sign TAL.
VHF: Pilot on Channels 16, 12 and 14 throughout 24 hours.
TUGS: 3 tugs (275 h.p. – 750 h.p.) and 1 mooring boat available.
BERTHING: Outer breakwater is 1,440 m. long, inner breakwater is 650 m. long. Port area is 331,600 sq.m.

Vessels can enter port and anchor at any time with a Pilot aboard. Manoeuvring area has 400 m. diameter, depths 8 m. – 11 m.

9 operating quays, 2 passenger quays and a military quay available.

Quay No.	*Length* (m.)	*Depth* (m.)
1	150	10.00
2, 3	165	5.5 – 6.5
4	60	8.00
5, 6	290	10.00
7	170	10.00
8 (Passenger Quay)	170	10.00
9 (Military Quay)	270	5.50
4 Ro/Ro	35	5.50

Storage:

Open warehouse area is 200,000 sq.m. Closed warehouse area is 3,000 sq.m. Closed warehouse (for combustible cargo) is 400 sq.m.

Cold storage plant is 6,900 sq.m. with capacity of about 10,000 tons.

PORT EQUIPMENT:
1 floating crane (60 tons).
6 cranes (1×25 tons (fixed), 5×5 tons).
6 mobile cranes (3×10 tons, 1×25 tons, 1×5 tons, 1×3 tons).
16 forklifts (10×3 tons, 3×5 tons, 2×10 tons, 1×25 tons).
5 tractors.
26 trailers (20×1 ton, 4×6 tons, 2×25 tons).

BULK CARGO FACILITIES: 4 alumina silos each of 4,000 tons capacity which can load into vessel by conveyor belt at a rate of 250 t.p.h.
STEVEDORES: Gangs of 6 – 8 men each, load/discharge cotton at rate of 100 tons per shift, general cargoes 125 tons per shift.
Working Hours: First shift: 0800 hrs. – 1600 hrs. (lunch break from 1200 hrs. – 1230 hrs.). Second shift: 1600 hrs. – 2400 hrs. (meal break from 1900 hrs. – 1930 hrs.).
FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 32 t.p.h. – 48 t.p.h.
FUEL: Available by road tanker.
CERTIFICATES: Certificate of Freeboard, Certificate of Registry, Certificate of Pratique, Light Bill, Manifest, AA(1) Certificate.
AIRPORT: Antalya Airport is 22 km. from the port, 12 km. from Antalya city centre.
TIME: GMT plus 2 hours.
HOLIDAYS: Work is possible on Turkish holidays, weekends upon request.
GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (US$)/1,000 g.r.t.			
	Flag of Ship		*Cost (US$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	10	1.00
At Anchor	30	90	10	1.00

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (US$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	120

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.
Contact Tel: 31-181492, Telex: 56186 TRDZ or Fax: 931-183346 for further details.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 5,479 TL (10.2.92).
DEVELOPMENTS: TMO and SEKA quays (3) are still under construction for passenger vessels, grain and lumber.
AUTHORITY: TDI is in charge of loading/ discharging.

Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

Local officials: Huseyin Seymen, Port Manager. *Tel:* 9-31-181469, 181494. *Telex:* 56186.

Dr.Tugay Aker, Sanitary Authority. *Tel:* 181439. *Telex:* 56035 Asam TR.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box 116, Antalya, Turkey. Tel: 113342, 116054. After Hours: 114649. Telex: 56218, 56250. Fax: 1125683. Cables: "Gacship", Antalya.

BANDIRMA (including Bagfas): 40.22 N. 27.59 E.

(See Plan)

LOCATION: Bandirma is situated on Southern side of Marmara Sea about 63 nautical miles from Istanbul. Admiralty Chart No. 294.
PORT LIMITS: The sea area of the Port of Bandirma is an area inside a line joining Latitude 40° 23′ 42″ N., Longitude 27° 54′ 12″ E. and Latitude 40° 22′ 00″ N., Longitude 27° 59′ 30″ E.
DOCUMENTS:

7 copies Crew List.
4 copies Passenger List.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest (1 copy must be legalised by Turkish Consulate at loading port. If no Consulate existing same to be certified by Local Customs Officer or the Chamber of Commerce.)

Special Regulations: Special regulations, copies of which should be obtained by vessels proceeding to Bandirma, are in force for anchoring, berthing alongside mole and for vessels carrying inflammable or explosive cargoes. Vessels required to give ETA to Harbour Authorities at least 24 hours in advance, also nationality, cargo and last port of call. Unless prevented by important reasons, Masters of all vessels must present their papers to Harbour Authorities within one hour of arrival.
PILOTAGE: Compulsory in the New Harbour and Bagfas/Iskur Wharf. It is compulsory to employ a pilot and tugs in and out of the harbour. Charges for such services are levied by TCDD (Turkish Railway Administration), as per compulsory zone pilotage, and tug tariff effective in Istanbul. One pilot boat of 2×385 h.p.
APPROACHES: Two long entrance channels lead from Bandirma Bay to the harbour.
ANCHORAGE: Good anchorage in roads about 370 m. off entrance to harbour in depths up to 12.8 m. There are also suitable anchorages within the breakwater area.
MAX. SIZE: Max. draft 12.0 m.
HEALTH: Arriving vessels are inspected at the Dardanelles and Istanbul (Bosphourus) No other inspections are required.
RADIO: Istanbul Radio – call sign TAH; Bandirma Radio – call sign TAA4; Tekirdag Radio – call sign TAA3.
VHF: Channels 16, 12, 13 and 14.
TUGS: 3 tugs available (up to 1,000 h.p.).

Vessels up to 500 g.r.t. do not require tugs. Vessels over 500 g.r.t. use one tug, and vessels over 3,000 g.r.t. use 2 tugs. Tugs are provided by the Port Administration.
BERTHING: The port is protected by 2 breakwaters, 1,000 m. and 500 m. long.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	130	8.25	Passenger
2 – 3	284	10.00	General Cargo
4 – 5	324	10.00	General Cargo
6	130	10.00	General Cargo
7 – 8	379	10.00/12.00	Dry Bulk
9	203	10.00	Dry Bulk
10	100	10.00	Dry Bulk
11	190	10.00	Dry Bulk
12	182	10.00	Dry Bulk
13	80	10.00	Dry Bulk
14	180	8.25	Dry Bulk
15 – 16	270	4.00	
17 – 18	335	4.00	For vessels under 300 n.r.t.

Storage: Open storage area of 79,845 sq.m., and covered storage area of 7,000 sq.m.
Bagfas: Bagfas Fertilisers (Private Wharves):
Location: Bagfas Fertilisers Jetty is situated on Southern side of the Marmara Sea about 5 nautical miles from Bandirma. (Admiralty Chart No. 294).
Pilotage: The jetty is private but pilotage/tug boat/mooring boat services are operated by TCDD (Turkish State Railways).
Anchorage: Port of Bagfas is an open port, but good anchorage in roads a few cables off the entrance in depths up to 7 fathoms.
Accommodation: Bagfas fertilisers jetty, length 125.6 m., depths between 12.3 m. and 9.30 m.

NOTE: From jetty to each mooring dolphin 61 m.

Port Facilities: One moving crane available on the jetty with 10 tons lifting capacity which loads bulk cargoes into bunker which is connected to conveyor belt with discharging capacity up to 3,000 tons daily.

Receiving capacity of products (liquid Ammonia) is 350/400 tonnes per hour.

Working hours 24 hours per day.

The jetty is used for discharging phosphates, sulphur in bulk, phosphoric acid and ammonia, and for loading bagged fertiliser.
CRANES: There are 15 shore cranes with capacity 5 – 25 tons, 5 mobile cranes with capacity 5 – 25 tons and 3 crawler mobile cranes.

Other equipment includes 14 forklifts with capacity 3 – 5 tons, 5 towing tractors, 3 loaders and 14 pneumatic loaders.
STEVEDORES: *Working Hours:* Service is provided to vessels 24 hours a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs. – 0030 hrs., third shift 0030 hrs. – 0800 hrs.
Loading Rates: Ore loading capacity 800 tons/shift/gang. Bagged cargo, loading 140 tons/shift/gang. Bulk cargo, 500 tons/hatch/shift. Work can be carried out day and night.
Principal Imports and Exports: Imports: Bulk phosphate and sulphur, phosphoric acid, ammonia, fertiliser.
Exports: Various ores and acids, marble, grain, canned foods, flour, tomato paste and domestic appliances.
MEDICAL: State hospital available.
FRESH WATER: Available at berths.
FUEL: Vessels at anchorage can be supplied with fuel. Fuel also available by truck.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09, 337 36 86, 337 88 31, 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
CONSULS: None.
REPAIRS: Minor repairs are possible.
OPENING/CLOSING HATCHES: May be opened or closed by ship's crew, or by stevedores at no extra charge.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and a bottle of spirits.
AIRPORT: Local airport 6 km. Istanbul Airport 350 km.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (commences 1200 hrs./December 31st), National Sovereignty Day (April 23rd), Sports Day (May 19th), Victory Day (August 30th), October 29th, Sheker Bayram (3 days, movable), Kurban Bayram (4 days, movable). However, the port is not working the first days of Sheker Bayram and Kurban Bayram, during all other days work carried out.
POLICE/AMBULANCE/FIRE: Police 10870, Ambulance 17331, Public Hospital 12932. Fire service available.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.
WASTE OIL DISPOSAL: Collection service is available. An oily water separator system of 15,000 cu.m./year is also available.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 6.100 TL (28.3.92).
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacity (one for wagons and the other for trucks).
Weather: North winds prevail in the area and cause high seas. The breakwaters protect harbour from North and West winds.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), Bandirma, Turkey. *Tel:* (198) 17530-34966. *FAX:* (198) 36011. *Contact:* Fahri Sayili, Port Manager. Ibrahim Yalkiri (Tel: (198) 11028), Harbour Master.

AGENT: See "Istanbul".

BORUSAN: 40.25 N. 29.05 E.

(See Plan)

LOCATION: Borusan Jetty is situated near Gemlik in position Lat. 40° 25′ 03″ N., Long. 29° 05′ 21″ E., on East side of Marmara Sea.
DOCUMENTS:

4 copies Crew List.
4 copies Cargo Manifest.
2 copies Stores List.
2 copies Crew Declaration.
2 copies Health Declaration (including the Clearance from Canakkale "Dardenelle" or Buyukdere "Bosphorus").
2 copies Ship's Particulars.

PILOTAGE: Compulsory.
VHF: Channel 16.
TUGS: 1×1,000 h.p. 1×1,250 h.p. and 1×2,500 h.p.

Vessels 2,000 g.r.t. – 5,000 g.r.t. – 1 tug.
Vessels 5,000 g.r.t. – 25,000 g.r.t. – 2 tugs.
Vessels over 25,000 g.r.t. – 3 tugs.

BERTHING: The 170 m. jetty offers 2 berths alongside. Depth 4.5 m.- 8.5 m. Vessel may be loaded and discharged while moored stern to the open sea.
Facilities: Borusan Gemlik has 11,000 sq.m. of storage area. 1,600 sq.m. is covered and 2,000 sq.m. covered storage will be built.
CRANES: 3 cranes with lifting capacities of 30 tons, 55 tons and 130 tons operating on the jetty.
STEVEDORES: Private Borusan group. Normally working in 2 shifts from 0830 hrs. to 1700 hrs. and second shift from 1700 hrs. to 2330 hrs.

MEDICAL: Emergency hospital and dental facilities are available at Gemlik, approximately 10 km. from the Borusan plant.
FRESH WATER: Available.
FIRE PRECAUTIONS: Factory fire brigade available.
GANGWAY/DECK WATCHMAN: Not necessary, ship's gangway used.
OPENING/CLOSING HATCHES: By ship's crew.
AIRPORT: Nearest airport at Bursa which has daily flights to Istanbul, flight time 30 minutes.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day (1st January); National Sovereignty Day (23rd April); Sports and Youth Day (19th May); Victory Day (30th August); Proclamation of the Republic (29th October); Ramadan (3 days movable); The Moslem Festival of Sacrifices (4 days movable); Weekend holiday (Sunday only).

Normal working starts as of Monday morning 0800 hrs.

GENERAL: Borusan Jetty, built in 1984, is located at the entrance of Gemlik Bay and Eastern part of Marmara Sea which is known as Cape Tuzla. Type of pier is reinforced concrete jetty and clear alongside distance is 170 m., width 20 m. Maximum depth at jetty changes from 4.5 m. to 8.5 m. Bottom is sandy and shelving.

Borusan Jetty has been operating since 1984 and about 200/250 Turkish and foreign flag vessels call at pier every year. The deadweight of vessels changes from 1,000 tons up to 10,000 tons and sometimes more than 10,000 tons, depending on arrival draft and cargo quantity on vessel. For example, in 1988 following vessels called at pier and safely berthed and discharged. Vessel with deadweight 38,962 tons, cargo on board 10,000 tonnes and another vessel with deadweight 28,031 and cargo of 13,000 tonnes.

Port loads and discharges about 500,000 tons per year, especially steel products.

AUTHORITY: Borusan Ihracat Ithalat Dagitim A.S., Borusan binasi 523/533, Salipazari, 80040 Istanbul, Turkey. *Tel:* 1-251 34 10 (20 lines). *Telex:* 24190/24586. *FAX:* 1-249 37 22.

Boru Nakliyat ve Ticaret A.S., Head Office: Borusan binasi 523/533, Salipazari, 80040 Istanbul, Turkey. *Tel:* 1-2513400 (20 lines).

Gemlik Branch: Hisar Mah. Gemsas Mevkii, Gemlik-Bursa, Turkey. *Tel:* (251) 15000 (3 lines). *Telex:* 32498. *FAX:* (251) 12749. *Contact:* Captain Bulent Dandin.

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to Boarding Officer.

Certificate of Registry.
Derat Certificate.
Crew List.
Name of Agent in Istanbul.

Vessels proceeding to a Turkish port will require in addition:

4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.

PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAT. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.

Also see "Shipmaster's Report".

ANCHORAGES: Vessels may anchor in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.

Also see "Shipmaster's Report".

RADIO: Radio station TAT situated at local Post Office.
TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours' notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours' notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCES: Crew allowed to retain only quantities for personal consumption.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
IDENTIFICATION CARDS: Required for crew members going ashore.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None. Local facilities include international telephone, football, dances, shops and postage facilities.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,750 TL (10.4.91).
DEVELOPMENTS: New installations and berths under construction.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot station has been established at Mehmetcik Point (Cape Hellas); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and Southbound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's Register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc., also name of ship's Agent in Turkey.

AUTHORITY: Canakkale Liman Baskanligi. *Tel:* 196-1123/21171. *Telex:* 58209.

AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.50 E. (See Plan)

PORT LIMITS: A vessel that has arrived in Izmit Anchorage is considered an "arrived ship".
DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique Received from Canakkale or Buyukdere.
Customs:
Crew Declaration.
Ship's Stores List.
Cargo Manifest.
Customs Clearance from last port.
Immigration:
Crew List.
Passenger List.

Shore leave passes arranged by Agent. Passenger embarkation/disembarkation not possible.

PILOTAGE: Compulsory. Pilot service carried out in harbour by stevedore administration, which is under the monopoly of Turkish State Railways. One pilot boat of 2×385 h.p. is available.
ANCHORAGES: Forbidden near the port. Waiting anchorage is at Izmit, 4 miles East of Derince. It is compulsory for vessels with explosives to anchor in Yarimca Anchorage.
MAX. SIZE: Max. draft 12.0 m.
VHF: Pilot on Channel 16.
TUGS: Compulsory for vessels over 500 g.r.t.

500 g.r.t. – 5,000 g.r.t.	One tug.
5,000 g.r.t. – 25,000 g.r.t.	Two tugs.
25,000 g.r.t. – 50,000 g.r.t.	Three tugs.
Over 50,000 g.r.t.	Four tugs.

4 tugs (up to 1,500 h.p.) are available. Mooring boat arranged by Pilot.

BERTHING:

Berth No.	*Length* (m.)	*Depth at LW* (m.)	*Remarks*
1	110	4.5	
2	82	7.0	
3 & 4 *	400	15.0	
5	55	6.0	General Cargo
6	220	12.0	
7	180	10.0	
8	120	6.0	

* The construction of the berth, which will enable the berthing of Panamax type vessels, is being continued. The construction is nearing completion, and 90% of the construction has already been completed.

Storage: The quay is rail connected, and provided with 10,500 sq.m. of closed storage, and 122,120 sq.m. of open storage. Also, 40% of the new silo construction of 100,000 cu.m. capacity has been completed, and is scheduled for completion by January 1993.

Equipment: For handling of grain, one 1,200 ton/hour pneumatic loader for loading, and 2×600 ton/hour capacity pneumatic unloaders for unloading, together with 2×1,200 ton/hour capacity conveyors will be in place, and they will have connection with the quay.

Also available are 32 forklifts, 2 trailers of 40 tons capacity, 2 tugmasters, 1 loader and 5 towing tractors.

Ro/Ro Facilities: Available.

Ore and Bulk Cargo Facilities: Bulk cargoes loaded and discharged by grabs.

Principal Imports and Exports: Imports: Aluminium, logs, rubber, scrap paper, steel and iron products, timber and woodpulp.

Exports: Magnesite, steel and iron products and general cargo.

CRANES: 8 shore cranes of 3 tons to 35 tons capacity, one special mobile container crane of 40 tons capacity, 10 mobile cranes of 5 tons to 25 tons capacity and 3 crawler mobile cranes of 6 tons to 30 tons capacity.

STEVEDORES: *Working Hours:* Service is provided to vessels 24 hours a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs. – 0030 hrs. and third shift 0030 hrs. – 0800 hrs.
Working Rates: General cargo discharging rate 100 to 125 tons/gang/shift and iron products, 200 to 250 tons/gang/shift.
MEDICAL: Facilities available.
FRESH WATER: Available at all berths.
FUEL: Available from private suppliers by road tanker, arranged through ship's Agent.
REPAIRS: Most deck and engine repairs can be carried out.
SURVEYORS: Available from Istanbul through Agent.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever is to the vessel's advantage.
CERTIFICATES:

- Safety Construction.
- Safety Equipment.
- Safety Radio.
- Load Line.
- Tonnage.

CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per week per crew member.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: 130 km. to Istanbul International Airport.
TIME: GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Emergency services available in the port.
SERVICES: Arranged by Agent, from Istanbul.
SHORE LEAVE: No restrictions. Also see "Documents".
HOLIDAYS: New Year's Day (commencing 1200 hrs. December 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable), Kurban Bayram (4 days, movable). However, the port is not working the first days of Sheker Bayram and Kurban Bayram, during all other days, work carried out.
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacity (one for wagons and the other for trucks).
Reception Facilities: An oily water separator system is available at the capacity of 4,500 cu.m./year.
Prevailing Winds: South-West and South.
DEVELOPMENTS: There are plans for container facilities, a new Ro/Ro ramp and a slipway.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), Derince, Turkey. *Tel:* (21) 133990-131540. *FAX:* (21) 134278. *Contact:* Gurol Toykan, Port Manager. Haydar Dogan, Harbour Master (Tel: 183754).

DILISKELESI: 40.46 N. 29.32 E.

(A) ALEMDAR HOLDINGS
(B) COLAKOGLU METALURGI
(C) SOLVENTAS

(A) ALEMDAR HOLDINGS PIER

LOCATION: Lat. 40° 46′ 15″ N., Long. 29° 32′ 15″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: *Jetty No. 1:* Length 210 m. Depth varies from 5.5 m – 14.0 m. *Jetty No. 2:* Length 200 m. Depth varies from 7.8 m. – 12.0 m. (Jetty No. 2 still under construction).

Jetties are used for loading sinter magnesite and for loading and unloading other dry cargoes and discharging chemicals.

No shore cranes available on the jetties. Magnesite is loaded by conveyor system at a rate of 2,000 tons per day.

The installation works around the clock.

TANKERS: Discharging rate for tankers is 200 t.p.h. – 250 t.p.h. There are storage tanks for tallow and vegetable oil.
FRESH WATER: Not available at the jetty. Fresh water can be supplied by barge from Izmit.
FUEL: Not available.
CUSTOMS: The port is under control of Gebze and Derince Customs Authorities.
AUTHORITY: Alemdar Holdings, Istanbul, Turkey.

(B) COLAKOGLU METALURGI PIER

LOCATION: Approximate location of the pier is Lat. 40° 46′ 05″ N., Long. 29° 32′ 10″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of Pier No. 1 is 119 m. and depth 11.0 m. Length of Pier No. 2 is 100 m. and depth varies between 7.40 m. and 9.0 m. No shore crane available at either pier. Imports are steel and iron scrap and sometimes ferro manganese and ferro silicone. Exports are iron and steel products. Discharging rate of scrap iron and steel products is 3,000 – 4,000 tons a day. Installation works around the clock.
FRESH WATER: Available.
FUEL: Not available.
CUSTOMS: The port is under the control of Izmit and Derince Customs Authorities.
AUTHORITY: Colakoglu Metalurgi AS. *Telex:* 34125 Cmg Tr.

(C) SOLVENTAS

LOCATION: Approximate location of the pier is Lat. 40° 41′ 30″ N., Long. 29° 32′ 12″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of pier is 39 m. and depth 8.5 m. Capacity of installation is approximately 200 t.p.h. – 250 t.p.h.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS: The port is under control of Derince and Izmit Customs Authorities.
AUTHORITY: Solvent A.S., Gebze.

EDINCIK: 40.21 N. 27.51 E.

LOCATION: In the South of Erdek and on the West coast of Kapidag Peninsula. See B.A. Chart No. 884.
PILOTAGE: Pilotage compulsory. Pilot comes from Bandirma.
MAX. SIZE: 5,000 d.w.t.
BERTHING: This is a colemanite loading berth of Etibank, where loading is effected by conveyor.

Five dolphins exist in front of the conveyor house and in enough deep water for mooring and shifting of vessels. As there is little movement of the conveyor, vessels have to shift in order to load bulk cargo in all hatches.

DENSITY: 1025.
FRESH WATER: Available.
TIME: GMT plus 3 hours.
GENERAL: Formalities with the Harbour Master are carried out in Erdek but all others in Bandirma. All services to be supplied from Bandirma.
AUTHORITY: Erdek Liman Baskanligi, Erdek, Turkey. *Tel:* 90-1989-1044. *Telex:* 58-214. *Contact:* Nezih Onal.

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. (See Plan)

PORT LIMITS: Line joining Lat. 41° 17′ 23″ N., Long. 31° 23′ 43″ E. and Lat. 41° 14′ 46″ N., Long. 31° 23′ 43″ E.
DOCUMENTS:

- 5 copies Crew List.
- 5 copies Passenger List.
- 3 copies Provisions List.
- 3 copies Bonded Stores List.
- 5 copies Crew Effects List.
- 3 copies Cargo Manifest.
- 3 copies Bills of Lading.
- 1 copy Health Declaration.

PILOTAGE: Pilotage is compulsory and available day and night. Vessels bound for the old port of Eregli should send their ETA to their local Agent. Vessels bound for Usunkum should send their ETA to the factory in accordance with the Charter Party terms.

Pilot will board vessels at a reasonable distance off the North Breakwater (red light). The pilot boat has a steel hull and is painted grey. Pilot may be contacted on VHF Channel 16.

ANCHORAGE: Anchorage for the deep draft vessels is about 0.5 miles – 1 mile West of the North Breakwater (red light). However, smaller vessels may anchor 0.5 miles West of the South Breakwater (green light). The bottom is muddy and sandy.
RESTRICTIONS: Vessels over 500 g.r.t. have to take a pilot and vessels over 1,000 g.r.t. have to use tugs. Number of tugs required increases in accordance with the vessel's gross registered tonnage.

Vessels of large deadweight are not permitted to berth at night.

MAX. SIZE: *Eregli:* Port maximum draft is 28 ft.
Usunkum: Oil and Coal Discharge Berth: Maximum LOA 240 m., maximum beam 36 m., maximum draft 36 ft.

Cargo Berth: Maximum LOA 240 m., maximum beam 32 m., maximum draft 35 ft.

HEALTH: Pratique is granted after the Quarantine Officer has visited the vessel on arrival.
RADIO: Eregli Radio (TAD 5). The Marine Operator is on VHF Channel 16 throughout 24 hours.
VHF: The calling channel for all stations is Channel 16.
RADAR: Not available.
TUGS: 3 tugs. 1×2,650 h.p. and 2×800 h.p. Tugs normally join the vessel outside the harbour and ship's lines are always used.
BERTHING: *Eregli Old Harbour:* Length of quay 400 m. Depth alongside 28 ft. There is also a small wharf of 80 m. in length and 14 ft. depth.
Usunkum: Ore and Coaling Unloading Dock: Length of berth 408 m. Depth alongside 36 ft.

Cargo Dock: Length of wharf 280 m. Depth alongside 35 ft.

CRANES: *Eregli Old Harbour:* Heavy lift derrick with a capacity of 147 tonnes and a fixed coal loading conveyor with a rate of 220 tonnes per hour.
Usunkum Cargo Dock: 3×15 tonnes capacity shore cranes.

BULK CARGO FACILITIES: In Usunkum Harbour there are 2 grabs (1×10 tonnes, 1×15 tonnes) for unloading ore and coal. Maximum air draft 14 m.

STEVEDORES: *Eregli Old Harbour:* Working hours are from 0800 hrs. – 1600 hrs. for coal loading and from 0800 hrs. – 2200 hrs. for loading and discharging of general cargo.

Usunkum: Work is carried out continuously throughout 24 hours.

MEDICAL: All types of medical assistance are available.

TANKERS: No facilities available.

DENSITY: Average density 1012 – 1014.

FRESH WATER: Fresh water is available at Usunkum at a rate of approximately 15 t.p.h.

FUEL: Diesel oil can be supplied by tank trucks.

CONSULS: None locally.

REPAIRS: Minor repairs can be carried out.

DRY DOCKS: None available.

SURVEYORS: Available locally.

GANGWAY/DECK WATCHMEN: Usually ship's crew, ship's gangway used.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: Cargo Gear Certificates required.

CUSTOMS ALLOWANCES: Each crew member is permitted 200 cigarettes and 1 bottle of spirit.

REPATRIATION: Crew changes and repatriation are possible.

AIRPORT: The nearest airports are at Istanbul and Ankara, about 300 km. by road.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Work is carried out on all holidays at Usunkum Harbour.

TELEPHONES: There are no facilities for placing telephones on board vessels.

SERVICES: None available locally.

BANKS: There are no foreign banks in the city.

SHORE LEAVE: No restrictions.

DEVELOPMENTS: 2 tugs of 2,700 h.p. each are under construction and will be available in the near future.

The following are planned:

1×150,000 d.w.t. bulk berth.

1×40,000 d.w.t. finished products berth.

Bulk storage area.

AUTHORITY: Karadeniz Eregli Liman Baskanligi. *Tel:* 11007. *Telex:* 48451 KRDL. *Contact:* Turgut Ege, Harbour Master.

FERCOM TERMINAL: 40.46 N. 29.33 E.

LOCATION: The terminal is located in the Gulf of Izmit in position Lat. 40° 46′ 24″N., Long. 29° 33′ 03″ E.

The terminal is called Fercom or Upet and is for the import of gasoline.

PILOTAGE: Compulsory for berthing and through the Dardanelles.

MAX. SIZE:

Outer Berth: Max. LOA 210 m. Max. draft 16.0 m.

Inner Berth: Max. LOA 100 m. Max. draft 10.0 m.

BERTHING: The jetty is parallel to the shore and has 3 dolphins.

FINIKE: 36.16 N. 30.13 E.

RADIO: Finike Radio. Call sign TAC3.

BERTHING: Jetty 80 m. long, depths alongside 4.5 m. – 5.5 m. Vessels of more than 3,000 g.r.t. cannot berth alongside, but anchor outside the port.

CARGO HANDLING: Vessels at anchor are worked by 4 lighters towed by a motor boat. Only 200 tonnes of cargo worked per day by lighters.

At the jetty, 300 – 500 tonnes of cargo are handled per day.

AIRPORT: At Antalya (280 km.).

GENERAL: Port is dangerous in Winter.

OFFICIALS: Halil Tarhan, Port Master.

GEMLIK: 40.25 N. 29.06 E. (See Plan)

SHIPMASTER'S REPORT: July 1980.

VESSEL: L.P.G. Carrier – 32,000 g.r.t. Vessel discharged ammonia.

FORMALITIES: Formalities were dealt with quickly. Bonded stores are sealed and remain sealed until clearing outward from last Turkish port. Application may be made to open under Customs control and these applications were granted.

Travelling manifests of cargo and ship's stores are made up and accompany the vessel from port to port.

Papers required:

2 Stores Lists.
6 Cargo Manifests.
6 Crew Lists.
2 Vaccination Lists.
1 List of Monies in ship's safe.
2 Lists of Ports of Call.
2 Health Declarations (including clearance from Canakkale).
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ships Particulars.

APPROACHES: Chart BA. 1005.

The inset on Chart BA. 844 does not quite cover the area in which the berth is situated. (Position of Ammonia section of quay Lat. 40° 25′ N., Long. 29° 06.5′ E.).

The approach itself presents no difficulty since good fixes are available both by radar and visually. Similarly, although care is needed, an approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must be expected through the island passages and fishing vessels will be met within Gemlik Liman. Some of these craft are very small although sea conditions are invariably smooth and they should show up well on the radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may be used although this should be chosen to Eastwards of the berth to keep the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave here however short a stay, will be able to give advice on choosing a suitable anchorage, should this be necessary.

PILOTAGE: The Pilot may be summoned by whistle and will board from a small, open fishing craft. Gangway or pilot ladder must be lowered to the water's edge.

No night time berthing. Unberthing may be carried out at night at the Master's discretion and presents no difficulty. The starboard anchor may be used for berthing (not on this call) and is used to heave the vessel off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead as far astern as possible, the vessel hove astern about 30 m. (to ensure that the bow does not fall inside the line of the quay and foul the 'bridge' to the forward mooring dolphin), everything let go aft, hard to port and dead slow ahead on the engine until the vessel is at an angle of 45°. The vessel is then backed out, after which the Pilot leaves.

VHF: Not available.

TUGS: None available.

BERTHING: Vessel always berths port side alongside.

REPAIRS: No facilities.

SURVEYORS: With sufficient notice, Lloyd's Surveyor may be ordered from Istanbul.

SHIPMASTER'S REPORT: September 1980.

FORMALITIES: Customs Officer stays on board whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up and accompany the vessel from port to port. For Cargo Manifests I used the U.S. Customs Declaration of Cargo Form with the U.S. Seal blanked out, Authorities had no objection.

PILOTAGE: If vessel requires an outward Pilot through the Dardanelles remember to order in good time, 12 hours minimum order time is required, especially when the vessel's stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and is generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it will foul the quay.

BERTHING: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern Berth for loading bulk or bagged fertiliser has 2 loading booms. This berth, if it has another vessel on it, may well cause some problems on leaving the Western Berth which is the liquid ammonia facility. When the vessel is in position with the liquid Chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin, connected to the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete structure with good fendering.

Minimum depth alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the Fertiliser Berth which causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 1019 – September 1980.

DISCHARGING: 2 Chicksans, liquid line 10 in., vapour line 10 in., both 150 ASA, both can be used for either liquid or vapour so be careful when connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 1980 – 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at over 1,000 t.p.h. depending on shore tank ullages.

Fertiliser plant usage of raw ammonia presently 400 tonnes per day increasing in January 1981 to 600 tonnes per day. The actual production of ammonia is expected to commence in about five years' time.

Shore surveyor attended and his figures taken as quantity discharged. Attends the vessel at subsequent Turkish ports by flying between ports, not allowed to stay with vessel. Very helpful. No gauging of shore tanks.

GENERAL: No fuel. Available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the Immigration post is not in Gemlik.

Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.

Doctor: Available at Bursa about 30 km. (30 minutes).

Dentist: In Gemlik, near Agent's office.

Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik.

SHIPMASTER'S REPORT: November 1980.

BERTHING: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertiliser berth without any difficulties, proceed slowly. Unberthing at night.
DISCHARGE: Very keen on correct discharge temperature. Use forward liquid line, aft vapour line. Shore tanks hold 40,000 tonnes total (20,000 tonnes each).
FRESH WATER: Available but not potable. At L.400 per tonne (1.90 pounds). A fire tender is used as a pump at Chicksan. I believe it is well water.
FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
AUTHORITY: Gemlik Directorate, Port of Gemlik, Liman Baskanligi, Gemlik, Turkey. *Tel:* 1133. Gemlik Customs House: *Tel:* 1411; Gemlik Police Station: *Tel:* 1628; Gemlik Hospital: *Tel:* 2329.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. (See Plan)

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins Lat. 40° 56′ 40″ N., Long. 38° 19′ 40″ E. and Lat. 40° 54′ 51″ N., Long. 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with Lat. 40° 56′ 15″ N., Long. 38° 27′ 00″ E. and Lat. 40° 55′ 10″ N., Long. 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in true North direction.
PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.
ANCHORAGES: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.
MAX. SIZE: Max. draft 10.0 m.
RADIO: Giresun Radio. Call sign TAB4.
TUGS: 1×750 h.p. Compulsory for all foreign flag vessels.
BERTHING: The Port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger berth has been converted to a general cargo berth and is equipped with a shore crane of 3 tons capacity. This quay is 150 m. long and the water depth is 9.0 m. – 10.0 m.

B – The cargo wharf: This is reserved for cargo ships. It is 275 m. long and the water depth is 8.0 m. – 9.0 m. The cargo wharf is equipped with shore cranes of 3 tons capacity.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater, North of the normal anchoring area.
STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1630. Four gangs available.
CRANES: 4 cranes available, 3 – 10 tonnes. 5 mobile cranes, 5 – 25 tonnes.
FRESH WATER: Available.
FUEL: Available by road tanker.
REPAIRS: No repair facilities.
GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

Cost (U.S.$)/1,000 grt

	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

Cost (U.S.$)/1,000 grt

	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.
Contact: Tel: 051-11490. Telex: 82468 TRDZ. Fax: 051-21734.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,940.1 TL (16.5.91).
AUTHORITY: Giresun Port Authority, Giresun Liman Isletmesi Mudurlugu, Giresun. *Tel:* (90) (051) 12447. *Telex:* 82468 Giresun.
Contact: Port Manager.

GOCEK: 36.45 N. 29.55 E. (See Plan)

SHIPMASTER'S REPORT: February 1990.

LOCATION: Port of Gocek is located in the N.W. part of Fethiye Korfezi (Fethiye Bay). Position of the Berth 36° 45.2′ N., 29° 55.5′ E.
DOCUMENTS:

6 Crew Lists.
2 Lists of Crew's Personal Effects.
2 Lists of Ship's Stores.
2 Lists of Medical Narcotics.
2 Lists of Arms and Ammunition (if any).

All Passports/Seaman's Books taken ashore by Immigration and numbered landing cards issued. Passports returned on departure in exchange for landing cards.
PILOTAGE: Pilotage is optional. Request for the Pilot should be made through local Agents at least 48 hours in advance (on this particular vessel the Pilot had been hired from Izmir). However, pilot service is recommended, so as to assure good communications and cooperation with mooring boat. Pilot boards about 1 mile S.E. of Gocek Island (in good weather conditions) from the same boat, which is later used as a mooring boat.

Before proceeding, sufficient time should be allowed for the boat to return to port (distance about 3 miles).
APPROACHES: Approach to Gocek Port leads through a deep channel between Gocek Island and the mainland, about 3 cables wide and 1 mile long. Rounding the protruding point on Akmaden Peninsula (Southern part of Gocek Bay), the speed should be at the minimum, because vessel is already approaching the berth. There are 2 flat unlit buoys, painted white and red, about 80 m. from shore, N.W. and N.E. from Akmaden Lighthouse. Both buoys marked "MY HALAS" on sides. In addition there are 2 small white buoys close to S.W. part of the berth, apparently marking entrance to yacht harbour.

In berthing port side alongside (which is recommended because of departure), during the manoeuvre vessel's stern will at times be quite close to mentioned buoys (this vessel is 135 m. LOA, 12,000 d.w.t.). Starboard anchor should be used well in advance in order to swing the vessel to starboard and to facilitate the departure (at least 4 shackles). Swinging area is quite restricted and manouvre should be done without any haste and carefully.
VHF: Communications through Fethiye Radio.
TUGS: Tugs not available. Mooring boat is usually hired from local fishermen.
BERTHING: The port is perfectly sheltered from all winds and swell. There are numerous berths for pleasure and fishing craft in whole bay area, which is considered a tourist resort. Some of those berths have piers, protruding 20 m. – 30 m. from the shore, but none obstruct navigation or manouvres. Maximum tide range is only 10 cm. – 15 cm. throughout the year, with the exception of persistent Southerly wind periods, when slightly higher. At present the port is handling export of chrome ore and import of waste paper for nearby paper factory. Ships with cargo for the paper factory have priority to berth.

Port of Gocek consists of a main berth, total length 157 m. At a slight angle to the main berth is the berth (92.5 m. length) for small tankers of up to 1,000 d.w.t.

Depths alongside the main berth are as follows: At the extreme S.W. part 10.4 m., in the middle 11.5 m., and at the extreme N.E. part 10.0 m.
CARGO: Cargo is delivered to the quay by trucks. Chrome ore is already loaded in square iron boxes, each truck 5 – 6 boxes, each box about 2.5 tons of ore. The boxes are hooked directly from trucks and emptied into holds. Daily rate with 3 gangs during consecutive 24 hours might reach over 1,500 tons. Weighing of cargo done on shore under Customs' control, and draft survey not required. The cargo declared as lumpy chrome ore, stowage factor 16 cu.ft./ton, actually consists of about 50% medium size rocks and the rest is crushed/rubble.
Cargo Handling: No shore or mobile cranes available, all cargo handling by ship's gear.
MEDICAL: Fethiye Hospital.
FRESH WATER: Not available from quay.
FUEL: Not available.
CUSTOMS ALLOWANCES: 200 cigarettes per crew member.
REPATRIATION: Possible.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime from late March.
SERVICES: Ship chandler and laundry available in Fethiye, 35 km. by road.

GOLLUK: 37.14 N. 27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:

4 copies of Crew Lists.
2 copies of Stores Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.

N.B. Ship's particulars form is to be filled by Masters upon arrival and remitted to the Port Authorities.

PILOTAGE: Pilot not available.

RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.

HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by Sanitary Officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.

RADIO: Izmir Radio Station, call letters TAN2. Istanbul Radio Station, call letters TAH.

TUGS: Not available.

BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

GOLOVASI, Botas (Ceyhan) Terminal, including Delta Terminal and Toros Gubre: 36.53 N. 35.56 E.

(See Plan)

(A) BOTAS (CEYHAN) TERMINAL.
(B) TOROS GUBRE.
(C) DELTA TERMINAL.

(A) BOTAS (CEYHAN) TERMINAL

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Iskenderun Harbour Master's Office and the harbour area is the sea area North of a line between:

(1) 36° 36′ 00″ N., 35° 47′ 42″ E. (Yumurtalik Lighthouse).
(2) 36° 49′ 06″ N., 36° 10′ 06″ E. (mouth of brook "Deli Cay").

"Botas Terminal", "Toros Terminal", "Delta Terminal", "Dortyol Terminal" and "Aygaz Terminal" are in Botas Port Limits.

Pilotage is compulsory for mooring and unmooring by day or night according to regulations of Botas (Ceyhan) Port, which is in force within Botas Port Limit.

DOCUMENTS:

7 Crew Lists.
7 Passenger Lists.
2 Stores Lists.
2 Crew Declaration Lists.
1 Free Pratique.
Last Port Clearance.

Certificates: Load Line, Ship Safety Construction, Safety Radio, Safety Equipment Certificate, Certificate of Registry, Oil Pollution Insurance, Tonnage, Machinery class and minimum manning documents.

Agent has to take the Certificates to the Port Authority at Iskenderun.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ships 2 miles South from the end of the jetty in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

After the ship has berthed, the Pilot / Loading Master stays on the ship and requires a separate cabin.

ANCHORAGES: There are 2 "Tanker Anchorage Zones" near the terminals.

Tanker Anchorage Zone (I):

Point	(a1)	36° 53′ 02″ N., 36° 00′ 00″ E.
"	(b1)	36° 49′ 30″ N., 35° 57′ 04″ E.
"	(c1)	36° 49′ 00″ N., 35° 59′ 40″ E.
"	(d1)	36° 52′ 36″ N., 36° 02′ 05″ E.

Tanker Anchorage Zone (II):

Point	(a2)	36° 51′ 50″ N., 36° 04′ 50″ E.
"	(b2)	36° 50′ 00″ N., 36° 05′ 05″ E.
"	(c2)	36° 50′ 00″ N., 36° 06′ 52″ E.
"	(d2)	36° 51′ 50″ N., 36° 06′ 20″ E.

There are 2 "Prohibited Anchorage Zones".

Prohibited Anchorage Zone(I)

Point	(A1)	36° 52′ 12″ N., 35° 55′ 07″ E.
"	(B1)	36° 50′ 30″ N., 35° 56′ 05″ E.
"	(C1)	36° 51′ 30″ N., 35° 58′ 30″ E.
"	(D1)	36° 52′ 25″ N., 35° 58′ 52″ E.
"	(E1)	36° 54′ 28″ N., 36° 00′ 48″ E.
"	(F1)	36° 55′ 50″ N., 36° 00′ 22″ E.

Prohibited Anchorage Zone (II):

Point	(A2)	36° 52′ 24″ N., 36° 07′ 48″ E.
"	(B2)	36° 51′ 36″ N., 36° 06′ 30″ E.
"	(C2)	36° 49′ 45″ N., 36° 07′ 00″ E.
"	(D2)	36° 49′ 48″ N., 36° 10′ 00″ E.

NOTE: There are two shallow water buoys (Fl. 3 ev. 15 sec.) in position 36° 57′ 56″ N., 35° 55′ 39″ E. and 36° 52′ 12″ N., 35° 55′ 52″ E.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting. However, vessels over 100,000 d.w.t. are not allowed to berth at Berth No. 4 after sunset.

MAX. SIZE: 300,000 tonnes d.w.t. at outer berths and 150,000 tonnes d.w.t. at inner berths. Maximum displacement is 150,000 tons.

If vessel over 300,00 d.w.t. but under 150,000 tons displacement, vessel could berth at Berth No. 1 during daylight hours, at the discretion of the District Manager of BOTAS and the Marine Department after taking into account LOA, draft, freeboard and weather conditions.

There is no limitation on displacement at Berth No. 2.

Also see "Berthing".

RADIO: It is essential that tankers bound for the Botas Terminal communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board, time required for deballasting and whether vessel is gas-free. Vessel should request Agent to forward the information to Botas.

VHF: Botas Terminal Shore Control on VHF Channels 16 and 22.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

Channels 16 and 22 always watched.

Terminal uses Channels 10, 11 and 12 for cargo handling and manoeuvring. Channel 11 is for manoeuvring and Channels 10 and 12 are for jetty operations and not to be used for other purposes.

When the ship makes contact with Botas, the following information to be given to the Iraqi representative:

Ship's name, nationality, deadweight, cargo required, loading rate required, dirty, clean and permanent ballast quantity and deballasting time.

Iskenderun Radio on Channel 16 for connection with telephone numbers ashore.

RADAR: There is no port Control Radar. The approach from the SW or South can be made without difficulty as the coast line provides very good fixes.

TUGS: There are 7 tugs available to assist in berthing and unberthing. 3×2,600 h.p., 2×3,200 h.p. and 2×1,200 h.p. The tugs are provided with fire fighting equipment.

For vessels of 1,000 g.r.t. up to 4,000 g.r.t., which are berthing/unberthing at the jetty, it is compulsory to take at least 1 tug, 2 tugs for vessels from 4,001 g.r.t. up to 50,000 g.r.t., 3 tugs for vessels from 50,001 g.r.t. and over.

Depending on weather and having regard for safety conditions, additional tugs may be assigned by Botas or Port Master's Office or requested by vessel.

BERTHING: Four loading berths available. Vessels berth with bow seaward (starboard side alongside at No. 1 and No. 3, and port side alongside at No. 2 and No. 4):

Berth No.	*Max. size* d.w.t.	*Depth Alongside* (m.)	*Max. Draft* (m.)	*Max. LOA* (m.)
1 (Outer East)	300,000	23.00	21.60	355
2 (Outer West)	300,000	23.00	21.60	355
3 (Inner East)	150,000	18.00	16.70	300
4 (Inner West)	150,000	18.00	16.70	300

Max. Freeboard:	*Min. Freeboard:*
Berths No. 1 and 2: 22.0 m.	2.50 m.
Berths No. 3 and 4: 20.0 m.	2.00 m.

Moorings: (All wires to have synthetic tails of 15 m. – 20 m. length).

Forward	Aft
4 Headlines	4 Sternlines
3 Breastlines	3 Breastlines
2 Springs	2 Springs
1 Towing Wire	1 Towing Wire

LOADING:

Berth No.	*Max. Loading* Rate cu.m.p.h	*Loading* *Arms*	*Ballast* *Arms*
1	15,000	4×20 in.	20 in.
2	15,000	4×20 in.	20 in.
3	8,500	4×16 in.	16 in.
4	8,500	4×16 in.	16 in.

Two grades of oil are loaded in BOTAS:

(1) Kirkuk Blend Crude Oil (API 36.95-35.98 and temperature 80°F.-105°F.).

(2) Basrah Light Crude Oil (API 34.97-33.05 and temperature 80°F.-105°F.).

Maximum loading rates are dependent upon availability of loading lines on the ship.

Pilot / Loading Master is the adviser for all mooring, unmooring, cargo operations and communications with shore, etc.

Derricks and Cranes: Derricks and cranes S.W.L. of 0.75 tonnes are recommended.

Loading Operations and Shore Communication: Ship's tanks are inspected by Loading Master and passed as suitable for loading.

Responsible ship's officer must certify to the Loading Master that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Loading Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.

The Loading Master will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Loading Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of Readiness will be received by the Loading Master. It should be tendered at the time of anchoring or Pilot boarding. Lay time will commence 6 hours after receipt of Notice of Readiness. Notice of Readiness to be addressed "S.O.M.O. Representative, Botas Terminal – Ceyhan".

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Loading Master has received instructions to stop loading immediately this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipe-lines and hoses shall, while rigged for loading crude oil, be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

DENSITY: 1027.

BALLAST: Max. ballast discharge rate 5,000 cu.m.p.h.

Shore ballast tanks capacity – 65,000 cu.m.

Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. If the vessel is sure that ballast is extremely clean, it is permissible to deballast to sea, but in case of pollution, fine is heavy. Masters of tankers will be held responsible in cases of wrong declaration of clean or dirty ballast. Deballasting during loading (simultaneous) especially in Winter season is preferable for safety.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 km., Adana 75 km., and Iskenderun 65 km., distance from Botas (Ceyhan) Terminal.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available alongside.

With 24 hours notice Anadolu A.S. – Istanbul, can supply marine fuels in Iskenderun Bay by branch of Anadolu A.S. Tel: 1515873 (7 lines). Telex: 38018-38019. Fax: 1437072.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: At Iskenderun.

REPAIRS: Not possible.

SURVEYORS: There are no Classification Societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 km, from Botas (Ceyhan) Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Sports Day, (May 19th); Victory Day, (August 30th); National Holiday from October 28th (1200 hrs.) to October 29th (2400 hrs.); Shakear Bairam (3.5 days, movable); Kurban Bairam (4.5 days, movable).

The terminal works all year round.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: Daily garbage service available to vessels alongside and at anchor.

SHORE LEAVE: Crew permitted to go ashore with shore passes and Seaman's Book.

It is forbidden to walk on jetty and in terminal area. A vehicle is obtained by Botas for the needs (transportation) of ship's personnel on jetty. The vehicle goes only to the gates.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: Vessels may store at the anchorage or while vessel is at the berth with permission from Botas Authority.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The Loading Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.
(b) Fire-mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 l.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.
(b) 2 deck level manual water spray monitors of 450 l.p.m. and 2 foam branch pipes of a capacity of 450 l.p.m. of foam delivery used to extinguish fires on the manifolds.
(c) A number of portable dry chemical and CO_2 extinguishers are located in various locations.
(d) There are numerous foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.
(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

Emergency and Fire Signal: One or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: 1978.

Documents: Turkish Health Form (supplied when vessel boarded), 2 Stores Lists, 2 Crew Declarations, 8 Crew Lists.

Pilotage: Compulsory. Pilot meets ship 1 mile South of the pier at the anchorage zone.

Anchorages: At least 1 mile South of Southern end of jetty.

Restrictions: Max. drafts 72 ft. to 98 ft. at Berths No. 1 and 2 and 66 ft. to 72 ft. at Berths No. 3 and 4.

Max. Size: 300,000 d.w.t.

Health: Free Pratique granted at anchorage or when berthed.

Radio: Via Mersin.

VHF: Communicate with Botas Terminal Channel 16 at least 4 hours before arrival. Uses Channel 22 for working.

Radar: None.

Tugs: 3 of 2,600 h.p. and 1 of 1,200 h.p. All provided with fire fighting equipment.

Berthing: Normally facing Southwards (bow to sea) for emergency purposes.

Cranes: 1 on each berth.

Medical: A doctor is available ashore but vaccinations not possible.

Density: 1025.

Fresh Water: Available at all berths, arranged through Agent.

Fuel: Not available.

Fire Precautions: I.O.T.T.S.G. Safety Check List is utilised.

Consuls: See "Iskenderun".

Repairs: Repairs to engines alongside may be permitted with written permission from Terminal Management.

Dry Docks: None.

Surveyors: None.

Gangway/Deck Watchmen: Not required.

Customs Allowances: 200 cigarettes and 1 bottle per man.

Repatriation: Possible via Iskenderun and Istanbul.

Time: GMT plus 3 hours in November 1978.

Services: Limited fresh stores available.

Shore Leave: Permitted.

Identification Cards: Shore passes issued.

Mail: To U.K. takes about 5 days. None received due late orders.

General: No large scale B.A. chart available but B.A. 2632 is adequate if radar working. A Turkish Chart No. 334 is available. The position we anchored (2.1 miles South of jetty in 35 m.) was thick mud on bottom and good holding ground with wind from North about Force 7. At present berthing only during daylight but sailing any time. Each berth is equipped with shore gangway. Dirty ballast can be accepted up to 40,000 tonnes and clean up to 60,000 tonnes at a rate of 4,500 t.p.h. Loading rates up to 20,000 cu.m.p.h. on Berths 1 and 2 and up to 10,000 cu.m.p.h. on Berths 3 and 4. S.G. about 0.8459 (API 35.78) at 60/60F. with a loading temperature (November) of about 80°F. The oil is Kirkuk Blend Crude from Iraq. There are facilities for storing about 1,000,000 tonnes. Berths 1 and 2 manifold 6×20 in. with reducers to 16, 18 or 20 in. if required. Berths 3 and 4 manifold sizes 16 in. with reducers to 12, 14 or 16 in. if required. Automatic couplings may be used. At berths 3 and 4, 4 hoses can be connected if distance between ship's manifold centres is more than 150 cm. There is a Doppler approach system on jetties but it has not been calibrated. All moorings on quick release hooks and usually 3 head, 2 breast and 2 back spring moorings for 140,000 d.w.t. tankers, same aft. For berthing, 2 tugs make fast with their own lines, 1 tug at each end of main deck and 3rd tug stands by. For unberthing, 1 tug makes fast to bow and stern with ship's rope (not wires) and 3rd tug stands by. Pilot will not use pilot hoist but requires accommodation ladder when in ballast and disembarks with pilot ladder. 7 Notices of Readiness and Dry Certificate required by Pilot, 1 of each and 1 Ullage Report required by Agent. Agent takes ashore certificates of Safety Construction, Safety Equipment, Safety Radio, Loadline and Class. No early departure procedure available and ship stays on berth up to 2 hours after loading awaiting papers. N.O.R. is made out to I.N.O.C. – Bagdhad – Botas – Ceyhan. Pilot requires separate cabin as he acts as Loading Master, also cabin required for 1 Customs official and possibly Agent. Abnormal ship/shore differences appear to be usual as evidenced by the fact that when you handed them a letter of protest they hand you a reply at the same time.

Authority: Botas District Management.

SHIPMASTER'S REPORT: December 1980.

Botas and Toros Gubre Piers:

Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertiliser pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertiliser pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.

VHF: The Fertiliser Pier has no VHF.

Botas Oil Pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros Fertiliser Pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.

Anchorage: Toros Fertiliser: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.

Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros Berth in about 15 minutes.

Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.

Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort nozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing, push with bow line onboard. When unberthing, use ship's line which is doubled up.

Botas: 300,000 d.w.t. – 4 tugs
150,000 d.w.t. – 3 tugs
Toros: – 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.

Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.

Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to Force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.

Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side to on West side. Liquid – Starboard side to on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60′ N., 35° 59.04′ E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chicksan.

Depths each berth minimum 12.5 m.

Mooring/Fenders: Toros: This can be a problem, and is dependent on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.

Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.

Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chicksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draft Ammonia – about 18 m. maximum.

Air draft Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.

Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.

Agent: Agent comes from Iskenderun about 30 miles away.

Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.

Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kg. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.

N.O.R.: Tendered in usual manner on anchoring, accepted at that time unless weather prevents berthing.

Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.

Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.

Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agent's Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on one's own.

Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

SHIPMASTER'S REPORT: April 1988.

Documents: Agent requires the following:
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Classification Certificate.
Tonnage Certificate.

Restrictions: Unberthing any time.

Berthing at Berths No. 1, 2 and 3 at any time.

Berthing at Berth No. 4 during daylight hours only.

SHIPMASTER'S REPORT: June 1989.

Tugs: Vessels over 50,000 d.w.t. require 3 tugs. A ship's messenger is required for taking tugs lines.

On departure tugs will take ship's ropes.

Berthing: Vessels normally berth with the bow to seaward. Vessel moored with 4 head/stern lines, 3 breast lines and 2 springs fore and aft. The order for sending lines away depends on the pilot, who remains onboard and acts as Loading Master.

Loading: At Berths No. 1 and 2, which are for VLCC's, the minimum loading rate is 3,750 t.p.h.

Gangway: Shore gangways are provided at all four berths.

Shore Leave: Not normally possible from 1700 hrs. – 0900 hrs.

AUTHORITY: Botas Petroleum Pipeline Corporation, P.O.Box 73, 01921 Ceyhan-Adana-Turkey. *Tel:* 1388, 1431, 2488, 2514. *Telex:* 63838 Btas Tr. *FAX:* 15859 (9 lines). *Cables:* Botas-Ceyhan-Adana. *Contact:* Esat Can, District Manager. Captain Ali Meral, Manager-Marine Department.

AGENT: See "Iskenderun".

(B) TOROS GUBRE

LOCATION: Lat. 36° 55′ 00″ N., Long. 35° 58′ 54″ E.
PORT LIMITS: Toros Gubre is in the Botas (Ceyhan) port limits.
DOCUMENTS: Similar to Botas (Ceyhan) Terminal.
PILOTAGE: Similar to Botas (Ceyhan) Terminal, but there are no Loading Master's services.
ANCHORAGE: See "Botas (Ceyhan)" port plan.
RESTRICTIONS: Berthing possible by day and unberthing possible at any time.
MAX. SIZE: There are 2 jettys in the Toros Gubre. First is the old jetty and max. size is 30,000 d.w.t. The new jetty has a max. size of 80,000 d.w.t. but is not yet completed. Also see "Berthing".
RADIO: See "Botas (Ceyhan)" Terminal.
VHF: Always standing by on Channel 16.
RADAR: There is no port control radar.
TUGS: Botas (Ceyhan) Terminal's tugs are used.
BERTHING: There are 2 loading berths available on the old jetty.

Berth	*Max. d.w.t.* tonnes	*Max. LOA* (m.)	*Depth Alongside* (m.)	*Max. Draft* (m.)
East Side (Cargo ships and tankers)	30,000	175	12-14	10-12
West Side (For tankers only)	30,000	214	12-14	10.50

Six loading berths will be available on the new jetty. See "Plan".
BALLAST: There is one ballast tank with a capacity of 5,000 cu.m., but not always in use.
MEDICAL: See "Botas (Ceyhan)" Terminal.
DENSITY: Salinity 39 p.p.m.
FRESH WATER: Available at jetty.
FUEL: Not available.
SURVEYORS: There are no classification societies at the Terminal.
GANGWAY/DECK WATCHMAN: There are no watchman services.
CUSTOMS ALLOWANCES: Same as Botas (Ceyhan) Terminal.
AIRPORT: Adana Airport is 82 km. from Toros Gubre.
TIME: GMT plus 2 hours. (Summertime is GMT plus 3 hours.)
HOLIDAYS: Similar to Botas (Ceyhan) Terminal.
POLICE/AMBULANCE/FIRE: All information given after berthing.
TELEPHONES: It is possible to make calls via Iskenderun Radio Station.
SHORE LEAVE: See "Botas (Ceyhan)" Terminal.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: All information given after berthing.
DEVELOPMENTS: See "Berthing".
GENERAL: See "Section A" – Shipmaster's Report – dated December 1980.
OPERATOR: Toros Gubre ve Kimya Endustrisi A.S., P.K. 83 01921, Ceyhan-Adana, Turkey. *Tel:* 7321-5001 (4 lines). *Telex:* 63840 Tors Tr.

AGENT: See "Iskenderun".

(C) DELTA TERMINAL: (Dortyol/Yesil).

LOCATION: Lat. 36° 51.05′ N., Long. 36° 09.18′ E.
PORT LIMITS: The Delta Terminal is operated under the authority of Iskenderun Harbour Master's Office, where the mooring/unmooring operations are under the monopoly of Golovasi Botas (Ceyhan) Terminal.
DOCUMENTS:

7 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
1 copy Free Pratique.
Last Port Clearance.
Load Line, Safety Construction, Safety Radio, Safety Equipment and Class Certificates.

Agent has to take the last five certificates to the Harbour Master.
Clearance: For clearance on arrival, the vessel has to call at Iskenderun first. However, depending on the weather conditions and availability of clearance team, the Agent may arrange berthing at Delta Terminal and then arrange clearance. This is why Masters are advised to contact the agent 3 – 4 hours prior to arrival in order to get the final instructions for mooring.

Free Pratique is not granted by radio as it might be in some countries, but after boarding of the Sanitary Officer.
PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will be taken from Botas Terminal (see "Golovasi"). It is requested that the pilot ladder be of an approved pattern and securely rigged.
ANCHORAGE: In the event of berth not being available on arrival, and after the clearance, the vessel is to anchor in the anchorage zone of Botas Terminal (1 mile off Botas Terminal).
RESTRICTIONS: Mooring is carried out during daylight only. Unmooring is carried out around the clock.

Terminal does not accept any vessel not consigned for agency to

Ets. A. Boutros and Fils,
Ataturk Blvd., Unsal Bldg., 1st Floor,
31200 Iskenderun.
Telex: 68123 sail tr/68131 sail tr/68214 imoc tr/68202 eeb tr/ 68203 bson tr.
Telephone: (90) (881) 15170.
Telefax: (90) (881) 12036.
Cables: Boutros – Iskenderun.

MAX. SIZE: The Terminal accepts vessels up to 40,000 d.w.t. or 220 m. LOA. For vessels over these sizes, special acceptance can be granted depending on the cargo, season, etc.

Depth is 12.6 m. at low tide.

RADIO: It is essential that tankers bound for Delta Terminal communicate with the agent at least 72 hours, 48 hours and 24 hours before arrival and state:

ETA.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
S.W.L. of derricks.
Quantity of ballast on board and time required for deballasting.
Whether the vessel is gas free or not.
Max. draft after loading.

VHF: Delta Terminal and the agent monitor Channel 16. Masters should contact the agent 3 – 4 hours prior to arrival in order to get final instructions for mooring. Once the vessel is moored, operations channel is agreed between the vessel and terminal.
RADAR: There is a Gulf Control Radar at the entrance of the Gulf of Iskenderun, however it is not always on watch. From time to time Control may call a vessel entering or leaving the Gulf, on Channel 16, to ask some questions. The approach to or leaving the Gulf can be made without difficulty as the coast line provides very good fixes.
TUGS: Tugs are supplied by Botas Terminal at the discretion of the Master and Pilot. Generally one tug is used for mooring and unmooring. Botas Terminal has 3 tugs of 2,600 h.p. and 1 tug of 1,200 h.p.
BERTHING: There are 3 berths. Each berth consists of 3 buoys (one portside ahead and 2 aft):

Outer Berth: For clean products only.
Inner Berth: For dirty and clean products. (See "Operator's Report" dated April 1988 on page 1566).
Bunker Berth: For vessels up to 5,000 d.w.t., for dirty products and LPG.

LOADING:

Clean products: 2×8 in. hoses, 1,200 t.p.h.
Dirty products: 2×10 in. hoses, 2,000 t.p.h.

All ship's valves should be closed or blanked, except those required for loading and water circulation purposes.

Ship's crew with an officer in charge will assist in all operations, as advised by the terminal representative. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Max. loading rate is requested by Master.
Cranes: No cranes available, vessels are required to use their own equipment.
Lighting: Manifolds should be lit to enable night loading operations to be carried out with safety. Sea area around the ship is to be illuminated.
Notice of Readiness: Notice of Readiness should be tendered at the time of arrival, it will be received by the terminal representative after mooring.
Deck Watch: A responsible ship's officer shall be on watch at the point near the ship's tanks which are receiving cargo during the process of loading, with a Loading Master from the terminal.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil, during process of loading.
BALLAST: There are no dirty ballast facilities. The vessel must arrive with clean ballast.
MEDICAL: Master to inform agent by cable or telex if urgent medical assistance is required upon arrival, indicating if possible, seriousness of case in order that adequate steps may be taken.

Hospital and doctor are available at Dortyol 10 km., Iskenderun 40 km. and Adana 100 km. distance from the terminal.
DENSITY: Salinity about 39 p.p.m.
FRESH WATER: Fresh water is not available. Tankers to be supplied with fresh water are to call at Iskenderun before or after loading. Fresh water is supplied by the state-owned port company at Iskenderun, by means of a 200 ton capacity barge. The price is U.S.$4.00 per 1,000 kg., including 'petties'. Fresh water is supplied on a round the clock basis. There is an additional charge of U.S.$50.00/100.00 for fresh water supplied between midnight and daybreak. A minimum charge is made for 20 tons.

Arrangements to be made through Agent.
CONSULS: Consuls for Norway, Spain, Germany, U.K., France, Netherlands, Greece and Italy are located in Iskenderun.
REPAIRS: Most radar/radio and engine repairs can be carried out.
SURVEYORS:

SGS. Tel: (90) (881) 11072.
Marine Survey Bureau. Tel: (90) (881) 18729 – 19751.
Atlantic. Tel: (90) (881) 21479.

GANGWAY/DECK WATCHMEN: There is no watchmen service.
CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
AIRPORT: Adana Airport, served only by domestic lines, with routes to Istanbul and Ankara. Airport is situated 100 km. from Delta Terminal. Twice daily services to Istanbul and Ankara for international connections.
TIME: LMT is GMT plus 2 hours in Winter time and GMT plus 3 hours in Summer time.
HOLIDAYS: New Year's Day, 31st December (noon) and 1st January; Commemoration of Ataturk & Children's Holiday, 23rd April; Youth and Sports Day, 19th May; Seker Bayrami (3.5 days), changeable – after Ramadan feast; Kurban Bayrami (4.5 days), changeable – Festival of Sacrifice; Victory Day, 30th August; Independence Day, 28th October (noon) and 29th October.
POLICE/AMBULANCE: Can be contacted through the local agent (Boutros).
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew permitted to go ashore with shore passes which can be arranged through the local agent.
IDENTIFICATION CARDS: Seaman's Book is sufficient for shore leave. Embarking or disembarking crew members must hold a valid Passport (and depending on citizenship, a visa).
SAFETY: *Tanker Safety:* Masters are at all times responsible for the application of all safety precautions. One boat of the terminal is at all times alongside the vessel for safety.

Safety Check List: The tanker Safety Check List must be completed after inspection of each item, prior to commencement of loading. The berth operator is authorised to stop all loading operations should he consider safety and property to be endangered.

Signals: The following signals must be shown when vessel is in port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire fighting and vacating the berth in case of emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors be ready.
(b) Fire mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment at Buoys: One boat available alongside the vessel for fire-fighting when vessel is loading.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The emergency and fire signal is: 1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration, supplemented by a continuous sounding of the general alarm system.

GENERAL: The main engines of all vessels while tied up to the buoys shall be ready for immediate use. Deck power (steam) is to be maintained on deck at all times and water pressure shall be maintained on the fire fighting system.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the pilot or Port Health Officer, may approach any vessel entering the port and no other person until Free Pratique has been granted.

Whistle or siren to be available at all times.

Stores/Provisions: Vessels may store at the anchorage or while they are at berth with permission of the terminal and the Customs authorities.

OPERATOR'S REPORT: April 1988.

Location: Lat. 36° 50.65′ N., Long. 36° 08.71′ E.

Documents: Vessels are to call at Iskenderun for Customs Clearance, after which they will sail to the Terminal.

Pilotage: Compulsory. Pilot boards off Botas Oil Terminal.

Restrictions: Normally mooring is not undertaken after sunset. However, without any commitment from the owners of the Terminal, mooring after sunset is left entirely at the discretion of the pilot who might decide to moor the tanker after sunset, weather permitting.

Unmooring is carried out day and night.

Max. Size: Maximum draft 12.6 m.

Radio: Masters to advise agent of vessel's ETA 72 hours, 48 hours and 24 hours prior to arrival.

Cable to include the following information:

ETA Iskenderun.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
Quantity of ballast on board and time required for deballasting.
Whether vessel is gas-free or not.

Berthing: Vessel will moor at sea buoys. One buoy is located on the port bow and two buoys are located aft.

Loading: 2×10 in. hoses are available for dirty products and 2×8 in. hoses are available for clean products. Hose connection is amidships.

Loading is carried out at an average rate of 1,700 t.p.h. – 1,800 t.p.h. for dirty products and 1,200 t.p.h. – 1,500 t.p.h. for clean products.

Ballast: There are no facilities for receiving ballast. Vessels must arrive with clean ballast.

Fines for pollution are approximately U.S.$50,000.

Fresh Water: Not available locally.

Tankers requiring fresh water should call at Iskenderun before or after loading. Fresh water is supplied by the state owned port company at Iskenderun by a 200 ton capacity barge. Cost of fresh water is U.S.$4.0 per 1,000 kg. A charge of U.S.$50 – U.S.$100 is to be paid for supply between midnight and daybreak. Minimum supply 20 tons.

Fuel: Available.

General: Stores: A ship chandler is available for supply stores.

Agent: ETS. A. Boutros and Fils, Ataturk Bulvari, Unsal Han Kat 1, 31200 Iskenderun, Turkey; P.O.Box 11, 32101 Iskenderun. Telephone: (90) (881) 15170/74 (5 lines), (90) (881) 13684/85. Telex: 68123 Sail Tr/68131 Sail Tr. Fax: (90) (881) 12036. Cables: Boutros – Iskenderun. After Hours Contacts: Mr. Ferit Uyar, telephone (90) (881) 12893. Mr. Taner Carpar, telephone (90) (881) 13846.

Office hours during which Master can contact Agent on VHF Channel 16: 0830 – 1230 and 1430 – 1830 every day (including Saturday/Sunday/holidays during which one person on duty).

Telephone contact possible through Iskenderun Radio, VHF Channel 16.

HEREKE: 40.42 N. 29.37 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.

PILOTAGE: Compulsory pilotage from Darica to Hereke and vice-versa; also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Hereke port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.

ANCHORAGES: Anchoring places at Izmit Gulf are as follows:

For Dry Cargo Vessels:

Darica/Eskihisar Anchorage: Approx. Lat. 40° 46′ 05″ N., Long. 29° 32′ 10″ E.

Izmit Anchorage: Approx. Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E.

For Tankers:

Yarimca Anchorage: Approx. Lat. 40° 44′ 50″ N., Long. 29′ 44′ 30″ E.

RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.

MAX. SIZE: No restrictions if vessel suitable to load/unload at Hereke berth where jetty length 249.5 m. and depth varying between 11.50 m. and 17.00 m.

HEALTH: For vessels proceeding to Hereke Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere/Bosphorus. Crew List and Derat Certificate required.

RADIO: Istanbul Radio Station. Call sign TAH.

VHF: Available only at Darica and Yarimca pilot stations, Channel 16.

TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations in Izmit Gulf:

500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs

BERTHING: Only one jetty available at Hereke which belongs to NUH Cement Factory where more than one vessel can berth at a time.

CRANES: No shore cranes available on jetty.

BULK CARGO FACILITIES: As pier belongs to cement factory only cement cargo loaded. For bulk cement loading rate is 3,000/4,000 tonnes per day. 24 hours continuous work.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Private.

MEDICAL: Hospital and dental facilities are available at Izmit approx. 30 km. from Hereke.

TANKERS: No tanker facilities.

DENSITY: 1020-1022.

FRESH WATER: Available by barge and small quantities available from the jetty.

FUEL: Not available at Hereke, can be supplied by barge or coaster from Istanbul.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No repair facilities.

DRY DOCKS: None.

SURVEYORS: (1) Cargo Inspectors available at Istanbul.
(2) Surveyors available at Istanbul.

Cargo Inspectors and Surveyors can be ordered from Istanbul to attend vessels at Hereke.

GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.

HATCHES: Opening/Closing hatches carried out by the crew.

CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.

CARGO GEAR: Load/discharge effected by ship's gear as no cranes available on the jetty.

REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Immigration and Izmit/Derince Customs to assist repatriations.

AIRPORT: Nearest airport at Istanbul, approx. 100 km. from Hereke.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.

POLICE/AMBULANCE/FIRE: Police: 055 or 211-111224, Ambulance: 077 or 211-111030, Fire: 000.

EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-111224.

TELEPHONES: No arrangements exist.

SERVICES: None.

BANKS: Only local banks.

STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs formalities required for storing, Agent assists.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: Nil. No visitors allowed aboard without permission.

DELAYS: No delays expected.

AUTHORITY: NUH Cement Factory of Hereke, Akyar Mevkii Hereke, Kocaeli, Turkey. *Tel:* (2161) 1051 (3 lines). *FAX:* (2161) 1121. *Telex:* 33227, 33288. *Cables:* Nuh-Hereke. *Contact:* The Commercial Manager.

HOPA: 41.28 N. 41.27 E. (See Plan)

DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique (received from Canakkale or Istanbul).
Customs:
2 Crew Lists.
2 Crew Declarations.
2 Stores Lists, including bonded store.
2 Cargo Manifests.
2 Customs Clearance from last port.
Immigration:
2 Crew Lists.
2 Passenger Lists.

PILOTAGE: Compulsory for vessels berthing and unberthing.
2 Pilots available, ordered by Agent on basis of Master's ETA.
International code signals used to call Pilot, who boards at harbour entrance. Vessel may enter and leave at any hour on request.

ANCHORAGES: In the outer harbour, off the entrance.

HEALTH: Pratique granted after Sanitary Officer's visit on vessel's arrival.

RADIO: Hopa Radio. Call sign TAB-2. (41° 23′ 50″ N., 41° 25′ 19″ E.)

VHF: Hopa Radio on Channels 16, 12 and 74. Pilot on Channel 12.

TUGS: 2 tugs of 900 h.p. and 1 mooring boat available.

BERTHING: 1,146 m. of berthing space.

Quay No.	*Name*	*Length* (m.)	*Depth* (m.)
1	Ore Quay	215	10.0
2	Passenger Quay	198	10.0
3	General Cargo	190	10.0
4	General Cargo	100	10.0
5	Naval Quay	100	5.5
6	Motor Boat Quay	185	4.5
7	Fisherman's Quay	120	4.5
8	Ro-Ro Quay	38	9.0

CRANES: Shore cranes: 1×25 tons, 2×5 tons and 2×10 tons.
Mobile crane: 1×10 tons.

STEVEDORES: Gangs of stevedores secured by the Agent through the port monopoly 24 hours prior to arrival. Working hours of first shift 0800 – 1200 and 1300 – 1630. Second shift: 1630 – 2030 and 2130 – 0030.

MEDICAL: A Doctor and hospital facilities are available.

DENSITY: 1024.

FRESH WATER: Fresh water available at all berths, order through Agent. Rate 60 t.p.h. (approx.).

FUEL: Available by road tanker.

CONSULS: None.

REPAIRS: Small repairs possible.

DRY DOCK: None.

GANGWAY/DECK WATCHMEN: Recommended.

SURVEYORS: Available from Istanbul. Order through Agent.

HATCHES: Opening/closing hatches to be carried out by ship's crew.

REPATRIATION: All facilities available for crew changes and repatriation.

AIRPORT: At Trabzon. Approximately 185 km. from the port.

HOLIDAY: New Year's Day; Seker Bayrami (3 days), Kurban Bayrami (4 days), (Both are religious holidays and dates are changeable every year). 23rd April, 19th May and 29th October are National Holidays. Saturday and Sunday are official holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 1624. Ambulance Tel: 1068. Fire Tel: 3625.

BANKS: Ziraat Bankasi, Is Bankasi, Ak Bank, Halk Bank.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE: Trucks will remove garbage from vessel at berth on request.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour and two of 10 tons per hour capacity and shore tanks of 100 tons and 600 tons capacity.
Contact: Tel: 0571-2259. Telex: 83338 TRDZ. Fax: 0571-1791.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,940.1 TL (16.5.91).

AUTHORITY: Port Management, Hopa, Liman Isletmesi Mudurlugu, Hopa, Turkey. *Tel:* (90) (0571) 3638. *Telex:* 83338. *Contact:* Emin Ali Yilmaz, Director of Port. Dursun Seheri, Assistant to Director.
Nedim Kurum, Harbour Master. Tel: 1067. Telex: 83359.

ISDEMIR: 36.43 N. 36.11 E. (See Plan)

LOCATION: The port is located inside the Western Breakwater within Lat. 36° 43′ 30″ N., Long. 36° 11′ 06″ E. and the South Breakwater within Lat. 36° 43′ 35″ N., Long. 36° 11′ 15″ E.

DOCUMENTS: Same as other Turkish ports.

PILOTAGE: Compulsory for all foreign vessels. Working hours are 0800 hrs. – 2400 hrs. (Also see "Restrictions"). Pilot boards 0.5 miles to 1.5 miles from the main breakwater. Call on Channel 16, working on Channel 12.

ANCHORAGES: Safe anchorage South of a line due West of the South breakwater light (green light) and at least one mile from the breakwater.

RESTRICTION: Large vessels (over 100,000 d.w.t.) and tankers are not allowed to enter during hours of darkness.

MAX. SIZE: No limitation at the anchorage.

	Max. Length (m.)	*Max. Draft* (m.)
AI (1)	300	16.0
AB (2)	200	11.0
CD (3)	150	7.8
DE (4)	200	9.2
EF (5)	185	9.5
FG (6)	90	5.5
Service Berth	140	5.5
Fuel Wharf	No limit	13.0

HEALTH: See "Iskenderun".

RADIO: See "Iskenderun".

VHF: Channel 16, working Channel 12.

RADAR: There is a Radar Control Station on the South side of Iskenderun Gulf Entrance, near Akinci Point. Operator asks vessels on entering and departure for their name and call sign by VHF Channel 16. The station is on duty 24 hours.

TUGS: 3 tugs available, 2×2,480 h.p. and 1×1,200 h.p. Tug compulsory for vessels over 500 g.r.t.
1 Tug for over 500 to 4,000 g.r.t. vessels.
2 Tugs for over 4,001 to 15,000 g.r.t. vessels.
3 Tugs for over 15,001 g.r.t. vessels.
If a vessel arrives with over 100,000 tonnes cargo or 16.0 m. draft, a fourth tug is provided from Botas/Ceyhan or Iskenderun Port.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Cranes Capacity* tons	*Remarks*
1	500	16.0 - 18.5	2 × 25	2,000 t.p.h. (ore), 1,250 t.p.h (coal), outreach 28.0 m., air draft 19.0 m.
2	240	11.5 - 12.0	5 × 15	400 t.p.h. (ore), 300 t.p.h. (coal). Berth can also be used for general cargo.
3	220	8.0 - 8.5	2 × 10	General cargo
4	200	9.5 - 10.0	1 ×140	Heavy lifts
5	185	9.5 - 10.0	2 × 10	General cargo
6	90	6.0 - 7.5	–	The cranes on Pier 5 are used.
Service Berth	140	6.0	–	Load-discharge only for the Turkish vessels.
Fuel Wharf	–	14.0	–	Vessels are moored by stern and drop both anchors.

CRANES: 2 Portal cranes on Pier 1 for ore and coal discharging operations. 5×15 ton cranes on Pier 2 for bulk and other purposes. On Piers 3, 5 and 6, 10 ton capacity cranes can be used with hydraulic grabs for bulk and general cargoes. Fixed heavy lift crane on Pier 4 for special purposes which can be used for heavy cargoes up to 140 tons.
Mobile Cranes: Capacity 6 tons – 90 tons.

SPECIALISED CARGO HANDLING FACILITIES: Tar and benzol are produced by the factory. The tar loading can be carried out by 30 ton trucks. A 4 in. hose is available on the Fuel Wharf, and benzol can be loaded by pipeline at a rate of 1,000 tonnes per day.

Fuel oil, gas oil and diesel oil can be loaded by 8 in. hoses from the existing 8 storage tanks (total capacity 30,000 tonnes). Vessels have to have clean ballast on their arrival. There are no storage facilities for dirty ballast.

STEVEDORES Available 24 hours. Written ETA advices to the Port Management required 8 hours before berthing.

Handling Rates:	*Tons per 24 hours*
Pig Iron	1,500
Iron Ore	20,000
Pipes	800 – 1,000
Timber	4,000
Coal	16,000
General Cargo	800 – 1,000
Wheat	1,500
Sugar	100
Rice	600
Cement	1,500
Fertiliser	1,500
Fuel-oil	3,500 – 5,000

TANKERS: Facilities owned by the Port. Depth alongside 14.0 m. Discharge rate for fuel and oil (1×10 in.) 350 t.p.h. – 400 t.p.h. Benzol (1×6 in.). Handling rate 70 t.p.h. – 80 t.p.h. Distance between dolphins 106 m. Also see "Specialised Cargo Handling Facilities".

FRESH WATER: Good quality water available from shore connection, rate 15 t.p.h. maximum.

REPAIRS: No facilities.

CONSULS: See "Iskenderun".

DRY DOCKS: None.

GARBAGE DISPOSAL: The port is integrated with Iskenderun Steel Works and garbage facilities are provided by the Social and Internal Services Department, who provide garbage collection trucks and teams. Contact Tel: 9-8895-6270-1101/1501.
WASTE OIL DISPOSAL: A waste oil refining station has been installed near the fuel tanks of the Steel Works and trucks are used to transport waste oil from ships to the oil cleaning station.
SEAMAN'S CLUBS: None.
CURRENCY: Turkish Lira (TL).

SHIPMASTER'S REPORT: June 1981.
Location: 8 miles North of Iskenderun.
Pilotage: Pilotage is compulsory, but we arrived and sailed without Pilot. Permission must first be obtained via VHF Channel 16 through Iskenderun, usually the Agents. On no account must vessels enter and leave without permission.
Anchorages: Good holding ground inside breakwaters, protected from all directions except Southwesterly swell. Permission must first be obtained before anchoring inside.
Navigation: Good navigational entrance marks. No difficulties encountered on entering or leaving, plenty of water.
Tugs: Not available.
Berthing: Longest wharf appears to be "D", which at present is being extended (see "Plan"), the smallest being "C". All wharves appear to have plenty of water, (see "Plan"). All wharves have good access, wharves B, C and D being serviced with rail. Berth "A" has a heavy lift crane of 100 tonnes, no rail. Berth "D" has a conveyor for bulk cargoes. Most cargo being discharged into road transport.
Cargo Handling: Wharf "D" Bulk, "B" and "C" general cargo, Wharf "A" heavy lifts.
Cranes:
Wharf A – 1 × 100 tonnes for heavy lifts
B – 2 × 10 tonnes
C – 2 × 10 tonnes
D – 4 × 10 tonnes
Small mobile cranes also available.
Stevedores: Working hours – 24 hours continuous. Shifts change at 1600 hrs. Meal breaks at 1200 hrs. – 1300 hrs., 1700 – 1800 hrs. and 2000 – 2100 hrs.
Rate of discharge good, labour force good. Majority of port handling equipment is new, cranes, rail, etc. No warehousing available.
Fresh Water: Fresh water obtained by road tanker only, in quantities of 40 tonnes. Usually supplied at night as they supply the steel town during the day.
Fuel: No facilities observed.
Medical: Facilities at Iskenderun.
Consuls: At Iskenderun.
Repairs: No facilities observed.
General: Communications: Rail and road to Iskenderun, no local airfield. All instructions and information available through Iskenderun on VHF Channel 16, calling "Demicargo" which is local control, usually operating 0900 hrs. to 1700 hrs. and available only during working hours (Not meal hours).
Tonnage Handled: By observation only, it appears that relatively large vessels can be handled at the iron ore berth, up to 30,000 tonnes. A new berth is under construction (see "Plan") which will be able to handle vessels up to 100,000 tonnes. Other berths are for smaller vessels (A, B and C), the largest being "B".
Principal activities, steel, iron ores, general cargo.
Services: Tank cleaning services and ship chandlers available from Iskenderun.

SHIPMASTER'S REPORT: October 1986.
Clearance Inward: Vessel ordered to Iskenderun, anchored on arrival, cleared inward. All certificates and Seaman's I.D. Cards landed. Shore passes issued. 7 copies of Crew List required.
Radio: Istanbul for long distance messages. Iskenderun for messages when close by, port has VHF but uncertain if international connections possible.
Iskenderun Pilot has VHF Channel 16, opening watch at 0630 hrs.
Most Agents appear to be on VHF in office hours.
Fuel: Available with appropriate arrangements.
Isdemir: Vessels shifted up to wait for Pilot off Harbour Entrance on instructions of Agency. Pilotage available from 0830 hrs., VHF Channel 12. Tug channel monitored, 2 tugs on station, a third can be ordered.
The port imports coal and iron ore for the steel mill, using the newly completed portal grab cranes on Berth A-I. Berths A-B, C-D, E-F appear to be mainly used for exports of steel bars, coils, steel rods, pig iron, some coal and other minerals. Berth D-E mostly used for import of grain for direct delivery into lorries, and yard cargo for import or transhipment overland.
Working Hours: (3×8 hours) 0800, 1600, 2400 hrs. Though tally clerks may work (2×12 hours) 0800, 2000 hrs.
Vessel loaded 27,000 tonnes steel bars in 21 days after waiting 13 days for berth, with one shift to a deeper berth across harbour with tugs.
Facilities: Industrial grade or non-potable water piped to a few points in the harbour. Drinking water supplied in road tankers (ship's hose used). Agencies, communications, medical, ship chandlers, etc., all in Iskenderun. Agency charged by tariff for all services, rather than by the amount of work done.
International telephone system appears limited, and congestion occured soon after 0900 hrs. Agency telex machines only domestic models, head office relayed international messages.
Provisions, especially vegetables, limited choice in hot weather. No bonded stores, only duty paid beer, etc. available. Ship chandlers required Owners approve the cost of the order before arranging supply, also that only one delivery be made owing to the high costs involved. Bill made out in U.S. dollars.
The public highway is a walk of 1.5 hours in very hot weather, before taxis or mini buses can be obtained. The bus system at shift change time, with a transfer at the factory bus terminal was useful and economical. There are some small general stores in the 'Fabrik Town' about 1 hour's walk. Hourly bus service to Iskenderun until early evening.
Clearance Outward: Vessel returned to Iskenderun on a Sunday for outward clearance, where the certificates and Seaman's I.D. Cards were returned. It is possible to sometimes arrange clearance at Isdemir on weekdays.

AUTHORITY: Iskenderun Demir Ve Celik Fabrikalari, Directorate of Iskenderun Iron and Steel Plants, Isdemir, Turkey. *Tel:* 8895-6260. *Telex:* 68696, 68697 Isde Tr. *FAX:* 9-881-13895. *Cables:* Isdemir-Iskenderun. *Contact:* Salih Buker, Port Manager Tel.: 8895-6260 (Ext. 3080), Fax: 9-8895-3759.

ISKENDERUN: 36.35 N. 36.10 E. (See Plan)

DOCUMENTS:
7 Crew Lists.
2 Stores Lists.
7 Passenger Lists.
2 copies Crew Declaration.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest, of which one must be legalised by Turkish Consulate at loading port. If no consulate existing same to be certified by local Customs Officer or Chamber of Commerce.
1 set Bills of Lading.
2 copies Cargo Stowage Plans.
Health Documents.
Ship's Certificates.
PILOTAGE: Compulsory and provided by Port Administration. One pilot boat available.
ANCHORAGES: Anchorage should not be less than 600 m. to 800 m. from the breakwater, where quarantine control is performed, and where depth ranges from 15.0 m. to 25.0 m.
RESTRICTIONS: Depth at port entrance 12.0 m.
MAX. SIZE: Max. draft 12.0 m.
Also see "Tankers".
HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew Vaccination Certificates to be produced if required. Sanitary Certificate required if live animals on board.
RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN. Iskenderun Radio, call sign TAI.
VHF: Port Authority and Pilots on Channels 16 and 13.
TUGS: 6 tugs up to 2,500 h.p. available.
One tug compulsory for the vessels of up to 4,000 g.r.t. and 2 tugs compulsory for the vessels of more than 4,000 g.r.t. Tugs are provided by the Port Administration.
BERTHING: The port has a breakwater 1,400 m. long, and is protected from North and South winds.

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	170	10.0	General Cargo
No. 2	170	10.0	General Cargo
Nos. 3 & 4	353	10.0	General Cargo
No. 7	200	10.0	Dry Bulk and Ro/Ro
No. 8	166	12.0	Dry Bulk
No. 9	167	12.0	Dry Bulk
No. 10	200	10.0	Dry Bulk

CARGO HANDLING FACILITIES: The port is connected to the national railway system. The overall length of railway line within the port is 22,500 m., and railway connection exists to every quay. Dangerous cargo is discharged into lighters and stored in special areas. Vessels with dangerous cargoes can only be worked during daylight hours.
Container and Ro/Ro Facilities: The port does not have specific container equipment. However, mixed container operations are carried out at the port by a fixed shore crane of 25 tons lifting capacity and 3 container forklifts of 10 tons – 42 tons lifting capacity. Reefer points for refrigerated containers are available on a 75,000 sq.m. concrete yard. Ro/Ro operations are carried out at Berths No. 7 and 10.
Ore and Bulk Cargo Facilities: Conveyors are available for ore, grain and coal handling, operating at a rate of 250 tons/hr., 300 tons/hr. and 100 tons/hr. respectively. The construction of a grain silo of 60,000 tons capacity has been completed, and has a conveyor connection with the quay.
Liquified Gas Terminal: Available at Sariseki Chemical Works, 3.5 miles North of the main port.
Cranes: 21 shore and yard gantry cranes of 3 tons – 25 tons capacity, 15 mobile cranes of 3 tons – 25 tons capacity, one floating crane of 90 tons capacity and 15 crawler cranes.
Equipment: Two container forklifts of 10 tons – 42 tons capacity, 34 forklifts of 3 tons – 5 tons capacity, 6 trailers of 40 tons capacity, 4 tugmasters, 3 loaders and 7 towing tractors.
Storage: Open storage area of 374,630 sq.m., and covered storage area of 18,395 sq.m.
STEVEDORES: 3 shifts (0800 – 1630, 1630 – 0030 and 0030 – 0800). For bulk cargoes, 3 consecutive shifts of 8 hours can be worked.
Cargo Handling Rates: Average daily rates/shift/gang: General cargo 100 tons to 125 tons; bagged 125 tons – 150 tons; cotton 100 tons.
Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.
MEDICAL: Facilities available. Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: Three berths operated by Mobil Oil, Petrol Ofisi and Shell. Max. draft 12.19 m. Mooring not allowed after sunset. Anchorage for ships carrying inflammable and dangerous cargoes is N.W. off the breakwater head, where the cargoes are pumped from submarine pipelines to the shore installations.

Also see "Golovasi".

FRESH WATER: Available alongside and from 2 barges of 240 tons capacity.

FUEL: Available locally from Baytur Trading S.A., Telex: 68068 AUTT TR/68022 AUIS TR. Tel: (881) 14400/18958/11104. Fax: (881) 15737, Iskenderun, Turkey.

With 48 hours notice Petrol Ofisi can supply Marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 BUNK TR. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: Vice-consulates of France, Germany, Greece, Italy, Norway, Spain and U.K.

REPAIRS: Welding and other minor types of repairs are possible.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.

OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.

CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

REPATRIATION: Can be arranged but Passport compulsory.

AIRPORT: Adana Airport, situated 147 km. from Iskenderun.

POLICE/AMBULANCE/FIRE: Police 11007; Ambulance 11057; Fire 11000.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

Iskenderun Port is not working only on first days during Sheker Bayram and 2 days during Kurban Bayram, during all other days work carried out.

IDENTIFICATION CARDS: Seamen's Book is sufficient. For repatriation and joining vessels, passport compulsory.

GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.

WASTE OIL DISPOSAL: Collection service is available. The waste oil is collected by 10 cu.m. mobile tanks. There is another tank of 80 cu.m. capacity inside the port. An oily water separator system of 7,500 cu.m./year is also available.

SEAMAN'S CLUBS: There is no seaman's club. However some facilities are available both within the port and in the city.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 6.125 TL (18.3.92).

GENERAL: *Weighing Facilities:* There are 4 weighbridges up to 100 tons capacity.

Weather: Sudden and very strong winds called "Yarikkaya" blow from North and East during Winter season.

Security: Port Security personnel ensure the security of the port 24 hours a day.

Provisions: Available.

DEVELOPMENTS: There are plans for container facilities in order to meet the container handling requirements, which will arise from Southeast Anatolia Project (GAP). The feasiblity study for a container terminal has already been completed.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed both at anchor and at the berth. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. For vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port), the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health Officials require 4 Crew Lists on arrival. The Agent will require 2 more Crew Lists prior to the vessel's departure for clearance with the Harbour Master.

(A) ISTANBUL (EUROPE)
(B) HAYDARPASA (ASIA)

(A) ISTANBUL (EUROPE)

DOCUMENTS: *Vessels bound for Istanbul:*

5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Manifests of all cargo onboard.
Copies of relevant Bills of Lading for Inward Manifests.
3 Lists of Money in the Ship's Safes (if there is no money on board please issue 3 "Nil" lists).
Harbour Master's Sailing Permit (which must be exchanged at each Turkish Port and kept on board).
Ship's Certificates (Derat, Ship Safety, Safety Radio, Class o Freeboard).

Transit Vessels: Master to present only Tonnage and Derat Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).

PILOTAGE: For both vessels bound for Istanbul and transit vessels Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. ETAs must be confirmed or corrected not less than 2 hours prior to ETA. Pilot boarding vessel, using service boat hoisting red and white flag, of Haydarpasa and Sarayburnu (entrance from Marmara Sea) or off Kavak (entrance from Black Sea). Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGES: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage of Haydarpasa and off Yenikapi, Ahirkapi for large vessels. For smaller vessels there is a good anchorage between Dolmabahce and Kurucesme.

RESTRICTIONS: Ships carrying hazardous cargoes (flammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

MAX. SIZE: No limitation of draft in open roadstead at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere Oil Port.

HEALTH: Sanitary control of both transiting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wireless messages to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is TAH. Frequency MW 500 kHz. Ships can also communicate with Agent by radio telephone on frequency 2182 KHz. It is recommended that ships keep watch for any radio telephone call by Agent detailing any berthing and operation arrangement.

TUGS: Arranged by Agent. Vessels of 1,500 g.r.t. and over berthing at the quays or mooring to the buoys are compelled to take the services of at least one tug and vessels of 5,000 g.r.t. and over require at least two tugs. Charged per hour or fraction of each operation.

21 tugs ranging from 110 hp to 2,500 hp are available.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Turkish Maritime Corporation Facilities:

Wharves:	*Length* (m.)	*Depth of Water* (m.)
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari for cargo handling	600	10
Sarayburnu for passenger handling	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4
Kurucesme for coal handling	370	10

Equipment:

Electric Cranes along the quays:
- 2 of 5 tons
- 7 of 3 tons
- 3 of 4 tons (coal transporter)

Rubber wheeled mobile cranes:
- 1 of 25 tons
- 7 of 10 tons
- 8 of 5 tons
- 5 of 3.5 tons

Floating Cranes: 5 tons – 60 tons.

BULK HANDLING: See "Section B" – Haydarpasa.

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150 – 200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position Lat. 40° 58′ N., Long. 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30 t.p.h. – 60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours' pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.) Telex: 29048 Bunk Tr. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS/DRY DOCKS: At the Golden Horn are 3 graving-docks:

(1) 388 ft. length, 72 ft. width at entrance
(2) 279 ft. length, 62 ft. width at entrance
(3) 600 ft. length, 63 ft. width at entrance

At Istinye (in the Bosphorus):

1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Haskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas, Turkish Lloyd.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be undertaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux Countries, Sweden, Norway, Germany, Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunisia, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection throughout world. Airport 15 km. from Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 521 42 22, Uskudar 333 20 30; Police 527 45 00; Ambulance Istanbul 521 15 95, Beyoglu 144 49 98, Uskudar 333 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), derat, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

	Flag of Ship		Cost (U.S.$)	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 10 tons per hour capacity and shore tanks of 800 tons and barge of 350 tons capacity.

Contact: Tel: 1-1522100/5. Telex: 24410 TRDZ. Fax: 1497415.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,940.1 TL (16.5.91).

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere: Ship's Register, Derat, Crew List and certificate issued at Canakkale North-bound.

There is also a silo of 70,580 tons capacity at the harbour.

CRANES:

7 shore cranes × 5 tonnes.
19 shore cranes × 3 tonnes.
1 shore crane × 8 tonnes.
1 shore crane × 25 tonnes.
2 shore cranes × 10 tonnes
1 shore crane × 15 tonnes.
1 shore crane × 35 tonnes.
1 floating crane with capacity 250 tonnes.

STEVEDORES: 2 consecutive shifts of 8 hours each day. At anchor approximately 100 tons can be handled each shift for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.

Gangs ordered by Agent through the Port Monopoly 24 hours prior to arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

FRESH WATER: Supplied from hydrants on the berths.
FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels, see "Section A".
CONSULS: 42 countries have Consulates in Istanbul.
REPAIRS: Welding and other minor types of repairs are possible under the Haydarpasa Port Directorate's control.
GANGWAY/DECK WATCHMEN: Watchmen services recommended. 3 shifts of 8 hours each.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew or by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
REPATRIATION: Can be arranged.
AIRPORT: Istanbul Ataturk Airport served by international and domestic lines. Airport situated 20 km. from Haydarpasa Port.
HOLIDAYS:
Official Holidays: New Year's Day (from December 31st at 1200 hrs. and January 1st); National Sovereignty Day (April 23rd); Youth and Sports Day (May 19th); Seker Bayram (3.5 days), movable; Kurban Bayram (4.5 days), movable; Victory Day (August 30th); Proclamation of the Republic (from October 28th at 1200 hrs. to October 29th).
POLICE/AMBULANCE/FIRE: Police Control Office: 144 94 03; Ambulance: 354-383 (internal phone numbers of Haydarpasa Port), 338 10 10; Fire Brigades: Haydarpasa Port: 393-354-583 (internal phone numbers of Haydarpasa Port), 163 60 20.
IDENTIFICATION CARDS: Seamen's Book is sufficient.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed at anchoring areas Kumkapi (if coming from Marmara Sea) and Buyukdere (if coming from Black Sea). All officials and agents arrive by boat and when clearance is given, the Pilot comes out. For vessels with cargo for the chemical works at Meda (2 miles S.S.E. of the main port) the procedure is the same except that a pilot is not required.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi Genel Mudurlugu – Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.

TCDD Liman Isletmesi Mudurlugu Haydarpasa, Istanbul, Turkey. *Tel:* 337-06-83.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:
- 6 Crew Lists.
- 4 Passenger Lists.
- 2 Manifests of Transit Cargo.
- 3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
- 1 set Bills of Lading.
- 1 set Cargo Stowage Plans.
- 2 Stores Lists.
- Health Documents.
- Ship's Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.
PILOTAGE: Vessels are permitted to arrive and sail from Izmir by day and night. After entering the Gulf of Izmir, Masters who are not familiar with the waters, require a Pilot at Pelican Spit. The pilotage from Pelican Spit to Izmir is not compulsory and Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.

Pilot can be contacted on VHF Channel 16.
ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.
RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.
MAX. SIZE: Vessels of any size with a max. of 38 ft. draft can operate at Izmir. There is a pipe-line for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.

In Old Port, length restricted to 165 m., max. draft 8 m.
HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.
RADIO: Izmir Radio Station, call sign TAN. Istanbul Radio Station: call letters TAH.
TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug. 2×800 h.p. and 1×2,500 h.p. tugs available.

BERTHING: *Old Port:* Location Lat. 38° 25′ N. Long. 27° 10′ E. Harbou entrance to port 130 ft. wide, depth 40 ft., harbour length 1,200 m harbour width 700 m. (Pilots boards 0.25 mile off entrance).

Precautions to be taken against N.E. and South winds. Mooring ste to quay. Operations effected by means of lighters. Altogether 8 vesse can berth in Inner Harbour with a draft of 24 ft. to 30 ft.
Alsancak: Located at a distance of about 2 miles from the old port Depth alongside berths 22 ft to 38 ft. Pilot's board vessels outside breakwater old port. Presently 12 cargo vessels of various sizes (mainly medium and small sizes) otherwise 9 to 10 large vessels can operate at the new port. There is also a berth for 2 large passenger vessels or 3 small size vessels. 95,000 sq.m. of open storage and 24,000 sq.m of sheltered storage available. Storage for 2,000 TEUs within port area
CRANES: 48 mobile cranes (5 – 35 tons). 1×50 ton and 1 × 200 ton floating cranes available when required.
BULK HANDLING FACILITIES: Grain silo has capacity 40,000 tons The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.

Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.
STEVEDORES: Straight time 0800 – 1200, 1300 – 1700 hrs. Overtime Saturdays, Sundays and public holidays 0800 – 1700 hrs., otherwise 1800 – 0200 hrs. Overtime charges 50% increase on S.T. charges.

For overtime discharging operations at the new port, handling charges (overtime) frorn ship's tackle to the Custom's warehouse, are for accoun of the ship.

9 men per gang aboard (6 labourers, 2 winchmen, 1 hatch tender) 3 lightermen or men on the dock.

Extra men used to reinforce regular gangs and in hatches congested with cargo for discharge secures a quick despatch.
MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.
TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oi receives petroleum products in bulk through a pipe-line at a distance of about 1 mile from their shore installations. Depth at the end of the pipeline is 33 ft. The pipe-line is of 12 in. and the pumping is effected through a flexible hose of 10 in. at an average of about 450/500 t.p.h.

British Petroleum receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.
FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barge. Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.
FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofis – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned). Deck and engine repairs are possible.
DRY DOCKS: Floating dock, capacity 7,000 d.w.t.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended. Three shifts of 8 hours per day.
OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.
CERTIFICATES:
- Derat Certificate.
- Registry.
- Vaccination Certificates (if required).
- Health Certificate.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: 1 litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.
REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.
AIRPORT: Airport from dock – distance 30 kilometres. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also 2 direct flights per week to Europe.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st, 2400 hrs.); National Sovereignty Day (from 22nd April, 1200 hrs. to April 23rd, 2400 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National

Holiday (October 28th, 1200 hrs. to October 30th, 2400 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 75% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is not carried out.

POLICE/AMBULANCE/FIRE: Police, tel. 255460; Ambulance, tel. 252405; Fire, tel. 00.

TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.

SHORE LEAVE: Crew members are allowed to go ashore with landing card.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.

SERVICES: *Shipchandler:* General Ship Chandler Ltd. Co., Yahya-Erhan Varlikli, 1475 Sok 1/202, Alsancak, Izmir, Turkey. Tel: (51) 219756, 216088, 220948. Telex: 53195, 53761. Fax: (51) 630468. Branches at Aliaga and Gemlik. Services available: Deck, engine and cabin stores; fresh water; laundry and provisions.

DELAYS: During the active export season, some delays occur varying 1 or 2 days.

DEVELOPMENTS: New port of Alsancak to be extended during the next 2 years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 2 to 3 vessels, especially container vessels. 2 container cranes ordered.

AUTHORITY: Denizcilik Bankasi TAO.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box 857, Izmir. Tel. 217270, 217287. After hours 224119. Telex 52371. Fax: 220375. Cables: "Gacship" Izmir.

IZMIT: 40.46 N. 30.00 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.

PILOTAGE: Compulsory pilotage from Darica to Izmit and vice-versa, also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Izmit Port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.

ANCHORAGES: Approx. position: Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E.

RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.

MAX. SIZE: No restrictions for vessels loading on roads, and no special restriction if vessel suitable to load/unload at the jetty of Seka Paper Mills where jetty length 70 m., depth varying between 24 ft. and 27 ft.

HEALTH: For vessels proceeding to Izmit Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere-Bosphorus. Crew List and Derat Certificate required.

RADIO: Istanbul Radio Station.

VHF: Available only at Darica and Yarimca pilot stations, Channel 16.

TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations at Izmit Gulf:

500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs

BERTHING: Only 1 jetty available at Izmit which belongs to Seka Paper Mills where 2 ships can berth at a time to each side of the jetty.

CRANES: No shore cranes available at the jetty.

BULK CARGO FACILITIES: No bulk cargo facilities. Vessels load minerals on roads, by ship's gear, brought alongside by barges with rate of 800/1,000 tonnes per day, working hours generally from 0800 to 2000.

At the jetty of Seka Paper Mills, working hours from 0800 to 1700 and 1700 to 2400. Generally paper and wood-pulp in bales discharged at a rate of 125/150 tonnes per shift per gang by ship's gear.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Private. See also "Bulk Cargo Facilities".

MEDICAL: Hospital and dental facilities are available.

TANKERS: No tanker facilities.

DENSITY: 1020-1022.

FRESH WATER: Available by barge, and small quantities available from the jetty.

FUEL: Not available at Izmit, can be supplied by barge or coaster from Istanbul.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No repair facilities.

DRY DOCKS: None.

SURVEYORS: Cargo Inspectors and Surveyors available from Istanbul and can be ordered to attend vessel at Izmit.

GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.

HATCHES: Opening/closing hatches to be carried out by the crew.

CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Customs and Immigration.

AIRPORT: Nearest airport at Istanbul, approx. 130 km. from Izmit.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.

POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 211-11030, Fire: 211-00.

EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-10945.

TELEPHONES: No arrangements exist.

SERVICES: None.

BANKS: Only local banks.

STORING: See "Prelims".

1. Vessels can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs facilities required for storing. Agents assist.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: Nil. No visitors allowed aboard without permission.

DELAYS: No delays expected.

AUTHORITY: Izmit Seka Paper Mills. *Tel:* 211-31630. *Telex:* 33124. *FAX:* 23235, 20074.

MERSIN: 36.47 N. 34.38 E. (See Plan)

PORT LIMITS: Inside the lines drawn from 36° 48′ 00″ N., 34° 37′ 00″ E., first 2 miles S.E., then N.E. to the land.

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 Stores Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Chamber of Commerce.
3 Outward Cargo Manifest.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.

Ship's Certificates:

(a) Load Line Certificate.
(b) Passenger Ship Safety Certificate (g.r.t. over 150).
Cargo Ship Safety Construction Certificate (g.r.t. over 500).
Cargo Ship Safety Equipment Certificate (g.r.t. over 500).
Cargo Ship Safety Radio-Telegraphy Certificate (g.r.t. over 1,600).
Cargo Ship Safety Radio-Telephony Certificate (g.r.t. over 300).
Exemption Certificate.
(c) Tonnage Certificate.
(d) Health Certificate.
(e) Derat Certificate.
(f) (According to MARPOL 73/78):
Oil Record Book I (g.r.t. over 150 for tankers, g.r.t. over 400 for others).
Oil Record Book II (g.r.t. over 150 for tankers).
Certificate of Complience.

PILOTAGE: Compulsory for all vessels. Agent orders Pilot through Port Monopoly Administration. Master to cable ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according to existing international frequencies. Usual international signals for requesting Pilot.

ANCHORAGES: Safe anchorage in open roads outside main breakwater.

Prohibited Anchorage:

1. Within the entrance canal of 14 m. depth marked by buoys.
2. Inside the circle of radius 2.5 cables length, with centre, red lighthouse at 36° 40′ 45″ N., 34° 38′ 45″ E.
3. North East open roads outside the line at 80° from green lighthouse towards the outside line of East breakwater.

RESTRICTIONS: Ships can anchor in open roads outside main breakwater at any time without Pilot. No night time restrictions for entry. Ships carrying more than 50 tons of explosives are not permitted to berth alongside.

The following are not permitted to enter Port:

Vessels over 9.0 m. draft between 16th December and 15th March.
Vessels over 9.5 m. draft between 16th March and 15th December.
Tankers over 12.0 m. draft between 16th December and 15th March.
Tankers over 12.5 m. draft between 16th March and 15th December.

Within main breakwater, ships exceeding 7.0 m. draft, and within the entrance channel, ships exceeding 9.0 m. draft, are not to operate engines. Ships below above mentioned drafts can only sail at low speed, unless force majeure. Ships over 1,000 g.r.t. cannot operate propeller within 50 m. of berths.

HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board, radio Agents full details before arrival. Upon arrival, yellow flag on foremast during daytime, and one red light at top/one white light at bottom during night-time.

RADIO/VHF: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAN, Mersin Radio TAM.

VHF Radio Telephone Channels 24 and 28, call Channel 16. Position of station: 36° 49′ 00″ N., 34° 36′ 00″ E.

M/F-R/T frequency: 2,820 kHz, call 2,182 kHz.

M/F-W/T frequency: 516 kHz, call 500 kHz.

Telephone: 9 741 13456, 9 741 23654, 9 741 26765 and 9 741 26766.

Radio messages to be routed to Agent, preferably via Istanbul Radio.

Telex communication always possible with Agent.

VHF communication possible with Agent through Channels 16, 68, 71, 74.

TUGS: 6 tugs available up to 2,630 h.p.

Tug Requirements:

Vessels 500 – 3,999 g.r.t.: One tug.

Vessels 4,000 – 14,999 g.r.t.: Two tugs.

Vessels over 15,000 g.r.t.: Three tugs.

Ship's lines are used.

BERTHING: Priority to Army, food relief and passenger ships. Second priority to Ro-Ro and Container vessels. If no berth available then ships to wait for turn in roads at anchor.

18 Mobile Cranes, capacity 3 tons – 25 tons.

1 Floating Crane, capacity 60 tons.

13 Transtainers, capacity 35 tons.

BULK CARGO FACILITIES: Conveyor system available.

Loading rate: 600×2 = 1,200 t.p.h.

Discharging rate: 100×2 = 200 t.p.h.

Silo capacity: 100,000 tons.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival, 7 days a week, 24 hours a day service.

Average discharging/loading rates:

100 tons per shift general cargo.

200 tons per shift bagged cargo.

150 tons per shift baled cargo

175 tons per shift bulk ore

Max. rate for ore 400 tons per shift if grab loading.

3 shifts per day, each shift 7.5 hours.

Above are ideal rates, and may vary according to kind and stowage of cargo.

MEDICAL: Agent to receive advance notice if urgent medical aid is required on arrival. Hospitals, dental facilities and all other medical facilities are available.

TANKERS: *ATAS Refinery Terminal:* Depth in harbour channel 11.2 m. Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers at one time, 10 in. hose connections to 26 in. shore line. Loading rate 1,000 cu.m.p.h., discharge rate 1,500 cu.m.p.h.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied by barge (2×100 tons capacity), but otherwise by shore installation at the rate of 30 t.p.h.

FUEL: Most types of marine fuel and lubricants available for delivery to ships.

With 48 hours notice, Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Te (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petr Ofisi – Haydarpasa, Mehmet Ince, Kadikoy Istanbul, Turkey.

CONSULS: Belgium, Denmark, Italy, Sweden, United Kingdom.

REPAIRS: Small craft repairs possible.

SURVEYORS: Cargo Inspectors such as Lloyd's, SGS, etc., available.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCES: 600 cigarettes and 7 bottles wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship uses her own means when such cranes are not available. Full lights to be supplied by ship.

REPATRIATION: Repatriation arranged by Agent.

AIRPORT: Adana Airport, 70 km. from Mersin, served only by domestic line THY-Turkish Airlines, with routes to Northern Cyprus (Ercan), Ankara and Istanbul, twice a day.

TIME: GMT plus 3 hours.

HOLIDAYS: Republic Day (October 28th afternoon, October 29th); New Year's Day (January 1st); Independence Day (April 23rd); Youth and Sports Day (May 19th); Victory Day (August 30th); Ramazan Bayram (Religious Holiday – 3 days); Kurban Bayram (Religious Holiday – 4 days).

Discharging/loading effected on all holidays except the first two days of Religious Holidays.

Piers in the Free Zone work on holidays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 055, Ambulance 13555, 26770, 077; Fire 000.

TELEPHONES: No installation for connection on board.

SERVICES: Special services available through Agents and/or ship chandlers.

STORING: Vessels can be stored by trucks. Trucks can proceed alongside at the berths. Forklifts can be used on the jetty if needed.

SHORE LEAVE: Crew allowed shore leave. Shore passes are issued.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Collection service is available and drums or skips are provided on board. Contact Mesbas Mersin Free Zone Corp. Tel: 90-741-39575.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,900.67 TL (25.4.91).

BANKS: Local/National/International Banks are available.

GENERAL: 30 ships per day, 4,550 ships per year can be handled. 4,960,000 tons general cargo, 200,000 TEU container, 1,040,000 tons bulk cargo handled annually.

SHIPMASTER'S REPORT: February 1992.

Documentation: The vessel was cleared very quickly whilst at anchor by the Agent and one Customs Officer.

The Ship's Register and all certificates have to be presented to the Harbour Master.

Documents required were: IMO Crew List, Stores Declaration, Personal Effects Declaration, Inward Manifest and Transit Manifest.

Pilotage: The Pilot boards to seawards of the channel buoys, depending on weather, and on departure he leaves at the breakwaters. The pilot cutter has a black hull with white superstructure. There is one pilot on duty at all times and the shifts are from 0000 hrs. – 0800 hrs., 0800 hrs. – 1600 hrs. and 1600 hrs. – 2400 hrs. There are likely to be delays at change-over times.

The pilot is available on VHF Channel 12 throughout 24 hours.

Anchorages: Anchorage is to the S.W. of the breakwaters in position Lat. 36° 46′ N., Long. 34° 39′ E. This location is clear of the entrance channel. The anchorage is exposed to most winds and the holding ground is poor.

Vessel should be aware of the SPM gantry and storage tanker in position Lat. 36° 45.97′ N., Long. 34° 41.35′ E. At night, it looks like a normal vessel at anchor with normal decklights and no special navigation lights.

Depth: There is a table indicating drafts in the sailing direction, but this is a guide only and is not rigidly enforced.

The entrance channel inside the breakwaters, the turning area and the channel to the ATAS Oil Jetty is being dredged to 15.0 m. and the channel to the container berths and the Grain Silo Jetty is being dredged to 11.0 m.

When we were alongside Commercial Quay (Berths No.6 and 7), the sounding ranged from 8.4 m. – 10.6 m. (see "Plan").

Tugs: There are 3 modern tugs available, 2×3,500 h.p. and 1×2,000 h.p. Ship's lines are used with the long drift.

When berthing we used 1 tug, and when departing we used 2 tugs. In each case, the centre fairleads were used.

Restrictions: Vessels of less than 15,000 g.r.t. not carrying dangerous IMO rated cargoes can berth and unberth throughout 24 hours. Vessels over 15,000 g.r.t. and all vessels carrying dangerous goods can berth and unberth in daylight hours only (0700 hrs. – 1700 hrs.).

Berths: The container berths are now completed and are dredged to 11.0 m. There are 5 container cranes, 3 on the West Quay and 2 on the East Quay.

The Commercial Quay was very busy. Discharge of vegetable oils from parcel tankers is undertaken at this quay.

On Berth No.4, at the South end of the Commercial Quay, a depth of 10.0 m. is quoted. Vegetable oil tankers can berth at any berth on the Commercial Quay as portable gantries are used, depending on draft.

Cargo: The discharge of vegetable oil is slow.

On our visit, the discharge rate averaged 20 t.p.h. due to the vegetable oil in the road tankers freezing up on the journey to the plant in Andana which is 70 km. away.

Discharge is through 1×4 in. diameter rubber shore hose and ship's reducers, to portable gantry which covers 2 trucks. Each loading hose is 2.5 in. diameter.

If no other ship is discharging vegetable oil, 2 gantries can be provided with individual hoses, joined at the ship's side into 1×4 in. hose.

There are generally long stoppages waiting for trucks.

The maximum discharge rate with 2 gantries and no stops is about 100 t.p.h.

It was difficult to obtain information from the shore as to when trucks would be available.

Medical: Good medical facilities available.

Fresh Water: Fresh water is available at the quay at a rate of 10 t.p.h. Loading is through ship's hoses and no meter is available. The cost is U.S.$ 4.00/tonne.

The cost of water by barge is U.S.$ 5.00/tonne and supply is subject to a 3 mile limit outside the breakwaters. The service by barge is unreliable.

Surveyors: Lloyd's exclusive surveyor available.

Repatriation: Outward visas are required and must be obtained during normal office hours (not Saturday afternoon, Sunday or public holiday). Airport tax is to be paid in the currency of the passport holder (U.K.£ 5.00 or U.S.$ 10.00, German DM, etc.). Most third world countries pay in U.S.$.

Airport: The nearest airport is at Andana, which is the regional capital, and is 70 km. to the N.E. There are many flights to Istanbul and Ankara.

Weather: During Winter, the weather can be poor and there are often high winds from the North and East. Also temperature can drop below freezing at night. During the Summer, the weather is very hot and there are a lot of flies and insects about.

General: The standard of English spoken was fairly good.

The Commercial Quay is within easy walking distance of the city. Leather goods and gold jewelry of good quality are available.

Ship Chandler: Fresh produce is good and cheap when in season.

Waste Oil Disposal/Slops: The Harbour Authority has available a 5 ton road tanker for collection of slops. The charge for the use of this service is U.S.$ 480 for 1 tonne or 20 tonnes. Engine room bilge water only accepted.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari – Isletmesi Genel, MD, Talatpasa Bulvari, Ankara, Turkey. Telex: 42571. *Cables:* Demiryol.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box 328, Mersin. Turkey. Cable Address: "Gacship" Mersin. Telex: 67141. Tel: 14961-6. After hours 15059. Fax: 120144.

NEMRUT BAY (including Foca): 38.46 N. 26.55 E. (See Plan)

PORT LIMITS: Nemrut Bay is situated on the South side of the port of Aliaga (see Aliaga). It is the area between the mainland and a straight line drawn True North from Kizilburun which is situated in position: Lat. 38° 45′ 00″ N., Long. 26° 53′ 50″ E.

The Bay is divided into two areas, the inner port and outer port.

Inner Port: Is the area remaining between the imaginary line connecting the South end of the Petkim Petrochemical Complex's breakwater with Karacadogan Penisula situated in position: Lat. 38° 46′ 10″ N., Long. 26° 54′ 22″ E.

Outer Port: Is the area between interior port and Nemrut Bay boundaries.

DOCUMENTS: See "Izmir".

PILOTAGE: Pilotage is compulsory for all vessels arriving at Nemrut Harbour.

Notice of ETA must be reported 72 hours, 48 hours and 24 hours before arrival to the Harbour Master's office at Petkim – Aliaga (Telex No. 51706, 51707, 51709. Fax. No. (543) 61248. VHF Channel 16). Time must be in GMT.

VHF Channel 16 is continuously watched at Nemrut Pilot Station and ETA may be confirmed on this frequency.

The address of pilot station is as follows:

Petkim Petrokimya Holding A.S.
Aliaga Kompleksi,
Dis Alim Mudurlugu,
Aliaga – Izmir – Turkey
Tel: Aliaga (543) 61240 (8 lines)
Izmir (51) 140910 (5 lines)
Telex: 51706, 51707, 51709
Cables: Petkim – Aliaga – Izmir.

In the ETA message, the following information must be indicated:

1. Name/call sign of vessel.
2. Nationality.
3. Agency.
4. Length overall, max. draft, gross tonnage, sailing draft and after loading draft.
5. Nature of Cargo (In IMO).

Rendezvous point with Pilot is: Lat. 38° 47′ N., Long. 26° 54′ E., in outer port. In the event of bad weather Pilot joins the vessel in inner port. Two pilot boats of 210 h.p. are available. Call sign of the boat is "TCZJ".

ANCHORAGES: Anchorage in the inner and outer ports is possible. However, anchorage within the area of 5 cables diameter of middle of interior port boundary is prohibited for safety of sea traffic (See "Plan").

RESTRICTIONS: Mooring to or sailing from the Petkim's Tanker Quay and Ege Gubre's Pier from sunset to sunrise time needs the permission of Port Administration.

MAX. SIZE: See "Berthing".

HEALTH: See "Izmir".

RADIO: Complete MF/SSB type radio, 1.6 – 4.2 MHz International Navigation Code with 31 Channels capacity, radio transmitter 150-350, 300-535, 700-1650, 1650-4250 kHz, and a 4 band SSB/AM receiver.

VHF: Communication within 20-25 miles with VHF radio operating in 156 – 162 MHz band is possible. International navigational bands are used. Station listens on Channel 16. Call sign: "TAB".

RADAR: No radar facility.

TUGS: 2 tugs of 1,225 h.p. and 2,500 h.p. are available. Tugs normally join the vessel in the outer port.

BERTHING: Quays at port of Petkim Petrochemical Complex situated on the Northern side of Nemrut Bay (See "Plan").

Berth No.	*Name*	*Length (m.)*	*Depth (m.)*	*Remarks*
1	Tanker Quay	163	7	Load/discharge lines:
2	Tanker Quay	175	10	6 in., 8 in., 10 in., 12 in. Constructed for loading/discharging various chemicals such as ammonia, benzene, fuel oil, ethylene oxide, ethylene glycols, chloric hydrocarbons, wash oil.
3	Caustic Quay	60	6	Loading lines: 8 in. for caustic, 4 in. for hypochloride.
4	Naphtha Quay	90	14	Out of service.
	Salt Quay	190	6	Constructed for discharge of salt to be used at Chlorine Alkali Plant.
5	Tanker Quay	285	13	Load/discharge of naphtha, benzene, ammonia, caustic, fuel oil. Ready for use late 1990.
6	General Cargo Quay	338 (175+163)	10 – 7	Constructed for loading/discharging various petrochemical raw materials, products and equipment.
	Petrol Ofisi Quay			Loading petroleum products.

Quays on the Eastern and Southern side of Nemrut Bay (See "Plan").

Ege Gubre Pier	122.90	12 – 14	Private jetty constructed for discharging/loading raw materials and products of fertiliser facility. Rate 1,000 tons/day.
Limas Pier	154	12	Private jetty constructed for discharging/loading iron scrap and iron products of Ironworks in Izmir.
Cukurova Pier	167	15	Private jetty constructed for discharging/loading iron scrap/iron products of Ironworks in the site. Also see "Shipmaster's Report" dated October 1992.
Nemtas Pier	210	7-21	Private jetty constructed for loading/discharging iron and steel products of Ironworks at site.
Habas Pier	220	10-20	Private jetty for loading/discharging iron and steel products.

CRANES: Fixed/mobile cranes are available at Petkim Petrochemical Complex.

Lifting capacity of 2 cranes at Salt Quay is 3 tonnes each. Salt is transferred by conveyor belt to the plant. One mobile crane of 270 tonnes lifting capacity, 2 mobile cranes of 150 tonnes, 2 mobile cranes of 110 tonnes and 55 mobile cranes of 12 – 30 tonnes lifting capacity are available.

Nemtas and Cukurova have mobile crane facilities. Limas has 2 fixed cranes each with 10 tonnes lifting capacity. Ege Gubre has 1 × 10 ton crane.

BULK CARGO FACILITIES: See "Berthing" – Salt Quay and General Cargo Quay.

SPECIALISED CARGO HANDLING FACILITIES: Loading and discharging lines of liquid chemicals available at Port of Petrochemical Complex (See "Berthing").

MEDICAL: Hospital near Petrochemical Complex.

TANKERS: See "Berthing".

FRESH WATER: Available at Petkim's Quays, Ege Gubre and Limas.

FUEL: Available at Petrol Ofisi Quay.

CARGO GEAR: Load/discharge can be effected by mobile cranes at General Cargo Quay (See "Cranes").

AIRPORT: Izmir Adnan Menderes Airport is approximately 75 km. from Petkim Petrochemical Complex.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

HOLIDAYS: *Official:* January 1st, April 23rd, May 19th, August 30th, October 29th.

Religious: "Bayram" days (Id-al-Fitr: 3 day, Id-al-Adha: 4 days) of Muslims (These dates are subject to visibility of new moon at Mecca).

POLICE/AMBULANCE/FIRE: Petkim has its own protection and medical units.

TELEPHONES: Available for national and international calls at Petkim.

BANKS: T. C. Ziraat Bankasi, Turkiye Is Bankasi, Akbank, Emlak Kredi Bankasi and Vakifar Bankasi in Petkim site.

SHORE LEAVE: Petkim's permission is needed at Petkim Quays.

IDENTIFICATION CARDS: The list of personnel leaving/joining the vessel should be announced to Petkim.

GARBAGE DISPOSAL: *Petkim:* Service can be ordered through Port Authority. Call "Nemrut Pilot" on VHF Channel 16. Service is free of charge provided vessel has Garbage Disposal Certificate, otherwise U.S.$ 45 per 1,000 g.r.t..

WASTE OIL DISPOSAL: *Petkim:* Ballast line available to waste treatment plant for ballast and slop disposal. Service is free of charge provided vessel has Disposal Certificate, otherwise U.S.$ 60 per 1,000 g.r.t..

SEAMAN'S CLUBS: None. Usual local facilities.

GENERAL: Piers and facilities at Nemrut Bay are owned by industrial companies located in this area.

SHIPMASTER'S REPORT: July 1980 (Updated 1992).

Port of Foca: Vessel discharged ammonia.

Approach: Charts: BA 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.

Berth: Consists of an "L" shape with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The Chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.

Density: 1028.

Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines.

General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships).

Fuel: Not available.

Officials: Officials are located in Nemrut Bay.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting Customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

Doctor: Available at 20 minutes notice.

Repairs: Not possible.

Surveyor: Available.

Chandler: Available.

SHIPMASTER'S REPORT: September 1980.

Port of Foca:

To be read in conjunction with the previous report.

Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

B.A. Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsula between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. Force 4.

Pilots: Available on 24 hour basis from Aliaga Refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 mile N.W. of Karacadogan Burnu. He either drives across the peninsula to the new chemical berth and boards his boat there or comes by tug around the peninsula from Aliaga Refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.

Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga Refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.

Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).

Moorings: (See "Plan"). Back spring first forward, starboard buoy line first aft. Mooring boat available.

Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.

Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.

General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish Light Dues Certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:

- 2 Crew Currency Lists.
- 2 Crew Declarations.
- 6 Crew Lists.
- 1 Vaccination List.
- 1 List of Cash in Ship's Safe.
- 1 Health Declaration.
- 2 Lists of Ship's Particulars (Turkish Form).
- 2 Lists of Previous Ports.
- 6 Copies of Cargo Manifests (to be stamped at previous port if Foca second or subsequent port).

SHIPMASTER'S REPORT: October 1987.

Chart: B.A. Chart No. 1618.

Documents:

8 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
8 copies Cargo Manifest.

Approaches: Good positions are obtained on approach. Crude carriers generally berth in Aliaga Bay and product and gas vessels in Nemrut Bay.

Pilotage: Pilot is based at the Dock Office of the Petkim Refinery in Nemrut Bay. Pilots also undertake berthing at other Nemrut Bay berths.

Pilotage is available 24 hours but in general pilotage not available between the hours of midnight and 0600 hrs. for berthing.

Pilot boards from a small black hulled cutter. Excessive use of the tug and anchor was made.

The Pilot boards 0.5 miles west of FL.R. light on Petkim Breakwater.

Prior to arrival Pilot may be contacted by Telex No. 607 53950 PETE TR and on approaching may be contacted on VHF Channel 16.

Anchorage: There is a prohibited anchor circle on BA. Chart No. 1618 but this does not seem to be observed. We found a good anchorage cables west of the FL.R. light of Petkim Breakwater. In October 1987 there were many ships at anchor.

Tugs: There are two tugs on standby (1 x 1500 h.p. and 1 x 2,500 h.p.) at Petkim Dock and they require 15 minutes notice. Ship's lines used.

Berthing: At Petkim Refinery in Nemrut Bay there are 6 berths. There are 3 berths for product and gas ships. 1 berth for Naphtha (vessels berth stern to), 1 berth for caustic soda and 1 general cargo berth. The two product berths are on the N.W. side of Petkim Dock and the general cargo berth is on the S.E. side.

The water depth in the dock is about 30 ft. although there is more water at the outer end.

The product berth which is on the outer side of the N.W. breakwater was damaged by Winter storms and was out of use.

We berthed head in port side to at the product/gas berth and used the offshore anchor. Moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The berth was well fendered. Ship's gangway used.

Cargo: A full range of gases are handled for import and export, including ethylene. Also many chemicals and products are handled.

We discharged propylene with back pressure of 12 Bar (Maximum back pressure allowed 20 Bar) at 50 t.p.h., heater discharge to +5°C. We used a 6 in. Chicksan arm for liquid and a 4 in. hose for vapour return line.

We believe 4 x 4,000 cu.m. spheres used for storage of pressure gases. The Terminal and Surveyor were very helpful. Hot vapour pumped ashore on completion. The English spoken was fair.

Fresh Water: Fresh water is available from Petkim Dock and at a good rate. Shore hoses used.

General: Nearest airport is at Izmir with flights to Istanbul and Ankara.

Ship chandler available locally.

There are 4 berths on the West side of Nemrut Bay. One berth being for ammonia (Foca) and 3 for steel, scrap and finished exports.

SHIPMASTER'S REPORT: October 1992.

Berth: Cukurova Jetty.

Cargo: 46,000 tons of scrap steel.

Documents: Copies of all the ship's main classification certificates, including the IOPP Certificate. All certificates must be valid.

6 Crew Lists.
2 Crew Declarations.
2 Bonded Stores Lists.
2 General Declarations.
1 Cargo Plan.
1 List of Medical Drugs and Narcotics.
Photostat of the Master's Passport.

General: On arrival, no berth was available for our 60,000 ton displacement vessel, which was the largest to enter here. In order to offset harbour dues, which for our ship was $ 17,000, we dropped anchor in position outside of port limits in 38° 45.8′ N., 27° 53.2′ E. (B.A. Chart No. 1618). Northwest winds were strong at times, up to Beaufort Force 7, but even with 8 shackles of chain out the ship held well. The sea bed was found to be light grey ooze/mud.

Density of the water was found to be 1028.

Berthing at Berth No. 4 was done with the assistance of 2 tugs of 1,200 h.p. and 2,200 h.p. All vessels drop the outboard anchor prior to coming alongside.

The jetty is well fendered, and as our vessel was 213 m. LOA, and the berth being 185 m. in length, quite a considerable overhang had to be made to allow vessel alongside. Mooring is assisted with the aid of a lineboat.

The depth of water was sounded after berthing and found to be 30.0 m., forward and aft.

Cargo operations were very fast. Shore labour drove the vessel's 6 cranes, and daily discharge was rated at 5,000 tonnes per day. The cargo is dropped into adjacent hold hoppers on the jetty and into awaiting trucks. Damage to the ship was minimal, but whatever was noted, was repaired by Cukurova's own welders prior to departure.

The grabs for the crane of approximately 4.0 cu.m. are also supplied by Cukurova, and these are electro-hydraulic type, the power source being derived from the ship's power supply of 440 V., to junction boxes at each hold. Care must be taken with the run of electric cables being subject to rupturing by falling scrap metal.

NOTE: The vessel must sail within 2 hours of the completion of the final draft survey, otherwise the ship will be charged with a further day's port dues.

Fuel is available by barge from either the Petkim Jetty or from Istanbul, but plenty of notice is to be given.

Fresh water is available at the anchorage, at $ 20.00 per ton. At the berth, it is available by truck at prices ranging from $ 3.00 – $ 10.00 per ton, depending upon the chandler.

Provisions are plentiful, especially local fruits, vegetables, etc., but imports are expensive.

In our case, we had to have hydraulic hoses made up for the cranes at 300 Bar pressure, and these were very expensive.

There are no medical facilities at Nemrut Bay, the nearest being in Aliaga, 20 minutes drive from the berth.

Nemrut Bay is strictly a steel work jetty/works. There is nothing else here, nor is there any connected telephone lines, but Agents are equipped with mobile telephones for communications. Other than that, there is always Aliaga Radio on VHF, which is quite good.

FINAL NOTE: There is no limitation as to how much liquor or tobacco the crew have. Customs Officers will seal the bond on arrival, and will not open the same until the vessel is about to sail, when they will ascertain that the declared contents have remained in tact.

AUTHORITY: Petkim Petrokimya Holding A.S., Genel Mudurlugu, Aliaga, Izmir, Turkey. *Tel:* (543) 63653 (Port Director's personal telephone). *Telex:* 51706, 51707, 51709. *Cables:* Petkim, Aliaga, Izmir, Turkey. *FAX:* (543) 61248. *Contact:* Mr. Semih Timocin, Port Director/Harbour Master.

SAMSUN: 41.21 N. 36.34 E. (See Plan)

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List (if any onboard).

Customs:

2 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.

Health:

Valid Derat Certificate.
Maritime Declaration of Health.
1 copy Crew List.

Immigration:

2 copies Crew List.

PILOTAGE: Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

VHF: Samsun Radio (TAF) on Channel 16.

TUGS: 4 tugs abvailable. 1×970 h.p., 1×450 h.p., 1×1,500 h.p. and 1×2,480 h.p.

Vessels over 4,000 g.r.t. are required to use 2 tugs.

BERTHING: Harbour protected by two breakwaters, entrance width 200 m., depth 11.9 m.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1-5	776	10.5	12 Cranes general, bulk, containers.
6-9	—	—	—
10	250	12.0	2 container cranes.
11-12	410	12.0	To be constructed.
13	–	–	Ferry terminal.
14-15	400	12.0	Industrial quay, 5 cranes available
16	180	6.5	Coastal.
17	400	6.0	Fishing boats.

BULK HANDLING FACILITIES: Coal and ore handled at the Main Quay. Rate for coal 200 t.p.h. by conveyor and iron ore 250 t.p.h. by conveyor. Grain silo with 34,000 tonnes capacity.

Also see "Developments".

CRANES: 17 quay cranes, capacity 3-10 tons. Mobile cranes 3, 10, 25 and 40 tons capacity.

DENSITY: 1013, but changes according to season.

FRESH WATER: Available from the quay.

FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

STEVEDORES: Working hours for general cargo: From 0800 hrs. to 2400 hrs. in 2 shifts.

For bulk cargo: 24 hours operations in 3 shifts.

REPAIRS: Minor repairs possible.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Usually by ship. Can be carried out by shore personnel is required by Master.

CERTIFICATES: Safety Construction, Safety Equipment, Load Line, Safety Radio, Hull Class, I.O.P.P. and International Tonnage Certificates are required. Garbage Pollution Prevention Certificate, if vessel has one.

CUSTOMS ALLOWANCES: 10 packets of cigarettes per man, per week and 1 bottle per man per week.

POLICE/AMBULANCE/FIRE: Available in the port.

AIRPORT: Distance 5 km.

IDENTIFICATION CARDS: All Passports (except Master's) are collected by Immigration in exchange for shore pass during vessel's stay in the Port.

DEVELOPMENTS: New bulk cargo quay under construction. Length 500 m., depth 12 m.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi, Genel Mudurlugu, Samsun, Turkey. *Tel:* (361) 11318. *Telex:* 82172 TCSL TR.

SINOP: 42.01 N. 35.08 E.

DOCUMENTS: See "Izmir."

PILOTAGE: Not available.

ANCHORAGES: Good anchorage in front of pier in 9 m. – 18 m.

RADIO/VHF: Sinop Radio. Call sign TAD2.

BERTHING: One pier, length 180 m. Max. draft 7.5 m.

STEVEDORES: *Working Hours:* 0730 – 1700 hrs.

MEDICAL: Facilities available.

DENSITY: 1025.

FRESH WATER: Available.

CONSULS: None.

REPAIRS: Possible.

REPATRIATION: Not possible.

AIRPORT: At Samsun, distance 190 km.

TIME: GMT plus 2 hours.

AUTHORITY: Sinop Liman Baskanligi, Sinop, Turkey. *Tel:* 90-36-61-2990. *Telex:* 82414. *Contact:* Mr. Hamdi Ersavas.

TEKIRDAG: 40.58 N. 27.31 E. (See Plan)

LOCATION: The area contained by the direct line connecting Kocaburun (Lat. 40° 50′ 42″ N., Long. 27° 27′ 30″ E.), and the point where Deince River meets the sea (Lat. 40° 59′ 57″ N., Long. 27° 39′ 5″ E.).

Port Borders:

Internal Port: The area contained by the direct line connecting the point where the Barbaros River meets the sea (Lat.40° 54′ 18″ N., Long. 27° 27′ 58″ E.), and the point where the Kayikoy River meets the sea (Lat. 40° 59′ 08″ N., Long. 27° 34′ 40″ E.).

Outer Port: The sea area between the internal port and the port borders.

PILOTAGE: Available throughout 24 hours.

ANCHORAGES: Vessels can anchor in the Inner and Outer ports.

MAX. SIZE: Draft 7.0 m – 9.0 m.

VHF: Tekirdag Radio (TAB) on Channel 16 throughout 24 hours.

TUGS: 1×400 h.p. tug and 1×220 h.p. and 1×180 h.p. service boats available.

BERTHING:

Quay No.	*Length* (m.)	*Depth* (m.)
1	104.5	5.0 – 7.2
2	97.0	7.0 – 7.2
3	75.5	6.8 – 7.0
4	69.0	5.5 – 6.8
5	343.0	2.0 – 9.5
6	325.0	4.0 – 9.4

CARGO HANDLING EQUIPMENT:

Equipment	*No.*	*Capacity* tons
Shore Cranes	2	3

STEVEDORES: *Working Hours:*

	First Shift	Second Shift	Third Shift
Start	0800	1630	2400
Break	1200 – 1300	2000 – 2100	0200 – 0300
End	1630	2400	0800

FRESH WATER: Available at all berths, rate 10 t.p.h.

FUEL: Not available at berth. Deliveries possible by road tanker or barge.

TELEPHONES: *Useful Numbers:* Ambulance 25355. Customs 12424.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,940.1 TL (16.5.91).

AUTHORITY: Tekirdag Port Management, Tekirdag Liman Isletmesi Mudurlugu, Tekirdag, Turkey. *Tel:* (31) 181469, 10800, 12255, 12025. *Telex:* 56186. *FAX:* (31) 12346.

TRABZON: 41.01 N. 39.46 E. (See Plan)

PORT LIMITS: The one-mile imaginary line drawn in the Northern direction between the Hacibesir Stream (Latitude 41° 00′ 15″ N., Longitude 39° 39′ 28″ E.) and the Hopsi Cage (Latitude 41° 00′ 45″ N., Longitude 39° 48′ 07″ E.).

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign flag vessels and available 24 hours. Arranged by Agent subject to vessel's notice of ETA in advance.

ANCHORAGE: In the Outer Harbour off the breakwater.

MAX. SIZE: Vessels up to 9.5 m. draft.

RADIO: Trabzon Radio. Call sign TAO.

VHF: Pilot on Channel 16.

TUGS: 1×2,500 h.p. and 1×800 h.p. Towage compulsory for vessels over 550 tons.

BERTHING:

Quay No.	*Name*	*Length* (m.)	*Depth* (m.)
1	The Large Quay	400	9
2	General Cargo	300	9
3	Container Quay	280	9
4	Ore Quay	290	11
5	Ro-Ro Quay	25	9.5
6	Sub-quay	30	9.5
7	Fisherman's Quay	200	3

BULK HANDLING FACILITIES: Grain handled at the Main Quay using 2 rail mounted loaders. One grain silo with capacity of 10,000 tonnes and 1 warehouse with capacity 10,000 tonnes.

CRANES:

Shore cranes:
3 × 3 tons
1 × 5 tons
2 × 10 tons
1 × 25 tons

Container crane:
1 × 35 tons (available 1990)

Mobile cranes:
1 × 50 tons
1 × 25 tons
8 × 10 tons
2 × 3 tons.

STEVEDORES: Working hours: First shift 0800 – 1200 and 1300 – 1630. Second shift 1630 – 2030 and 2130 – 0100.

TANKERS: *Shipmaster's Report:* August 1992.

Tanker Berths: The mooring buoys are located to the East of the City (See "Plan").

Products Handled: Berth No. 1 – Fuel oil. Berth No. 2 – Kerosene, gasoline and gas oil. If discharging to Shell, only 2 grades of clean products are handled.

Depth: Reported to be 31.0 m.

Mooring: Two anchors with 6/7 shackles on each and 6 mooring lines to buoys on each quarter, 100 m. off when in position.

Discharging: 1×8 in. stern discharge for kerosene.
Rate: 350/400 cu.m./hr.
Pressure: 4 kg./N.
Distance to Shore: 800 m.

Vessel: 20,000 d.w.t., LOA 161 m.

Pilot: Not available. A small fishing boat indicates position for dropping anchors.

Tugs: Not available.

Communications: Difficult. Trabzon Radio only replies to Turkish vessels.

Provisions: Available.

Fresh Water: Not available.

FRESH WATER: Obtainable from the quay, rate 20 t.p.h. – 30 t.p.h.

FUEL: Fuel oil obtainable in limited quantities.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofis – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS: There are no repair facilities.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

	Flag of Ship		*Cost (US$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

Cost (US$)/1000 grt

	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour capacity and shore tank of 100 tons capacity.

Contact: Tel: 031-11156. Telex: 82150 TRDZ. Fax: 031-21004.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 3,940.1 TL (16.5.91).

DEVELOPMENTS: One quay of 400 m. length near completion. Depth alongside 10 m.

AUTHORITY: Ports Management, Trabzon Liman Isletmesi Mudurlugu, Trabzon, Turkey. *Tel:* (90) (031) 11156, 11054. *Telex:* (90) (031) 83150.

TUTUNCIFILIK: 40.45 N. 29.47 E. (See Plan)

SHIPMASTER'S REPORT: July 1981.

LOCATION: TUPRAS berths are situated just South of the 'Petkim' chemical complex at Yarimca (See "Yarimca"), as before the railway seems to be the dividing line between TUPRAS and PETKIM.

PILOTAGE/APPROACHES: See "Yarimca".

TUGS: Three tugs generally used. 1 Government and 2 TUPRAS. All large and powerful but rarely use their full power.

As a rule tug's lines used for berthing and ship's lines departing.

BERTHING: For LPG carriers, 2 berths are used. Also refined product carriers use same berths. Crude is imported to a sea island for VLCC's and on the original old jetty for smaller tankers.

The original jetty for all tankers is at the Southern corner of the refinery at Kilier Bar. This is not now used for LPG.

A new berth constructed in 1979/80 is now open 0.5 miles North of the old jetty. At present only the North side of the new jetty is used (No. 2) but soon the Southern side will be in use for all larger vessels for all grades.

The new berth is of modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading off at 45° with 4 mooring/fender dolphins to seaward, connected by catwalks.

Draft alongside both berths is 18 m. with 3 m. clearance. Fenders and mooring arrangements are good.

Vessels generally berth head in, so can go either side alongside.

A small tug jetty is at the root of the main jetty.

See "Plans" for dimensions and general layout of all berths.

Mooring: Mooring boat used. 3, 2, 2, each end with line up very precise. Bow comes near the end of the jetty where it bends at 45° to a roadway.

CARGO HANDLING: *Discharge:* Valves shut against ship without warning, high back pressure – 7.5 to 8 bar., and line draining at completion non-existent. 8 in. rubber discharge hose 150 ASA.

No vapour return line as yet, and cannot see one on jetty, but one on old jetty suddenly appeared with TUPRAS wanting to return benzene to the ship.

5×10 in. Chicksans for refined products on North side.

5×12 in. Chicksans plus 2×16 in. Chicksans on South side.

Control hut at seaward end of roadway with telephone and a couple of operators.

Rate 250 – 300 t.p.h. when all shore valves open.

FRESH WATER: Available.

DENSITY: 1017.

SURVEYORS: Employed by Turkish Survey Bureau.

GENERAL:

Gangway: Can be a problem due to dolphins. We used accommodation ladder with half BOT gangway section between bottom platform and dolphin.

Customs/Immigration: Customs Officer on board requires room continuously.

Facilities: Agent very helpful. Personnel change through Istanbul Airport without too much difficulty.

Curfew in force from 2400 hrs. to 0500 hrs. for ship's crew, 0200 hrs. to 0500 hrs. for local population.

Overseas telephone calls delayed about 2 hours during weekdays and 30 minutes at weekends.

Lloyd's Surveyor from Istanbul – to be arranged 24 hours in advance. Medical facilities from TUPRAS or local doctor through Agent. Izmit about 30 minutes by taxi/car.

General stores, apart from some fresh provisions, are difficult to obtain.

SHIPMASTER'S REPORT: January 1986.

DOCUMENTS:

6 Crew Lists together with passports for all persons onboard.

2 Lists of Provisions, Stores and Bunkers.

2 Manifests of all cargo onboard.

2 Crew Effects Declarations.

2 Declaration of all Money and Cheques carried in ship's safe.

2 Maritime Declarations of Health, one form supplied on arrival, one form supplied at Canakkale or Buyukdere when passing inwards.

PILOTAGE: Compulsory Pilot inwards at Darica Burnu. VHF contact possible. Call Darica Pilots on VHF Channel 16 normally working Channel 14.

Pilot boards from small tug, ladder should be about 1 m. above the water. Tug equipped with VHF but personnel only Turkish-speaking.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilots depart either off Darica or off berth depending on other employments and vessel's size.

Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 497.

ANCHORAGE: The anchorage is situated to the Northwest of the berths, off Yarimca. Pilots consider it safe for any size of vessel.

MAX. SIZE: Max. draft 18 m. (59 ft. 00 in.) permitted at the new berth according to the Pilots.

TUGS: Up to 5 tugs used when berthing at Sea Island. 3 government and 2 TUPRAS. (TUPRAS tugs 2,500 h.p. each).

All tugs are large and powerful but rarely use their full power.

At the other berths three tugs generally used.

BERTHING: For LPG carriers 2 berths are used, also refined products carriers use the same berths.

Crude is imported to a Sea Island for VLCCs and to the original old jetty for the smaller tankers.

The original jetty is at the Southern corner of the refinery at Kilier Bar.

A new berth has been constructed some 0.5 mile North of the old jetty. The new berth is a modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading of at 45° with 4 mooring/fender dolphins to seaward, connected with a catwalk.

Vessels berth on both sides of this jetty, generally head in. Fender and mooring arrangement is good. This jetty is used for LPG and refined products.

The Sea Island consists of a platform with three dolphins on each side. There are no connections between the platform and the dolphins. Fendering and mooring arrangements acceptable for tankers of 150,000 d.w.t.

Vessels normally berth port side to at the Sea Island.

2 mooring boats are used for rope handling.

CARGO HANDLING: *Discharge at New Berth:*

Valves shut against ship without warning, high back pressure – 7.5 to 8 Bars. Line draining at completion non-existent.

8 in. rubber discharge hose, (150 ASA).

No vapour return line.

5×10 in. Chicksans for refined products on North side.

5×12 in. Chicksans and 2×16 in. Chicksans on the South side.

Control hut at seaward end of roadway with telephones and operators.

Rate 250-300 t.p.h. when all shore valves opened.

Discharge at Sea Island:

4×16 in. Chicksans for crude. 3 normally connected. Generally low back pressure, but at times, when topping up of shore tanks, discharging rates reduced considerably.

Loading Masters have Control Room at platform. Communication with them by VHF. Communications sometimes difficult due to language problems. One representative of TUPRAS stays onboard throughout discharge.

DENSITY: 1017.

FRESH WATER: Available at all berths.

FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

SURVEYORS: Employed by Turkish Survey Bureau, Katoni Persa or other local Turkish companies.

GENERAL:

Gangways: Can be a problem at the new berth, due to dolphins. At Sea Island, gangway from the platform.

Telephone: Overseas calls delayed about 2 hours during weekdays and about 30 minutes at weekends.

Lloyd's Surveyor: Comes from Istanbul. Has to be arranged 24 hours in advance.

General Stores: Apart from fresh provisions, difficult to obtain locally. Can be arranged from Istanbul but transportation costs are high.

Fuel: Available by barge only. It is more economical to anchor off Istanbul for fuel. All fuel supplied from Istanbul.

Airfreighted Stores: No difficulty with getting items onboard. If spare parts are to be taken onboard, items that cannot be carried will be put on a barge. Transportation costs are high.

Pollution: Strict anti-pollution laws in operation.

Facilities: Curfew has been in force earlier for ship's crew. In January 1986 no restrictions in force.

AUTHORITY: TUPRAS-Izmit Rafinerisi Bolge Mudurlugu, P.O.Box 43, Izmit, Turkey. *Tel:* 31660-31665, 20330-20333. *Telex:* 22285, 33152, 33153, 33154. *Cables:* Umipras, Izmit.

Izmit Liman Baskanligi, Yarimca, Turkey. *Tel:* 90-211-73754. *Telex:* 33292. *Contact:* Atilla Gorgunler.

YARIMCA: 40.45 N. 29.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1980 (Updated 1992).

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the factories of Petkim to the North and TUPRAS to the South (see "Tutuncifilik"). As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases, bulk fertilisers and chemicals are handled. The Products Pier which handles ammonia is in position Lat. 40° 45.4′ N., Long. 29° 45.1′ E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke, another important shipping complex.

PILOTAGE: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit Pilot Office which is the control centre works on Channels 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica, depending on other pilotage requirements and curfew. Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 467.

TUGS: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.

BERTHING: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipe-line roadway. There are dolphins connected by catwalk to main pier, plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring Arrangements: Hydraulic hook release system in use.

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side to) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.

DISCHARGE: There are lines for naphtha, benzene, butadiene vapour and liquid, and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets Chicksans, others use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. Shore personnel effect the connection. In total there are 13 lines for loading and unloading of various chemicals such as Naphtha, Benzene, Butadiene vapour and liquid, Ammonia vapour and liquid, Aromatic oil, Naphtenic oil, Heavy Extract Oil, Styrene, DDB, Propylene Tetramer, EDC, Propylene Liquid and Gas, VCM Liquid and gas.

Vapour return line can be used if required.

Samples taken before discharge.

Yarpet's surveyor speaks English. Hut on quay with telephone.

Line capacities are given to the ship's Master by the surveyor before discharge. The back pressure varies from 2.5 to 5 Bar.

Surveyors as normal, travel around Turkey following ships, so can be late in boarding if ship early, then Yarpet Representative notes temperatures and ullages.

GENERAL: Fresh water available from quay at 40 t.p.h. metered at U.S.$2.64 per tonne.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available locally by barge but costly.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyd's/Agent: Lloyd's Surveyor from Istanbul also covers all Turkey but travel is expensive.

AUTHORITY: Yarimca Petrokimya Sanayi Ve Ticaret A.S., P.O. Box 46-47, Kocaeli, Turkey. *Tel:* 9-21-281450 (20 lines). *Telex:* 22422 Ypet TR, 33113 Ptkm TR. *Cables:* Petkim Izmit. *FAX:* 9-21-281738, 9-21-281400.

ZONGULDAK: 41 28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGES: Good anchorage off the harbour in a depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern Breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available".

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour".

RADIO: Zonguldak Radio. Call sign TAR.

TUGS: 5 tugs available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m. Loading rate 350 – 450 t.p.h.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.

CRANES: Shore cranes up to 15 tons capacity and floating crane 60 tons capacity.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

Turks and Caicos Islands

GRAND TURK: 21.28 N. 71.08 W. **(See Plan)**

DOCUMENTS: *Customs:* Clearance from last port, Inward Report, Crew List and Declaration, Ship's Stores List, Manifest of all goods to be discharged at each Port.
Immigration: Passengers Manifest, Immigration control cards.
PILOTAGE: Compulsory. The Owner, Master, or Agent of a ship bound for any Port in the Turks and Caicos Islands must report via Harbour Master or Cable and Wireless on VHF Channel 16 about 4 hours in advance of the ETA of the ship.
The following information is required.

1. Name/Call Sign of Vessel.
2. Nationality.
3. Length, Draft, and Gross and Net Registered Tonnage.

Pilot Office on VHF Channel 16. Berth arranged by Harbour Master through Local agent making request 24 hours in advance for use of dock and facilities.
ANCHORAGE: Available.
MAX. SIZE: No restrictions.
HEALTH: Pratique, given by Customs Boarding Officer.
RADIO: RTC 1460 kHz AM band (Cable and Wireless VHF 16).
TUGS: Only available at the Port of Providenciales.
BERTHING: See "Plan".
CRANES: Arranged by Agent, if ship's own is out of order.
STEVEDORES: Arranged by Agent.
MEDICAL: No advance notice except in case of emergency, hospital facilities available on Grand Turk and Providenciales.
TANKERS: Refined petroleum products are imported through the Bahamas by Shell and Esso at all ports. There is no special bunkering port, but bunkering services are available.
DENSITY: 1025.
FRESH WATER: Available, ordered through Agent at approximately 0.03 cents (U.S.) per imperial gallon.
FUEL: Delivered by tank trucks at all berths, diesel as well as marine lubricants can be obtained through suppliers (Shell and Esso Agents).
CONSULS: None.
REPAIRS: Most deck and engine repairs can be carried out.
DRY DOCKS: Caicos Marina & Shipyard, Providenciales. Tel: (809) 946-4600. Telex: TWX 3158440 TRUMPRO. Max. lifting capacity 85 tons.
SURVEYORS: Registrar of Shipping, Natural Resources Branch, Iron Building, Front Street, Grand Turk. Tel: 2550.
GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, which ever to ship's advantage.
CERTIFICATES:
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Cargo Gear Certificate.
CUSTOMS ALLOWANCES: Tobacco. Each man 200 cigarettes, or 100 cigarillos (cigars with a maximum weight of 3 grammes) or 50 cigars or 12.5 grammes of smoking tobacco, and one reputed quart of normally potable spirits or not more than 2 litres of wine containing less than 42% of proof spirit.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: In Grand Turk the airport is about 1 mile from the port and is served by Pan Am 2 times a week (Friday and Sunday) and various charter operators. In South Caicos the airport is about 2 miles from the port and is served by Bahamas Air twice weekly and charter flight at anytime. In Providenciales the airport is about 7 miles from the port and is served by Pan Am 4 times a week (Monday, Wednesday, Thursday and Saturday), with connections from Grand Turk by T.C.N.A. and by various charter operators.
TIME: E.S.T. Daylight savings time starts the last Sunday in April when clocks are advanced 1 hour and ends last Sunday in October when clocks retarded 1 hour, returning to Eastern Standard Time.
POLICE/AMBULANCE/FIRE: Grand Turk Police 2299; Ambulance 2333; Fire 2233. Emergency No. 2570. Port Officer 2325. South Caicos Police 3299
Providenciales Police 4259, Ambulance 4201, Fire 4378.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters (Grand Turk) 2299, (South Caicos) 3299, Providenciales 4259.
TELEPHONES: No arrangements exist for placing telephones on board ships.
SERVICES: Divers available for underwater surveys and repairs.
BANKS: Barclays Bank, Tel: 2831. Bank of Nova Scotia, Tel: 2506/7.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday, Commonwealth Day, Queen's Birthday, Emancipation Day, Columbus Day, International Human Rights Day, Christmas Day, Boxing Day, Jags McCartney Memorial Day, National Youth Day.
CREW IDENTIFICATION CARDS: Not required.
SHIP SUPPLY SERVICE: Arranged through Agents.
GARBAGE DISPOSAL: Garbage from ships is usually taken off under agent's supervision and disposed of at dump site.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar.
DELAYS: Normal delays if berth is in use or docks under repair.
DEVELOPMENTS: A proposed area adjacent to South Dock, Grand Turk, for a new dock is under study. A new dock has just been completed on South Caicos and ports facilities are being installed.
AUTHORITY: Department of Customs, Custom's Office, Grand Turk, Turks and Caicos Islands. *Tel:* 2801-2808. *Telex:* TQ 8227.

Tuvalu

FUNAFUTI: 08.31 S. 179.13 W. (See Plan)

DOCUMENTS:
Customs: Boarding of ships after Radio Pratique granted.
Clearance from the Last Port.
Crew List.
List of Passengers.
Stores' Lists.
Ship's Inward Report.
List of Unmanifested Cargo.
Crews' Stores.
Manifest and Bill of Lading with invoice.
Health: Radio Pratique to be granted within 24 hours before arrival.
Vaccinations against Cholera.
Immigration:
Crew List.
Passenger List.
Next Port of Call.
Final Destination.
Passports.

PILOTAGE: Local Master available on 1 month's prior notice.
Chart: See Chart BA. 2983. Fongafale Anchorage – main anchorage.

RESTRICTIONS: None.

MAX. SIZE: See "Te Puapua Passage". Max. depth 15 m. 250 ft. wide at low water.

HEALTH: Radio Pratique available.

RADIO: Funafuti Radio (T2U) on 6215.5 kHz.

VHF: Funafuti Radio equipped with 80 channel VHF radio. Vessels to call on Channel 16.
VHF in operation when vessels approaching, arriving, manoeuvring and sailing.

TUGS: None.

BERTHS: Concrete on pile wharf. 2 berths, lengths are 50 m. and 40 m. respectively. LW depths of 8 m. and 5.5 m.

CRANE: None.

STEVEDORES: Available on 24 hours' notice, discharge rate high.

MEDICAL: Hospital radio advice available.

TANKERS: Must provide own discharge lines. No residue discharge facilities. Light diesel only available. No tanker berth.

DENSITY: Sea Water.

FRESH WATER: Max. 60,000 gallons in wet season, little or none in dry season, by pipe-line on wharf to vessel.

FUEL: Light diesel only. Max. 5,000 gallons from 500 gallon tanks (hand pump).

FIRE PRECAUTIONS: No special precautions other than normal for tankers.

CONSULS: None.

REPAIRS: None.

SURVEYORS: None.

WATCHMEN: Not required.

HATCHES: By stevedores or crew.

CUSTOMS ALLOWANCES: Passengers only, allowed 200 cigarettes and 1 bottle of spirit.

REPATRIATION: Air service to Fiji and Tarawa.

AIRPORT: 1.25 miles from jetty, fortnightly service. Special charters by arrangement.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year (1st January); Public Holiday (3rd January); Good Friday; Easter Friday; Easter Monday; Commonwealth Day (12th March); Gospel Day (4th May); Queen's Birthday (18th June); Public Holiday (13th June); Bank Holiday (1st August); National Children's Day (6th August); Tuvalu Day (1st and 2nd October); Public Holiday (3rd October); Prince of Wales Birthday (12th November); Christmas Day (25th December); Boxing Day (26th December); Public Holiday (27th December).

POLICE/AMBULANCE/FIRE: Police 728 or 726. Ambulance 751 or 749. Fire – send messenger for fire engine.

TELEPHONE: Ship can use marine office telephone ashore.

SERVICES: None.

SHORE LEAVE: Allowed after clearance.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: 44 gallon drums available for garbage not affecting environment.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: Australian Dollar (A$). Currency restrictions equivalent of A$ 1,000.

REGULATIONS: No sullage, ballast, tank residue, etc., to be discharged in lagoon.

DELAYS: Unpredictable, depending on whether other ships in port.

AUTHORITY: Ministry of Works and Communications, Tuvalu Government, Vaiaku, Funafuti, Tuvalu. *Tel:* 725. *Telex:* TV 4800. *Cables:* Wocom, Funafuti. *FAX:* 688800. *Contact:* Soo Patiale, Transport Systems Manager.

NOTES

Please also advise Shipping Guides Ltd.

United Arab Emirates

GENERAL:

EMIRATES RADIO: The Emirates Telecommunications Corporation operate a Coastal Radio Telephone Service (Etisalat) to provide connections via a manual operator between ships at sea and the public telephone network. The service is available continuously 24 hours a day.

There are 8 shore stations set up around the coast of the U.A.E. These transmit and receive on the VHF channels shown in the table below. The control and operation of all shore stations is at a central point in Dubai.

Channel	Frequencies Ship Transmitter (MHz)	Frequencies Ship Receiver (MHz)	Use
16	156.800	156.800	Simplex for distress and safety for all areas
1	156.050	160.650	Duplex working channel for Ras al Khaimah area
2	156.100	160.700	Duplex working, first channel for Jebel Ali area
3	156.150	160.750	Duplex working, first channel for Khor Fakkan area
4	156.200	160.800	Duplex working, first channel for Abu Dhabi area
5	156.250	160.850	Duplex working, first channel for Umm al Quwain area
7	156.350	160.950	Duplex working, second channel for Jebel Ali and Khor Fakkan areas
28	157.400	162.000	Duplex calling channel for all areas
60	156.025	160.625	Duplex working, first channel for Jebel Dhanna area
62	156.125	160.725	Duplex working, first channel for Fujairah and Zirku areas
63	156.175	160.775	Duplex working, third channel for Jebel Ali area
66	156.325	160.925	Duplex working, second channel for Zirku area
83	157.175	161.775	Duplex working, third channel for Abu Dhabi area and second channel for Fujairah area
84	157.225	161.825	Duplex working, second channel for Umm al Quwain area
85	157.275	161.875	Duplex working, fourth channel for Jebel Ali area
86	157.325	161.925	Duplex working, second channel for Jebel Dhanna area
87	157.375	161.975	Duplex working, second channel for Ras al Khaimah area

For all areas a common calling frequency on Channel 28 is used both for ship-to-shore calls and for shore-to-ship. After contact is established the Etisalat Coast Station Operator will assign a working channel taking into account the ship's position and existing calls in progress.

To establish a ship-to-shore call the ship should switch the equipment to Channel 28, ensure the channel is not already in use by listening and then call "Emirates Radio", identify itself and give the coastal area in which it is sailing e.g. "off Jebel Dhanna". The Coast Station Operator will then assign a working channel, e.g. in the case of Jebel Dhanna area working will be established normally on Channel 86. After recontacting on the working channel the called number and calling ship details will be established and the call connected. If there is traffic congestion the Operator may assign a free working channel from another area.

For calls to the ship, the Operator will set up the called ship's code number which will be sent on Channel 28. This will operate an alarm on the equipment. In the case of there being no selective calling equipment installed or contact cannot be established by this means the Operator will also call the ship by voice using its call sign and name on Channel 28. Following establishment of contact the ship will give the area it is in and the operator will then assign a working channel. On re-establishment on the working channel the call will be connected.

It follows therefore that all ships must keep one of their receivers switched to Channel 28 when idle in order to be able to receive a shore-based call.

Traffic lists, that is calls on hand for ships in the area, will be broadcast at 0603, 0803, 1203, 1403, 1603 and 1803 hrs. GMT on Channel 28. This is in addition to calls made on first receipt of the call booking. Ships should avoid using Channel 28 to call during the broadcast of traffic lists.

Distress and Safety: Simplex Channel 16 (156.8 MHz) is received continuously by the Coast Station and is monitored by the Border Guard in Abu Dhabi who will handle all matters relating to distress, urgency and Safety of Life at Sea (SOLAS).

Ship-to-Ship Traffic: Ship-to-ship calling and working frequencies are different from those used by the Coast Station. Such calls are not normally the concern of the Coast Station and should be conducted in accordance with international and local regulations.

Exceptionally however if a ship desires to call another ship out of direct range the Coast Station facilities may be used in which case the procedure and use of calling channels is the same as for calling a shore number.

Shore-Based Subscribers: Subscribers wishing to contact a ship should dial number 158, from any location within the Emirates in order to contact the Coast Station Operator.

They should give the Operator their town location and telephone number, the name of the ship, if known its call sign and code number and the name of the person to whom they wish to speak. The Operator will call the shore-based party back after the call with the ship is established.

Categories of Calls Available: Paid calls only are accepted. Collect calls are not admitted from or to ships.

The following categories are accepted:

- Calls from ships within range to parties anywhere within the United Arab Emirates.
- Calls from any party within the U.A.E. to any ship within range.
- Calls from ships within range to parties in any country in the international telephone network.
- Calls from any party in the international telephone network to any ship within range. These will only be accepted via the operator in the network of origin.
- Calls from any ship within range of the Coast Station to any other ship within range.

All calls to ships are treated as personal calls. Calls from ships are station calls at the normal charge. Personal calls are available subject to an additional personal call charge.

U.A.E. ships or boats using this service must ensure that:

1. They have a valid licence which is issued by the Ministry of Communications who will also issue a call sign and, where applicable, a code number.
2. The vessel is equipped with a Maritime Mobile Radio Telephone which conforms with international requirements and any supplementary regulations issued by the Ministry of Communications.
3. That proper operating procedures are followed.

Technical Characteristics for Maritime Mobile Radio Telephone (VHF): The technical characteristics should be in accordance with CCIR Recommendation 489-1 except for transmitter power which must not exceed 10 watts (U.A.E. Regulation).

The recommendations as modified in the U.A.E. are summarised below:

General Characteristics:

1. The frequency band is 156 – 174 MHz.
2. The Channel spacing is at 25 kHz intervals.
3. The class of emission is F3 (frequency modulation telephony).
4. The bandwidth is 16 kHz.
5. Frequency modulation has a pre-emphasis of 6 db/octave.
6. Apart from specially designated Simplex Channel, for SOLAS, only ships with full duplex facilities can work with the public telecommunications system. Ships with only semi-duplex cannot work with the public telecommunications system.
7. It must be possible to make changes between Channels within 5 seconds.
8. The emission is vertically polarised.
9. The selective calling system is as per CCIR Recommendation 257-2.

The tone frequencies for this system are as follows:

Figure:	1	2	3	4	5	6	7
Audio Frequency:	1124	1197	1275	1358	1446	1540	1640
Figure:	8	9	0		Figure Repetition		
Audio Frequency:	1747	1860	1981		2110		

Transmitter:

1. The transmitter carrier power shall not exceed 10W and shall incorporate facilities to readily reduce this to 1W or less for use at short ranges. (Note: The normal 25W power permissible internationally is reduced to 10W in the U.A.E.).
2. The frequency deviation should not exceed ±5 kHz.
3. Frequency tolerance should not exceed 10 parts per million.
4. Spurious emissions should not exceed 25 μW or 40 db below normal power whichever is the lower.
5. The upper limit of the audio band should not exceed 3 kHz.
6. Cabinet radiated power should not exceed 25 microwatts.

Receiver:

1. Sensitivity should be equal or less than 2 microvolts e.m.f. for a given reference signal to noise ratio at the output.
2. Adjacent Channel selectivity should be at least 70 db.
3. Spurious response rejection should be at least 70 db.
4. Radio frequency intermodulation rejection ratio should be at least 65 db.
5. The power of any conducted spurious emission measured at the antenna terminal should not exceed 2 nanowatts.
6. The effective radiated power of any cabinet radiated spurious emission on any frequency up to 70 MHz should not exceed 10 nanowatts. Above 70 MHz, the spurious emissions should not exceed 10 nanowatts by more than 6 db/octave in frequency up to 1000 MHz.

General Guide to Operating Procedure:

Ships wishing to make a call via the Emirates Coast Station should use the following procedure:

1. Switch their receiver to Channel 28.
2. Listen to establish there is no traffic on the channel.
3. Transmit the following call: Emirates Radio this is . . . (call sign, ships name or other identification). Location . . . (nearest Emirates main coastal town).

In the case of difficult conditions this procedure can be modified as follows: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

If the Coast Station does not reply to the first call the call may be repeated at 3 minute intervals. However, before renewing the call, the calling station must first ascertain that further calling is unlikely to cause interference to other communications in progress and that the station called is not in communication with another station.

For replying to a call from the Coast Station a similar procedure is followed; the following is transmitted on Channel 28: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

After contact has been established on Channel 28, the Coast Station will assign a working channel. Coast and ship stations then change to the working Channel and proceed with the call.

Example: A Ship the 'Al Said' located off Jebel Dhanna wishes to make a telephone call. This is the procedure:

1. The 'Al Said' listens on Channel 28 to ensure there is no communication it may interfere with.
2. Transmits the following call on Channel 28: Emirates Radio, this is . . . (call sign) . . . 'Al Said' off Jebel Dhanna.
3. The Coast Station will reply: (Call sign) . . . 'Al Said', This is Emirates Radio, Channel 86.
4. 'Al Said' now switches to Channel 86 and calls: Emirates Radio, this is 'Al Said', how are you receiving me?
5. The Coast Station replies: 'Al Said', this is Emirates Radio, receiving you well, go ahead with your traffic.
6. The ship then gives details of the telephone call required.

Inmarsat Service:

Scope of Service: This service provides for the exchange of telephone/telex calls between suitably equipped ships in the U.A.E. coastal waters or in international waters, and any subscriber connected to Etisalat's telephone network.

The declared purpose of the INMARSAT System is to establish and operate a worldwide satellite communications system to provide improved maritime communications that will lead to greater efficiencies in the management and operation of ships at sea as well as contribute to improvements in distress and safety of life at sea.

Inmarsat Network – Global Coverage: The Inmarsat network consists of satellite circuits and their associated control systems providing national telecommunication carriers of member countries access to ships at sea via the maritime coast stations owned and operated by those countries who choose to provide such facility. Global coverage of accessing ships in each ocean area.

The implications of this network are that such access to ships having suitably equipped terminals, and located anywhere in the world can be had via extremely reliable and high quality circuits at reasonable costs.

In the operation of the service, Etisalat has the freedom to route its maritime telecommunications traffic via any of several coast earth stations having coverage to that particular ocean area. Etisalat's routing arrangements provide service to Inmarsat satellite coverage areas in Atlantic, Indian and Pacific Ocean regions.

Facilities Offered: Telephone: In the direction from shore-to-ship, IDD service and Operator Assisted call facilities are available.

For IDD Calls the telephone country code to dial are:

Ocean Region	*Code*
Atlantic East	871
Atlantic West	874
Indian	873
Pacific	872

Operator Assisted Calls have to be booked with the Etisalat International Telephone Operator. Calls can be either station-to-station or person-to-person, subject to a personal call surcharge in the latter case. When booking a call, callers in the U.A.E. should give the operator the ship telephone number and the ocean region where the ship is located.

In the direction of ship-to-shore, calls will be received on an automatic basis, but if necessary such calls will also be connected via the operator in the coast earth station country.

Telex: U.A.E. subscribers have the facility to dial telex calls in the shore-to-ship direction, and to receive calls from ships on a fully automatic basis. However, if necessary the Etisalat Operator or the operator in the coast earth station country will be able to establish telex calls.

Automatic telex calls can be made by keying the destination code and the ship telex number.

Area	*Destination Code*
Atlantic Ocean	0581
Indian Ocean	0583
Pacific Ocean	0582

Collection Charges: Telephone calls from shore-to-ship via Etisalat are charged on the basis of 3 minute minimum plus each additional minute. For person-to-person calls a surcharge equivalent to a 1 minutes charge will apply. The charges applicable are:

First 3 minutes via operator	Dh.150
Each additional minute	Dh. 50
Personal surcharge	Dh. 18
Per minute telex call from shore-to-ship via Etisalat is	Dh. 30

Telex calls are charged on the basis of 1+1 charging, i.e. the minimum charge is for 1 minute with the additional time charged per minute, with fractions of a minute charged as a full minute.

Accounting Services for Inmarsat/Radio Maritime Communications: Etisalat also provides accounting service to ocean going and mobile vessels registered by the Federal Ministry of Communications, U.A.E., in accordance with the international telecommunications rules (CCITT) and International Maritime Laws. Under the terms of this service, Etisalat will provide such accounting and settlement facilities for the ships thus registered in U.A.E. for all their radio communication traffic via Inmarsat and other communication channels anywhere in the world.

Charges payable to Etisalat by the mobile station operator are:

(i) Deposit: A refundable security deposit of Dh 5,000/– is payable at the time of application for service. The deposit will be returned at the time of termination of the service, subject to the satisfactory settlement of all outstanding matters, including the payment of all charges and dues payable to the Corporation.

(ii) Service Fee: An annual service fee of Dh 2,000/– is payable in advance for calculation and verification of charges, allocation of charges to interested parties, adjustment and payment of accounts received from Administrations and other accounting authorities and related incidental correspondence. This charge will accrue day to day from the date of commencement of service.

Etisalat branch offices in Abu Dhabi and Dubai will provide on request details of terms and conditions governing this service to interested mobile station operators. Applications for such service should also be made to the appropriate Etisalat branch office.

Other Marine Services: If ships are outside U.A.E. coastal waters, calls may be made via marine communication facilities available in other countries.

These are: Ship/shore telephone/telex/telegram services via radio (VHF, MF or HF).

Charges for ship/shore services by radio consist of the appropriate international rate to the country in which the coast station is situated plus the coast station and ship station charges.

OPERATOR: The Emirates Telecommunications Corporation Ltd., P.O.Box 3838, Abu Dhabi, U.A.E. *Tel:* 283333. *Telex:* 22135 Etcho Em. *FAX:* 725456, 727842. *Contact:* Manager Operations.

ABU AL BUKHOOSH: 25.26 N. 53.08 E. (See Plan)

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) Lat. 25° 31′ N., Long. 53° 05′ E.
(b) Lat. 25° 29′ N., Long. 53° 12′ E.
(c) Lat. 25° 26′ N., Long. 53° 12′ E.
(d) Lat. 25° 26′ N., Long. 53° 05′ E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early Departure Procedure: The Master must, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the Early Departure Procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing.

In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P.

Mail: Official ship's mail and the crew's personal mail may be handed to an Abu Dhabi agent by Total ABK.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified Deck Officer must be on watch at all times while the vessel is alongside the storage tanker.

RESTRICTIONS: See "Readiness".

MAX. SIZE: Max. 270,000 d.w.t. Max. draft 22.5 m. Depth of water 27 m.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio or Inmarsat, which operates on a 24 hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio or Inmarsat.

Communications within 60 Miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 15. This frequency is monitored continuously.

Once contact has been made on Channel 15, further conversation should be conducted on either Channel 14 (156.7 MHz), Channel 12 (156.60 MHz) or Channel 15 or 17.

Communications after Total ABK Mooring Master has Boarded: A Total ABK Mooring Master will board incoming tankers in the Anchorage Area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Usual advice of tankers arrival:

Quote

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio or Inmarsat stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop 50 miles before arrival please contact terminal by VHF Channel 15 to receive berthing instructions stop Total ABK.

Unquote

Mooring Instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

ANCHORAGES: An area immediately S.W. of Terminal limits is designated as the Anchorage Area, centred on position: Lat. 25° 27′ 54″ N., Long. 53° 05′ E. This co-ordinate represents the centre of a circle with a radius of 0.5 miles which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

Check with Harbour Master before anchoring as pipe-laying operations may be in progress.

TUGS: Two tugs, each with 80 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be received provided the Master shall have received the Mooring Master on board.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

The port is also closed from 1600 hrs. (L.T.) to sunrise from March to October and from 1500 hrs. (L.T.) to sunrise from November to February.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "World Trader" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for Mooring: Vessels are requested to have, on their starboard side, a pilot ladder and/or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's tug. Vessel's platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform.

Hoses: The hoses are hoisted by flow boom system, connection (16 in.) by storage tanker crew.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be flown by helicopter to Abu Dhabi.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of Communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency Shut Down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 15.

Loading Rates: Maximum loading rate will be 64,000 bbl./hr.

Gases: ABK crude oil contains H_2S (hydrogen sulphide). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve Closure Against High-Speed Loading: No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry 40% of their deadweight in ballast and/or cargo for safe handling, having due regard to existing weather and sea conditions. Total deballasting of tanker prior to loading is not acceptable. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection During Loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are NOT available at the Terminal.

SHORE LEAVE: Not possible.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

CURRENCY: U.A.E. Dirhams (Drhs). = Drhs 3.67 (15.4.91).

GENERAL:

Radio Equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the storage tanker except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring shall be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

Agency: Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

SHIPMASTER'S REPORT: 1977: The following information may be of value to other Masters:

- *(a)* The holding ground in the anchorage is very bad, this vessel dragged her anchor (10 shackles out) in a Force 5 from the N.W.
- *(b)* Only documents supplied on departure were Bills of Lading, no port clearance documents supplied.
- *(c)* No Customs or Immigration Officials at terminal therefore no documents required.

SHIPMASTER'S REPORT: 1978: The storage tanker is 320 m. long. Centre of the manifold to bow is 140 m. We berthed with our bows level which meant our stern overhung the other vessel and we were not able to use our first ropes leading from the after end of the poop.

Forward: (SV=Storage Vessel). 2 headlines to SV. 1 spring to SV. 1 rope from SV with end to be turned up on own vessel's bits forecastle head. 2 more headlines to SV and 1 spring from SV.

Aft: 2 sternlines to SV. 1 backspring to SV. 1 backspring from SV, eye on bitts. 2 more stern lines to SV.

SHIPMASTER'S REPORT: June 1992.

Vessel: 96,000 tonnes d.w.t. (OBO). LOA 243 m. Beam 38.0 m.

Upon arrival, the vessel was asked to anchor in position Lat. 25° 23′ N., Long. 53° 08′ E.

Storage tanker "World Trader" has 5 Yokohama fenders on her starboard side. Pilot boards from an offshore supply vessel, while vessel is at anchor. During berthing, 2 offshore supply vessels are fast, one forward and one aft. Berthing depends upon weather conditions, which are assessed by the Pilot. Understood from Pilot, that if wind speed is in excess of 25 knots, berthing is not carried out.

Storage vessel's distance from flow-boom to stern is about 128 m. Our vessel's stern was almost in line with the storage tanker's stern. Own vessel moored with 4 headlines and 1 back spring forward and 3 sternlines and 1 back spring aft, from own vessel. Additionally, 1 breast line and 1 back spring (forward and aft) is passed by the storage tanker to own vessel.

It is very important to plan loading/deballasting in such a way, so as to maintain at least 40% of deadweight on board at all times.

Cargo surveyors (SGS, Caleb Brett, etc.) require special permits to come on board the vessel, as per local oilfield regulations. Hence sufficient notice must be given, if surveyor is required to attend to the vessel.

No documents are required for Inward Clearance of the vessel, as there are no Customs or Immigration Authorities. At the time of departure, only Bill of Lading copy and other normal cargo documents are handed over to the Master by the outward Pilot.

No Port Clearance is issued by the Terminal.

AUTHORITY: Total – Abu Al Bukhoosh, P.O.Box 4058, Abu Dhabi, U.A.E. *Tel:* 33.55.66. *Telex:* 22347 Totabk Em. *FAX:* 322948. *Cables:* Totabk. *Contact:* Captain G. Le Dez, Head of Terminal and Marine.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh Em"). Fax: 731328. Tel: 730500 (10 lines). After office hours Tel: 730381, 794490. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz). Call sign "Confidence, Abu Dhabi".

AHMED BIN RASHID, Umm Al Qiwain: 25.35 N. 55.35 E. **(See Plan)**

LOCATION: Ahmed Bin Rashid Port is located on the West Coast of the United Arab Emirates some 30 miles North East of Dubai, in the Emirate of Umm Al Qiwain.
DOCUMENTS:
Crew Declaration (2 copies).
Cargo Declaration (Manifest).
Clearance from last Port.
Dangerous Cargo List.
APPROACHES: The entrance channel has a minimum depth of 10 m. and has a width of 100 m. which connects with a swinging basin of 500 m., the whole channel being marked by standard buoys and beacons in accordance with International Regulations.
PILOTAGE: Not available at present.
ANCHORAGES: Anchorages can be obtained off the harbour in depths ranging from 11 m. to 13 m.
RESTRICTIONS: Entry restricted at night time.
MAX. SIZE: Length 210 m., draft 9.8 m.
HEALTH: Usual International Health Regulations to be observed. Any vessel which is suspect should inform Port Authority.
RADIO: All communications on VHF Channels 16 and 69.
BERTHING: *Deep Water Berth:*
Wharf No. 1. 130 m. long, dredged depth 5.5 m.
Wharf No. 2. 115 m. long, dredged depth 7.5 m.
Wharf No. 3. 200 m. long, dredged depth 9.5 m.
Wharf No. 4. 400 m. long, dredged depth 10.0 m.

Bollards are located at 22 m. intervals and fitted with rubber fendering.
Town Wharf: 800 m. long, max. draft 4.0 m. Berth for coasters and small vessels up to 60 m. LOA.
CRANES: Not available. Shore cranes can be hired locally.
STEVEDORES: Services provided wholly by Port Authority. Advice of labour requirements must be received in advance.
MEDICAL: Can be obtained at short notice. Hospital facilities available in Umm Al Qiwain.
FRESH WATER: Limited supplies available at deep water berths, can be provided by road tanker or barges (to be arranged by Agent).
FUEL: Various grades of gas oil and diesel oil can be supplied by barges or road vehicles (to be arranged by Agent).
REPAIRS: All types of deck and engineering repairs are allowed (to be arranged by Agent).
SURVEYORS: Inspector available locally (to be arranged by Agent).
GANGWAY/DECK WATCHMEN: Under Port Regulations there shall always be on board sufficient men to move or take care of vessel.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CERTIFICATES: Safety Construction, Load Line, Cargo Gear, Safety Radio and Safety Equipment.
CARGO GEAR: Load/Discharge effected by ship's gear, shore cranes can be arranged locally.
REPATRIATION: Arrangements can be made.
AIRPORT: Dubai, Sharjah and Ras Al Khaimah Airports, all within 100 km., handling regular scheduled flights.
TIME: Local time is GMT plus 4 hours.
HOLIDAYS: 1st January (New Year's Day) and 2nd December (National Day). Other holidays dependant upon Lunar Calendar (i.e. Idd Ul Adha, Idd Ul Haj).
POLICE/AMBULANCE/FIRE: Call 999 and ask for service required.
EMERGENCY CO-ORDINATION CENTRE: U.A.E. Coast Guards, Tel: 666435.
BANKS: National Bank of Umm Al Qiwain, Tel: 665225/665441.
National Bank of Dubai, Tel: 666151/666154.
STORING: See "Prelims".
1. Yes.
2. Yes, if it does not hinder cargo operations.
3. Yes.
4. Yes.
5. —
6. Yes.

SHORE LEAVE: Possible.
IDENTIFICATION CARDS: Shore passes issued (1 Passport size photo required).
GARBAGE DISPOSAL: Drums provided alongside by Port Authority.
WASTE OIL DISPOSAL: Can be arranged through local agents.
SEAMAN'S CLUBS: None.
CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.67 (Fixed).
AUTHORITY: Ahmed Bin Rashid Port Authority, P.O.Box 279, Umm A Qiwain, U.A.E. *Tel:* 06-665882. *Telex:* 69717 ABRPA EM. *FAX:* 06-651552, 665444. *Contact:* M.K.Moosajee, Port Manager.

AGENT: See "Sharjah",

AJMAN, Ajman: 25.25 N. 55.28 E.

PILOTAGE: Pilot boards 3 miles N.W. of breakwater. 48 hours Notice of Arrival required.
RESTRICTIONS: Dredging is taking place between the breakwaters. Work will commence at the S.E. corner of the Eastern Breakwater and proceed to the outer end Roundheads. The dredger will then move to the Western side. The 100 m. cut will then be completed to a depth of 7.2 m. below Chart Datum.

The following restrictions are imposed during operations:
(a) The port will be closed to all navigation during the hours of darkness – sunset to 30 minutes before sunrise.
(b) Transit priority will be given to vessels sailing outward from the port up to 0630 hrs. local time.
(c) Between 0630 hrs. and 0730 hrs. local time, priority will be given to incoming vessels.
(d) At all other times during daylight hours, vessels may arrive or sail as required but all must exercise extreme caution while passing the dredger.

The dredger will carry lights and shapes as prescribed for vessels of this class.
MAX. SIZE: Max. draft available 5 m. Approach Channel width 100 m.
RADIO/VHF: Call Harbour Control on VHF Channel 16, 2 hours prior to arrival.
BERTHING: Total quay space 5,000 m.
4 transit sheds of 60 m. × 120 m. available alongside.
Before sailing, all vessels must obtain a Port Clearance Certificate issued by the Department of Port and Customs.
REPAIRS: A "gas-free" and "hot-work" certificate is required from vessels undergoing repairs to oil-tanks within port limits.
A surcharge may be imposed on vessels undergoing repairs or modifications where welding equipment, compressors, etc., are operated from the wharf. Permission to commence this work must be obtained beforehand from the Port Authority.
GENERAL: *Charts:* BA 2887, 3711. USHO 62390.
AUTHORITY: Department of Port and Customs. *Tel:* 423081, 446445. *Telex:* 69552.

AGENT: See "Sharjah".

ARZANAH ISLAND: 24.47 N. 52.33 E. SBM: 24.46 N. 52.31 E. **(See Plan)**

PORT LIMITS: *Port Area:* Contained within the following co-ordinates:

"A"	Lat. 24° 50′ 12″ N.,	Long. 52° 29′ 24″ E.
"B"	Lat. 24° 50′ 12″ N.,	Long. 52° 37′ 12″ E.
"C"	Lat. 24° 43′ 48″ N.,	Long. 52° 37′ 12″ E.
"D"	Lat. 24° 36′ 48″ N.,	Long. 52° 34′ 36″ E.
"E"	Lat. 24° 37′ 00″ N.,	Long. 52° 29′ 24″ E.

LOCATION:
Port Area and Terminal: Arzanah Island is located at Lat. 24° 47′ N., Long. 52° 33′ E. and is the base for export of crude oil. The Port of Arzanah is the area defined above.

A tanker terminal and another berth on Arzanah Island for vessels destined to other than the tanker terminal, are located within the port area.
PILOTAGE: Conduct and movement of vessels within the port area are controlled by the Harbour Master. A Company designated Mooring Master is required for the berthing and unberthing of vessels at the Storage Tanker.
Mooring Master: Pilotage is compulsory within the "Port Area" and no vessel may enter or depart the port area, berth or unberth at the Storage Tanker or conduct any other manoeuvres of the vessel without prior notification to the Harbour Master and without the assistance of a Company designated Mooring Master unless otherwise ordered by the Harbour Master. The Company designated Mooring Master for vessels bound for the Storage Tanker will board the vessel at Khor Fakkan (Lat. 25° 22′ N., Long. 56° 22′ E.) or Jebel Dhanna Pilot Station as directed by Lamnalco Pilots Khor Fakkan. The Company designated Mooring Master for vessels bound for the Shore Berth will board the vessel at Khor Fakkan or such other location approved by the Harbour Master upon request of the vessel made in the first notification. (See "Radio").

The Mooring Master's function will be to advise the Master of the vessel for the above stated purposes. The Master of the vessel always remains responsible on behalf of the vessel's owner for the safety and proper navigation of the vessel. The vessel must remain at Khor Fakkan or such other location approved by the Harbour Master until the Mooring Master is aboard. Mooring Master stays onboard and leaves at Khor Fakkan outward bound.

ANCHORAGES: Anchoring of vessels is prohibited within the port area and terminal area. An area 3.5 miles West of the Storage Tanker in the vicinity of 24° 46′ N., 52° 27′ E. is designated as the anchorage area.
RESTRICTIONS: See "Berthing".
MAX. SIZE: *S.B.M.:* Max. d.w.t. 280,000 (export tanker). Max. draft 43 ft. Depth of water at SBM 107 ft. Least depth in approaches 48 ft.
Sailing Draft: The draft of loaded vessels leaving the Storage Tanker is controlled by the water depth between Dalma Light Float and the No. 1 Buoy in the outer channel. Minimum under keel clearances recommended by the Mooring Master are as follows:

D.W.T.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Master prior to starting to load.
RADIO: The Company cable address is "Amerhess – Abu Dhabi" and telex number is 949 – 22275. The Company also maintains radio watch on International Marine VHF Channels 16, 61 and 67.
Notice of Arrival:

A. Vessels bound for the *STORAGE TANKER* must advise the Company as follows:

72 HOURS: Not less than 72 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and cable to "Lamnalco Khor Fakkan" or telex to "Lamnalco" (telex number 89034 Pilotkf) providing the following information:
(a) Estimated time of arrival at Khor Fakkan.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Quantity of oil to be loaded.
(d) Distance from the bow to the cargo manifolds.
(e) Size, number and type of cargo connections.

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and to Lamnalco reconfirming or giving any changes in the 72 hour notice.

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3 kHz.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

B. Vessels bound for the *SHORE BERTH* must advise the Company as follows:

48 HOURS: Not less than 48 hours prior to arrival at Khor Fakkan or such other location at which permission is requested of the Harbour Master for the Mooring Master to be on board, vessels will send a cable or telex to the Company and a cable to "Lamnalco Khor Fakkan" or telex to Lamnalco (telex number 89034 Pilotkf), providing the following information:
(a) Estimated time of arrival at Khor Fakkan or such other location where it is requested the Mooring Master board.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Cargo to be loaded or unloaded.
(d) Request for permission for Mooring Master to board at other than Khor Fakkan (if applicable).

24 HOURS: Not less than 24 hours prior to arrival at Khor Fakkan or such other approved location, vessels will send a cable or telex to the Company and a cable or telex to Lamnalco reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours, notice of such change must be given promptly to the Company and Lamnalco.

Not less than 24 hours prior to the vessel's ETA at Khor Fakkan the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Khor Fakkan must maintain a radio watch on VHF Channel 16.

Other frequencies available are:
HF: 2638, 2738, 3270, 3710, 4136.3 kHz.
VHF: Channels 1 to 28, 60 to 74 and 77 to 88.
Call sign for Lamnalco base is "Gulf Pilot Khor Fakkan".

TUGS: *Tugs and Launches:* The Company will have available a tug (3,600 h.p.) for berthing or unberthing and for standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used. Should the Master of a vessel require more than 1 tug for the above purposes such must be separately arranged by the Master sufficiently in advance of the vessel's arrival at the port area to avoid delay in the berthing or unberthing of the vessel and any delay occasioned thereby will be charged to the vessel.

A line handling boat under the direct control and supervision of the Mooring Master will assist in berthing or unberthing of vessels.
BERTHS: The tanker terminal in the port area consists of the VLCC "Tropical Lion" ("Storage Tanker") connected to a single buoy mooring system located at Lat. 24° 46′ N., Long. 52° 31′ E., 1.25 miles West of Arzanah Island.

The berth at Arzanah Island ("Shore Berth") consists of a 700 ft. long earth filled pier with facilities required to load and unload diesel oil and desalinated water. Fire protection facilities on the pier include a fire water line and fire water monitors.

BERTHING:
Berthing-Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or of any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.
Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker or the Shore Berth. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Harbour Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.
Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which clean or segregated ballast is being discharged. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Harbour Master. An investigation shall be carried out by the vessel and the findings immediately reported to the Harbour Master. Deballasting shall not recommence without the permission of the Harbour Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Harbour Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the vessel are ready for safe transfer and handling of the cargo.

The Harbour Master may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Harbour Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chicksans) to the appropriate manifold connections. As a convenience to the vessel the Harbour Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.
Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.
Pumping Rate: Max. pumping rate using 2 arms. 60,000 b.p.h. Average pumping rate 55,000 b.p.h.
Storage tanker capacity: 1,400,000 bbls. Cargo Arzanah Stabilized Crude, API 43.0. Specific Gravity 0.8109. Reducers: In limited supply.
General Cargo Loading–Unloading: Loading or unloading operations cannot commence until permission has been granted by the Harbour Master. All operations after such permission is granted in connection with the loading and unloading of the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Shore Berth there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.
POLLUTION: The Petroleum Ports Law prohibits the discharge into the water of oily water, garbage, waste or other objectionable materials. The Petroleum Ports Law also requires immediate reporting to the Harbour Master of any leakage or spillage by the vessel. The Law is strictly enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spilled overboard from his vessel in the vicinity of the Port Area. In the event of any spillage or loss of oil from the vessel as the result of any act or omission of the vessel, such as, but not limited to, the pumping of oily water overside from ballast or bilges, or oil spilt during loading. The vessel shall be responsible for all costs and expenses of clean up, and for any damages to property or injury to persons resulting from such spillage or oil loss.

The Company reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor acting on behalf of the vessel or its owner, and will charge the vessel for all costs and expenses incurred thereby.
SAFETY REGULATIONS:
Safety: The Petroleum Ports Law, recommendations contained in the I.C.S. International Safety Guide for Oil Tankers and Terminals covering the loading and discharging of tankers and the safety regulations set forth herein will be strictly enforced while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storage Tanker and Shore Berth except in places specified by the Master which shall not be outside of any of the accommodation areas. The Master is responsible for ensuring that all on board are informed of the selected areas for smoking and for posting suitable notices. Matches and lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must be ready for instant use while the vessel is moored. Fire hoses of sufficient length to reach all parts of the vessel must be strung out and connected to hydrants. If the vessel's fire fighting equipment is rendered inoperative for any reason this must be reported to the Harbour Master immediately.

Fires: The only open flames allowed while the vessel is moored at the Storage Tanker or the Shore Berth are those in the vessel's boilers and galley equipment. All other open flames are prohibited. Sufficient fire extinguishers must always be provided near the galley.

Engine Room/Boiler Room Precautions:

(a) Combustion equipment – burners, tubes, uptakes, exhaust manifolds, and spark arresters shall be maintained in good working order and kept clean.
(b) Blowing tubes – funnel uptakes and boiler tubes will not be blown while a vessel is moored at the Storage Tanker.
(c) Cleaning solvents – highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening on to decks must be kept closed while the vessel is moored. Any doors open for access other than the pumproom doors must be closed immediately after use.

Cargo Tank Openings: All cargo tank hatch covers and ullage port covers are to be kept closed. If tanks must be hand sampled or ullaged the ullage openings must be kept closed except while sampling or ullaging cargo.

Sea Valves: All sea and overboard discharge valves are to be closed and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carrying cargo must be pressured and fully inerted with gas having an oxygen content of less than 8% prior to the commencement of loading. The oxygen content of the tank blanket will be checked throughout the loading and loading will be stopped anytime the oxygen level rises above 8%.

Insurance (Towing) Wires: Towing wires of at least 50 m. long are to be secured to mooring fittings and run out at the bow and stern on the vessel's outboard side and held in place on short stoppers with the eye about 1.5 m. above the water so they are readily available to a tug in an emergency.

Bonding Cable: The bonding cable from the Storage Tanker or the Shore Berth must be attached to the vessel before the loading arms are connected and removed only after the loading arms are disconnected from the vessel.

Electrical Storms: All cargo or ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and other essential manoeuvring equipment must be kept in readiness at all times to permit the vessel to unberth on short notice. No engine or propulsion machinery repairs may be carried out while the vessel is moored alongside the Storage Tanker. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed engineer of the vessel on duty in charge of all operations in the engine room.

Radio-Radar: The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast alongside the Storage Tanker or the Shore Berth. The use of intrinsically safe VHF radios for cargo handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shut and adequate drip pans provided where necessary on deck prior to the start of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be alongside the vessel during cargo or ballasting operations without the express permission of the Harbour Master.

Portable Lamps Electrical Equipment: The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited. Only approved intrinsically safe self-contained flash lights are permitted on deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the Shore Berth or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A Safety Check List shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker or the Shore Berth before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licenced officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzanah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc., excepting vessels servicing the Company's operations in the port area.

TIME: GMT plus 4 hours.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Regulations:* Shipping operations at Arzanah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Amerada Hess Oil Corporation of Abu Dhabi, P.O.Box 2046, Abu Dhabi, U.A.E. *Tel:* 779500. *Telex:* 22275 Amhess Em. *FAX:* 779500 (ext. 212). *Cables:* Amerhess. *Contact:* M. D. Murphy, General Manager. J. R. Douglas/C. Dirks, Harbour Masters.

AGENT: See "Mina Zayed".

DAS ISLAND, Abu Dhabi: 25.09 N. 52.52 E. (See Plan)

Conduct and movement of vessels within the port are controlled by the Port Officer, Das Island.

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The Island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd. (ADGAS).

PORT LIMITS: The area of authority is encompassed by a line joining the following positions:

From (a) Lat. 25° 14.0′ N., Long. 52° 48′ E., due East
to (b) Lat. 25° 14.0′ N., Long. 52° 57′ E., then due South
to (c) Lat. 25° 07.7′ N., Long. 52° 57′ E., then S.E.
to (d) Lat. 25° 07.2′ N., Long. 52° 58.8′ E., then due South
to (e) Lat. 25° 04.5′ N., Long. 52° 58.8′ E., then due West
to (f) Lat. 25° 04.5′ N., Long. 52° 48′ E., then finally due North to position (a).

All marine orientated activities within this area, all waters, installations, facilities and structures which are, or may be, erected therein are governed by ADNOC – Petroleum Ports Authority (ADNOC – P.P.A.).

DOCUMENTS:

Bills of Health for Ports visited on voyage.
3 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

Documents and Specimen Forms: Before the P.P.A. appointed Berthing Master commences any berthing operations certain initial documents must be tendered duly signed, timed and dated as applicable, by the Master. The Berthing Master will acknowledge receipt as necessary. These initial documents are in a booklet form and contain:

1. Clean Ballast Declaration.
2. Ship's Particulars.
3. Conditions of Use of Terminal facilities.
4. Safety requirements.

019-MAR-4 Pre-Berthing Declaration.
Additionally vessels loading Condensate Blend Cargoes:
019-MAR-19 H_2S Content in Condensate Cargo.

A supply of these initial documents will be provided at the vessel's first visit to Das Island. On second and subsequent visits the Berthing Master will receive the documents, duly completed, on boarding thereby avoiding any delays to the vessel.

Also see "General".

PRE-ARRIVAL INFORMATION: All vessels calling at Das Island must telex the Pre-Arrival Information below, at least 72 hours in advance, so as to avoid any unnecessary delays.

All Vessels Except Liquified Gas Carriers:

Pre-Arrival Information Required by Port Authority:

Please provide the following information to Petroleum Ports Authority, Das Island, Care ADMA-OPCO, in the same sequential format, at least 72 hours in advance, and update ETA 48 hours and 24 hours prior to arrival.

1. Vessel's name, Port of Registry and Nationality.
2. NRT, GRT and SDWT (please specify SDWT in long tons).
3. ETA Das Island.
4. Arrival and Departure Drafts.
5. Amount of cargo to load.
6. Inerting System operational and in use.
7. Accommodation air-conditioning/ventillating systems operational with positive pressure.
8. Ballast to be discharged at this port:
   (a) Segregated ballast amount.
   (b) Dedicated ballast amount.
   (c) Clean ballast amount.
   (d) Total time for deballasting before loading or concurrent.
9. Expiry dates of the following certificates:
   (a) Load line.
   (b) Safety Ship Construction.
   (c) Safety Ship Equipment.
   (d) Safety Radio Telegraphy.
   (e) Safety Radio Telephony.
   (f) TOVALOP.
   (g) Civil Liability Certificate (CLC).
   (h) International Oil Pollution Prevention (I.O.P.P.).
   (i) Derating/Derating Exemption.
   (j) Class Certificate.
   Note: Uncomplied conditions on any of the certificates automatically cancel the validity of the certificate.
10. Last port, next port and destination.
11. Master's Name.

Pre-Arrival Information Required by Terminal:

Please advise the following information to ADMA-OPCO separately.

1. Confirm suitability of ship's manifold for connecting 16 in. crude hoses.
2. Please indicate and confirm:
   - (a) Size and type of ship's forward Panama Lead/Fairlead vertical and horizontal dimensions.
   - (b) Internal dimensions and SWL of ship's chain compressor/stopper – suitable for 3 in. chafing chain.
   - (c) SWL of your port hose handling derrick.
   - (d) Maximum freeboard – berthing or during deballasting.
   - (e) Distance from ship's manifold to bow, to ship's side and height of manifold over deck.
3. Please rig on the lee side a combination pilot/accommodation ladder for Berthing Master boarding.
4. Confirm acceptance of signing Boycott Declaration to be submitted to Abu Dhabi Supreme Petroleum Council stating that cargo loaded at Das Island will not be discharged at any port in Israel, South Africa or any other boycotted countries.
5. Last loading port in U.A.E. and date.
6. Confirm you accept Early Departure Procedure.
7. Arrival displacement and maximum loading rate required.
8. Voyage number.

Liquified Gas Carriers:

Pre-Arrival Information Required by Port Authority:

Please provide the following information to Petroleum Ports Authority, Das Island, Care ADMA-OPCO, in the same sequential format, at least 72 hours in advance and update ETA 48 hours and 24 hours prior to arrival.

1. Vessel's name, Port of Registry and Nationality.
2. NRT, GRT and SDWT.
3. ETA Das Island.
4. Arrival and Departure Drafts.
5. Amount of cargo to load.
6. Inerting system operational and in use.
7. Accommodation air-conditioning/ventillating systems operational with positive pressure.
8. Ballast to be discharged at this port:
   - (a) Segregated ballast amount.
   - (b) Total time for deballasting.
9. Expiry dates of the following certificates:
   - (a) Load line.
   - (b) Safety Ship Construction.
   - (c) Safety Ship Equipment.
   - (d) Safety Radio Telegraphy.
   - (e) Safety Radio Telephony.
   - (f) TOVALOP.
   - (g) Civil Liability Certificate (CLC).
   - (h) International Oil Pollution Prevention (I.O.P.P.).
   - (i) Derating/Derating Exemption.
   - (j) Class Certificate.
   - (k) IGC/IMO Certificate of Fitness for Bulk Gas Carriers.

     Note: Uncomplied conditions on any of the certificates, automatically cancel the validity of the certificate.
10. Last port, next port and destination.
11. Master's Name.

Vessels Loading Condensate:

Pre-Arrival Information Required by Port Authority:

Please indicate and confirm:

(a.) All aft accommodation.

(b.) Type of venting system – height above deck, location of risers. A centralised venting system is required, if not advise type and operations of the existing system. Multiple simultaneous venting not permitted.

(c.) Operable Inert Gas Automatic Ullage System and closed loading systems. Tanks must be inerted on arrival and cargo tank atmosphere should be less than 8% oxygen.

(d.) Number of self contained breathing apparatus.

(e.) You will load, topping and measure condensate with dip hatches closed.

No deviation from this procedure will be permitted while your vessel is within the port limits.

NAVIGATION AIDS:

DEEP WATER CHANNEL: IALA System.

FLARE COMPLEX: A series of 6 flares are located in an arc approximately 4,500 ft. (1,370 m.) North of Das Island. The unlit flares may be brought into service without warning. The Northern perimeter of the Flare Zone is marked by a green conical light buoy, Fl. G. 5 secs., in position: Lat. 25° 11.5′ N., Long. 52° 52.2′ E.

An additional flare is situated on a small jetty extending approximately 400 ft. (120 m.) from shore approximately 2,500 ft. (760 m.) from LNG/LPG Berth No. 4.

Numerous flares are situated onshore on the North and N.W. coasts of Das Island.

All of the flares previously referred to are situated within the Restricted Area No. 1.

PIPE-LINE MARKER BUOY: A yellow can buoy fitted with flash (U) 12 secs. amber light, is situated between Berth No. 2 and Berth No. 4. This buoy marks the Southern extremity of pipe-lines running between the two berths. Approximate position of buoy: 25° 09.1′ N., 52° 53.2′ E.

DAS ISLAND RADIO MAST: See "VHF".

APPROACHES: *Entering and Navigation within the Port:* Navigation/movement within the port area is permitted subject to prior permission being granted by the Port Officer. Vessels visiting the port area must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notices to Mariners and other notices promulgated for the area through MENAS.

CAUTION:

The Umm Shaif Oil Field is approximately 20 miles East of Das Island.
The Zakum Oil Field is approximately 48 miles S.E. of Das Island.
The Bunduq Oil Field is approximately 15 miles West of Das Island.
The Fields, together with their associated submarine oil and gas pipe-lines to Das Island are marked upon hydrographic charts pertaining to the area.

It is essential that vessels/craft approaching Das Island do not enter the Oil Field areas or anchor in the vicinity of submarine pipe-lines.

NOTE: Masters of vessels/craft are advised that actual depths over submarine pipe-lines are generally less than those charted and vessels passing over these pipe-lines may have the under-keel clearance substantially reduced.

Use of anchors in the vicinity of these pipe-lines is strictly prohibited. (See Note: "Pipe-lines" on BA and USHO Charts.)

Approaches to Das Island: Vessels approaching Das Island must navigate with due caution on account of numerous oil platforms and associated submarine pipe-lines within the waters of Abu Dhabi and neighbouring states. (See Cautions on BA and USHO Charts.)

Vessels passing to the East of Das Island must not pass closer than 2 miles from the Island, and then only with prior permission of the Port Officer and giving due care and attention to vessel movements within the port.

SOUTHERN ROUTE:

Vessels approaching from the South must pass not closer than 3 miles South of oil installations etc., in the Umm Shaif Field, thence towards the pilot/anchorage areas S.E. of Das Island (See "Pilotage" and "Anchorage").

Special attention shall be paid to the traffic routing system which passes between the Umm Shaif and Zakum Oil Fields, and vessels/craft shall navigate in accordance with the requirements of the International Rules and Regulations for the Prevention of Collisions at Sea.

NORTHERN ROUTE:

Vessels approaching from the North should normally pass down the West side of Das Island and keep at least 4 miles to the West and at least 5 miles to the South of the Island. However, vessels may pass to the East of Das Island with permission of the Port Officer but see note above.

DEEP DRAFTED VESSELS:

Deep drafted vessels may approach the port via the Deep Water Buoyed Channel (See "Navigation Aids"). The channel is intended primarily for the use of deep drafted vessels sailing from Das Island, but vessels intending to enter the port via this channel should advise 'Das Marine' by radio, of their intentions. Masters are advised that this channel is not for the exclusive use of Das Island traffic and are cautioned to proceed accordingly.

PILOTAGE: P.P.A.-appointed Berthing Masters are the designated representatives of the Port Authority and, as such, are responsible to the Port Authority for the observance and implementation of Standing Instructions for Marine Operations.

The Berthing Master will normally board the vessel approximately 2 miles E.S.E. from Tanker Berth No. 2. The pilot station is at Lat. 25° 08′ N., Long. 52° 55.4′ E.

For vessels entering from the North the Berthing Master may board in a different location. If so, he will advise the Master accordingly via VHF radio.

The Berthing Master will undertake the pilotage, berthing and unberthing of the vessel save that the Master of the vessel shall remain solely responsible on behalf of the Owners for the safety and safe navigation of the vessel at all times.

Tankers and Gas Carriers: Tankers and gas carriers are not permitted to berth at or unberth from any of the berths in Das Island without a P.P.A.-appointed Berthing Master on board.

General Cargo Vessels: General cargo vessels are required to employ a Berthing Master. Vessels are required to use the anchorage area designated for cargo operations (See "Anchorage"), but may anchor in the main anchorage while awaiting weather conditions to improve, availability of lighters or if the designated anchorage is congested.

Small Craft: Craft entering the boat harbour are not required to hire pilotage services, but may do so by prior application to the Port Authority.

Movements of all craft into, within or out of the boat harbour is at the discretion of the Port Officer. Allocation of berths is the sole responsibility of the Port Officer. No craft are allowed to enter, manoeuvre within or sail from the boat harbour during the hours of darkness without the prior permission of the Port Officer.

ANCHORAGES: Designated anchorages are established for use by vessels/craft visiting the Port of Das Island. The use of anchors outside these areas must only be undertaken after obtaining permission from the Port Authority.

Main Anchorage Area: This anchorage area lies to the S.E. of Das Island and is for tankers, gas carriers and other large vessels. The area is encompassed by lines joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 55.4′ E. to
(b) Lat. 25° 07.2′ N., Long. 52° 58.8′ E. to
(c) Lat. 25° 04.5′ N., Long. 52° 56.8′ E. to
(d) Lat. 25° 04.5′ N., Long. 52° 55.4′ E. and finally to (a).

Optional Anchorage Area: An optional anchorage for deep draft vessels is located approximately 1 mile to 1.5 miles N.W. from No. 12 Deep Water Channel Buoy.

General Cargo Vessels: The offloading anchorage for general cargo vessels is situated approximately 6 cables South of Tanker Berth No. 2 in an area encompassed by a line joining the following positions:

(a) Lat. 25° 07.5′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. to
(d) Lat. 25° 07.5′ N., Long. 52° 53.63′ E. and finally to (a).

Small Craft and Barges: This anchorage lies to the S.W. of Tanker Berth No. 2, in an area encompassed by a line joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.4′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.4′ N., Long. 52° 53.23′ E. to
(d) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. and finally to (a).

CAUTION:

(a) Pipe-lines connecting the tanker berths to the shore lie close to the Northern boundary of this anchorage.
(b) Within the small craft anchorage area are mooring buoys, installed by the Company for their own usage. The number of buoys installed and their position are liable to be changed without promulgation of any notices.
    The use of these buoys by any craft is subject to permission being granted by the Port Authority. Unauthorised occupancy of these buoys could result in strong action being taken against the craft, and any consequential damage/loss of earnings/incidental expenses etc. incurred by the Company will be for the account of the offending craft.

Holding Ground (Sea Bed): The sea bed around Das Island is rock, covered by a few inches of loose sand. Holding is poor and vessels are urged to exercise due care and pay out extra chain.

Wind and Tide: Prevailing winds are from the N.W. Rise of tide can be up to 2 m. but the usual variation is 1 m.

Also see "VHF".

PROHIBITED ANCHORAGES: Prohibited anchorage areas have been established at Das Island. The use of anchors within these areas is strictly prohibited.

Prohibited Anchorage – South of Das Island: A prohibited anchorage area is established to the South of Das Island in an area encompassed by a line joining the following position:

(a) Lat. 25° 08.38′ N., Long. 52° 52.50′ E. to
(b) Lat. 25° 08.00′ N., Long. 52° 52.50′ E. to
(c) Lat. 25° 08.00′ N., Long. 52° 53.00′ E. to
(d) Lat. 25° 08.50′ N., Long. 52° 53.00′ E. then to shore in
(e) Lat. 25° 08.50′ N., Long. 52° 52.78′ E.

Prohibited Anchorage – Tanker Berth No. 3: A prohibited anchorage area exists within a circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a RESTRICTED AREA.

RESTRICTED AREAS: Restricted areas have been established at Das Island. Vessels/craft are only allowed to enter these areas for duly authorised operational purposes.

Restricted Area No. 1: Enclosed by a line joining the following positions:

(a) Lat. 25° 09.35′ N., Long. 52° 52.77′ E. on shore to
(b) Lat. 25° 09.30′ N., Long. 52° 53.05′ E. to
(c) Lat. 25° 09.16′ N., Long. 52° 53.10′ E. to
(d) Lat. 25° 09.20′ N., Long. 52° 53.30′ E. to
(e) Lat. 25° 09.55′ N., Long. 52° 53.20′ E. to
(f) Lat. 25° 09.55′ N., Long. 52° 53.00′ E. to
(g) Lat. 25° 10.54′ N., Long. 52° 53.00′ E. to
(h) Lat. 25° 10.54′ N., Long. 52° 52.20′ E. to
(i) Lat. 25° 09.80′ N., Long. 52° 52.20′ E. to
(j) Lat. 25° 09.80′ N., Long. 52° 51.85′ E. to
(k) Lat. 25° 09.00′ N., Long. 52° 51.85′ E. then East to shore.

Restricted Area No. 2: Enclosing Tanker Berth by a line joining the following positions:

(a) Lat. 25° 08.80′ N., Long. 52° 53.10′ E. on shore to
(b) Lat. 25° 08.86′ N., Long. 52° 53.30′ E. to
(c) Lat. 25° 08.30′ N., Long. 52° 53.50′ E. to
(d) Lat. 25° 08.25′ N., Long. 52° 53.30′ E. then finally to (a).

Restricted Area No. 3: A circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in position: Lat. 25° 08′ 53″ N., Long 52° 54′ 07″ E. This is also a prohibited anchorage area.

MAX. SIZE: See "Berthing".

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are required to inform the Company if there is any sick person on board or if there has been sickness on board within the week prior to arrival. Pratique is granted by the Port Medical Officer normally through the Berthing Master.

Health Certificate with valid cholera inoculation (if coming from cholera-infected areas) is compulsory.

RADIO: *Arrival Messages:*

(a) All vessels calling at Das Island Petroleum Port must adopt the following ETA procedures:

1. ETA and updates are to be sent 72 hours, 48 hours and 24 hours before arrival at Das. Telexes to be directed to Port Officer, Das.
2. The initial ETA message should normally contain, in addition to the ETA Das Island:

(a) Vessels name, port of registry, g.r.t., n.r.t., s.d.w.t. and arrival displacement.
(b) Drafts on arrival and sailing Das Island.
(c) Cargo requirements – loading/discharging plus fuel requirements.
(d) Type of ballast on board on arrival (segregated, dedicated and/or clean ballast, amount) and total time of discharging.
(e) Whether IGS is operational and that vessel already inerted on arrival.
(f) Validity of all applicable certification.
(g) Last port, next port and destination.
(h) Master's name.

In order to expedite Pilot attendance Masters should endeavour to confirm their final ETA to Das Island Port Control on VHF Radio Channel 12, six hours prior to arrival at the anchorage.

(b) The Agent shall also provide the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Also see "Berthing" – Tanker Berth No. 3.

VHF: Das Marine maintains a 24 hour listening watch on VHF Channel 16 and works Channels 12 and 74.

All communications other than Terminal VHF should be sent through "Bahrain Radio" (A9M).

Das Island radio mast is installed in position: Lat. 25° 08′ 30.396″ N., Long. 52° 52′ 43.903″ E. Red lights visible all round the horizon are established at the top of the mast, 81.8 m. above chart datum.

Vessels Anchoring: Vessels anchoring to await berthing instructions must advise "Das Marine" via VHF Radio of:

(a) Anchoring time (Local Time is GMT plus 4 hours)
(b) Anchoring position (bearing and distance from Tanker Berth No. 2).

All vessels at anchor must keep a listening watch on VHF Channel 16.

When a vessel leaves the anchorage it must advise "Das Marine" via VHF Radio of:

(a) Time departed anchorage.
(b) Reason for departing.

Also see "Pre-Arrival Information".

RADAR: Not available.

TUGS: *Tugs and Mooring Launches:* Three Fire Fighting, Pollution Control and Salvage Tugs are generally available at Das Island to assist in berthing/unberthing vessels at the bulk petroleum and LNG/LPG facilities.

Minimum of 2 tugs used for berthing at Berths No. 2 and 4 and minimum of 1 tug used for berthing at Berth No. 3 (SPM).

NOTE: Only tug's towing equipment shall be used for these operations and only in an emergency situation and in order to avert a potential disaster may ship's equipment be considered for use.

Mooring launches are available for berthing/unberthing operations and for the transportation of personnel.

BERTHING: Tanker Berth No. 1 has been demolished and no longer exists. All structures to this berth have been cleared to sea bed and no obstructions remain. The pipelines still exist to the original berth platform location.

Tanker Berth No. 2:

Platform position: Lat. 25° 08′ 39″ N., Long. 52° 53′ 14″ E.

General: This is a fixed platform berth situated approx. 2,400 ft. (750 m.) East of Das Island. Vessels berth alongside 4 flexible dolphins, and 6 mooring dolphins are provided to receive moorings.

Berthing limitations: Capable of accepting vessels over 16,000 L/T S.D.W. subject to the following limitations as to berthing:

(a) Ballasted or partially loaded tankers up to a maximum of 165,000 L/T displacement.

(b) Fully loaded tankers up to 130,000 L/T S.D.W. provided the displacement does not exceed 165,000 L/T.

(c) Vessels with a max. draft not exceeding 56 ft. (17 m.).

Minimum depth of water alongside is 67 ft. (20.4 m.) at datum and the maximum permissible sailing draft is 64 ft. (19.5 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General mooring pattern for vessels up to 130,000 L/T S.D.W.:

Forward: 3 head lines, 2 breast lines, 1 spring.

Aft: 3 stern lines, 2 breast lines, 1 spring.

General mooring pattern for vessels in excess of 130,000 L/T S.D.W.:

Forward: 3 head lines, 3 breast lines, 1 spring.

Aft: 3 stern lines, 2 breast lines, 2 springs.

Loading/Discharge Rates: Maximum cargo loading rate 32,000 bbls./hr. per 16 in. hose (4,200 t.p.h.), 4×16 in. hoses are available. Maximum fuel oil loading rate is 5,000 bbls./hr. per 10 in. hose (750 t.p.h.), 2×10 in. hoses are available. For fuel oil discharge the maximum pressure is 100 p.s.i. at ship's manifold (7.03 kg/sq.cm.). (Bunker operations ceased in 1989, situation being reviewed).

Control of Loading/Discharge and Safety: Loading/discharge must proceed to a pre-declared plan. Co-ordination of loading/discharge will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

Tanker Berth No. 3 (SPM):

Buoy position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E.

Additional pre-arrival message: The following message will be transmitted to vessels which are nominated to berth at Tanker Berth No. 3.

Quote:

Present indications that vessel will berth at No. 3 SPM. Ship's derrick/crane should be rigged on port side.

Ship's manifold suitable for connection of up to 2×16 in. crude and 1×10 in. bunker hoses. Mooring and hose connection by ship's crew. Mooring and hose connection equipment shipped on board after Berthing Masters board. Request accommodation be provided for 2 Berthing Masters whilst on board. Please confirm soonest SWL of hose handling crane/derrick and that suitable forward Panama/fairlead aperture is minimum 24 in. horizontally and 18 in. vertically.

Unquote.

General: Tanker Berth No. 3 is a Single Point Mooring (SPM) situated approx. 7,500 ft. (2,285 m.) East of Das Island. The buoy is moored in 94 ft. (28.65 m.) of water at datum, and is served by a 48 in. crude oil submarine pipe-line and a 22 in. fuel oil (bunker) submarine pipe-line.

Vessels will be required to be fitted with a hose handling crane/derrick capable of plumbing at least 2 ft. outboard of the ship's side over the entire length of the portside manifold (including the bunker connection). Minimum SWL of the crane/derrick to be in accordance with the following requirements.

Less than 100,000 L/T S.D.W. 8 tons.
100,000 – 300,000 L/T S.D.W. 10 tons.
Over 300,000 L/T S.D.W. 12 tons.

Berthing Limitations: Capable of accepting vessels up to 410,000 L/T S.D.W. subject to the following limitations: Maximum berthing draft of 72 ft. (22 m.). Maximum berthing displacement 410,000 long tons. Maximum sailing draft of 79 ft. (24 m.).

(See "Approaches" "Cautions" – Note: Actual depths over submarine pipe-lines).

Mooring at SPM: The fixed mooring at Tanker Berth No. 3 is a 21 in. circumference nylon braidline rope, 160 ft. (50 m.) long, terminating in a 3 in. diameter stud link chafing chain.

The vessel must have a suitable bow fairlead (24 in.×18 in.) to permit direct connection of the 3 in. diameter stud link chafing chain to a Smit or similar O.C.I.M.F. approved bracket.

Loading Rates: The crude oil loading installation comprises 2×20 in. floating hose strings each terminating in 16 in. tail hoses. The fuel oil (bunker) loading installation consists of 1×16 in. floating hose string terminating in a 10 in. tail hose. Flanges are to BS 1560.

Various reducers/spool pieces are available, with prior knowledge of vessel connections if different from shore fittings. Adequate ship crew and tools must be provided for the safe and efficient connection of hoses. There is no shore assistance for connecting/disconnecting of hoses.

Maximum cargo loading rate is 46,000 bbls./hr. per 16 in. hose (6,000 t.p.h.), 2×16 in. hoses are available. Maximum fuel oil loading rate is 7,000 bbls./hr. per 10 in. hose (1,000 t.p.h.), 1×10 in. hose available. (Bunker operations ceased in 1989, situation being reviewed).

Control of Loading and Safety: Loading must proceed to a pre-declared plan. Co-ordination of loading will be undertaken by the Duty Berthing Master, who will also conduct the necessary safety checks at frequent intervals.

LNG/LPG Berth No. 4:

Platform position: Lat. 25° 09′ 22″ N., Long. 52° 53′ 08″ E.

General: This is an ADGAS installation for the transfer of LNG/LPG and related products. Movement of vessels to and from the berth are governed by the Port Authority.

The berth is a fixed platform type and is situated approx. 4,300 ft. (1,300 m.) N.N.W. from Tanker Berth No. 2 Platform. Vessels berth alongside flexible dolphins and 7 mooring dolphins are provided to receive moorings.

Berthing Limitations: Capable of accepting vessels up to 100,000 L/T displacement subject to a maximum draft alongside of 46 ft. (14 m.). Minimum depth of water alongside is 49 ft. (14.95 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General Mooring pattern is:

Forward: 3 head lines, 3 breast lines, 2 springs.

Aft: 3 stern lines, 3 breast lines, 2 springs.

Loading Rates: Loading LNG/LPG and associated products is the responsibility of ADGAS. Maximum LNG loading rate is 10,500 cu.m.p.h. Maximum LPG loading rate is 4,000 cu.m.p.h. Maximum Pentane Plus loading rate is 10,000 bbls./hr. (1,200 t.p.h.). Maximum fuel oil loading rate is 4,500 bbls./hr. per 8 in. flexible hose (650 t.p.h.).

Vessels must have crane/derrick rigged on port side to assist with connection of Fuel Oil (bunker) hose.

Control of Loading: Co-ordination of loading is the responsibility of ADGAS. Fuel Oil (Bunker) loading will be co-ordinated by ADGAS. (Bunker operations ceased in 1989, situation under review). After the initial safety check by the Berthing Master, ADGAS Representative will conduct the necessary safety checks at frequent intervals. Please note however that the Master can request the services of the Berthing Master in an emergency to take his vessel off the berth.

Small Boat Harbour : Das Island Small Boat Harbour is situated at the South of Das Island. There are a total of 14 berths available at this time, usage of which is governed by the Port Authority/ADMA-OPCO.

Eastern Extension: Consists of 2 berths (No. 1 and 2) which are reserved for use by ADMA – OPCO and direct hire deep sea tugs, also for the importation of petroleum products. Maximum draft permitted is 15.5 ft. (4.7 m.).

Inner Harbour: Consists of 12 berths (No. 3 through No. 14). The facilities are reserved for ADMA – OPCO small craft, Government craft and contracted craft for the loading/discharge of materials and supplies. The maximum permissible draft is 9 ft. (2.7 m.).

GENERAL CARGO OPERATIONS: No loading/unloading facilities exist in the port area for cargo vessels and such vessels must provide all equipment and machinery to facilitate transfer of cargo to/from barges, lighters etc., at the designated anchorage area.

Cargo Manifests: One original and two copies of General Cargo Manifests are required to be supplied by the vessel.

Discharging/Loading: Vessels should arrive with all derricks etc., rigged and ready for cargo handling. Barges and associated craft must satisfy the mandatory requirements of the Port Authority, the Consignee being responsible for the provision and control of barges and associated craft. Cargo transfer will normally be carried out continuously dependent on weather conditions.

Dangerous Cargo: The Port Authority must be informed of any dangerous cargo carried in any vessel arriving within the port area whether it is intended for discharge at Das Island or not. Masters of vessels are requested to confirm that any dangerous cargo being carried is stored in accordance with the "Recommendations for the Carriage of Dangerous Goods in Ships" by the United Kingdom Department of Transport or other recognised authority.

CRUDE OIL LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40° (approx.), and Umm Shaif Crude of 37° (approx.).

Associated product available at this time is Condensate Blend of API 60° (approx.).

All tankers of 70,000 long tons s.d.w.t. must comply with the IMO 1978 protocol and must employ inert gas system.

Masters of vessels arriving to load Condensate Blend cargoes must sign a Declaration (019-MAR-19) to signify that they realise they are loading a highly volatile cargo which contains dangerous quantities of Hydrogen Sulphide (H_2S) in the gas evolved from the cargo.

BALLAST: There are no facilities for receiving vessel's ballast ashore for treatment. All vessels must have clean ballast for over-board discharge. Clean ballast implies oil-in-water content of not more than 15 p.p.m.

Masters of vessels arriving at Das Island will make a pre-berthing declaration regarding ballast (019-MAR-3).

MEDICAL: A Company Medical Officer and small hospital are available, subject to the Company's discretion, to vessel's crews. Charges for attention, treatment and associated facilities are for the vessel's account.

Masters of vessels must take precautions against heat exhaustion and heat stroke.

Requests for medical attention must be made to the Agency, or through the Duty Berthing Master. Port Authority consent must be obtained.

Personnel allowed ashore for medical attention must carry with them Passports/Seaman's Card and Health Documents and, if necessary, be accompanied by an interpreter (English or Arabic). An Agency representative will accompany them to the Hospital, but they will not be permitted to visit other Das Island facilities.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Fuel oil bunkers are not available at all tanker and liquid gas berths.

Small craft on charter to ADMA-OPCO are able to obtain limited supplies of diesel oil, the facility is only available through prior contractual agreement and must be loaded at the small boat harbour.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

REPAIRS: No repair facilities are available at Das Island. No repairs are permitted within port limits without prior written permission of the Port Authority.

DRY DOCKS: None.

SURVEYORS: Not available.

GANGWAYS: Shore gangways are provided at Berths No. 2 and 4, vessel to provide access steps from gangway at ship's rail. At Berth No. 3 vessel must provide accommodation ladder on both sides of the vessel for access.

CUSTOMS ALLOWANCES: No restrictions for tobacco or liquor onboard. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is strictly prohibited.

REPATRIATION: There are no facilities for crews of visiting vessels to join or leave vessels at Das Island. Repatriation for medical reasons may be arranged at Master's request with the recommendation of the Das Island Resident Medical Officer, and the consent of the Port Officer and the Chief of Police.

AIRPORT: ADMA operate a private airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: All emergencies: No. 2 Tanker Berth, Tel: 63333. No. 4 LNG/LPG Berth, Tel: 62222.

TELEPHONES: No onboard facilities – fixed berths are linked to Island telephone system. On LNG/LPG Berth No. 4 a ship/shore telephone connection is available.

BANKS: National Bank of Abu Dhabi, Das Island, Abu Dhabi, U.A.E.

STORING: Not available.

SHORE LEAVE: No shore leave is permitted at Das Island. Any crew member who comes ashore unauthorised will be considered as having entered the UAE illegally and as such will be liable to a heavy fine and/or imprisonment.

Shore visit for medical reasons, and in exceptional circumstances as required by the Petroleum Ports Regulations, may be permitted with prior arrangement. The Port Authority must give express consent.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

REGULATIONS: No cameras allowed on the Island – high security area.

GENERAL: All vessels entering the port of Das Island must comply with the International Agreement on Safety of Life at Sea (SOLAS) and its amendments and all tankers with the IMO 1978 Protocol.

The Masters of tankers/gas carriers must comply with the following:

Pre-Berthing Declaration and Inspection: All vessels arriving at the Port of Das Island must be suitably ballasted and/or trimmed for berthing with regard to weather and existing circumstances.

All vessel's personnel must be familiar with the Das Island Safety Requirements and other applicable Standing Instructions.

Safe and adequate access to the vessel must be provided for the Berthing Master. If the Berthing Master considers the means of access unsafe or unsuitable, the vessel will be delayed until such time as proper access is provided. Any loss will be to the vessel's account.

The requisite initial documents must be completed in full, signed and handed to the Berthing Master prior to commencement of berthing operations.

Permission to berth will not be granted unless the Berthing Master is satisfied that the vessel can safely complete all parts of the operation, including but not limited to, berthing, ballasting, deballasting, cargo transfer and sailing. If for any reason it is deemed necessary to refuse permission to berth, the Port Authority will be informed and a detailed inspection of the vessel will be undertaken. Shortcomings, etc. will be noted and the Master informed of them. If the vessel is unable to rectify the identified faults, it will be removed from the Port Area. Owners/Charterers will be notified accordingly.

Fire Wires (Emergency Towing Wires): Emergency towing/fire wires of sufficient strength and construction are to be provided and secured forward and aft, on the offshore side of the vessel, with the towing eye maintained at 6 ft. (2 m.) above the water level.

Access to Vessel: While at the loading berths all vessels must provide an accommodation/pilot ladder suitably positioned and maintained at 6 ft. (2 m.) above the water level on the offshore side of the vessel.

M.E.N.A.S.: ADMA-OPCO Agency Section is a collection agency for Middle East Navigation Aids Service (M.E.N.A.S.) dues and, on the authority of the Master, dues payable to M.E.N.A.S. are collected and remitted on behalf of the vessel.

Courtesy Flag: The correct courtesy flag for vessels visiting Das Island is the flag of the United Arab Emirates. This flag may be obtained from the Agents.

Notice of Readiness: Prior to commencement of any transfer operation within the Port of Das Island, the Master shall tender, to the Company, a written Notice of Readiness to load/discharge, duly timed, dated and signed by the Master. Receipt of such notice does not necessarily imply acceptance.

Early Departure Procedure: E.D.P. is available to all tankers at Das Island. Tankers not accepting E.D.P. are generally unberthed after completion of transfer and must proceed to the Anchorage Area to complete documentation, where an agent will board under safe access; a boat/tug will be used by agent for transportation with a hire rate based upon the hourly rate.

Note: Vessels loading fuel oil (bunkers) are required to accept E.D.P. to minimise delays to other vessels.

OIL POLLUTION: Any incident of pollution, no matter how small it may be, from a vessel within the Port of Das Island is a contravention of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973.

In the event of the escape of oil or oily water from any source, operations must be suspended immediately, and every effort made to identify, stop, contain and clean up the pollution. The Port Authority must be informed immediately via the Duty Berthing Master, in order that the Pollution Contingency Plan can be initiated.

Transfer operations will not be resumed until such time as the Berthing Master and the Port Authority are satisfied that the cause of pollution no longer exists and that the affected area is sufficiently cleaned and safe. Oil Pollution incidents that occur within the Port of Das Island will be fully documented and the necessary documents (019-MAR-41) signed by the Master before transfer is resumed.

Masters of vessels/craft are warned that any breach of the provisions of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973 will render themselves liable to prosecution.

Pollution: The dumping of waste, dangerous, toxic or other hazardous material within the Port of Das Island is strictly prohibited.

AUTHORITY: Abu Dhabi National Oil Company – Petroleum Ports Authority (ADNOC – P.P.A.) Das Island, P.O. Box 898, Abu Dhabi, U.A.E. *Tel:* Direct (02606) 2376, 3368. *Telex:* 22284 ADMA EM, 22215 ADNOC EM. *Cables:* ADNOC. *FAX:* Abu Dhabi (02) 660106. *Contact:* Captain I.Kazi, Port Officer, Das Island.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., see "Mina Zayed".

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: U.A.E. and Dubai.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 2 copies Dangerous Cargo List, Stowage Plan in duplicate, Hatch List in duplicate, 7 copies of Cargo Manifests, 1 copy of each Bill of Lading. On arrival, 4 Crew Lists required.

Immigration: Vessels of less than 3.0 m. draft are expected to berth and report at the Immigration Station on the Customs Wharf to report In and Out. Larger and deeper draft vessels are cleared In and Out by Agents.

APPROACHES: Dubai Beacon Fl. 3 Sec. Port Rashid Lee Breakwater 25° 16.77′ N., 55° E., thence by 5.5 metre channel parallel to the breakwater, entry dolphins lit. Channel depth maintained centre line though opening spans of Al Maktoum and Al Garhud Bridges beyond Al Jadaf Ship Lift in Khor Dubai Lagoon.

PILOTAGE: No organised Pilot service, but Pilot can be arranged by Agents.

ANCHORAGE: Marked by lightbuoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of lightbuoy in approx. position Lat. 25° 17′ 4″ N., Long. 55° 16′ 16″ E. Depth 36 ft. to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request Free Pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive/sail at any time.

Departure: No Port Clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: "Khor Dubai" R/T (VHF MF/SSB) near entrance, 24 hour watch on 2182 kHz (MF/SSB), Channel 16/14 VHF. Controls movements and berthing, broadcasting navigation warnings and weather forecasts.

TUGS: Required, on basis of overall length, for Northern reaches and bridges, details available from Khor Dubai Radio and Agents.

BERTHING:

Khor Dubai: 2,300 m. of unnumbered berthing exists on the West Bank of the Khor and 3,300 m. on the East Bank. Depth between 3.0 m. and 5.5 m. Details from "Khor Dubai" Radio. Whereabouts of vessel to be reported on berthing.

Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.

Flag: UAE and Dubai.

Documents: The following should be airmailed to Agent prior to ship's arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arrival).

Approaches: Approach channel and entrance dredged to 6.0 m. Breakwaters are lit.

Pilotage: No organised Pilot Service, but Pilots can be arranged by Agents.

Restrictions: Vessels will not be allowed to remain alongside the quay when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there are 3 quays. One measuring 450 m. in length with a draft of 4.5 m., 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: Required on basis overall length as instructed by "Khor Dubai" Radio and arranged by Agents.

Radio: "Khor Dubai" Radio (VHF MF/SSB) near Khor mouth, the station controls movements, etc. in Mina Hamriya. 24 hours watch on 2182 kHz. and Channels 16 and 14. Navigation Warnings, weather forecasts, etc. are also broadcast.

The Port Signal Station (call sign: "Khor Dubai") equipped with VHF and M/F SSB is situated near the entry to Dubai Creek. Vessels should contact the station by VHF Channel 16 or 12 or on RT 2182 kHz. Signal station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is made by Port & Customs Office and vessels may directly order their requirement or through Agents.

Fuel: E.G.P.C. supply fuel at bunker point opposite entrance.

Cargo Handling: Port is not involved in the cargo discharge operation. There is no equipment available in the port such as cranes, forklifts etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted on direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged by Agent.

Telephones: No connections at the quays. However, there are telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all Passports and Seaman's Books should be surrendered to the Customs Office situated in the port area with 3 copies of Crew List against which shore passes issued. Before sailing of the vessel, a clearance should be obtained from the Port & Customs Office (Launch Section) and produced to the Customs Office for releasing the Seaman's Books/Passports.

Lay-By/Laying-Up Berth: 16 bollards available on Lee Breakwater for Mediterranean Moor of Lay-by/Lay-up vessels.

Port Authority: Department of Ports & Customs, Government of Dubai.

DISCHARGE TURN: Priority of discharge given to ships carrying mail and/or passengers for Dubai. Ships carrying less than 100 weight or measurement tons have priority and are supplied with one barge for discharge of cargo immediately on arrival, whether turn is in force or not. Should there be congestion, Agents require Stowage Plan showing clearly that all Dubai cargo is freely available and Master's signature on a request for discharge turn. Based on this, vessels will be registered for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for turn, ships may proceed to other ports for discharge, but must return Dubai prior time and date given, otherwise turn is lost. Particular cargoes for H.H. The Ruler have priority, This should be evidenced by Manifests which will be produced to Customs Authorities in Dubai for approval. The cargoes must be accessible for immediate discharge, which should be verified by stowage plan.

STEVEDORES: Loading/Discharging Rates: Stevedores, tally clerks, supervisors, etc., will be supplied from shore at the same time as ships are supplied with barges. These people working under vessels' supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 hrs. to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to get stevedores to work third shift unless ship will complete within a reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men from shore but food only to supervisors, tally clerks, watchmen and foremen.

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.

TANKERS: See "Port Rashid".

FRESH WATER: Supplied at the Bunker Berth, otherwise supply is by road tanker.

FUEL: 3 small vessel bunker berths by Al Shindaga Fish market, otherwise refuelling carried out by road tanker.

FIRE FIGHTING: No facilities available at anchorage.

CONSULS:

Egypt
Great Britain
India
Iran
Italy
Kuwait
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Switzerland
USA

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and radio technicians capable of carrying out extensive repairs available. Underwater cleaning, repairs and other works connected with this also available. See also Dubai Dry Dock under "Port Rashid".

SURVEYORS: Lloyd's.

CUSTOMS ALLOWANCES: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

REPATRIATION: Visa is required for non-UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete Passport details given well in advance. Excepted are British Subjects with right of abode in the U.K. who are permitted to remain in U.A.E. without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of U.A.E. However, person must leave U.A.E. via airport through which he entered.

When advise arrival flight details also advise Seaman's Book number and nationality.

Seven days' transit visa:

From 1st February, 1985 a new form will be used by the Immigration Authorities in Dubai for persons entering Dubai on Transit Visa.

As the form has to be typed out in both English and Arabic it is essential that full details of arriving persons are in hand at least 48 hours prior to arrival.

The information required is as follows:

1. I, the undersigned wish to sponsor the undermentioned who wishes to enter the country for . . . .
2. Name of the sponsored . . . . Father's Name . . . .
3. Nationality . . . . Passport No. . . . .
Category: Normal/Diplomatic Service.
4. Place and Date of Issue . . . . Expiry Date . . . .
5. Place and Date of Birth . . . . Profession . . . .

DRY DOCK: Two ship-lifts of 450 tons and 2,850 tons (Nominal lift) respectively, plus adjacent berthing, side travellers, etc., are installed at Al Jadaf in Khor Dubai Lagoon on the North West Bank. Over five ship and engine repair companies have workshops in this compound. *Bridge transits* through opening span regulated by time and tide, are arranged with Police/Ship Docking Yard by Agents.

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays, End August. 1st November*; 21st November*; 2nd December; 25th December.
*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid Passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The Passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

Ship Spares in Transit: Agents in Dubai advise that spares arriving in Dubai even with valid invoice, certificates of origin and packing lists attached are now opened by the Dubai Airport Customs. All Owners and operators are thus warned not to include any items which are banned in boxes containing spare parts as if detected they will be confiscated.

Further to the above, Agents give below a list of prohibited articles:

(a) All pornographic literature, videos, films, pictures.
(b) Alcohol.
(c) Narcotic drugs.
(d) Wireless transmitters.
(e) Firearms and ammunition.
(f) Products of Israeli – blacklisted manufacturers.
(g) Exposed cinematographic (movie) films.
(h) Political and religious literature.

– need prior approval from the Ministry of Information. The Customs are particularly sensitive about video tapes and when found in luggage they are subject to check. The checking is taking time and passengers are kept waiting sometimes for hours. To avoid trouble and irritation strongly recommend that crew arriving Dubai should be advised by principals not to carry any video tapes.

AUTHORITY: Government of Dubai, Department of Ports and Customs, Marine Adviser's Office, P.O.Box 2001, Dubai, United Arab Emirates. *Tel:* 457772. *Telex:* 49787 Khord Em. *FAX:* 00971-4-450810. *Contact:* Captain W. Nelson, Marine Adviser.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (12 lines, 24 hour service). After office hours: 480424, 440193. Telex: 45448, 45809 ("Gacdb EM"). Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz) Call sign "Confidence, Dubai". Fax: 457202.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendez-vous positions off Dubai or off Fujairah.

FATEH TERMINAL (offshore Dubai): 25.35 N. 54.25 E. (See Plan)

Oil Loading Terminal of the Dubai Petroleum Company (DPC).

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service (at the present time). However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week and provided berth not occupied, tankers will be berthed upon arrival, day or night.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh, S.W. Fateh, Falah and Rashid Fields. The terminal limits are bounded by the following co-ordinates:

(i)	Lat. 25° 38′ 00″ N.	Long. 54° 05′ 16″ E.
(ii)	Lat. 25° 40′ 00″ N.	Long. 54° 30′ 00″ E.
(iii)	Lat. 25° 15′ 00″ N.	Long. 54° 30′ 00″ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: All platforms, structures, SBMs and floating storage vessels are fitted with a white light Fl. "U" ev. 30 secs. vis. 5 miles and horn every 30 secs. sounding "U" in Morse.

Numerous working lights are also fitted on platforms, etc.

Six flares in position:

(1)	Lat. 25° 35′ 50″ N.	Long. 54° 25′ 50″ E.
(2)	Lat. 25° 35′ 56″ N.	Long. 54° 25′ 20″ E.
(3)	Lat. 25° 35′ 48″ N.	Long. 54° 25′ 18″ E.
(4)	Lat. 25° 29′ 44″ N.	Long. 54° 18′ 29″ E.
(5)	Lat. 25° 33′ 30″ N.	Long. 54° 11′ 30″ E.
(6)	Lat. 25° 21′ 00″ N.	Long. 54° 29′ 00″ E.

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (see "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

Lat. 25° 36′ N. Long. 54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Dubai Trade Centre Light is 298° true, distance 47.8 miles and from Jazirat Sirri Light 185.5° true, distance 18.2 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

SBM No. 1 Lat. 25° 34′ 37″ N. Long. 54° 28′ 18″ E.
Bearing 242° true 2.83 miles from anchorage.
SBM No. 2 Lat. 25° 35′ 12.6″ N. Long. 54° 24′ 36.6″ E.
Bearing 262° true, 5.85 miles from anchorage.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and Ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

MAX. SIZE: SBM No. 1. and No. 2: Max. displacement 350,000 tons. Max. draft, no restriction. Depth of water 150 ft.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 or 45423 DPC EM.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign "A9M") which operates on a 24 hour basis.

Communications Within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 MHz). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on Channel 12.

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable UHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable UHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

(a) Name of tanker.
(b) ETA in GMT (Dubai time is GMT plus 4 throughout the year).
(c) Quantity of cargo required.
(d) Maximum loading rate.
(e) If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.
(f) Deballasting time (if any).
(g) If vessel proceeding to any port(s) prior to Fateh, and if so, any anticipated delays.
(h) If AKD stopper or Smit towing bracket is fitted, and if so, distance from centre bow fairlead.
(i) Confirm inert gas system is in use and operational.
(j) Indicate if vessel is in possession of an International Oil Pollution Prevention (I.O.P.P.) Certificate.
(k) Sailing draft and corresponding sea water displacement tonnage.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged and lowered down so the platform is not more than 10 ft. from the water and a short pilot ladder rigged to facilitate access to the platform.

Tankers are requested to have ready on the forecastle head the following:

(a) 2 towing ropes, polypropylene or other man-made fibre.
(b) 2 messenger ropes, minimum lengths of 300 ft.
(c) Selection of shackles, wirestrops and tools.

When the approach to the terminal commences, the berthing tug will be available to assist in berthing. The method and position in which the tug will be utilised will be dependent upon the weather and tidal conditions prevailing. At this time, the mooring launch will prepare the mooring and standby at the SBM.

Approach to the SBMs necessarily involves passing, in close proximity, various platforms and other structures. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.

The mooring launch will be situated about 600 ft. from the SBM with a 10 in. circumference polypropylene pick-up rope secured to the main mooring, which consists of 2×18 in. circumference nylon ropes, connected to a standard O.C.I.M.F. chafing chain and a 40 ft.×3.5 in. circumference pick-up wire rope.

During the approach of the tanker towards the SBM, ship's crew, with the advice of the Mooring Master's Assistant (MMA) will prepare the forecastle for the mooring operation. This will include passing a messenger rope through the centre bow fairlead (or other fairlead designated by the MMA) taking the end to the after port corner of the forecastle and, from this point, lowering the end to the waters edge. The mooring attachment will also be prepared, and will be, in order of preference:

(a) Bow stopper (AKD).
(b) Towing bracket or futtoch (Smit).
(c) Bitts.

Vessels which, in the Mooring Master's opinion, do not have a suitable method of attaching the mooring, will be refused permission to berth. Should bitts have to be utilised, or should the towing bracket be located at a substantial distance from the fairlead, wire snotters of 2 in. diameter and various lengths are available from the berthing tug.

Upon the close approach of the tankers bow, the mooring launch will manoeuvre alongside the port shoulder and attach the mooring pick-up rope to the ship's messenger line. The tanker will then heave up the messenger and pick-up rope, carefully picking up the slack as the tanker approaches the SBM. The mooring launch will now be stationed at the end of the floating hose string in order to tow the hoses clear of the ship's side should this become necessary.

The pick-up rope should be continually hove in as the tanker nears the SBM. The distance between the bow and the SBM will be continuously relayed to the Mooring Master on the bridge by the MMA from the forecastle and by the berthing tug. When the pick-up wire has been brought inboard through the fairlead, it may be necessary to adjust the direction of pull and assist the chain through the fairlead. Action required by the tanker's crew in this respect will be advised by the Mooring Masters Assistant.

When the chain is inboard, depending upon the method of attachment available, the connection will be made. It should be noted that should a Smit Bracket or bitts be utilised, the first triangular plate on the chain must only be connected on tankers of less than 100,000 d.w.t. and on vessels of greater size, the chain must be hove in and the connection made on the second, larger, triangular plate.

After the connection to the mooring is made, it may be necessary to run the engines astern to ensure the tanker does not contact the SBM. The Mooring Master will then advise "Finished with Engines", but at no time during the tankers stay in port shall the engines be immobilised.

Shortly after the mooring operation is completed, the berthing tug will be secured from the stern of the tanker on a long ships rope, polypropylene if possible.

LOADING: *Lifting Hoses:*

SBM 1: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift is 9 tons.

SBM 2: Two 16 in. diameter hoses will be lifted by ship's gear on the port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. The Mooring Master will advise the ship's officer in charge concerning lifting techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped with the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc., to efficiently effect the hose connection.

Flange Sizes: 16 in. – 12 in. reducers will come on board the tanker with the mooring gear thus enabling tankers with either 16 in. or 12 in. ASA 150 lb. flanges to connect directly to the Terminal hoses. Flange size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flanges are available if required to enable tankers with 12 in. – 10 in. manifold connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the Production Platform constantly via portable UHF units. In case of temporary breakdown of the portable UHF circuit, contact may be continued on International Marine Channels 16 or 12 if the vessel is so fitted.

Failure of Communications: Should communication with the Production Platform fail, loading will cease.

Emergency Shut-Down: An emergency cessation of loading may be effected by the ship's VHF Channel 16.

Cargo: Oil loaded at Fateh is Dubai Stabilised Crude with an average API of 31.0. Loading temperature varies between 90°F in the Winter to 100°F in the Summer months. The oil is relatively free of sediment and low in wax and asphaltenes.

Loading Rate: At SBM No. 1 the maximum loading rate is 60,000 bbls.p.h. At SBM No. 2 the maximum loading rate is 70,000 bbls.p.h.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility of the ship's Master to see that no crude (or bunkers', diesel or bilge) oil or dirty ballast is pumped or spilled overboard from his ship whilst in the area. Drip pans should be used, especially when disconnecting hoses in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overside scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard. The dirty ballast will be collected into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkness, the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are not available. In emergencies requiring hospitalisation, the patient will be taken by boat from the tanker to the Production Platform, hoisted to the upper deck of the platform and flown by helicopter to Dubai. The shipowner will be charged for all expenses incurred.

DENSITY: 1030.

FUEL: Bunker supply not available at Fateh.

Fuel oil (IFO 180 cSt) can be arranged at Jebel Ali. Gas oil can also be arranged.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None, offshore terminal.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.674 (8.4.91).

GENERAL: The following are not available at Fateh Terminal: Fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew. There is no shore leave.

Charts: Charts covering the approach to and the area of Fateh Marine Terminal are:

British Admiralty Nos. 2837, 2887, 2888, 2889.

U.S. Hydrographic Office No. 3647.

AUTHORITY: Dubai Petroleum Company, P.O.Box 2222, Dubai, U.A.E. *Tel:* Dubai 442990. *Telex:* 45423 or 45557 Dpc EM. *Cables:* Dupetco, Dubai. *FAX:* 462200. *Contact:* Captain A. V. Carrington, Marine Superintendent. Captain J.A.Petty, Mooring Master.

AGENT: Gulf Agency Co. (Dubai) Pvt. Ltd., P.O.B.2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (15 lines, 24 hours service). After hours 480424, 440193. Telex: 45448, 45809 ("Gacdb EM"). Fax: 457202.

VHF Radio: standing by on Channel 16 (156.8 MHz) communicating on Channels 14, 12 or 6, call sign "Confidence Dubai".

SSB Radio: standing by on 6910 kHz lower side band, communicating on frequencies 3539, 6910 and 7010 kHz. Call sign "Confidence Dubai".

FUJAIRAH: 25.10 N. 56.21 E. (See Plan)

LOCATION: Lat. 25° 10.5′ N., 56° 21′ E., 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

PORT LIMITS: Within area bounded by a line drawn:–

Lat. 25° 09′ 35″ N., Long. 56° 21′ 00″ E. due North to Lat. 25° 10′ 05″ N., 56° 21′ 00″ E., thence due West for 65 m. to the West side of the old road and following the West side of the old road to Lat. 25° 11′ 30″ N., thence due East to Lat. 25° 11′ 30″ N., Long. 56° 22′ 30″ E., thence South to Lat. 25° 09′ 00″ N., Long. 56° 22′ 30″ E., thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 30″ E, thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 00″ E. and include all waters, land and installations contained within that area.

DOCUMENTS: The provisional requirements are:–

Immigration:	Crew List	3 copies
	Passenger List	3 copies
Customs:	Crew List	2 copies
	Passenger List	2 copies
	Cargo Manifests	2 copies
	Alcoholic Beverages/ Bonded Stores List	2 copies
Port Operations:	Cargo Manifests	2 copies
	Stow Plan/Hatch List	2 copies
	Dangerous Cargo List	2 copies
	Transhipment Cargo	2 copies
	Heavy Lift List	2 copies
	Ro/Ro Discharge List	2 copies
For Inspection:	Last Port Clearance, Ship's Log.	
Certificates:	Safety Equipment, Construction, Load Line, Radio, Oil Record Book.	

All documents relating to cargo should be forwarded prior to vessels' arrival.

PILOTAGE: Compulsory, except for 'Country Craft' and M.E.N.A.S. tender.

Notice of ETA and request for a Pilot must be made not less than 24 hours before ETA at Fairway Buoy via vessels' Agents. Pilot launch will keep listening watch on VHF Channel 16, 2 hours prior to ETA.

The Pilot boarding point is 1 mile S.E. of the Fairway Buoy. Pilot boarding arrangements must be according to IMO Rules. Vessels awaiting a Pilot must anchor East of Long. 56° 25′ E. approx. 3 miles offshore. There is good holding ground in 40 m. to 59 m. of water.

ANCHORAGE: Vessels wishing to anchor offshore must not anchor West of Long. 56° 25′ E. or South of Lat. 25° 10′ N. They should report their position to either the Harbour Master on VHF Channel 16 or through Agent on VHF Channel 16.

Also see "Pilotage".

RESTRICTIONS: *Draft Restrictions – Main Quay:*

1. Vessels with a draft of less than 11.5 m. can be moved at any state of the tide.
2. Vessels with a draft of between 11.5 m. and 12.0 m. can only be moved from 5 hours before to 4 hours after predicted HW.
3. Vessels with a draft in excess of 12.0 m. can be moved only at a time agreed by the Harbour Master.

Any variances to the above restrictions will be agreed by the Harbour Master, Port of Fujairah.

MAX. SIZE: Ships up to 275 m. LOA and 12.5 m. draft can be accepted.

HEALTH: Normal quarantine regulations apply. Radio Pratique can be obtained, via the vessel's Agent, providing the Master can state that no serious illness has occurred on board during the preceding 30 days.

RADIO: *Notice of Arrival:* Vessels should advise their ETA, Fujairah, at least 72 hours prior to arrival, giving draft, LOA and details of cargo operations. Agents should re-confirm 24 hours prior to vessels' arrival.

Also see "Health".

VHF: Fujairah Port Authorities, call sign "Fujairah Port Control" equipped with Marine Band VHF Radio Telephone Transceiver maintains continuous watch on Channel 16.

Vessels should establish radio contact with Fujairah Port Control Station if they intend anchoring in Fujairah Waters or are proceeding to Fujairah Port.

Following Channels are used by the Fujairah Port Authorities:

Station	*Hours of Watch*	*Channel*	*Function*
Fujairah Port Control	24	16	Distress, Safety and Calling Frequency
Fujairah Port Operations	24	9	Pilot Services
Tugs	24	8	Berthing/Unberthing
Working Channels	24	10&11	

Vessels in the Fujairah area are reminded not to use the above Channels except for the purposes specified.

RADAR: Port Control is equipped with radar. The pilot launch is equipped. However, fog is almost unknown though visibility is restricted by dust mainly – July and August.

TUGS: The use of tugs will be compulsory except at discretion of the Harbour Master. 2 tugs of 16 tonnes bollard pull are in operation fitted with foam monitors. A third tug of 36 tonnes bollard pull is also in service.

BERTHING: There are 4 berths on the Main Quay 780 m. long with a least depth of 12.5 m. for 600 m. and 11.0 m. for 180 m. This is a concrete capped and concrete blockwork constructed quay with rubber fendering.

There is a further 290 m. of quay with a least depth of 7 m. suitable for country craft and shallow draft vessels. This is a concrete capped sheet piled quay with continuous timber fendering.

There are 2 jetties for rock and aggregate cargoes.

There is a transit shed with 12,000 sq.m. of floor space with LCL facility.

PORT EQUIPMENT: 2×40 ton IHI gantry cranes with 34.5 m. outreach

1×40 ton IHI gantry crane with 44.3 m. outreach

5 rubber tyred gantries each 6 containers across and 4 high.

2×40 ton top loaders and 1×35 ton top loader.

2×24 ton Jones cranes. In addition to this, yard hustlers, trailers and forklift trucks have been added to complete a comprehensive range of support vehicles.
Reefer Storage: 120 points × 200 volts. 48 points × 38 volts.
Open Storage (container or general cargo): 54,000 sq.m. paved storage area.

STEVEDORES: The port will work on a 24 hour 7 day week basis. Requirements for port labour must be submitted to Operations Department by 1200 hrs. prior to to day required.

MEDICAL: Hospital facilities are available.

FRESH WATER: Good potable water is available and supplied by road tanker or water barge by prior arrangement through agents.

FUEL: Gas oil available ex-jetty. Fuel oil by prior arrangement through local Agent – supplied by bunker barge.

REPAIRS: Routine maintenance of medium engineering type is available. Offshore hull cleaning and repairs available.

SURVEYORS: Classification Societies and Surveyors can be brought from Dubai at short notice.

HATCHES: Rigging ship's gear, opening and closing of hatches, are the responsibility of the vessel.

REPATRIATION: This is permissible via Dubai and Sharjah International Airports, about 1.5 hours by road. Valid Seaman's Book and Passport required.

AIRPORT: Fujairah International Airport is a few minutes drive from City Centre. Gulf Air operate a flight on Thursday to and from Bahrain.

DRY DOCKS: None.

TIME: GMT plus 4 hours permanent.

SHORE LEAVE: Shore leave is permitted.

HOLIDAYS: 1st day of Id Al Fitr, 1st day of Id Al Adha.

TELEPHONES: This service will be available aboard ships at the quay by prior arrangement through Agents.

SHIP SERVICING: Gulf Agency Co. operate ship servicing along Lat. 25° 10′ N.

Barwil Shipping Services, Fujairah. Tel: 224800/224801. Telex: 89040.

Fujairah Maritime & Mercantile International, Tel: 228238/228239. Telex: 89017 Gray Fu Em.

Fujairah National Shipping Agency. Tel: 224151. Telex: 89081 Fnsa Em.

BANKS: British Bank of the Middle East, P.O.Box 21, Fujairah, U.A.E. Tel: 222221.

Fujairah National Bank, P.O.Box 887, Fujairah, U.A.E. Tel: 224518.

National Bank of Abu Dhabi, P.O.Box 79, Fujairah, U.A.E. Tel: 222633.

GARBAGE DISPOSAL: Garbage service is compulsory. Skips are provided alongside at Drhs 35 per collection, which is made upon request from ship. Arrangements can be made through Port Operations Dept. Tel: 09-228800, Extension 24.

WASTE OIL DISPOSAL: Service available from local agents.

SEAMAN'S CLUBS: A duty free shop selling wines, spirits, beers, cigarettes, cigars, electrical goods, cameras, luxury goods, gift items, and providing refreshments, snacks, darts and pool is available.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.67 (8.4.91).

GENERAL: Derat Exemption Inspectors are available.
Ship Chandlers: Complete chandlering facilities will be available.

SHIPMASTER'S REPORT: March 1985.

Called for bunkers (ex-barge) also crew changes.
Anchorage: Instructed by bunker barge to anchor 3 miles East of breakwater entrance in 25 fathoms of water, good holding ground, 6 shackles of cable used.
Stores: Fresh provisions are available by prior arrangement with Agent.
Repatriation: Any crew joining/leaving are landed by fast launch and then taken by minibus to/from Dubai (about 2 hours drive).
Time: GMT plus 4 hours – permanent.
VHF: Agency (Gulf Agency), Port Control and bunker barge all have VHF, contact initially Channel 16 then shift to working frequency.

AUTHORITY: The Fujairah Ports Authority, P.O.Box 787, Fujairah, U.A.E. *Tel:* Fujairah 228800. *Telex:* 89085 Fport Em. *Fax:* 228811.
Contact: Captain R. M. Saunders, General Manager. Captain R. G Turnbull, Harbour Master.

AGENT: Gulf Agency Co. (Fujairah) Ltd., P.O.Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("Gacfuj EM"). Tel: 228300, 228301 (24 hour service). After hours 222597. Fax: 228269.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendez-vous positions off Dubai or off Fujairah.

HAMRIYAH, Sharjah: 25.35 N. 55.24 E. (See Plan)

LOCATION: Hamriyah Oil Terminal is located in the Emirate of Sharjah, United Arab Emirates, and consists of a shore tank with related onshore facilities, an offshore loading berth composed primarily of one single point mooring buoy and a 30 in. submarine pipe-line which runs from the shore tank to the loading berth. The shore tank is located outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman in approximate position Lat. 25° 29.5′ N., Long. 55° 30.7′ E. The loading berth is located in 71 ft. of water and is situated in an open and unsheltered roadstead approximately 7.6 miles offshore on a bearing of approximately 308° (T) from the shore tank and in approximate position Lat. 25° 34′ 31.68″ N., Long. 55° 24′ 5.8″ E.

Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.
Company's Facilities: The Company's administrative offices are located in the town of Sharjah and the Company's terminal offices, storage tank and laboratory for testing stock are located onshore near the village of Hamriyah.

FLAG: Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

DOCUMENTS: The following documents are required when calling at Hamriyah Oil Terminal:

Health Declaration.

Crew List.

PILOTAGE: *Mooring Masters:* Vessels to be moored at the loading berth will be boarded by 2 Mooring Masters about 3 miles due North of the loading berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. The Mooring Masters will be provided by the Company and vessels will not be allowed to approach or depart from the loading berth without the Company designated Mooring Masters being on board. The Mooring Masters will advise vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose and in all other operations within the loading berth area. All manoeuvring of vessels within the loading berth area shall be performed by vessel personnel as directed by the vessel's Officer in charge and in accordance with the procedure advised by the Mooring Masters.

Vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Masters to immediately embark and disembark on the port side of the vessel and of sufficient length to reach the Mooring Masters' launch. At night, adequate lighting must be rigged overside for the Mooring Masters to approach or depart from the port side of the vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Masters' bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Masters in order to effect the safe embarking or disembarking of the Mooring Masters.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Masters shall be supervised by a responsible vessel Officer and shall be effected so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the vessel's side. If, in the opinion of the Mooring Masters, the pilot ladder is not safe, the Mooring Masters may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Vessels shall provide food for the Mooring Masters while on board the vessel and shall accommodate the Mooring Masters in cabins, equivalent to that required for an officer of the vessel. The Mooring Masters shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Masters.

Vessels shall also provide accommodation and food for the Cargo Inspector.

ANCHORAGES: The customary anchorage area for vessels awaiting the loading berth at Hamriyah Oil Terminal is a circle 2.0 miles in diameter and with its centre located 3 miles due North of the loading berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ E. Anchorage within 2 miles of the loading berth or of the 30 in. submarine pipe-line which runs from the shore tank to the loading berth is prohibited unless otherwise designated by the Company or the Mooring Masters.

HEALTH: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

MAX. SIZE: Max. draft 16.0 m. Maximum displacement at any time is 150,000 tonnes.

Also see "Berthing".

RADIO/VHF: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Company. The station call sign is "A9M" and the station operates on a 24 hour basis.
Advice of Arrival: It is important that vessels establish radio contact with the Company and with Lamnalco (Sharjah) Ltd. when 3 days distant from Hamriyah Oil Terminal and maintain such contact until just prior to arrival at Hamriyah Oil Terminal. Vessels should send an ETA telex to the Company (Telex: 68685 Amcosh EM) and Lamnalco (Sharjah) Ltd. (Telex: 68433 Lamshj EM) not less than 72 hours prior to arrival at Hamriyah Oil Terminal, providing the following information:

1. The ETA;
2. The estimated draft, fore and aft, upon arrival;
3. The quantity of crude oil to be loaded and the grade of such;
4. The estimated sailing draft and displacement;
5. The last port of call;
6. Whether the vessel has a clean Bill of Health;
7. The distance from the bow to the centre of the vessel's manifold.

This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting the floating cargo hose to the vessel's manifold. Further ETA telexes should be sent to the Company and Lamnalco (Sharjah) Ltd. when the vessel is 48 hours and 24 hours distant from Hamriyah Oil Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's readiness to load on arrival and the number of hours that will be required by the vessel to discharge clean ballast. Local time is GMT plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

Ship-To-Shore Communications: The Company and Lamnalco (Sharjah) Ltd. are equipped with VHF radiotelephone using international frequencies and maintain a radio watch on the international VHF Marine Channel 16 and on Channel 74. Not less than 12 hours prior to the vessel's ETA at Hamriyah Oil Terminal, the vessel is required to maintain a radio watch on R/T frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Mooring Masters will be in direct charge of the portable VHF ship-to-shore radiotelephone and all ship-to-shore communications will be by portable VHF radiotelephone. The use of the vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on R/T frequency 2182 kHz and on VHF Channel 16 with the Company and Lamnalco (Sharjah) Ltd.

TUGS: *Mooring Launch:* The Company will provide a mooring launch which is owned by Lamnalco (Sharjah) Ltd. to assist in the mooring and unmooring of the vessel. The mooring launch will be harboured in the town of Sharjah at the boat pier used by Lamnalco (Sharjah) Ltd. and will operate under the direct control of the Mooring Masters.

BERTHING: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a vessel in the order of its arrival, provided the vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the vessel will keep its position in line. Should the vessel be required to leave the area on account of weather, the vessel should keep in radio contact with Hamriyah Oil Terminal in order to make the vessel available as soon as the weather moderates. The Company reserves the right to load vessels "Out of turn" following the return of good weather, to the extent that such loading "Out of turn" does not materially delay the loading of other vessels in line. For example, should weather make it necessary for a specific vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another vessel which arrived at the anchorage after the specific vessel but before the return of the specific vessel which was waiting in line ahead of the the other vessel.

When the vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Masters, the mooring lines of the vessel will be carried by the launch to the floating buoy lines, secured thereto, and brought on board the vessel. On the vessel's end of the mooring lines there is a steel chafing chain which can be observed when the floating buoy lines come out of the water. This chafing chain will be secured to the vessel's bitts by way of Company-supplied mooring strops in such a manner that the floating buoy lines shall remain outside the vessel, thereby allowing the chafing effect at the fairleads to be taken by the chafing chain. All mooring details and the sequence of movements shall be directed by the vessel's Officer-in-charge, following consultation with the Mooring Masters. When the mooring operations have been completed, fire wires of at least 150 ft. in length will be secured to the vessel's bitts and run out at the bow and stern of the vessel's starboard side and held in place on short stoppers with the eyes approximately 6 ft. above the surface of the water, so that they can be readily available to a tug in case of an emergency.

Loading Berth: Vessels are loaded by means of a 30 in. submarine pipeline which runs from the shore tank to the loading berth and by means of a floating cargo hose which runs from the loading berth to the moored vessel.

Vessels meeting the following requirements will be accepted at the loading berth:

(1) Maximum draft is 16.0 m., at any time.
(2) Maximum displacement of the vessel is 150,000 metric tons, at any time.
(3) If deballasting is required by the vessel, the vessel must either deballast and load cargo simultaneously or after completion of loading.

In exceptional cases, vessel in excess of these requirements may be allowed to berth at the facility, provided written permission has first been obtained from the operators.

Mooring Facilities: The Single Point Mooring Buoy moors vessels from the bow and consists primarily of a cylindrical buoy which is secured to the seabed by 6 catenary anchor legs each of which are tethered to the seabed by a heavy duty anchor system. The cylindrical buoy is 5.3 m. in height, fitted with a skirt 16 m. in diameter, and equipped with a radar reflector and a racon beacon coded "Zulu", frequency 48 seconds. The cylindrical buoy is also equipped with a navigational light, white flashing code "U", which has a range of 5.7 miles with transmission factor of 0.85 and is visible through 360°.

Vessel's Alertness: The loading berth is on an open and unsheltered roadstead; therefore, from the time the Mooring Masters board the vessel until the vessel has loaded her cargo and the Mooring Masters have disembarked, full power must be available at all times on all deck winches and windlass and other gear of the vessel and the vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the vessel to depart from the loading berth at any time following a request by the Mooring Masters or the Company to do so.

The vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where vessels are equipped with an electric clutch control to the propeller shaft, such vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the vessel is moored. Constant observation in the engine room, control room and deck control room shall be provided at all times while vessels are at or in the vicinity of the loading berth.

Whilst a vessel is moored to the SBM a crew member must be stationed on the forecastle at all times (24 hours) and will report immediately to the officer in charge if the vessel approaches within 10 m. of the buoy.

READINESS: *Loading Readiness and Arrival Time:* Upon arrival of the vessel at the customary anchorage for the loading berth, the Master or his Agent shall give the Company notice by letter, telegraph, wireless, or telephone that the vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the vessel has been nominated to load cargo and the terminal holds such cargo nomination and further provided that the Mooring Masters have deemed the vessel to be in all respects ready to moor and load. As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted only between the hours of 0600 hrs. and 3 hours before sunset, provided that the vessel is apparently in all respects ready to moor and receive the cargo. The time of sunset will be determined by the current nautical almanac. Notice of Readiness will not be accepted during a period when the port is closed, on account of adverse weather, and may not be accepted, if the vessel arrives prior to the date upon which it is nominated to load.

If, however, the vessel is moved to the loading berth without delay after having arrived at any time and the vessel is in all respects ready to moor and load in the opinion of the Mooring Masters, the Notice of Readiness will be accepted at the time the Mooring Masters board the vessel. Laytime shall continue until the floating cargo hose has been disconnected from the vessel's manifold.

LOADING: *Vessel's Gear:* Prior to the arrival of any vessel at the Mooring Masters Boarding Area, the port derrick of the vessel should be up and ready to lift the mooring and hose connection gear on board the vessel from the mooring launch, and the vessel must be equipped on the forecastle head with at least 2 good quality mooring lines, each not less than 120 fathoms in length and of buoyant material if possible, together with an adequate supply of lashing ropes and shackles. The mooring lines should be laid out free for running adjacent to bitts and warping winches. The warping winches or windlass should be in good working order and must be adequate to handle mooring lines under heavy strain.

On the port side, opposite to the vessel's manifold, there must be equipment capable of lifting the floating cargo hose, a 7.5 ton lift, safely and efficiently from the sea surface over the port rail to the vessel's manifold. Vessels must also have adequate mooring or loading facilities or lines or gear, the Mooring Masters must so inform the vessel's Master and in such event the vessel will not be brought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Masters.

Connecting Hose: After the vessel has been securely moored, the floating cargo hose will be hoisted to the vessel's port side rail amidship by vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, 920 ft. in length, fitted with a 150 ASA flat face flange for connection to the vessel's manifold. The vessel should have adapters and fittings on board so as to enable such floating cargo hose to be connected to the vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the vessel's crew as directed by the vessel's Officer-in-charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Masters, who will remain on board the entire time the vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.

Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for vessels using one 16 in. deck hose and 150 p.s.i. at vessel's rail is approximately 23,000 barrels per hour. In order to save vessel time and make the loading berth available for other vessels, it is requested that ballast be pumped as fast as possible and that vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers or mud boxes) to the flow of crude oil into the vessel, be removed before the arrival of the vessel at the loading berth.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Masters and the Officer-in-charge of the loading operations for the vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Masters, which permission shall not be given until the pre-loading conference has been completed. The vessel's Master shall remain responsible for the safety of the vessel and all operations on board the vessel at all times. The Mooring Masters will advise the Officer-in-charge of the loading operations for the vessel with respect to the loading pressures and hazards but the Mooring Masters will not direct any aspect of the loading except as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the vessel's valves is the direct responsibility of vessel's personnel. The Mooring Masters shall have the right to suspend cargo loading operations or to require the vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the vessel, or at anytime the Mooring Masters believe or become aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the vessel.

Oil Valve Control: The incoming oil stream is controlled onshore and the vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and could result in a pollution incident. Vessels will be held legally responsible for any damage resulting from the vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by vessel personnel during the loading operation so that a reduction in the loading rate, before topping of the final tank or tanks, may be arranged through the Mooring Masters by the Officer-in-charge of the loading operations for the vessel. A normal standby warning should be given about 15 minutes before the shutdown of the loading operations. Upon the request from a vessel to shut down the loading operations, a minimum of 5 minutes will be normally required to stop the flow of crude oil. Vessel's personnel shall be responsible for the call to stop the loading of the vessel. When cargo has ceased to flow, the valves on the shore will be closed and the vessel's manifold valves may then be closed.

Emergency Signal: Emergency signals and messages will be relayed by VHF/UHF radios and radio telephone links available with the Mooring Masters.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 1 mile and show an unbroken light around the horizon.

Shore Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, costs or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back ashore. Some delays in stopping the flow of crude oil are always incurred when such a shore stop request is made.

BALLAST: There are no facilities for the off-loading of dirty ballast but clean oil-free ballast may be discharged overboard from the vessel. It is the Master's responsibility to see that no oil (crude, bunker, diesel, bunker C, or oily bilge water) is pumped or spilled overboard from the vessel. All deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean oil-free ballast may be discharged.

The discharge of oil mixtures from vessels while en-route to Hamriyah Oil Terminal is prohibited.

Masters are warned that when disposing of dirty ballast or bilge water, all pipelines, sea suctions, strainers and pumps which are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Vessels must have sufficient ballast for safe manoeuvring and, where practicable, should arrive at the loading berth with the propeller completely submerged and trimmed 8 ft. to 10 ft. by the stern.

Due to the sudden and often unexpected onset of high winds in this area, it is essential that this condition is maintained, and the vessel is fully manoeuverable at all times, and also that the vessel is able to commence loading without delay as soon as the hose is connected. Therefore, vessels, arriving with clean ballast to discharge, must arrange this ballast in such a way that either it can be discharged concurrently with loading or after departure, while maintaining satisfactory segregation from the cargo.

The Mooring Masters may refuse to permit the mooring of any vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, vessel's tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place.

Vessels must keep a constant watch on the side of the vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Masters shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the vessel and the findings reported to the Mooring Masters. Discharging shall not resume without permission of the Mooring Masters.

If, during any inspection or during the process of loading, it is revealed that a vessel's tank is not oil-tight, the vessel will be rejected by the Mooring Masters and refused further loading until satisfactory evidence of effective repairs is submitted and the vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, vessels are required to illuminate the vessel and the waters around the vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness. Such illumination must be to the satisfaction of the Mooring Masters and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the vessel.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical or hospital facilities are available at Hamriyah Terminal, but private doctors and hospital facilities are available in the town of Sharjah.

CONSULS: There are no consulates in the village of Hamriyah; however, consular or diplomatic representatives for many nations maintain offices in the cities of Abu Dhabi and Dubai.

REPAIRS: The Masters of vessels loading at the loading berth are advised that the loading berth is considered an "open and unsheltered roadstead" and under no circumstances may engines be shut down for repairs while the vessel is at the loading berth. There are no facilities for making vessel repairs at Hamriyah Oil Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's agent to utilise the repair facilities at other ports.

SURVEYORS: No cargo inspectors or marine surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

SHORE LEAVE/REPATRIATION: Vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the loading berth. There are no facilities for crew change at the loading berth.

WEATHER: *Climate:* The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather Data Summary:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55°F.
Highest mean daily maximum air temperature	102°F.
Lowest average monthly sea surface temperature	72°F.
Highest average monthly sea surface temperature	90°F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year. The maximum current is up to 3 knots.

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g., waves over 8 ft. occur 0.2 per cent of the time).

SAFETY: The vessel's personnel are responsible for the safety of the vessel and themselves and shall take all necessary precautions, whether or not so advised by the Company or the Mooring Masters, having in mind the hazards of the loading operation, the cargo being handled, the weather condition and any other circumstances requiring special care or caution. The vessel's personnel shall also adhere to all safety precautions generally followed in the marine industry as well as all requirements and regulations imposed by the Company. Any safety precautions, requirements and regulations imposed by the Company and disregarded by the vessel's Master, Officers or crew will be considered a just cause for rejection of the vessel and all expenses related thereto shall be for the vessel's account. While the vessel is moored or within the vicinity of the loading berth, the vessel's personnel and the vessel's operations must comply or be in accordance with the following safety requirements:

(a) All ports opening onto the decks of the vessel are to be kept closed during cargo loading operations and all doors opened for access other than the pumproom doors must be closed immediately after use.

(b) Smoking is strictly prohibited on board the vessel and on the loading berth except in those areas designated by the Master as smoking areas. No areas outside of the accommodation areas shall be so designated. The Master is responsible for ensuring that all vessel personnel are informed of the designated smoking areas and shall post suitable notices regarding same. The Mooring Masters may request the Master to further limit the vessel's "No Smoking" areas as conditions warrant. Matches and lighters for personal use shall not be carried while outside the designated smoking areas and personnel shall be so instructed. The Master shall instruct the Officers and crew of the vessel not to throw lighted cigars or cigarettes overside or out of port holes. There may be occasions when smoking will be entirely prohibited.

(c) The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited and only approved intrinsically safe self-contained flashlights are permitted on deck.

(d) Ventilators must be so trimmed as to exclude flammable gases entering the area and if this cannot be done the ventilators must be completely closed.

(e) The vessel's engines, steering gear and other essential manoeuvring equipment and deck machinery must remain ready with full power for immediate use to permit the vessel to clear the area upon instruction from the Company or the Mooring Masters to do so.

(f) Window type air conditioners must be disconnected from their power source and not used unless a certificate can be produced from a recognised authority to show that the unit is safe to operate in flammable gas areas.

(g) The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast. The use of intrinsically safe VHF radios for cargo handling and safety operations are permitted.

(h) A continuous and efficient fire watch must be maintained on deck and in the engine room at all times. The vessel's fire fighting equipment shall be ready for instant use at all times throughout the vessel. Fire hoses of sufficient length to reach all parts of the vessel must be laid out and connected to hydrants and there must be full pressure on the deck line.

(i) Recommendations contained in the I.C.S. International Safety Guide for oil tankers and terminals covering the loading and discharge of tankers shall be strictly followed at all times.

(j) The only open flames allowed while the vessel is at the loading berth are those in the vessel's boilers and galley equipment. Sufficient fire extinguishers must always be provided near the galley and boilers.

(k) Burners, tubes, uptakes, exhaust manifolds and spark arrestors shall be maintained in good working order and kept clean. Funnel uptakes and boiler tubes shall not be blown while the vessel is at the loading berth. Highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever while the vessel is at the loading berth.

(l) In the event of fire breaking out on any part of the vessel, however minor the fire may be, the fire alarm must be given immediately. The fire alarm will consist of a succession of long blasts on the vessel's whistle together with a rapid and continuous ringing of the vessel's bell.

(m) Not less than 1 Deck Officer and 3 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the vessel is at the loading berth.

(n) Not less than 1 engineer shall be on duty, alert, available and in charge of the engine room at all times while the vessel is at the loading berth.

(o) A member of the vessel's crew, not one involved in any way with the loading operation, must be stationed on the bow of the vessel while the vessel is at the loading berth and a constant watch must be maintained on the moorings.

(p) During the discharge of clean ballast and the loading of crude oil, the vessel and the waters around the vessel must be illuminated during the hours of darkness with all available and suitable searchlights and floodlights.

(q) Before the floating cargo hose is brought on board the vessel, all deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times. The deck scuppers must remain plugged until the floating cargo hose has been disconnected. All other materials necessary to clean up any oil spillage on deck must be on hand for immediate use.

(r) All unused bunker connections, cargo connections and vessel manifolds must be fitted with blank flanges including the stern discharge line if fitted.

(s) All cargo tank hatch covers and ullage port covers are to be kept closed except where tanks are to be hand sampled or hand ullaged in which case the ullage openings may be opened to sample or ullage the cargo.

(t) All cargo and ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

(u) Prior to the commencement of any loading operations, all empty vessel cargo tanks and tanks carrying cargo must be under positive pressure and fully inerted with gas having an oxygen content of less than 8 per cent.

(v) THE COMPANY DOES NOT HAVE A TUG OR VESSEL IN THE AREA EQUIPPED WITH FIRE FIGHTING APPARATUS.

GENERAL: *Government Officials:* Sharjah Officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and Police, are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the loading berth, it is expected that the vessel will provide food for these guards and other Sharjah Officials. Vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such Sharjah Officials.
Visitors: Visitors are not allowed to embark or disembark from the vessel at the loading berth.
Supplies: Commissary supplies, steward's stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.
Contraband: The Company prohibits unauthorised craft from coming alongside vessels while at the loading berth without the permission of the Mooring Masters. To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage any such craft from coming alongside while vessels are at or in the vicinity of the loading berth.
Garbage: The dumping of garbage and refuse overside is prohibited.
Agency: The Company does not perform any vessel Agency functions. Vessels calling at Hamriyah must arrange for their own Agents.

SHIPMASTER'S REPORT: July 1983 (updated 1986).
Location: Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company. The terminal is located in the Emirate of Sharjah, United Arab Emirates. A 30 in. pipe-line runs from the shore tank to a S.P.M. located in position Lat. 25° 34′ 31.68″ N., Long.55° 24′ 05.8″ E. and is operated by Lamnalco.
Documents: Health Declaration and Crew Lists. Customs, Immigration and Quarantine Officers have an office in Sharjah but usually do not come on board.
Pilotage: A pilot ladder to be prepared on vessel's Port side and lowered to about 12 ft. above the waterline. If the height of the deck exceeds 30 ft. a pilot ladder in conjunction with the accommodation ladder must be rigged.
Anchorages: The customary anchorage for vessels awaiting the loading berth of Hamriyah Oil Terminal is 3 miles North of the S.P.M. Anchorage within 3 miles is strictly prohibited unless instructed by the Mooring Masters.
Max. Size: Vessels up to 250,000 tons have been accepted, subject to weather conditions.
Health: Rules are the same as found all over the world.
Radio/VHF: Amoco Sharjah and Lamnalco should be contacted by radio 3 days prior arrival via Bahrain Radio and maintain contact until prior arrival.

Telex: 68685 Amcosh EM and 68433 Lamshj EM.

Following information is required by both parties:

1. ETA.
2. Arrival Draft.
3. Quantity to be loaded.
4. Estimated sailing draft.
5. Last port of call.
6. Whether vessel has clean bill of health.
7. Distance bow to manifold.
8. Confirm vessels ability to load/deballast concurrently or alternatively to deballast after loading.

Both companies keep watch on international VHF Marine Channel 16.
Berthing: This cylindrical buoy is equipped with a navigational white flashing light code "U", range 5.7 miles, a radar reflector and a racon beacon coded "Zulu".

On forecastle, vessel should have 4 good quality mooring lines, minimum length of 120 fathoms and preferably of the floating type. Vessel's lines to be used to pick up the mooring lines of the buoy. The end of the buoy's mooring line consists of a steel chafing chain and will be secured onto vessel's bitts by mooring strops supplied by Lamnalco.

Port derrick should be up and ready for lifting moorings and cargo hose connecting gear and capable of lifting 7.5 tons safely.

Mooring Masters and Cargo Oil Surveyor stay on board while vessel is on the berth and both to be accommodated in an officer's cabin and meals served in officer's messroom.
Notice of Readiness: Will only be accepted between 0600 and 1800 hrs. but will not be accepted at times when the Hamriyah Oil Terminal is closed on a public holiday or Friday (Moslem Sabbath). However, if the vessel is moved to the berth without delay after having arrived at any time and vessel is ready for mooring and loading the Mooring Masters will accept the N.O.R. at the boarding time. Laytime shall commence upon expiration of 6 hours after accepting the N.O.R. and shall continue until hose has been disconnected from vessel's manifold.
Loading: The floating hose is 20 in. diameter with a 16 in. hose for connecting to the vessel's manifold. Loading rate approximately 23,000 bbls.p.h. Only one type of oil available, being crude oil condensate approximate API 50/60° and loading temperature approximately 95°F.
Ballast: There are no dirty ballast reception facilities and all vessels must arrive with sufficient clean ballast for manoeuvring with the propeller submerged and a trim of 8 ft. – 10 ft. by the stern. Non-permanent clean ballast to be discharged prior to commencing of loading.
Medical: Neither medical nor hospital facilities are available at Hamriyah Oil Terminal. Requests for emergency medical assistance should be passed to Hamriyah Oil Terminal by VHF and the information will be passed to vessel's Agent. Private doctors and hospital are available in the town of Sharjah.
Supplies: Stores, fresh water, laundry services, bunkers and lubricant not available via Amoco and may not be loaded at the berth. Availability of items should be handled through vessel's Agent and loading carried out elsewhere.
Consuls: No consulates in Sharjah; however, many nations have consular or diplomatic representatives in Abu Dhabi and Dubai.
Repatriation/Shore Leave: Not permitted while at loading berth.
Currents: Predominantly counter-clockwise circulation throughout the year along the Sharjah coastline and is generally not strong. Strongest in January (0.4 – 0.8 knots) and in April (0.6 – 1.7 knots).
Weather: Winds are usually light from Western quadrant, except during June to September when the Shamal blows and from November to April during passing of cold fronts with winds up to 20 knots producing rough seas.

AUTHORITY: *Operator:* Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* (9716) 355100. *Telex:* 68685 Amcosh EM. *FAX:* 355142. *Contact:* B. G. Bramley, General Manager.

AGENT: See "Sharjah".

HAMRIYAH LPG TERMINAL: 25.28 N. 55.29 E.

(See Plan)

LOCATION: The Terminal is located in position Lat. 25° 27′ 37.3″ N., Long. 55° 29′ 12″ E. outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman.

The Hamriyah LPG Terminal is owned by Sharjah LPG Company Limited ("Shalco") and operated by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting.

The Terminal consists of 2 storage tanks for propane and butane, and a marine loading facility capable of loading vessels ranging in size from 30,000 cu.m. to 83,000 cu.m. 2 liquid loading lines and 2 vapour return lines are mounted on the trestle connecting the breakwater and the loading platform.

DOCUMENTS: The following documents are required when calling at the Hamriyah LPG Terminal:

Health Declaration.
Crew List.
Clearance from last port of call.

Officials: No immigration, Customs or Health Officials stationed at the Terminal.

APPROACHES: *Approach Channel:* The approach channel's entrance is located in an approximate position of Lat. 25° 30′ 45″ N., Long. 55° 27′ 23″ E. The Fairway Buoy (Fl. "A" ev. 15 sec.) is located in position Lat. 25° 32′ 05″ N., Long. 55° 25′ 59″ E. The channel's length is 4,000 m. The width is 180 m. in the seaward channel, 250 m. in the intermediate channel and 180 m. in the near harbour channel. the channel depth has been dredged to 15 m.

Buoys:

Southern Training Wall	5	Green

PILOTAGE: Pilotage is compulsory from the seaward entrance of the dredged channel. The Pilot will board at or near the designated anchorage. The Pilot will be provided by the Operator and vessels will not be allowed to approach or depart from the port without the Operator's designated Pilot being on board. The Pilot will advise vessel's personnel on the approach through the channel to the jetty and all operations of mooring and unmooring. All manoeuvring of vessels within the loading berth area shall be performed by vessel's personnel as directed by the vessel's Master in accordance with the procedure advised by the Pilot. The vessel's Master must be on the bridge at all times while the vessel is manoeuvring.

Vessels shall provide food for the Pilot and Terminal Supervisor while on board the vessels and shall accommodate the Pilot and Terminal Supervisor in suitable accommodation equipped with private toilet facilities. The Pilot and Terminal Supervisor shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Pilot and Terminal Supervisor.

Vessels are required to have a clean and efficient pilot ladder, fitted with spreaders and manropes, safely and securely rigged ready for the Pilot to immediately embark and disembark and of sufficient length to reach the Pilot's launch. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Pilot's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Pilot in order to effect the safe embarking or disembarking of the Pilot.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. The rigging of the pilot ladder for the embarkation and disembarkation of the Pilot shall be supervised by a responsible officer and shall be positioned so that the ladder is well clear of any overboard discharge and such that each step of the ladder rests securely against the vessel's side.

If, in the sole opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Pilotage Radio Contact: Pilot/Vessel contact will be maintained on VHF Channel 16 or other frequency as mutually agreed by Operator's Marine Representative and vessel's Master.

Arrival at Anchorage/Pilot Boarding Area: Means of access to the vessel by the Pilot shall be provided by the vessel in accordance with the requirements of SOLAS. At night, the access area shall be adequately illuminated to provide a safe approach and boarding by the Pilot, Government Officials and Terminal Representatives.

The Conditions of Use of Shalco's Terminal Facilities will be presented to the Master for acceptance and signature on behalf of himself and the Owners prior to departures from the Anchorage/Pilot Boarding Area.

As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1500, provided that the vessel is apparently in all respects ready to moor and accept the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, and may not be accepted if the vessel arrives prior to the date upon which it is nominated to load. Berthing is not allowed during winds from Northeast.

ANCHORAGE: The customary anchorage area for vessels awaiting loading at the Hamriyah LPG Terminal is a circle 1 mile in diameter with its centre in an approximate position of Lat. 25° 30′ N., Long. 55° 25′ E. There is an existing SBM located at approximately Lat. 25° 34′ N., Long. 55° 24′ E. for the Hamriyah Oil Terminal. the SBM is fitted with a flashing light and racon. This existing SBM may be used as a reference to the LPG Terminal anchorage which is 3 miles W.S.W. of the LPG entrance channel.

When within VHF communication range, Masters of vessels shoul ascertain berthing prospects from the terminal. In all cases when tankers are instructed to anchor, Masters should obtain clearance to their intended anchorage position from the Operator.

Radio Watches: While at the anchorage awaiting the loading berth vessels should maintain a listening watch on VHF Channel 16 with the Terminal Operator.

Caution: Masters are cautioned that a 30 in. submarine pipe-line runs 7.6 miles from the Hamriyah Oil Terminal to an offshore SBM facility.

RESTRICTIONS: Vessels will be moored/unmoored in daylight only, but the loading will be performed at any hour, weather and circumstances permitting.

Also see "Pilotage".

MAX. SIZE: The harbour has been dredged to a depth of 14 m. Maximum draft for vessels calling at the Hamriyah LPG Terminal is 12.6 m.

Max. Size: 83,000 cu.m. Max. LOA 230 m.

Minimum LOA 186 m. Minimum flat side 80 m.

HEALTH: No officials stationed at the terminal.

RADIO: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Operator. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Operator and with the Operator's designated marine service when 3 days distant from Hamriyah LPG Terminal and maintain such contact until just prior to arrival at Hamriyah LPG Terminal. Vessels should send an ETA telex to the Operator (Telex No. 68685 a/b Amcosh EM) and to the Operator's designated marine service (Telex: 68433, a/b Lamsh EM) not less than 72 hours prior to arrival at Hamriyah LPG Terminal, providing the following information:

1. ETA.
2. Estimated arrival draft, fore and aft.
3. Estimated sailing draft, fore and aft.
4. Whether part-loaded or in ballast. If part-loaded, nature and quantity of cargo.
5. Last port of call.
6. Last 3 cargoes carried.

Further ETA telexes should be sent to the Operator and the Operator's designated marine service when the vessel is 48 hours and 24 hours distant from Hamriyah LPG Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's Readiness to Load on arrival. Local time is Greenwich Mean Time plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

VHF: *Ship-to-Shore Communications:* The Company and its designated agents are equipped with VHF radios using international frequencies and maintain a radio watch on the international VHF marine Channel 16.

On approach to Hamriyah LPG Terminal, the vessel is required to maintain a radio watch on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Pilot may be replaced by a Mooring Master (Safety Officer) who will be in direct charge of the portable VHF ship-to-shore radio and all ship-to-shore communications will be by portable VHF radio. The use of the vessel's radio station and/or radar is prohibited during cargo loading operations.

The following are terminal call signs in use during loading:

LPG Terminal UHF Channel 1, Monitor VHF Channel 3:

Amoco 410 – LPG Terminal Control Room.
Amoco 411 – LPG Terminal Operator.
Amoco 412 – LPG Terminal Spare Operator.
Amoco 415 – LPG Jetty Control Operator.
Amoco 416 – LPG Jetty Mooring Crew.
Amoco 417 – Lead Tug.
Amoco 418 – Second Tug.
Amoco 419 – LPG Tanker.
Amoco 420 – Amoco Terminal Supervisor.

TUGS: Tugs will be provided by the Terminal Operator. Due to the infrequency of LPG liftings, tugs will vary as to individual specifications. However, 2 tugs will normally attend each lifting and each will have a minimum of 1,500 h.p. and a bollard pull of 15 tons.

BERTHING: *Due to equipment limitations, it is not possible to purge inert gas from arriving vessels. Only vessels arriving in an LPG purged and cooled down condition will be accepted at Hamriyah LPG Terminal. Checks made with an oxygen analyser must read at 2 per cent oxygen or lower.*

Berthing: The berth is fitted with 2 shock absorbing fenders, 70 m. apart. Design is based on a 57,000 d.w.t. LPG vessel. Dredged depth alongside the jetty face is 14.8 m. at mean lowest low water level. The vessel turning diameter in the harbour is 600 m.

Vessel Specifications: Based on the above, vessel specifications must be:

Length: Maximum 230 m., minimum 186 m.

Draft: Maximum 12.60 m.

Mooring: The berth is equipped with 2 breasting dolphins which have 2 quick-release hooks along with powered capstans. The 4 mooring dolphins are each equipped with 3 quick-release hooks. All quick-release hook units are provided with attached powered capstans. All quick-release hooks have a capacity of 60 tonnes, and can be manually operated. The capstan capacity is 2 tonnes with a rope speed of 30 m. per minute. Bollards, bitts and cleats are also provided.

For safety reasons, vessels will be moored with their portside only to the jetty.

Ships should remain adequately secured in their moorings. Ranging of the ship is to be prevented by the vessel's personnel keeping all mooring lines taut. Attention is to be given by vessel's personnel to the movement caused by passing ships, wind, currents, tides, and the cargo operation in progress. Adequate mooring of the vessel is the Master's responsibility and the vessel and its Owner shall be responsible for all damage to the loading berth and related facilities in any way attributable to the failure of the vessel's personnel to keep all mooring lines taut. Operator may suspend cargo operations and have the vessel put off the berth for any failure to comply with this provision with all resulting delay to be for the account of the vessel.

Vessel's personnel should be at their duty stations and alert at all times during mooring, unmooring, hose handling and cargo operations. Ships fitted with automatic tension winches should not use such winches in the automatic mode as they may not always hold the vessel in position at the berth.

LOADING: *Tanker/Jetty Manifold Connections:* The jetty has a basic configuration of VLLV. Butane and propane can be loaded down either liquid line, and concurrently. However, the Terminal's preferred configuration is butane forward and propane aft, and ships should endeavour to comply with this if possible. Complete vessel's particulars shall be supplied for Company's approval at the nomination stages. Vessels are required to load both products concurrently when lifting both products. Therefore, manifold configuration must be adhered to stringently. The vessel manifold arrangement must be VLLV.

The maximum loading rate for one product at a time is 1,300 metric tonnes per hour, and the minimum 600 metric tonnes per hour. For concurrent loading, the maximum loading rate is 1,000 metric tonnes per hour per product, and the minimum acceptable loading rate 600 metric tonnes per hour per product, apart from commencement and completion.

It is emphasised that venting of vapour to atmosphere is not allowed. Vapour should be returned to the Terminal via the vapour return lines provided or reliquified and returned to the cargo tanks.

The propane and butane loading arms are 12 in. in diameter. The return vapour arms are 8 in. in diameter. Each arm is fitted with a hydraulic coupler which can be adapted to fit different sizes. The loading arms can be adapted to fit 16 in., 12 in. and 10 in. standard 150 lbs ANSI flanges. The vapour return lines can be adapted to fit 10 in. and 8 in. standard 150 lbs ANSI flanges.

Any other flange size or ratings other than the above stated will require special fabricated spool pieces to meet the foregoing flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the hydraulic couplers to the proper ship's flange. Vessels without proper spool pieces will be rejected.

Ship's manifold connections must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

Distance of ship's manifold from ship's side:

	Min.	*Max.*
12 in. Loading Arm	2.0 m.	6.0 m.
Distance centre to centre for 12 in. ship's manifold	1.5 m.	3.5 m.
Height of centre point of manifold above deck	0.85 m.	2.1 m.

Jetty Emergency Shutdown Systems and Purge Systems: The jetty is equipped with an Emergency Shutdown (ESD) system to stop loading operations. The system is activated by pushing an electronic stop button in the jetty control room or on the pendant which will be placed on board the vessel. The pendant with the ESD button placed aboard the vessel is to be used only in an emergency, and is used in preference to the ship's systems. On activating the ESD system, all loading pumps and loading arms will be shut down.

Documentation: Before and after completion of loading operations the vessel shall be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Time Sheet, Certificate of Quality, Certificate of Quantity and Certificate of Origin will be completed. All such documents will be signed by the Master of the vessel prior to the vessel's departure and by the Operator's Terminal Supervisor, as appropriate. If required or requested by the Master of the vessel, the Agent of the vessel may sign the documents on behalf of the vessel's Master. The official quantity of the LPG delivered to the vessel shall be determined by the use of vessel gauges applied to cargo tank volume calibrations. Tests for quality determinations shall be carried out by the Licensed Inspector.

The vessel may depart after receipt of the Port Clearance document duly signed by the appointed Government Official and the Operator's Terminal Supervisor.

Cargo Information: The vessel's Master will be informed of the approximate gravity and loading temperature of the LPG prior to commencement of loading. An official and final figure for specific gravity will be provided as soon as practical after completion of loading.

BALLAST: There are no facilities for off-loading ballast at Hamriyah LPG Terminal. Oil-free ballast suitable for pumping directly to the sea may be discharged overboard from the vessel. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or made to keep such unsuitable ballast segregated on board. It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, shall be subject to prosecution by the United Arab Emirates authorities if such pollution does occur.

FIRE PRECAUTIONS: The vessel's fire fighting appliances, including its main and emergency fire pumps shall be kept on standby and ready for immediate use. Before berthing operations comence, fire hoses shall be uncoiled and connected to the fire main which should be kept pressurised. Fire monitors should be elevated and maintained for immediate use. The water spray system of the vessel must be tested and maintained ready for use. The dry powder system or portable units shall be ready for use and in close proximity to the vessel's manifold.

The vessel is solely responsible for, and presumed capable of, fighting any fire on the vessel without assistance from terminal sources.

Should fire break out on either the vessel or the berth, the vessel's Master or deputy must immediately report the fire by the quickest means possible (VHF/UHF/telephone contact, sounding ship's siren, etc.) to the Terminal. The vessel's Master or deputy must also notify the Jetty Supervisor by means of VHF Channel 16. All cargo and ballast operations will be stopped immediately and then all valves closed. As the vessel's Master or deputy assisted by the crew is responsible for fighting the fire on board the vessel, he should stand-by to disconnect hoses or metal arms.

The jetty supervisor will be responsible for initiating the terminal fire alarm system and actuating the terminal emergency plan. He shall contact the senior deck officer on board the vessel to ascertain what assistance can be rendered by Terminal equipment and personnel.

In the event of an emergency, an alarm signal (continuous siren) will be sounded.

The loading platform fire fighting system has one main motor driven fire water pump and one stand-by diesel engine driven fire water pump. Both pumps are capable of handling 1,500 g.p.m. at 150 p.s.i.g. pressure, and are located on the jetty trestle.

The vessel's Master or his deputy will alert ship's personnel to stand-by for special instructions from the Terminal Supervisor. These instructions may require immediate departure of the vessel from the berth.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah LPG Terminal by UHF Radio (Amoco 210) or the Terminal Supervisor by UHF Radio (Amoco 420). Private doctors and hospital facilities are available in the town of Sharjah.

DENSITY: 1029.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no Consulates in the village of Hamriyah; however, the Consular or Diplomatic Representatives for many nations maintain offices in the towns of Abu Dhabi and Dubai.

REPAIRS: There are no facilities for making vessel repairs at Hamriyah LPG Terminal and no repairs will be allowed at the jetty. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.

SURVEYORS: No Cargo Inspectors or Marine Surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

CUSTOMS: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. national citizens and is controlled for other nationals. Masters are warned of the serious consequences of offering such drinks to the Terminal staff or other officials who may board the vessel.

REPATRIATION: Not possible as no officials based at the terminal.

POLICE/AMBULANCE/FIRE: Contact terminal operator.

WEATHER/TIDES: *General:* The Company can advise of the following general environmental characteristics for the Sharjah coastline area but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.

Climate: The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55° F.
Highest mean daily maximum air temperature	102° F.
Lowest average monthly sea surface temperature	72° F.
Highest average monthly sea surface temperature	90° F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g. waves over 8 ft. occur 0.2 per cent of the time).

GENERAL: *Flag:* Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

Government Officials: Sharjah officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Port Authorities and Police are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the jetty it is expected that the vessel will provide food for these Guards and other Sharjah officials.

APPROACHES: *Approach Channel:* The approach channel's entrance is located in an approximate position of Lat. 25° 30′ 45″ N., Long. 55° 27′ 23″ E. The Fairway Buoy (Fl. "A" ev. 15 sec.) is located in position Lat. 25° 32′ 05″ N., Long. 55° 25′ 59″ E. The channel's length is 4,000 m. The width is 180 m. in the seaward channel, 250 m. in the intermediate channel and 180 m. in the near harbour channel. the channel depth has been dredged to 15 m.

Buoys:

Location	*Nominal Range (nautical miles)*	*Light Colour*
Fairway	5	White
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red

Channel Marker	3	Red
Channel Marker	3	Green
Channel Marker	3	Red
Channel Marker	3	Green
Basin Limit Marker	2	Yellow
Basin Limit Marker	2	Yellow
Basin Limit Marker	2	Yellow

Beacons:

Location	*Nominal Range (nautical miles)*	*Light Colour*
Main Breakwater	13	Green
Lee Breakwater	5	Red
Leading Light	(White) 5	Green 2° Sectored White 1° Red 2°
Northern Training Wall	5	Red
Southern Training Wall	5	Green

PILOTAGE: Pilotage is compulsory from the seaward entrance of the dredged channel. The Pilot will board at or near the designated anchorage. The Pilot will be provided by the Operator and vessels will not be allowed to approach or depart from the port without the Operator's designated Pilot being on board. The Pilot will advise vessel's personnel on the approach through the channel to the jetty and all operations of mooring and unmooring. All manoeuvring of vessels within the loading berth area shall be performed by vessel's personnel as directed by the vessel's Master in accordance with the procedure advised by the Pilot. The vessel's Master must be on the bridge at all times while the vessel is manoeuvring.

Vessels shall provide food for the Pilot and Terminal Supervisor while on board the vessels and shall accommodate the Pilot and Terminal Supervisor in suitable accommodation equipped with private toilet facilities. The Pilot and Terminal Supervisor shall have access to the bridge and/or central area of the vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Pilot and Terminal Supervisor.

Vessels are required to have a clean and efficient pilot ladder, fitted with spreaders and manropes, safely and securely rigged ready for the Pilot to immediately embark and disembark and of sufficient length to reach the Pilot's launch. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Pilot's bag shall also be available at the pilot ladder head. Vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Pilot in order to effect the safe embarking or disembarking of the Pilot.

Whenever, as in the case of large vessels in light condition, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. The rigging of the pilot ladder for the embarkation and disembarkation of the Pilot shall be supervised by a responsible officer and shall be positioned so that the ladder is well clear of any overboard discharge and such that each step of the ladder rests securely against the vessel's side.

If, in the sole opinion of the Pilot, the pilot ladder is not safe, the Pilot may refuse to board the vessel and any delay caused by such refusal shall be for the vessel's account.

Pilotage Radio Contact: Pilot/Vessel contact will be maintained on VHF Channel 16 or other frequency as mutually agreed by Operator's Marine Representative and vessel's Master.

Arrival at Anchorage/Pilot Boarding Area: Means of access to the vessel by the Pilot shall be provided by the vessel in accordance with the requirements of SOLAS. At night, the access area shall be adequately illuminated to provide a safe approach and boarding by the Pilot, Government Officials and Terminal Representatives.

The Conditions of Use of Shalco's Terminal Facilities will be presented to the Master for acceptance and signature on behalf of himself and the Owners prior to departures from the Anchorage/Pilot Boarding Area.

As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1500, provided that the vessel is apparently in all respects ready to moor and accept the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, and may not be accepted if the vessel arrives prior to the date upon which it is nominated to load. Berthing is not allowed during winds from Northeast.

ANCHORAGE: The customary anchorage area for vessels awaiting loading at the Hamriyah LPG Terminal is a circle 1 mile in diameter with its centre in an approximate position of Lat. 25° 30′ N., Long. 55° 25′ E. There is an existing SBM located at approximately Lat. 25° 34′ N., Long. 55° 24′ E. for the Hamriyah Oil Terminal. the SBM is fitted with a flashing light and racon. This existing SBM may be used as a reference to the LPG Terminal anchorage which is 3 miles W.S.W. of the LPG entrance channel.

When within VHF communication range, Masters of vessels shoul ascertain berthing prospects from the terminal. In all cases where tankers are instructed to anchor, Masters should obtain clearance for their intended anchorage position from the Operator.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on VHF Channel 16 with the Terminal Operator.

Caution: Masters are cautioned that a 30 in. submarine pipe-line runs 7.6 miles from the Hamriyah Oil Terminal to an offshore SBM facility.

RESTRICTIONS: Vessels will be moored/unmoored in daylight only, but the loading will be performed at any hour, weather and circumstances permitting.

Also see "Pilotage".

MAX. SIZE: The harbour has been dredged to a depth of 14 m. Maximum draft for vessels calling at the Hamriyah LPG Terminal is 12.6 m.

Max. Size: 83,000 cu.m. Max. LOA 230 m.

Minimum LOA 186 m. Minimum flat side 80 m.

HEALTH: No officials stationed at the terminal.

RADIO: *Initial Radio Communications:* The radio station at Bahrain will handle the initial radio communications between vessels and the Operator. The station call sign is "A9M" and the station operates on a 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Operator and with the Operator's designated marine service when 3 days distant from Hamriyah LPG Terminal and maintain such contact until just prior to arrival at Hamriyah LPG Terminal. Vessels should send an ETA telex to the Operator (Telex No. 68685 a/b Amcosh EM) and to the Operator's designated marine service (Telex: 68433, a/b Lamshy EM) not less than 72 hours prior to arrival at Hamriyah LPG Terminal, providing the following information:

1. ETA.
2. Estimated arrival draft, fore and aft.
3. Estimated sailing draft, fore and aft.
4. Whether part-loaded or in ballast. If part-loaded, nature and quantity of cargo.
5. Last port of call.
6. Last 3 cargoes carried.

Further ETA telexes should be sent to the Operator and the Operator's designated marine service when the vessel is 48 hours and 24 hours distant from Hamriyah LPG Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's Readiness to Load on arrival. Local time is Greenwich Mean Time plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

VHF: *Ship-to-Shore Communications:* The Company and its designated agents are equipped with VHF radios using international frequencies and maintain a radio watch on the international VHF marine Channel 16.

On approach to Hamriyah LPG Terminal, the vessel is required to maintain a radio watch on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Pilot may be replaced by a Mooring Master (Safety Officer) who will be in direct charge of the portable VHF ship-to-shore radio and all ship-to-shore communications will be by portable VHF radio. The use of the vessel's radio station and/or radar is prohibited during cargo loading operations.

The following are terminal call signs in use during loading:

LPG Terminal UHF Channel 1, Monitor VHF Channel 3:

Amoco 410 – LPG Terminal Control Room.
Amoco 411 – LPG Terminal Operator.
Amoco 412 – LPG Terminal Spare Operator.
Amoco 415 – LPG Jetty Control Operator.
Amoco 416 – LPG Jetty Mooring Crew.
Amoco 417 – Lead Tug.
Amoco 418 – Second Tug.
Amoco 419 – LPG Tanker.
Amoco 420 – Amoco Terminal Supervisor.

TUGS: Tugs will be provided by the Terminal Operator. Due to the infrequency of LPG liftings, tugs will vary as to individual specifications. However, 2 tugs will normally attend each lifting and each will have a minimum of 1,500 h.p. and a bollard pull of 15 tons.

BERTHING: *Due to equipment limitations, it is not possible to purge inert gas from arriving vessels. Only vessels arriving in an LPG purged and cooled down condition will be accepted at Hamriyah LPG Terminal. Checks made with an oxygen analyser must read at 2 per cent oxygen or lower.*

Berthing: The berth is fitted with 2 shock absorbing fenders, 70 m. apart. Design is based on a 57,000 d.w.t. LPG vessel. Dredged depth alongside the jetty face is 14.8 m. at mean lowest low water level. The vessel turning diameter in the harbour is 600 m.

Vessel Specifications: Based on the above, vessel specifications *must be:*

Length: Maximum 230 m., minimum 186 m.

Draft: Maximum 12.60 m.

Mooring: The berth is equipped with 2 breasting dolphins which have 2 quick-release hooks along with powered capstans. The 4 mooring dolphins are each equipped with 3 quick-release hooks. All quick-release hook units are provided with attached powered capstans. All quick-release hooks have a capacity of 60 tonnes, and can be manually operated. The capstan capacity is 2 tonnes with a rope speed of 30 m. per minute. Bollards, bitts and cleats are also provided.

For safety reasons, vessels will be moored with their portside only to the jetty.

Ships should remain adequately secured in their moorings. Ranging of the ship is to be prevented by the vessel's personnel keeping all mooring lines taut. Attention is to be given by vessel's personnel to the movement caused by passing ships, wind, currents, tides, and the cargo operation in progress. Adequate mooring of the vessel is the Master's responsibility and the vessel and its Owner shall be responsible for all damage to the loading berth and related facilities in any way attributable to the failure of the vessel's personnel to keep all mooring lines taut. Operator may suspend cargo operations and have the vessel put off the berth for any failure to comply with this provision with all resulting delay to be for the account of the vessel.

Vessel's personnel should be at their duty stations and alert at all times during mooring, unmooring, hose handling and cargo operations. Ships fitted with automatic tension winches should not use such winches in the automatic mode as they may not always hold the vessel in position at the berth.

LOADING: *Tanker/Jetty Manifold Connections:* The jetty has a basic configuration of VLLV. Butane and propane can be loaded down either liquid line, and concurrently. However, the Terminal's preferred configuration is butane forward and propane aft, and ships should endeavour to comply with this if possible. Complete vessel's particulars shall be supplied for Company's approval at the nomination stages. Vessels are required to load both products concurrently when lifting both products. Therefore, manifold configuration must be adhered to stringently. The vessel manifold arrangement must be VLLV.

The maximum loading rate for one product at a time is 1,300 metric tonnes per hour, and the minimum 600 metric tonnes per hour. For concurrent loading, the maximum loading rate is 1,000 metric tonnes per hour per product, and the minimum acceptable loading rate 600 metric tonnes per hour per product, apart from commencement and completion.

It is emphasised that venting of vapour to atmosphere is not allowed. Vapour should be returned to the Terminal via the vapour return lines provided or reliquified and returned to the cargo tanks.

The propane and butane loading arms are 12 in. in diameter. The return vapour arms are 8 in. in diameter. Each arm is fitted with a hydraulic coupler which can be adapted to fit different sizes. The loading arms can be adapted to fit 16 in., 12 in. and 10 in. standard 150 lbs ANSI flanges. The vapour return lines can be adapted to fit 10 in. and 8 in. standard 150 lbs ANSI flanges.

Any other flange size or ratings other than the above stated will require special fabricated spool pieces to meet the foregoing flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the hydraulic couplers to the proper ship's flange. Vessels without proper spool pieces will be rejected.

Ship's manifold connections must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

Distance of ship's manifold from ship's side:

	Min.	*Max.*
12 in. Loading Arm	2.0 m.	6.0 m.
Distance centre to centre for 12 in. ship's manifold	1.5 m.	3.5 m.
Height of centre point of manifold above deck	0.85 m.	2.1 m.

Jetty Emergency Shutdown Systems and Purge Systems: The jetty is equipped with an Emergency Shutdown (ESD) system to stop loading operations. The system is activated by pushing an electronic stop button in the jetty control room or on the pendant which will be placed on board the vessel. The pendant with the ESD button placed aboard the vessel is to be used only in an emergency, and is used in preference to the ship's systems. On activating the ESD system, all loading pumps and loading arms will be shut down.

Documentation: Before and after completion of loading operations the vessel shall be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Time Sheet, Certificate of Quality, Certificate of Quantity and Certificate of Origin will be completed. All such documents will be signed by the Master of the vessel prior to the vessel's departure and by the Operator's Terminal Supervisor, as appropriate. If required or requested by the Master of the vessel, the Agent of the vessel may sign the documents on behalf of the vessel's Master. The official quantity of the LPG delivered to the vessel shall be determined by the use of vessel gauges applied to cargo tank volume calibrations. Tests for quality determinations shall be carried out by the Licensed Inspector.

The vessel may depart after receipt of the Port Clearance document duly signed by the appointed Government Official and the Operator's Terminal Supervisor.

Cargo Information: The vessel's Master will be informed of the approximate gravity and loading temperature of the LPG prior to commencement of loading. An official and final figure for specific gravity will be provided as soon as practical after completion of loading.

BALLAST: There are no facilities for off-loading ballast at Hamriyah LPG Terminal. Oil-free ballast suitable for pumping directly to the sea may be discharged overboard from the vessel. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or made to keep such unsuitable ballast segregated on board. It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, shall be subject to prosecution by the United Arab Emirates authorities if such pollution does occur.

FIRE PRECAUTIONS: The vessel's fire fighting appliances, including its main and emergency fire pumps shall be kept on standby and ready for immediate use. Before berthing operations comence, fire hoses shall be uncoiled and connected to the fire main which should be kept pressurised. Fire monitors should be elevated and maintained for immediate use. The water spray system of the vessel must be tested and maintained ready for use. The dry powder system or portable units shall be ready for use and in close proximity to the vessel's manifold.

The vessel is solely responsible for, and presumed capable of, fighting any fire on the vessel without assistance from terminal sources.

Should fire break out on either the vessel or the berth, the vessel's Master or deputy must immediately report the fire by the quickest means possible (VHF/UHF/telephone contact, sounding ship's siren, etc.) to the Terminal. The vessel's Master or deputy must also notify the Jetty Supervisor by means of VHF Channel 16. All cargo and ballast operations will be stopped immediately and then all valves closed. As the vessel's Master or deputy assisted by the crew is responsible for fighting the fire on board the vessel, he should stand-by to disconnect hoses or metal arms.

The jetty supervisor will be responsible for initiating the terminal fire alarm system and actuating the terminal emergency plan. He shall contact the senior deck officer on board the vessel to ascertain what assistance can be rendered by Terminal equipment and personnel.

In the event of an emergency, an alarm signal (continuous siren) will be sounded.

The loading platform fire fighting system has one main motor driven fire water pump and one stand-by diesel engine driven fire water pump. Both pumps are capable of handling 1,500 g.p.m. at 150 p.s.i.g. pressure, and are located on the jetty trestle.

The vessel's Master or his deputy will alert ship's personnel to stand-by for special instructions from the Terminal Supervisor. These instructions may require immediate departure of the vessel from the berth.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah LPG Terminal by UHF Radio (Amoco 210) or the Terminal Supervisor by UHF Radio (Amoco 420). Private doctors and hospital facilities are available in the town of Sharjah.

DENSITY: 1029.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no Consulates in the village of Hamriyah; however, the Consular or Diplomatic Representatives for many nations maintain offices in the towns of Abu Dhabi and Dubai.

REPAIRS: There are no facilities for making vessel repairs at Hamriyah LPG Terminal and no repairs will be allowed at the jetty. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.

SURVEYORS: No Cargo Inspectors or Marine Surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

CUSTOMS: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. national citizens and is controlled for other nationals. Masters are warned of the serious consequences of offering such drinks to the Terminal staff or other officials who may board the vessel.

REPATRIATION: Not possible as no officials based at the terminal.

POLICE/AMBULANCE/FIRE: Contact terminal operator.

WEATHER/TIDES: *General:* The Company can advise of the following general environmental characteristics for the Sharjah coastline area but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.

Climate: The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.

Weather:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55° F.
Highest mean daily maximum air temperature	102° F.
Lowest average monthly sea surface temperature	72° F.
Highest average monthly sea surface temperature	90° F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).

Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g. waves over 8 ft. occur 0.2 per cent of the time).

GENERAL: *Flag:* Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.

Government Officials: Sharjah officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Port Authorities and Police are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the jetty it is expected that the vessel will provide food for these Guards and other Sharjah officials.

Quarantine Regulations: The rules governing the quarantine of vessels are the same as those found in other parts of the world.

Contraband: During loading it is prohibited for any unauthorised craft to come alongside vessels while at the LPG Terminal.

Garbage: The dumping of garbage and refuse overside is prohibited.

Shore Leave and Crew Changes: Vessel's personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the jetty. There are no facilities for crew changes at the jetty.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the jetty.

Supplies: Commissary supplies, stewards stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Operator and may not be loaded at the jetty. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Readiness: As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1800 provided that the vessel is apparently in all respects ready to moor and receive the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather or when the vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

Agency: The Operator does not perform any vessel agency functions. Vessels calling at Hamriyah LPG Terminal must arrange for their own Agents.

AUTHORITY: *Owner:* Shalco (Sharjah LPG Co.) P.O.Box 787, Sharjah, United Arab Emirates. *Tel:* 543666. *Telex:* 68799.

Operator: Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* 355100. *Telex:* 68685. *FAX:* 355142. *Contact:* B. G. Bramley, General Manager.

LPG Terminal, Hamriyah, Sharjah, United Arab Emirates. *Tel:* 883744, 883894. *Contact:* Captain H. Dietze.

AGENT: See "Sharjah".

HULAYLAH TERMINAL, Ras Al Khaimah:

25.58 N. 55.56 E.

LOCATION: The geographical location of the Hulaylah Terminal SPM is: Lat. 25° 58′ 26″ N., Long. 55° 56′ 11″ E.

Hulaylah Terminal is the export crude oil facility operated by Ras Al Khaimah Gas Commission (RAKGAS) and is located approximately 6 miles offshore from Mina Saqr, Ras Al Khaimah, United Arab Emirates.

Crude oil from the Saleh Offshore Field is transferred to shore tanks located in approximate position 25° 58′ 26″ N., 55° 56′ 17″ E. from where it is transferred to the SPM by pipe-line.

Saleh Field production facilities are located at the following positions:

	Latitude	*Longitude*
Saleh 1 and Production Platform	26° 11′ 31″ N.	55° 42′ 27″ E.
Saleh 1 Flare	26° 11′ 44″ N.	55° 42′ 35″ E.
Saleh 2 Platform	26° 10′ 43″ N.	55° 42′ 16″ E.
Saleh 3 Platform	26° 10′ 11″ N.	55° 41′ 47″ E.
Saleh 4 Platform	26° 10′ 27″ N.	55° 45′ 37″ E.
Saleh 5 Platform	26° 09′ 51″ N.	55° 45′ 11″ E.
Saleh 6/7 Platforms	26° 11′ 00″ N.	55° 43′ 29″ E.

DOCUMENTS: None required.

PILOTAGE: The Mooring Master Boarding Area for the Hulaylah Terminal is 3 miles Westward of the SPM, or boarding will be at the anchorage as appropriate.

The RAKGAS Mooring Master will remain on board throughout the export vessel's stay on the berth to co-ordinate the petroleum transfer operation; therefore, suitable and adequate accommodation shall be provided for him on board the export vessel.

Arrival at Pilot Station/Anchorage: Means of access to the vessel by the RAKGAS Mooring Master shall be provided in accordance with the requirements of SOLAS, and early advice will be given by RAKGAS as to the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to provide for the approach and boarding of the RAKGAS Mooring Master, Government Officials and for RAKGAS Representatives.

The Conditions of Entry into and Use of Hulaylah Terminal and Agreement for the Hiring of Tugs will be presented to the Master of the export tanker and shall be signed by him on behalf of himself, the vessel and its Owners prior to departure from the pilot station/anchorage and commencement of berthing operations.

The Notice of Readiness will be accepted only between the hours of 0600 and 1800 provided the RAKGAS Mooring Master is satisfied that the export vessel is apparently in all respects ready to moor and load. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather, or when an export vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the export vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

ANCHORAGES: Should it be necessary to anchor, then vessel should proceed to the recommended Tanker Anchorage Area which is within a circle 0.5 miles in diameter and with its centre located in position Lat. 25° 58′ N., Long. 55° 53′ E.

MAX. SIZE: Max. deadweight 300,000 tons. Larger vessels require prior clearance by the terminal.

HEALTH: No health clearance requirements currently in force.

RADIO: Following receipt of a nomination of an export vessel to load at the Hulaylah Terminal, RAKGAS will cable to that vessel via Bahrain Radio (A9M) details of nomination, loading API and temperature, and berthing prospects.

On receipt of this cable, and in any case not later than 72 hours prior to arrival time at Hulaylah Terminal, the export vessel is required to cable to RAKGAS via Bahrain Radio the following information:

(a) Name of vessel.
(b) ETA in GMT (U.A.E. time is GMT plus 4 hours throughout the year).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft, and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Hulaylah, and if so any delays anticipated.

Sections (a) and (b) of above message should be repeated via Bahrain Radio 48 hours, 24 hours and again 12 hours prior to the export vessel's arrival at the Hulaylah Terminal and at any other time when ETA changes more than 1 hour.

When approaching the Terminal, an export vessel should contact the Terminal on VHF Channel 16 (156.8 MHz), establishing a working channel and confirm ETA.

VHF: *Export Tanker:* When the export tanker is berthed at the SPM communication between the Terminal and the export tanker will be established on VHF Channel 16 or on a mutually agreed VHF channel.

In those cases where the VHF equipment on board the export tanker is not compatible with the Terminal equipment, the RAKGAS Mooring Master will arrange for the availability of compatible VHF sets for use during the transfer operation. These sets shall be returned to the RAKGAS Mooring Master prior to his departure from the export tanker.

Approach to the Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Suitable tugs and line boats are chartered for each lifting and are for export tanker's account.

BERTHING: *Mooring/Unmooring Arrangements:* The export tanker will be moored to the SPM according to a mooring plan to be agreed between the RAKGAS Mooring Master and the Master of the export tanker.

LOADING: *Transfer Operations:* The RAKGAS Mooring Master will remain aboard the export tanker throughout the petroleum transfer operation and will co-ordinate all activities on board the export tanker with the Terminal.

The maximum loading rate available for the transfer operation will be about 9,000 bbls.p.h.

At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. A crew member shall be kept on watch on the bow.

When the responsible export tanker officer has declared the export tanker ready to load with all necessary valves open, the Mooring Master will instruct the Terminal to commence the transfer.

At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker.

The RAKGAS Mooring Master shall be given advance notice by the Master or responsible officer on the export tanker when a reduction of loading rate is required preparatory to completion of transfer.

After completion of loading, the vessel will be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Certificate of Quantity, Certificate of Quality, Certificate of Origin, and Port Time Log will be completed. All such documents shall be signed by the Master of the export tanker prior to that vessel's departure. If required or requested by the Master of the export tanker, the Agent for the export tanker may sign the cargo documents on behalf of the export tanker's Master. The official quantity and quality of the crude oil delivered to the export tanker shall be determined by RAKGAS and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: The storage vessel will present a single 16 in., 150 ASA connection, hose will be connected on the port side. Hose connection disconnection will be carried out by the export tanker's crew who are required to be at all times under the control of a responsible deck officer and undertake hose handling operations in co-operation with procedures advised by the RAKGAS Mooring Master.

The export tanker will be required to have ready a derrick at the port manifold area for the handling of the flexible hose.

Minimum Derrick Capacity:

Vessel size	*Derrick capacity*
up to 70,000 d.w.t.	7.5 tons
70,000 – 150,000 d.w.t	10.0 tons
over 150,000 d.w.t.	15.0 tons

Cargo Information: Oil loaded at the Hulaylah Terminal is Saleh Crude with an average API gravity of approximately 58°. The loading temperature will vary from 73°F in the Winter to 85°F in the Summer months. Some H_2S may be present in the crude oil.

Hydrogen Sulphide: Vessels nominated to load at the Hulaylah Terminal SPM should be advised that Saleh Crude may contain H_2S. Continued exposure over long periods to even small concentrations of hydrogen sulphide can cause headache and nausea. Exposure to high concentration may be dangerous and even fatal. Masters should ensure that personnel involved in the loading operation take the appropriate precautions as recommended by their Owners for handling cargo containing H_2S.

Deballasting Operations: Export vessels are required to arrive with sufficient ballast or cargo and be adequately trimmed for safe manoeuvring.

Hulaylah Terminal has no ballast reception or slop disposal facilities, and therefore, export vessels are required to arrive with sufficient clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. RAKGAS will not accept any claims for vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, may be subject to prosecution by the United Arab Emirates Authorities if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: Under certain weather/sea conditions this practice may be necessary. In such circumstances, simultaneous deballasting and loading may be requested by the RAKGAS Mooring Master.

If such operations are found necessary, it shall be done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker. The Owners, shall remain fully responsible for, and indemnify and hold RAKGAS, its parent companies, subsidiaries, and affiliates, harmless from, any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All crude tankers of 20,000 d.w.t. or greater nominated to load shall arrive with cargo tanks inerted to 8% oxygen or less by volume and pressurised as required by the SOLAS Convention. Normally cargo tanks under pressure will not be inspected by the Terminal Representative provided a declaration is signed by the Master prior to commencement of loading confirming that all compartments of the vessel have been prepared in all respects as required for the cargo to be loaded.

(a) Tank Inspection, Gauging, Sampling, Water Dips and Temperatures: Should it be necessary for tanks to be inspected, then it should only be done on a tank-by-tank basis. The system shall be maintained at about 200 mm. water gauge pressure except for the individual tank to be opened which, if possible, is to be isolated from the system and the sighting port opened with care. On completion of inspection the tank shall be secured and re-pressurised. The next tank is not to be isolated and opened until the preceding tank is secured and open to the IG system. All gauging, sampling, water dips and temperatures will be taken either through special fittings provided; or if it is necessary to open up tanks for this purpose, then this will be done one tank at a time as described above.

(b) Failure of IGS: If at any time the IGS is not maintaining the prescribed conditions, the RAKGAS Mooring Master shall order a suspension of transfer operations. The cost of any delays will be for the export vessel's account.

MEDICAL: Doctors and dentists available.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: It is not permitted to load bunkers while berthed at the SPM. Bunkers can be arranged at anchorage by vessels' local Agents.

CONSULS: At Dubai.

REPAIRS: Repair facilities are not readily available.

Repairs will not be permitted when the export vessel is berthed at the SPM.

SURVEYORS: At Dubai.

CUSTOMS ALLOWANCES: Most crew transit through Dubai where import allowances are:

1. 1,000 cigarettes or 200 cigars or 1 kilo of tobacco.
2. One litre toilet water and 150 gms. perfume.
3. No alcohol of more than 2% permitted without an import licence.
4. There are no restrictions outbound.

REPATRIATION: Launch service available.

AIRPORT: Ras Al Khaimah has an international airport but Dubai Airport has greater frequency of flights.

SHORE LEAVE: Permitted.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: Offshore facility – no services.

WEATHER: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Ras Al Khaimah coastline is generally good, but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Ras Al Khaimah coastline with accompanying swells.

High waves generally do not occur along the Ras Al Khaimah coastline since the winds are usually light in this area. On those occasions when the wind does become strong, the wave heights generally remain limited since the distance over which the wind can blow to generate waves is relatively short from most directions. This is due to the bend in the Gulf which tends to reduce the fetch of North winds (e.g. waves over 8 ft. occur 0.2% of the time).

Currents are omnidirectional and variable in strength. During the month of January 1984, currents in excess of 1 knot were recorded.

SAFETY: *Safety Requirements:* Masters will be given the RAKGAS Safety Requirement Letter by the RAKGAS Mooring Master prior to commencement of berthing operations, and a signed acknowledgement will be required.

Safety Check List: On completion of berthing and prior to the commencement of deballasting or cargo loading, the Ship Safety Check List will be completed following a joint inspection by the RAKGAS Mooring Master and a responsible export tanker's officer. The RAKGAS Safety Check List is based on the recommendations of the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).

GENERAL: *Operating Procedures:* Procedures for cargo and ballast operations shall be agreed in writing between the RAKGAS Mooring Master and the export tanker's Master and Chief Officer.

Flags: The national flags of the United Arab Emirates and Ras Al Khaimah shall be permanently displayed by vessels at the Hulaylah Terminal.

Alcohol: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. National Citizens and are warned of the serious consequences of offering such drinks to the Terminal staff who may board the vessel.

Storing: It is not permitted to load stores while berthed at the SPM.

Agency: RAKGAS does not perform any vessel Agency functions. Vessels calling at the Hulaylah Terminal are required to arrange their own Agency representation from an Agency operating in Ras Al Khaimah.

AUTHORITY: Ras Al Khaimah Gas Commission (RAKGAS), P.O.Box 434, Ras Al Khaimah, United Arab Emirates. *Telex:* 99155 Raknoc Em. *FAX:* 222733. *Contact:* J.C.Andrews, Manager (Tel: 222555).

AGENT: See "Mina Saqr".

JEBEL ALI, Dubai: 25.00 N., 55.03 E. (See Plan)

FLAG: U.A.E. and Dubai Emirate.

LOCATION: The Port of Jebel Ali is a major port situated some 35 km. S.W. of the city of Dubai.

The Port Control Tower is situated in position Lat. 24° 59.4′ N., Long. 55° 02.9′ E.

The Jebel Ali approach channel commences 12 km. off shore, the entrance to the channel being marked by a fairway buoy. The buoy is situated in Lat. 25° 06′ 54″ N., Long. 54° 56′ 33″ E.

The approach channel with a depth of 15.0 m. is buoyed and runs in a direction 315°T – 135°T towards the port. After 10.5 km. the channel takes a 25° bend and becomes the entrance channel which leads into the port on an alignment of 340°T – 160°T.

The approach channel has a width of 280 m. reducing to 235 m. In the bend the channel widens to 300 m. and in the entrance channel to 340 m.

The Outer Basin is 2.3 km. long and 600 m. wide with depth of 14 m. and the Inner Basin is 3.7 km. long and 425 m. wide with a depth of 11.5 m. The main axis of both basins is 047° – 227°.

All channel, basin and docks' bottoms are sandstone.

Tankers and LPG ships will use the dual purpose berth situated in the Outer Basin and will generally be berthed starboard side alongside.

A second tanker berth is situated at Berth No. 2 in the 14 m. basin for the import of products. Vessels normally berth starboard side to.

In all other berths ships can secure port or starboard side to.

DOCUMENTS: The following documentation shall be delivered to the Authority's Documentation Section at least 48 hours prior to the vessel's arrival. The Authority reserves the right not to commence cargo operations until the below listed documents are received.

(a) Discharging Vessels

3 copies Cargo Stowage Plans
8 copies Cargo Manifests
8 copies Cargo Declaration
3 copies Crew List
3 copies Hazardous and Dangerous Cargo Declaration
3 copies Hatch List
3 copies Arrival/Cargo Advice
1 copy Each Bill of Lading/Packing List

(b) Loading Vessels:

3 copies Cargo Stowage Plans
3 copies Cargo Loading List
8 copies Hazardous and Dangerous Cargo Declaration
1 copy Customs Endorsed Export Declaration (for each consignment).

On completion of loading, 8 copies of the vessel Manifest endorsed by Ports & Customs must be provided.

Note: For categories (a) and (b), in the absence of any hazardous or dangerous cargo, "Nil" Declaration *must* be made.

(c) Tankers:

3 copies Manifest
3 copies Cargo Plans
1 copy Certificate of discharge of previous cargo.

A copy of the "Notice of Readiness" should be made available to the Harbour Master on rquest.

Immigration: Three Crew Lists are required on arrival.

Immigration Offices are established in the port. The service is available 24 hours a day. However, Masters should advise their Agent that the ship may leave outside normal office hours and that the Agent should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Masters are advised that "Immigration Clearance" must be on board and sighted by the Pilot before he can take the vessel to sea.

MINIMUM REQUIREMENTS:

In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:

(i) Fully operational Radar.
(ii) Fully operational VHF Radio with normal marine channels.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel safely.
(vi) Efficient signalling equipment.
(vii) Fully operational Tachometer, Rudder and Helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master should be advised prior to arrival via "Jebel Ali Port Control".

APPROACHES: Ships should make for "Jebel Ali" light float in position 25° 10′ 30″ N., 54° 52′ 15″ E. (Gp. Fl.3 every 12 secs. 15 miles). This float lies on the axis of the channel leading into Jebel Ali Port i.e. from this float vessel should steer 135° to approach Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of the buoyed channel, marked by a fairway buoy. This buoy is a safe water mark painted red and white vertical stripes. Light character is Fl. 10 sec. The centre of this waiting area, with a radius of 1 mile, is Lat. 25° 09′ N. and Long. 54° 54′ E.

PILOTAGE: Pilots are available on a 24-hour/day basis. Ships requiring a Pilot should call "Jebel Ali Port Control" on VHF Channel 16 at least 2 hours before arrival at Pilot Boarding Area.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Jebel Ali shall be under the charge of a pilot.

The following ships will be excepted ships:

(i) Ships of War.
(ii) Pleasure Craft.
(iii) Ships of less than 150 n.r.t.
(iv) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Gulf.
(v) Tenders of M.E.N.A.S.
(vi) Country Craft.

Pilots will board from fast launches, marked "Pilots" equipped with VHF, watch kept on Channel 16. Call sign "Jebel Ali Pilots".

Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area, but vessels may be instructed to approach the channel entrance by Port Control.

Outbound ships should request Pilot at least one hour prior to departure. Masters should obtain "Master's Report" from the Inward Pilot and return it completed before the Pilot leaves. Masters are advised, that Outward Pilot cannot take the ship to sea, without having sighted valid "Immigration Clearance" first.

Pilot Boarding Areas: The Pilot boarding area is located North of the channel entrance. The centre of this area is in position Lat. 25° 09′ N., Long. 54° 54′ E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the above mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:

(i) The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of any possible discharges from the ship, and so that each step rests firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a positon where the Pilot can gain convenient access to the ship after climbing not less than 5 ft. and not more than 30 ft..
(iv) Whenever the distance from the water to the point of access to the ship exceeds 30 ft., access from the pilot ladder to the ship shall be by means of an accommodation ladder or equally safe and convenient means.
(v) A light shall be provided at night so that the pilot ladder overside and also the position where the Pilot boards the ship shall be adequately lit.
(vi) Lifebuoy and heaving line should be available at the ladder.
(vii) When a pilot hoist is provided as the method of access, it must be of an "approved" type, complying with the recommendations of the "European Maritime Pilots Association".

ANCHORAGE: The holding ground is poor, ships are recommended to use more chain than usual.

The anchorage is an area enclosed by the following four positions:

1.	Lat. 25° 11′ 20″ N.	Long. 54° 49′ 45″ E.
2.	Lat. 25° 08′ 12″ N.	Long. 54° 53′ 12″ E.
3.	Lat. 25° 05′ 18″ N.	Long. 54° 49′ 45″ E.
4.	Lat. 25° 08′ 20″ N.	Long. 54° 46′ 12″ E.

Ships will anchor here in a depth of approximately 16 m. – 20 m. (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipe-line lies East of the channel. This line comes ashore in position 25° 01′ N., 55° 04′ 30″ E. From this position it lies in a direction of 345° for approximately 10 miles, thence assumes a direction of 313° towards the "Fatah Field" i.e. it is from 2 to 5 miles East of the buoyed entrance channel. Ships should **not** anchor near this pipe-line, nor should they approach the area with anchors walked back or trailing.

MAX. SIZE: No limit on LOA except Tanker Berth. Max. LOA Tanker Berth 273 m.

Also see "Berthing", "Bulk Handling Facilities" and "Tankers".

RADIO: *ETA requirements:* (Also see "Tankers").

Vessels arriving at the Port of Jebel Ali are required to provide the Harbour Authority with the following estimated times of arrival:

(i) At least 48 hours prior to arrival or on leaving the last port, whichever is later, via Bahrain Radio, Inmarsat, Telex No. 47398 PAJA EM or Fax: 084-35430. Ship/shore telephone may be used on 084-35326 only.
(ii) Confirm the vessel's estimated time of arrival at least 24 hours before arrival at the designated pilotage area.

Communications: The Port radio station maintains continuous listening watch on VHF Channel 16. The Port Emergency Channel is 18A. On coming within VHF range of "Jebel Ali Port Control", vessels should establish VHF contact for the purpose of updating the estimated time of arrival, and at least 2 hours' notice of arrival in the Boarding Area should be given.

Continuous watch is maintained on radio frequency 2182 kHz.

Vessels are warned that VHF Channels are monitored and taperecorded and any misuse of VHF Channels will be reported to the proper Authorities.

Notice of Arrival: Each vessel Owner, Operator or Charterer expecting to dock a vessel at the port for the purpose of loading or discharging cargo shall give the Authority 2 days prior notice of the arrival of such vessel and furnish such information as the Authority may require. Reconfirmation of the vessel's arrival shall be made by the vessel's Master on the day prior to arrival.

Pre-Arrival Information: Prior to arrival, all vessels regardless of tonnage calling at the Port of Jebel Ali should provide "Jebel Ali Port Control" with the following information:

(i) Name of vessel
(ii) Port of Registry
(iii) Name of Master
(iv) Gross Tonnage
(v) LOA
(vi) Draft
(vii) Cargo to discharge or load
(viii) Pilot boarding arrangements
(ix) Number of crew, indicating the number of deck crew available for manoeuvring
(x) Health information
(xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: VTS harbour radar in Port Control Tower in position 29° 59.4′ N., 55° 02.9′ E.

The Control Tower is equipped with a Sperry Radar Vessel Traffic System C.A.S. II. This equipment consists of a dual radar system combined with a data processor and computer. Traffic movements are monitored, and recorded within the Port limits and approaches. The Tower is continually manned by qualified Radar/Radio Operators.

TUGS: Two tugs with bollard pull of approximately 30 tons and one tug with bollard pull 40 tons are available in the port at all times, watch maintained on VHF Channel 16. Extra tugs can be made available if needed.

Mooring boats: Three mooring boats, the "Dina", "Laila" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING:

Berths No. 1 – 17: Depth 14.0 m.
Berths No. 18 – 66: Depth 11.5 m.
Tanker/LPG Berth No. 1: Depth 15 m.
Tanker Berth No.2: Depth 14 m.
"Star Energy" Berths: Depth 14.0 m.
Bulk Grain Berths: Depth 14.0 m.
Dubai Terminal: Depth 14.0 m.

Moorings: Bollards on the various quays and wharves are of capacity and spacing as listed below.

Quay/Wharf	*Capacity* (Tonnes)	*Spacing* (m.)
1, 2, 3	100	27
4A, 4B	70	30
5, 6, 7	70	30
8, 8 Basin	30	30
9 West	70	30
9 East, 10	70	20
West Wharf	15	14.4
East Wharf	15	14.4
Bitumen Wharf	30	20

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns for ship sizes. The average rise and fall is 1.14 m.

There are special 250 tonne bollards on Berths No. 5, 7, 10, 11, 12 13, 19, 20, 21, 22, 23, 25, 26, 48, 49, 52 and 53 for vessels over 300 m. in length. These berths can cater for laid-up VLCCs and are fitted with electric points and shore telephone points. All berths can be connected to shore fire mains and fresh water points. Enquiries for further information and conditions to the Harbour Master.

General Cargo Areas: These are located on Quays No. 6 and 10 with 21 m. wide concrete aprons, covered and open storage, truck delivery and receiving docks.

Prior arrangements must be made with the Cargo Handling Manager for the discharge of obnoxious and hazardous cargo.

Storage: Six transit warehouses provide more than 48,000 sq.m. of covered storage. Over 250,000 sq.m. paved open storage areas are provided.

Equipment: A full supply of supporting cargo handling equipment to complement general cargo operations is available. This includes 5 mobile hydraulic cranes (2×20 tons, 2×40 tons and 1×60 tons capacity) and a Gottwald Model 260-E Crane capable of heavy lifts up to 80 tons. Port Operations should be contacted to verify weight limits at various radii.

and a comprehensive selection of materials handling equipment.

Ro-Ro Terminal: The Ro-Ro Terminal is situated at Berths 32-34, with two ramps specially designed for stern discharging vessels, and a water depth of 11.5 m.

An 8,000 sq. m. warehouse provides covered storage while 105,000 sq. m. of paved open storage is available. Equipment includes 3 Douglas Tugmasters.

Cold Store: The Cold Store is situated at Berth 31 and has a capacity of approximately 7,000 tons. Temperature can be separately controlled in each of eight rooms in the range of −29°C. to 13°C.

BULK HANDLING FACILITIES: *Dubai Terminal:* This facility is located on Quay 1, Berth No. 1. A travelling unloader equipped with 2 booms having a travel of 140 m. is used for discharging of alumina powder. Hourly capacity 380 t.p.h. through 2 booms. Outreach of boom 27 m. Max. draft 13.25 m.

Bulk Grain Terminal: This facility is located on Quay 1, Berths No. 3 – 4. Two travelling loader/unloader arms, with an outreach of 22.5 m. and a loading/unloading rate of approximately 800 t.p.h. each, are installed and can travel 460 m. parallel with quay face. Max. draft 13.25 m.

CONTAINER FACILITIES: The Container Terminal is situated at Berths No. 14 – 17, totalling 1,220 m., with 60 m. wide concrete aprons and a water depth of 14 m. Max. draft 13.25 m.

Storage: The Container Yard can accommodate over 8,000 T.E.U's.

The Container Freight Station provides 10,000 sq. m. of covered storage.

Two temperature-controlled warehouses provide 6,540 sq.m. of cool storage at low humidity.

Equipment: Three third generation 41 ton Mitsubishi electric gantry cranes, and 2 Hitachi gantry cranes with telescopic spreaders to handle 20 ft., 35 ft. and 40 ft. containers, and appropriate fittings for over height and flat rack units. Crane Specifications:

S.W.L. under the spreader 30.5 tons.
S.W.L. under cargo hook beam 34 tons.
Distance from face or rubber fender to centre line of container at maximum outreach 34 m.
Top of container at maximum lift above quay level 26 m.
Top of container at lowest position below quay level 16.5 m.
Quay level above highest tide 2 m. (6 ft. 6 in.)
Quay level above lowest tide 4 m. (13 ft. 1 in.)
Container crane travel 1,250 m.
Container crane reach behind back rail 15.0 m.
Maximum weight of 20 ft., 35 ft., 40 ft. container handled by spreader 30,504 kg.
Maximum heavy lift with spreader removed. 41,007 kg. (90,405 lbs.)

11 top-lift container handling vehicles with a 31 ton capacity, one with a 20 ton capacity and 4 rubber tyred gantries.

141×380 volt Kheops, 75×380 volt Crouse Hinds and 40×220 volt refrigerated container plugs with 24-hour monitoring service.

Flat bed trailers, low bed trailers, tractor units, mafis, goosenecks and an assortment of trucks.

Truck scale with a capacity of 50 tons.

A container cleaning service is available.

Container Terminal Crane Booking: Dubai Ports Authority operates a Crane Booking System for the Container Terminal. Cranes are booked in order of receipt of request. Agents should be consulted to assure timely booking of container cranes.

STEVEDORES: Dubai Port Authority (Jebel Ali).

Normal Working Hours:

The normal working hours from Saturdays to Thursdays inclusive (but excluding Public Holidays) will be 0700 hrs. – 1200 hrs. and 1300 hrs. - 1600 hrs.

Any activity outside of normal working hours must be arranged with the Authority and overtime rates may apply.

Working hours are subject to change during the month of Ramadan.

Prior arrangements must be made with the General Cargo Manager for the discharge of obnoxious and hazardous cargoes.

MEDICAL: Medical facilities are provided by Dubai Hospitals, arrangements should be made by Agents. 24 hour emergency medical services are available. Ships should call Jebel Ali Port Control on VHF Channel 16 (Tel: 35251) or Port Security (Tel: 56222) to arrange ambulance.

TANKERS: *Tanker/LPG Berth No. 1:* This berth provides facilities for product tankers as well as LPG and condensate carriers. 6 loading arms are available to handle Product tankers through 10 in. connections with reducers available. On the LPG half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is 15 m. Max. draft 14.25 m. on H.W. Max. LOA 275 m.

This berth is equipped with mooring hooks of 100 tons strength, each fitted with electric capstan. The hooks are tripped manually.

Tankers will generally be berthed starboard side to the Berth.

Tanker Berth No. 2: This berth provides facilities for product tankers, using 10 in. Chicksan arms. For certain products flexible pipeline conections are permissible. Various reducers are available. On this berth, Class 1 products can also be handled. Max. draft 13.25 m. Max. LOA 225 m.

Chemical Tanker Berth: A designated Chemical Tanker berth is operational at Berth No. 51. Depth of water at the berth is 11.5 m. Max. draft 10.75 m.

"Star Energy Resources" Berths: Star Energy Resources operates 2 product tanker berths on Quay 2 (Berths No. 8 and 9). Two ships upto 255 m. LOA each can be accommodated simultaneously on these berths, which are equipped with 2×12 in. Chicksan arms. Berths are also equipped with mooring hook assemblies, each fitted with capstans. The hooks are tripped manually. Maximum draft 13.25 m. Tankers can be berthed port or starboard side to the quay.

Vessels are warned that no dirty ballast discharge will be allowed within the limits of Jebel Ali. There are no shore ballast reception facilities.

Also see "General".

Vessel Requirements: Below, are details of information required by the terminal operators for accepting vessels for LPG, LNG and Condensate loading and Port Authority of Jebel Ali's requirements and regulations for a tanker in berth.

Dubai Port Authority (Jebel Ali) – Tanker Berth: Uniform mooring system is advisable, i.e., all synthetic or all wire for all moorings except backsprings. P.A.J.A. does not allow the use of nylon tails on wire moorings. Backsprings must be of wire.

Concerning deballasting requirements P.A.J.A. allows the discharge of permanent segregated clean ballast in the harbour. Clean tank ballast can only be discharged if a surveyor appointed by Agents at Owner's/Charterer's expense, certifies that the tank ballast is clean, that all cargo pumps and lines are clean and the surveyor remains on board to witness and if necessary stop the discharging of cargo tank ballast if it proves to be unclean.

It is also recommended that all efforts be made to cut down time taken by ships for documentation purposes after completion.

Bunkers may not be taken during cargo operations.

On all occasions, P.A.J.A. would berth all ships starboard-side-to on the tanker berth unless some particular "one off" technical reason prevents this.

LPG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection: (a) Size. (b) Rating. (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading and vapour return connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Manifold sequence of the loading and vapour return connection.
14. Loading rate per product for this particular lifting.
15. Cargo tanks temperature per product upon vessel arrival at the loading port.
16. Can propane and butane be loaded simultaneously?
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, P.A.J.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screens in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
25. Can propane and butane be purged and/or cooled simultaneously? (If applicable.)

LNG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Vessel gas vapour venting system.
14. Loading rate for this particular lifting, per single loading arm connection.
15. Ballast on board condition (clean, dirty, etc.).
16. Deballasting estimated time required after berthing.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, P.A.J.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screen in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.

Condensate – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Arco Dubai.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, arrival draft fore and aft, estimated departure draft, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
   (d) Is manifold located centre line of LOA.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.

8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Flange thickness. Maximum acceptable: 37 mm.
11. Clearance behind connecting flange for coupling claws. Minimum requirement: 240 mm.
12. Height of the ship's rail in front of the loading manifold.
13. Previous cargo and its origin.
14. Loading rate for this particular lifting. Minimum requirement 25,000 bbls p.h. per single loading arm connection.
15. Specify quantity of permanent and cargo tank ballast on board. Only permanent segregated ballast discharge allowed at Jebel Ali port. Repeat only permanent segregated ballast discharge allowed.
16. Estimated deballasting time required after berthing. Specify if simultaneous with loading.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel in possession of reducers, their type, size and rating.
19. Please confirm agreement release inert gas pressure in all tanks for inspection by Arco Surveyor.
20. Buyer or Agent to notify Arco of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
21. Arco Dubai advise starboard side alongside.
22. Arco Dubai advise loading arm size nominal 16 in. with provision for 16, 14 and 12 in. connection by hydraulic coupler.
23. Quantity to be loaded, in barrels. Arco Dubai advise
    API:– Temp.:–

DENSITY: 1032.

FRESH WATER: Supplied by Dubai Water Department (Tel: 56749). Order through Agents. Water laid on at all berths.

FUEL: A Bunkering Barge is stationed in Jebel Ali operated by "E.B.B. Co.". Arrangements for bunkers are to be made through vessels' Agents. Barge can deliver diesel oil and/or fuel oil. Delivery by road tanker also available. Tel: 56759.

Lubricating Oils: Available, transported by road.

CONSULS: Embassies and Consulates in Dubai.

Embassies:

Germany	Tel: 231013/214352
United Kingdom	Tel: 531070

Consulates:

Bangladesh	Tel: 236676.	Malaysia	Tel: 285695
Belgium	Tel: 226206	Netherlands	Tel: 225156
China	Tel: 227411	Norway	Tel: 233152
Egypt	Tel: 434417	Oman	Tel: 223692
France	Tel: 232442/237252	Pakistan	Tel: 531412
India	Tel: 220201/2	Panama	Tel: 285340
Iran	Tel: 531150/531915	Qatar	Tel: 221216
Iraq	Tel: 660822	Saudi Arabia	Tel: 222163
Italy	Tel: 377167	Sweden	Tel: 375542
Jordan	Tel: 667097	Switzerland	Tel: 375542
Kuwait	Tel: 221900	Syria	Tel: 663354
Lebanon	Tel: 451351	U.S.A.	Tel: 371115

The foregoing are Embassies and Consulates situated in Dubai. Most countries maintain diplomatic missions/embassies, etc., in Abu Dhabi – some 120 km. from Jebel Ali.

REPAIRS: Berths are available for afloat repairs to be done by local contractors.

Lay-up Berths for long and short periods can be arranged for vessels up to 550,000 d.w.t. with draft up to 13.5 m. Special bollards are installed to provide 8 berths for ULCC class vessels.

Marine engineering firms with specialised workshops in Dubai, undertake engineering repairs. Agents will make necessary arrangements.

Repairs to radar, radio, echo sounders and other electronic navigational and communication aids are available by major manufacturers' Agents, (i.e. Marconi, Decca, Kelvin-Hughes, Telefunken, etc.), being represented in Dubai and sets serviced by trained engineers. Agents will advise.

A Port Authority diver can be arranged through vessel's Agent.

SURVEYORS: Lloyd's, B.V., A.B.S., N.V., N.K. and the Salvage Association as well as other private qualified cargo, hull and engine surveyors and consultants are available.

Gas Free Certificates, Inert Gas Certificates and Hot Work Permits can be obtained through independent qualified surveyors who must be on Dubai Port's Authority (Jebel Ali) approved list. Agents will arrange.

Surveys: The following surveys and certification can be carried out in Jebel Ali: Load Line, Safety Equipment, Safety Construction, Radio.

TELEPHONES: Ship board telephones available by arrangement.

Important Telephone Numbers at Jebel Ali:

Port Control	35326
Harbour Master & Port Control	35251
Police	56111
Port Health	56892
Customs	56374/5
Immigration	56844/56334
Ambulance and Fire Service	56222 (24 hours)
Security	56846/56578 ext. 218, 232, 233

SHORE LEAVE: The following is the standard procedure for shore leave as dictated by the Port Immigration Department.

Crew members wishing to go ashore are to report to the Port Immigration Office (Agent to arrange) and collect a "Marine Landing Permit" which should be carried at all times. On returning to the ship, the permit should be handed back to the Port Police. The process is to be repeated on every subsequent shore leave.

GARBAGE DISPOSAL: Skips are compulsory for domestic garbage and are provided alongside ships and changed as necessary. Charges Drhs 50 per day and Drhs 150 per skip change. Skips can also be rented for industrial garbage. Contact Harbour Master for details.

WASTE OIL DISPOSAL: The port has no waste oil disposal facilit but several local companies can arrange disposal by tanker truck. A agents can arrange these facilities. Charges are negotiable. Municipal kapproval is required. Contact Harbour Master for details.

SEAMAN'S CLUBS/SERVICES: International Seamen's Club (Te 435551). Norwegian Seamen's Mission (Tel: 470561/3). Jebel A International Seamen's Centre: Situated on Quay No. 10. Tel: 3529 35296. Hours: 1600-2359 daily and 1100-2359 on Fridays and publ holidays. Facilities: Bus service to and from berths; internationa telephones; post box and stamps; small shop for tobacco, toiletrie writing materials, etc.; money changing; pool and darts; T.V. and vide library; snacks and full bar service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.65 (Fixe Rate).

WEATHER: *Weather and Currents:* Cross currents of up to 1.75 kno may be experienced in the Approach Channel. These currents are win and tide induced.

Fresh winds are frequently experienced at Jebel Ali. However, durin evening, night and morning hours, light Southeasterly winds preva veering to N.W. by noon and freshening to Force 4-5.

On occasions, especially during November-March, fog may b prevalent during early morning.

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned that n dirty ballast, bilges, etc., should be pumped out in the vicinity of the Po of Jebel Ali. Offenders will be prosecuted and the U.A.E. and Duba Police maintain maritime and helicopter patrols to ensure no dirty ballas is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Maste may instruct offending vessels to leave or bar them from returning t Jebel Ali.

Rubbish skips supplied by the Port Authority at a charge and ar compulsory.

Ballast Requirements: For the purpose of safe manoeuvring, th Harbour Master requires all vessels to maintain an acceptable ballaste condition.

Vessels should carry sufficient ballast so that the propeller can have maximum immersion whilst maintaining an acceptable stern trim.

Masters are reminded that no dirty ballast will be allowed to be discharged in Jebel Ali.

Tanker Ballast Discharge Rules:

1. Clean water ballast from tankers segregated ballast tanks may be discharged overside.

2. Clean water ballast from dedicated clean ballast tanks as defined in Marpol 73/78 may also be discharged in the port. However, if no separate ballast pumping system exists then such discharge must be monitored by an independent surveyor and the ballast discharged mus be certified clean. This discharge operation may take place durin daylight hours only.

3. Ships in the "C.O.W." mode may not discharge ballast from carg tanks, unless such tanks have been thoroughly cleaned and have reverted to the status of C.B.T. since last carrying oil.

4. "Clean" ballast means ballast containing less than 15 parts pe million of Hydro Carbons.

5. Not withstanding all the above, if any visible signs of pollution are seen on or below the surface around the ship discharging ballast, the ballast discharge will be stopped and no further discharge will be permitted.

Fumigation: Fumigation can be carried out by specialist firms.

Ships' Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Duba Arrangements through Agent and/or through direct VHF contacts wit ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Visitors Port Passes: Any Person entering the Port is required to have either a permanent or visitors temporary/day pass. Passes can be obtained from the Pass Office situated at the Main Entrance. The Pass Office operates daily from 0700 hours to 1900 hours.

Permanent passes cost Dh. 25 each and are valid for 12 calenda months from date of issue. Applicants are required to produce a Sponsor's letter and complete an application for Pass Form. Documents such as Passports and photographs are not required.

Temporary or Day passes which are free of charge are only issued to irregular visitors who have a confirmed appointment to visit the Port

No more than one of these passes a month will be issued to any individual. Day Passes can be obtained from the Pass Office or any Terminal Checkpoint.

Shops: A small supermarket is open in the port. Hours of work are 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: A bank complex is situated just outside of the port main gate Most major banks or their correspondents have branches there.

Transport: Arrangements for taxis can only be made through the Agen

SHIPMASTER'S REPORT: June 1990.

Location: A third tanker loading/discharging facility is situated at Berths No. 8 and No. 9, on the N.E. face of the 14 m. basin. This facility is operated by Star Energy Corporation (See "Berthing").

Star Energy are based in Abu Dhabi, Telex No. 24160.

Documents: The documents listed in the "Guide" do not apply to tankers. Requirements for tankers are:

1 copy Arrival/Cargo Advice (supplied by Pilot).
2 copies Bonded Stores List.
2 copies Drugs and Firearms Declaration.
2 copies Crew Declaration.
3 copies Crew List.
1 copy Maritime Declaration of Health (only if sickness on board, or if it is necessary to have any vaccinations performed).

Ship's Agency also usually has own Arrival/Sailing forms to be completed.

Anchorage: The Eastern corner of the anchorage area has been found to have very poor holding ground, and it is suspected that there may be scattered coral heads in this area, as this vessel dragged anchor there in moderate weather conditions, and anchor flukes were later found to have been damaged by the nature of the bottom.

Radio: Jebel Ali Port Control listen on Channel 16, and usually conducts operations thereafter on Channel 69.

Tugs: There are usually 3 modern tugs, owned by the Port Authority, on duty: The 'Asad', 'Namer' and 'Shadeed'.

Tankers: Tanker Berth No. 8: Alongside continuous fendered quay at N.E. end of 14 m. basin, equipped with 1×12 in. Chicksan arm. Products handled at present are naphtha, gas oil and fuel oil.

Tanker Berth No. 9: Adjacent to No. 8, on same continuous quay, equipped with 2×12 in. Chicksan arms. As far as is known same products handled as at Berth No. 8.

Both berths can accommodate product carriers of up to, and sometimes in excess of, 100,000 d.w.t., the larger vessels usually only part-load.

The terminal acts as a trans-shipment depot, for oil products supplied from other ports and refineries in the Gulf.

Vessels are berthed either side alongside at both berths.

Star Energy Complex: This is a self-contained area within the Jebel Ali Port Complex. The Operators enforce very strict security and safety procedures.

Crew members are not permitted to wander about or walk to the entrance gate, but must use the transport provided. This only operates on the hour, being summoned by radio. A pass is issued to each person leaving the area, and also a book must be signed. The passes will allow re-entry to the area on return, and are quite separate from the passes required by the Immigration Authorities. Provided the seamen are not leaving the Port Complex itself, e.g. visiting the Seaman's Club, no further passes are necessary.

Should, however, anyone wish to leave the Jebel Ali Port Area itself, to go to Dubai, the following procedure is necessary.

On arrival, most Shipping Agents supply forms which act as requests to the Immigration Authorities to issue a Shore Pass. This form is taken, along with a Passport size photo, and either Seaman's Book or Passport, to the Immigration Office near the Main Gate. An official pass will then be issued, with the photo affixed, after which the individual may leave the Port Area. *It is very important that this document is not lost.*

On return to Jebel Ali, the reverse procedure is necessary, presentation of the official pass will usually obtain the return of the identity document, after which the individual may proceed to his vessel. If the vessel is berthed at the Star Energy facility, their previously mentioned pass is required for admittance.

There are occasions when it may not be possible for individuals to recover their identity documents personally, or some may not have time to wait, in which case the official passes should be returned to the Master, and the Agent can take these to Immigration when Clearance is sought, when the documents in question will be given to him for return to the vessel. Clearance will not be issued until everything is in order, which is the reason for taking care not to allow anything to happen to the official pass.

Lengthy delays may be incurred in the case of any lost pass, as the individual in question must then go, in person, with the Agent, to the Immigration Office, if possible with an explanatory letter from the ship's Master. The procedure outlined above must be adhered to, so that there are no problems.

Departure: Pilots require minimum 1 hour's notice, via Harbour Control of vessel's sailing time. They are required to sight the clearance before leaving the berth, therefore it has been found advisable to actually have it on board before confirming sailing time.

AUTHORITY: Dubai Port Authority (Jebel Ali), P.O.Box 17000, Dubai, U.A.E. *Tel:* Jebel Ali (084) 35251/56578. *Telex:* 47398 Pajadub EM. *Cables:* Pajadub UAE. *FAX:* Jebel Ali (084) 56093, 35430. *Contact:* Captain R.E.Abbott, Harbour Master. (A) GENERAL

AUTHORITY: Abu Dhabi National Oil Company, – Petroleum Ports Authority (ADNOC-PPA), the Governing Authority for the petroleum ports in the Emirate of Abu Dhabi. *Address:* P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* Abu Dhabi 6023450/1. *Telex:* 22215 EM. *FAX:* Abu Dhabi 6923389, 6023422.

Abu Dhabi Petroleum Ports Operating Company (ADPPOC), P.O.Box 61, Abu Dhabi, U.A.E. *Tel:* 336700, 333718. *Telex:* 22209, 52207. *FAX:* 216002. *Contact:* Operations Manager and/or Station Manager (Ruwais). (ADPPOC is the service company contracted by the Petroleum Ports Authority).

Two Port Officers working on rotational basis represent the Port Authority at the Port. They are Captain A.Osman and Captain S.A.Shaffi. Telex: 52207 Apocru Em. Tel: Ruwais (052) 72089. Fax: (052) 72102.

PORT LIMITS: All waters Southward of Lat. 24° 26′ 48″ N., to the coast up to Spring High Water Mark, between meridians of Long. 52° 33′ 36″ E. and Long. 52° 46′ 36″ E., (that is, with reference to Chart 3780 B.A. & USHO, the whole waters of that Chart) and shall include all jetties, wharves, structures, sea-berths, reefs, rocks, sandbars and islands, excluding Sir Bani Yas Island, within the said area.

PILOTAGE: Pilotage is compulsory for all ships navigating within port limits other than exempted ships (See "General"). Ships may, however, drop anchor or sail from Gasha Anchorage without a Pilot. This rule is not applicable to U.A.E. Naval, Coast Guard vessels or country craft who may, having ascertained channel clearance from Port Control, proceed without the service of a Pilot.

Pilot Station: Pilots will board and disembark at the main Gasha Pilot Station as delineated on B.A. Chart No. 3780.

Use of North Channel: Masters of Exempted ships of suitable draft should use the North Channel and East Yabr Relief Channel when entering or leaving the port.

Pilotage Exemption Certificate: Port Pilotage Exemption Certificate may be granted to Masters of regular trading vessels of less than 3,000 n.r.t., upon the Port Officer's satisfaction of their competency. Such certificates shall be renewed annually.

Berthing and Unberthing at Oil and Gas Berths: Notwithstanding anything contained in these Rules berthing or unberthing at oil and gas berths at Jebel Dhanna or Ruwais shall be under the control of a Pilot.

Pilot Ladder: A clean and efficient pilot ladder fitted with spreaders and manropes shall be made available for the Pilot to embark or disembark and at night the ladder shall be illuminated with an efficient and safe light.

Accommodation Ladder and Pilot Ladder: Whenever as in the case of large vessels, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder, and shall be lowered to about 22 ft. (7.0 m.) above the water with the pilot ladder immediately adjacent to the bottom platform of the accommodation ladder.

Mechanical Hoist: A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder to be used in conjunction with the accommodation ladder.

NOTE: Mechanical hoists whose operation relies upon a single wire are not of approved pattern under these rules.

Supervision of Pilot Ladders: The rigging of the pilot ladders for the embarkation and disembarkation of Pilots shall be supervised by a responsible ship's officer, and shall be so effected that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the side of the ship.

Safe embarkation and disembarkation: A Master of any ship navigating in the port, shall afford such suitable "weather lee" and speed reductions as may be directed by the assigned Authority Pilot in order to provide a safe embarkation or disembarkation operation.

Pilot to Advise Course and Speed: Vessels navigating within Port Limits shall proceed on such a course and at such speed as the Pilot advises.

Provided that when passing through the inner anchorage areas every vessel whether under Pilotage charge, or navigated by her Master with an Exemption Certificate, shall proceed with caution and at a moderate speed duly considering other vessels and cargo operations in the area.

Small High Speed Vessels: High speed vessels as of "Crew Boat" type shall proceed at a moderate speed to reduce the wave making wash in the vicinity of vessels, working cargo, dredging or construction works, diving operations, etc., until past and clear of these vessels or operations.

Anchors Ready for Use: Every ship prior to any movement within the port shall have both Bower Anchors (if two fitted) prepared for immediate emergency use. Masters shall, however, consult with the assigned Pilot (if any) before lowering an anchor to the sea surface.

Any Damage to Ship to be Notified: Before entry the Master shall inform the Port Authority of any damage to the vessel or any projection from the hull above or below water which may affect the vessel's draft, ship-handling qualities or berthing capability.

NOTE:

To ensure greater safety in the Jebel Dhanna Channel, in consultation with Messrs ADPPOC and executive manager of Petroleum Ports Authority, it has been decided to minimise the amount of paperwork the Pilot is expected to complete while in transit from Gasha beacon to inner anchorage area.

Therefore a vessel arriving at Gasha while tendering her "Notice of Readiness" will henceforth be required to pass to Jebel Dhanna:

1. Name of vessel.
2. Tonnage required.
3. Her maximum loading rate, always assuming 2×16 in. hoses.
4. Number of hours ballast.
5. Any health hazard infectious diseases/or none.
6. Draft outwardbound.
7. Any other pertinent information.

The Pilot is to obtain signature on "acceptance of port regulations" booklet prior to entering channel. All other documentation can be completed after vessel is made fast in the berth. This will ensure no distractions while in transit in the channel and further enhance the exemplary safety standards.

All parties are kindly requested to comply with the slight change in Jebel Dhanna/Ruwais documentation procedures to enhance safety requirements.

TIDAL STREAMS: In the outer approaches to Jebel Dhanna-Ruwais, tidal streams would appear to attain a maximum of 1 knot while 1.7 knots may be encountered in the channel N.E. of Jazirat Sir Bani Yas.

Tidal currents in the area of the berths seldom exceed 0.4 knots.

The tides are generally diurnal, winds from N.E. and N.W. may cause an increase up to 0.6 m. in the height of the tide.

The highest average, spring high tide is 2.0 m. above chart datum.

The highest average, neap high tide is 1.0 m. above chart datum.

AIDS TO NAVIGATION: Approaches to Jebel Dhanna-Ruwais (See Admiralty Charts No. 3778, 3779 and 3780).

The outer channel for deep drafted vessels between Jazirat Zarakhuh (Zirku) and Gasha Anchorage is marked by 6 buoys and 2 light floats as follows:

Name/No.	*Description*	*Characteristic*	*Position*
Outer Fairway	Safe Water Mark	Iso 10 secs.	24° 45′ 48″ N. 52° 53′ 12″ E.
O1	Conical Green	Fl.G. 5 secs.	24° 46′ 20″ N. 52° 49′ 30″ E.
Creagh Shoal	Light Float	Fl. 10 secs. 14 M Racon "C" 72 secs.	24° 43′ 00″ N. 52° 42′ 15″ E.
Patch	Conical Green	Fl.G. 3 secs.	24° 40′ 00″ N. 52° 41′ 32″ E.
O5		Qk.Fl.(2) G. 10 secs.	24° 37′ 43″ N. 52° 38′ 13″ E.
Dalma	Light Float	Qk.Fl.(9) 15 secs. Racon "D" 72 secs.	24° 32′ 24″ N. 52° 27′ 48″ E.
O7	Conical Green	Gp.Fl.(3) G. 10 secs.	24° 29′ 27″ N. 52° 29′ 24″ E.
Gasha	West Cardinal	Qk.Fl.(9) 15 secs.	24° 25′ 46″ N. 52° 34′ 25″ E.

A relief route known as North Channel passes from the outer fairway buoy S.E. of Creagh Shoal and enters the port East of Gasha Island. It is marked by:

Obstruction	Isolated Danger Mark	Gp.Fl.(2) 10 secs.	24° 37′ 50″ N. 52° 47′ 17″ E.
North Channel	Safe Water Mark	Iso. 10 secs.	24° 30′ 00″ N. 52° 41′ 36″ E.
West Kurkum	West Cardinal	Qk.Fl.(9) 15 secs.	24° 23′ 51″ N. 52° 41′ 31″ E.
East Gasha	Green Conical	Fl.G. 5 secs.	24° 23′ 54″ N. 52° 41′ 15″ E.

The least depth in this channel 7.5 m. (1980) occurs about 0.8 nautical miles North of the Gasha/Kurkum entrance.

A Beacon was established at Price Shoal (1980) consisting of a pile with a bottle chamber at the top and a gas lantern.

Price Shoal	Red Pile Structure	Fl. 5 secs. 12 m. 14 miles Racon "P" 48 secs.	24° 17′ 24″ N. 52° 42′ 09″ E.

Shipmaster's Report: September 1992.

During our visit to Jebel Dhanna, I observed the following changes, which I consider worth bringing to your attention for future corrections to your Guide.

Berth No. 3 is no longer a conventional buoy mooring, but has been changed to an SBM mooring. As we berthed on Berth No. 4, I am unable to supply further details.

I also noticed changes in the Approach Channel with the establishment of 2 new buoys, which the Pilots advise me were placed 6 weeks ago. I enclose details for your interest.

Berthing was at night, so physical sighting of the buoys not possible.

New buoy by No. 1, in position Lat. 24° 36.7′ N., Long. 52° 35.8′ E., GP. FL. 3 every 9 secs.

New buoy by No. 2, in position Lat. 24° 34.8′ N., Long. 52° 32.6′ E., FL. Red every 5 secs.

ANCHORAGES: The main anchorage positions are defined on Chart No. 3780, and are identified by the letters of the alphabet.

Explosives Anchorage: Anchorage bounded by the following points:

(i)	24° 13′ 30″ N., 52° 44′ 55″ E.	(iii)	24° 13′ 18″ N., 52° 46′ 18″ E.
(ii)	24° 12′ 46″ N., 52° 45′ 48″ E.	(iv)	24° 14′ 00″ N., 52° 45′ 27″ E.

Explosives Buoy: Mooring buoy in position Lat. 24° 09′ 36″ N., Long. 52° 46′ 18″ E., for the purpose of temporary mooring of barges or pontoons carrying explosives.

CHANNELS:

Deep Water Channel: The channel marked at its outer end by:

Gasha Buoy in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 25″ E.

marked on the West side by:

Buoy No. 1 in	Lat. 24° 24′ 28″ N.	Long. 52° 36′ 26″ E.
No. 3	Lat. 24° 23′ 50″ N.	Long. 52° 37′ 18″ E.
No. 5	Lat. 24° 23′ 02″ N.	Long. 52° 38′ 37″ E.
No. 7	Lat. 24° 21′ 33″ N.	Long. 52° 40′ 14″ E.
No. 9	Lat. 24° 20′ 33″ N.	Long. 52° 41′ 22″ E.
No. 11	Lat. 24° 19′ 49″ N.	Long. 52° 41′ 52″ E.
No. 13	Lat. 24° 17′ 42″ N.	Long. 52° 40′ 34″ E.
No. 15	Lat. 24° 14′ 55″ N.	Long. 52° 39′ 26″ E.
No. 17	Lat. 24° 11′ 41″ N.	Long. 52° 41′ 42″ E.

and marked on the East side by:

Buoy No. 2 in	Lat. 24° 25′ 18″ N.	Long. 52° 35′ 40″ E.
No. 4	Lat. 24° 24′ 18″ N.	Long. 52° 37′ 07″ E.
No. 6	Lat. 24° 23′ 57″ N.	Long. 52° 37′ 34″ E.
No. 8	Lat. 24° 22′ 46″ N.	Long. 52° 39′ 06″ E.
No. 10	Lat. 24° 21′ 37″ N.	Long. 52° 40′ 21″ E.
No. 12	Lat. 24° 20′ 58″ N.	Long. 52° 41′ 08″ E.
No. 14	Lat. 24° 20′ 29″ N.	Long. 52° 41′ 42″ E.
No. 16	Lat. 24° 19′ 49″ N.	Long. 52° 42′ 18″ E.
No. 18	Lat. 24° 18′ 42″ N.	Long. 52° 41′ 48″ E.
No. 20	Lat. 24° 17′ 45″ N.	Long. 52° 41′ 28″ E.

North Channel: The inward/outward route marked at its southern end by

East Gasha Buoy	in	Lat. 24° 23′ 54″ N. Long. 52° 41′ 15″ E.
West Kurkum Buoy	in	Lat. 24° 23′ 51″ N. Long. 52° 41′ 31″ E.

Yabr Channel: The route East of Jazirat Yabr marked by:

North Yabr Buoy	in	Lat. 24° 20′ 54″ N. Long. 52° 43′ 18″ E.
Yabr Channel	in	Lat. 24° 18′ 55″ N. Long. 52° 45′ 11″ E.
S.E. Yabr	in	Lat. 24° 18′ 20″ N. Long. 52° 44′ 24″ E.
South Yabr Channel	in	Lat. 24° 15′ 46″ N. Long. 53° 43′ 24″ E.

Halat Al Alaq Island is now marked by:

North Alaq	in	Lat. 24° 15′ 20″ N. Long. 52° 40′ 54″ E.
West Alaq	in	Lat. 24° 14′ 27″ N. Long. 52° 40′ 27″ E.
N.W. Alaq	in	Lat. 24° 15′ 06″ N. Long. 52° 40′ 21″ E.
South Alaq	in	Lat. 24° 13′ 48″ N. Long. 52° 41′ 30″ E.
East Alaq	in	Lat. 24° 14′ 23″ N. Long. 52° 41′ 38″ E.

Ruwais Approach: The channel to N.E. of Ruwais middle marked by:

(i) Buoy No. 22	in	Lat. 24° 13′ 38″ N. Long. 52° 42′ 12″ E.
(ii) Buoy No. 24	in	Lat. 24° 12′ 24″ N. Long. 52° 44′ 42″ E.
(iii) Buoy North Middle	in	Lat. 24° 12′ 42″ N. Long. 52° 43′ 41″ E.
(iv) Buoy East Middle	in	Lat. 24° 12′ 08″ N. Long. 52° 44′ 26″ E.
(v) Buoy South Middle	in	Lat. 24° 11′ 07″ N. Long. 52° 43′ 46″ E.
(vi) Buoy West Middle	in	Lat. 24° 11′ 39″ N. Long. 52° 42′ 29″ E.
(vii) Buoy No. 26	in	Lat. 24° 12′ 17″ N. Long. 52° 45′ 48″ E.
(viii) Buoy No. 28	in	Lat. 24° 11′ 17″ N. Long. 52° 45′ 19″ E.
(ix) Buoy No. 30	in	Lat. 24° 10′ 10″ N. Long. 52° 45′ 24″ E.
(x) Buoy No. 32	in	Lat. 24° 10′ 15″ N. Long. 52° 45′ 45″ E.

Bulk Cargo Terminal (BCT): Turning basin marked by buoys:

(i) BCT 1	in	Lat. 24° 09′ 29″ N. Long. 52° 43′ 54″ E.
(ii) BCT 2	in	Lat. 24° 09′ 24″ N. Long. 52° 44′ 12″ E.
(iii) BCT 4	in	Lat. 24° 09′ 07″ N. Long. 52° 44′ 16″ E.
(iv) BCT 6	in	Lat. 24° 08′ 57″ N. Long. 54° 44′ 14″ E.

A relief channel East of Sir Bani Yas Island is marked by:

(i) N.E. Yas	in	Lat. 24° 21′ 58″ N. Long. 52° 39′ 21″ E.
(ii) Stewart	in	Lat. 24° 20′ 09″ N. Long. 52° 40′ 05″ E.

The entrance to the Construction Wharf is marked by:

CW1	in	Lat. 24° 19′ 12″ N. Long. 52° 40′ 20″ E.
CW2	in	Lat. 24° 09′ 10″ N. Long. 52° 45′ 07″ E.
CW3	in	Lat. 24° 09′ 09″ N. Long. 52° 45′ 04″ E.
CW4	in	Lat. 24° 08′ 34″ N. Long. 52° 45′ 08″ E.

PROHIBITED AREAS: Prohibited Areas exist for a distance of 2 cables (1,200 ft. – 365 m.) around any berth at which any ship is engaged in loading or discharging any petroleum cargo of whatever description including crude oils and refined products whether in bulk or containers, LNG or LPG and no vessels or craft may enter such restricted areas without instructions from the Port Authority or Oil Company.

RESTRICTED AREAS:

Sea Berths: A restricted area exists around ADCO's sea-berths within an area bounded by a line from:

(a) Jebel Dhanna Jetty Light in Lat. 24° 11′ 20″ N., Long. 52° 37′ 51″ E., thence 359° to

(b) Light Beacon "T.13" in Lat. 24° 13′ 06″ N., Long. 52° 37′ 49″ E. thence 060° to

(c) in Lat. 24° 14′ 00″ N., Long. 52° 39′ 30″ E., thence to 139° to

(d) Buoy No. 17 in Lat. 24° 11′ 41″ N., Long. 52° 41′ 42″ E., thence 255.5° to the coast to

(e) in Lat. 24° 10′ 48″ N., Long. 52° 37′ 57″ E.

Navigation and anchorage within this area is strictly prohibited to all unauthorised vessels and those not under the control of a Pilot.

Refinery/GASCO/FERTIL: A restricted area exists around the Refinery, GASCO Jetties and FERTIL Jetties at Ruwais within an area bounded by a line from:

(a) in Lat. 24° 08′ 36″ N., Long. 52° 42′ 12″ E., thence 000° to
(b) in Lat. 24° 10′ 24″ N., Long. 52° 42′ 12″ E., thence 035.75° to
(c) in Lat. 24° 10′ 48″ N., Long. 52° 42′ 30″ E., thence 103.5° to
(d) in Lat. 24° 10′ 18″ N., Long. 52° 44′ 42″ E., thence 119.5° to
(e) in Lat. 24° 09′ 57″ N., Long. 52° 45′ 24″ E., thence 195° to
(f) Construction harbour jetty head in Lat. 24° 08′ 12″ N., Long. 52° 44′ 54″ E.

Navigation and anchorage is prohibited to all unauthorised vessels not under control of a Pilot. Within this area no vessel or craft may secure or make fast to the Petroleum Jetty without instruction from the Pilot, Port Officer or the Oil Company.

RESTRICTIONS:

Times of Entry or Leaving: Subject to limitations upon draft, under keel clearance and extreme adverse weather conditions, vessels may enter or leave at any time during the day or night.

Minimum Under Keel Clearance: To ensure safe channel passage, a minimum under keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:

(a) 3 ft. (0.91 m.) for ships of less than 100,000 Summer d.w.t.
(b) 4 ft. (1.22 m.) for ships between 100,000 and 250,000 Summer d.w.t.
(c) 5 ft. (1.52 m.) for ships of over 250,000 Summer d.w.t.

And such under keel clearance may be increased at any time at the Port Authority's discretion having due regard to weather conditions.

NOTE: While observing the safety requirements of under keel clearance, tidal delays may be experienced as follows:

(a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
(b) Ships drawing 45 ft. (13.7 m.) will rarely have to wait for the tide.
(c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
(d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
(e) Ships drawing 48 ft. (14.6 m.) will occasionally be neaped.
(f) Ships drawing 49 ft. (14.9 m.) will be neaped ±294 days per year.

The best months are June, July and August.

Meteorological conditions may reduce the height of the tide by up to 1 ft. (0.305 m.)

Movements Within the Port Limits: No vessel may enter, leave or move within the confines of the port unless permission for moving is first obtained from the Port Control Office.

Outward Priority: When one ship is ready to leave and another to enter simultaneously, a deep loaded outward bound ship which requires to transit the "Deep Water Channel" on account of draft in excess of 30 ft. (9.14 m.) shall have priority subject to the provisions of Rules mentioned above.

HEALTH: *Quarantine and Medical Clearance:* The standard International Declaration of Health is required upon arrival. Free Pratique is obtained by radio.

There are no facilities for Derat at Ruwais.

If Free Pratique has not been granted prior to the vessel's arrival, the Master may contact Port Control for advice/instruction as per Port Health instructions.

Every vessel within the port shall display the appropriate quarantine signals as prescribed in the International Code of Signals.

ARRIVAL/DEPARTURE NOTICES: *Notice of Arrival:* The Master or Agent shall inform the Port Officer 72 hours prior to the vessel's arrival, giving the following details:

1. Name of vessel.
2. Flag.
3. G.r.t., n.r.t. and Summer Deadweight.
4. Arrival draft.
5. Nature of cargo and amount to be discharged or loaded if known.
6. ETA and subsequent amendments.
7. Deballasting time, type and quantity of ballast to be discharged.
8. Inerting time.
9. Date of expiry of the following certificates:
   (a) Load Line.
   (b) Ship Safety Construction Certificate.
   (c) Ship Safety Equipment Certificate.
   (d) Ship Safety Radio-Telegraphy – as appropriate.
   (e) Ship Safety Radio-Telephony – as appropriate.
   (f) Oil Liability Certificate (TOVALOP).
   (g) International Oil Pollution Liability (CLC).
   (h) Derat/Exemption Certificate.
   (i) Any other service required.

And shall confirm or amend such information at 48 hours and 24 hours before arrival.

Vessels should also advise:

1. The date and final port and country of her last loading at an Gulf or Omani port.
2. A list of ports and countries at which the vessel has called between 1. above and her arrival at Jebel Dhanna.
3. Should the tanker not have loaded in the Gulf or an Omani port since building, then a list of ports and countries at which the vessel has called from the date of building to her arrival at Jebel Dhanna.

In order to expedite Pilot attendance, Masters should endeavour to confirm their final ETA to "Port Control" Jebel Dhanna/Ruwais on VHF radio, Channel 9, 6 hours and 2 hours prior to arrival at anchorage.

Notice by Agent: The Agent shall also supply the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Notice of Departure: The Master or Agent of any ship within the port shall inform Port Control giving at least 12 hours' notice of departure and shall further confirm the time of departure 2 hours before being ready to sail.

BERTHING FACILITIES: The Port of Jebel Dhanna-Ruwais consists of two main oil terminals, one petroleum gas terminal, one bulk cargo terminal, a sulphur handling jetty and a small cargo harbour (see Admiralty Chart No. 3780).

The Crude Oil Terminal at Jebel Dhanna is operated by the Abu Dhabi Company for Onshore Oil Operations (ADCO) and consists of 4 C.B.M. Berths capable of accepting tankers up to 330,000 d.w.t. and 1,215 ft., (370.3 m.) in length. Minimum depths at the berths are:

Berth No. 1: 51 ft. (15.54 m.) max. length of ship 950 ft. (289.6 m.).
Berth No. 2: 52 ft. (15.85 m.) max. length of ship 1,100 ft. (335.3 m.).
Berth No. 3: 55 ft. (16.76 m.) S.B.M.
Berth No. 4: 55 ft. (16.76 m.) max. length of ship 1,215 ft. (370.3 m.).

Also see "Section B".

The Refinery Terminal at Ruwais about 2.5 miles S.E. of the Jebel Dhanna Terminal Berths is owned and operated by the Abu Dhabi National Oil Company Ruwais Refinery and consists of a 3 km. jetty with 2 deep water berths and 4 coastal tanker berths for the exportation of refined petroleum products and importation of crude oil.

Also see "Section C".

The Abu Dhabi Gas Industries Ltd. (GASCO) Terminal consisting of a 2.6 km. trestle jetty and one berth lies about half a mile East of the Refinery Jetty and can accept LPG carriers in the range 28,000 cu.m. to 125,000 cu.m. There is a minimum depth alongside of 17.0 m.

Also see "Section D".

The Ruwais Fertiliser Industries (FERTIL) Jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long, 25,000 d.w.t. bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

Also see "Section E".

A bulk sulphur export jetty with 6 berthing face piles capable of handling cargo vessels up to 25,000 tons d.w.t. with a depth of 36 ft. alongside completed in 1984. Loading via a single gantry.

Also see "Section F".

RUWAIS CARGO HANDLING SERVICE CONSTRUCTION JETTY:

General Information: ADPPOC, as the Port Operator, provides cargo handling service for the prime purpose of serving the construction and commissioning of the ADNOC and GASCO Refineries and Petroleum Export Terminals.

This undertaking is provided on an independent basis as an additional port facility and may be utilised by any importer who wishes to route cargo through the port to destinations in the Western region of Abu Dhabi.

A harbour, known as the Construction Jetty, consisting of 4 small cargo ship berths and 1 Ro-Ro Berth, is situated to the East of the Ruwais Petroleum complex. Vessels and barges with a draft of less than 4.2 m. may enter and lie safely alongside to discharge cargo. Larger cargo ships with a draft in excess of 4.2 m. will anchor in the cargo ship anchorages located N.N.W. 2 miles (approximately) from the Construction Jetty and discharge onto barges.

Extent of Service: Cargo will be worked in the cargo anchorages, weather permitting, during daylight hours only. The target minimum rate for discharge of general cargo will be 700 freight tons per day. In special circumstances these limitations may be modified to suit the dispatch and turn-round of the discharging freighter.

Procedure:

1. Consignee or his Agent must sign a Cargo Handling Indemnity form before discharge and vessel's Manager must sign Port's Conditions of Use receipt before entering port and berthing.
2. All Customs cargo documentation and clearance of vessels is the responsibility of the Shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.
3. The ship will normally be charged for port dues only as per 1984 Regulations and Tariff, except that, for working overstowed cargo, a charge per gang hour will be levied to the ship.
4. The consignee will normally pay the full handling charge per freight ton. The charge covers ship stevedoring, barge and towage, and either barge discharge to landed on quay, direct to trailer, or delivered to Custom's Pound.
5. Agents and/or consignees should advise their requirements, vessel ETAs and supply cargo manifests and stowage plans to: The Port Officer, Jebel Dhanna-Ruwais Port, ADPPOC, Ruwais, P.O.Box 61, Abu Dhabi. Tel: Ruwais 72018 daytime or Port Control Ruwais 75700, ext. 5762 (24 hours). Telex: 52207 Apocru EM. Fax: 72102.

PORT EQUIPMENT/CRAFT: The following craft and equipment are available in the port and subject to utilisation may be chartered or hired on application to the Station Manager who will advise the current rates.

Vessels:

3×3,200 h.p. twin screw shiphandling tugs with a bollard pull of 40 tons.

Equipped for fire fighting and oil dispersant spraying, fitted with 2 centrifugal pumps producing 680 cu.m. water/foam per hour to a height of 120 m. through a horizontal distance of 85 m.

Each tug carries 45 metric tons of foam and 11 metric tons oil concentrate dispersant.

3×15 m. twin screw mooring launches, 480 h.p. with 2 live-on-board crew.

5×15 m. single screw mooring launches, 360 h.p. each, no accommodation.

3×16 m. twin screw pilot-cum-ambulance vessels, 20 knots with live-on-board accommodation.

1 twin screw diving tender vessel.

1×12 m. single screw general purpose workboat.

1 barge with reinforced deck for heavy lifts and tank divided for oil pollution slops, 1,200 tons.

Shore Equipment:

1×150 ton Manitowoc mobile crane with 30 m. boom.

1×10 ton fork lift.

Miscellaneous:

Fully equipped marine workshops for repairs, overhauls to tugs, launches, vehicles, mooring buoys, etc.

Two double lock (2 man) decompression diving chambers in air conditioned module.

MEDICAL: If any person suffers a serious injury or sickness within the port limits and immediate medical attention becomes necessary the Master of the vessel concerned or the person in charge of the location shall notify the emergency to the Port Control on VHF Channel 9.

N.B. The Port "Casevac" system for such emergencies will be put into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concise description of the injury or sickness must be stated at the time of reporting. In the event a crew member has to be landed for hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious person) comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed.
(e) Masters of vessels which are not berthed alongside the Ruwais jetties should prepare invalid cases for landing in a fast launch or picking up by helicopter e.g. Niel Robertson stretcher; and afford a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port for which Medical or Police assistance is required shall make request for such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths and should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should be arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	*ASTM*
1. Viscosity Kin. at 33°C, CS, Max.	1.4	D445
2. Carbon Residue Conradson Wt. Pct. Max.	1.5	D189
3. Flash Point °C, Min.	66	D93
4. Water Cont. Pct. Vol. Max.	0.25	D95
5. Sediment Pct. Wt. Max.	0.02	D473
6. Ash Pct. Wt. Max.	0.02	D482
7. Sulphur Pct. Wt. Max.	1.80	D129
8. Pour Point °C Max.	12	D97

B. Marine Fuel Oil

1. Kin. Viscosity at 50°C. Max.	180	D445
2. Flash Point, °C. Min.	60	D93
3. Water Cont. Vol. Pct. Max.	1.0	D95
4. Sediment Pct. Wt. Max.	0.25	D478
5. Ash Pct. Wt. Max.	0.20	D482
6. Sulphur Point °C. Max.	4.0	D129
7. Pour Point °C. Max.	24	D97
8. Sp. Gravity at 60/60° F. Max.	0.990	D1298

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (25.4.91).

CLIMATE: The cool winter season extends over November to February with mean daily maximum temperatures of 25° C. to 30° C. and night temperatures of 10° C. to 15° C. The lowest recorded temperature being 4° C. Ground frost can occur inland.

The hot summer season extends over May to September with maximum day temperatures between 40° C. to 45° C.: the highest recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year, averaging between 50 and 60 per cent by day and 75 to 80 per cent by night. Heavy dew may be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are prevalent from November to May giving a total annual rainfall of 10 mm. to 50 mm. Rain is rare during the remaining months while in some years there is none at all.

Throughout the year the prevailing winds are from the West to North North-East sector. They are strongest during November to April when they occasionally reach gale force. Gusts of up to 50 knots have been recorded (April) and a 24-hours mean wind speed of 32 knots from the North-West is on record (January) the Shamal or strong North-West wind may blow for periods up to three days and raise a rough sea with waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Jebel Dhanna. 'Land and Sea' breezes are experienced throughout the year.

Visibility is 10 nautical miles for 70% of the time and less than 2 nautical miles up to 5% of occasions due to dust haze or radiation fog. Fog can occur during any month of the year but is most frequent in Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards Sir Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C. (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' notice to the Ship's Agent. These stores are not permitted to be loaded at an oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents who are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertake the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipe-lines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any Ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All Ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where

explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   (a) Port of discharge.
   (b) Discharge quantity in tonnes.
   (c) Date(s) of discharge.
   (d) Name and nationality of vessel.
   (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

LOCATION: 24° 11′ N. 52° 38′ E.

OPERATOR: ADPPOC is service contractor to Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and minimum width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Buoys No. 13 and 20, leaving Alaq Island to starboard. From Buoys No. 13 and 20 the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is not available.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys No. 13 and 20 and North of Berths. This area marked by Buoy No. 15 to West, Buoy No. 22 to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,215 ft. can berth at Jebel Dhanna. 450,000 d.w.t. at SBM.

Also see Section "A" – "Restrictions".

VHF: Vessels are to maintain watch on VHF Channel 9 when berthed.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately adjacent to the accommodation ladder platform, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36 in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Acceptable* (ft.)	*Approx d.w.t.* acceptable*	*Max loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×16 in.	16,269
No. 2	46	85,000	6,000	2×16 in.	16,427
No. 3 (SBM)	49	450,000	5,000	2×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

* Deadweights shown for vessels loading full cargoes. Part cargoes may be greater. Berths No. 2, 3 and 4 can accommodate VLCCs but Berth No. 2 is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

N.B. The Port "Casevac" system for such emergencies will be put into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concise description of the injury or sickness must be stated at the time of reporting. In the event a crew member has to be landed for hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious person) comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed.
(e) Masters of vessels which are not berthed alongside the Ruwais jetties should prepare invalid cases for landing in a fast launch or picking up by helicopter e.g. Niel Robertson stretcher; and afford a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port for which Medical or Police assistance is required shall make request for such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths and should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should be arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits		*Method ASTM*

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (25.4.91).

CLIMATE: The cool winter season extends over November to February with mean daily maximum temperatures of 25° C. to 30° C. and night temperatures of 10° C. to 15° C. The lowest recorded temperature being 4° C. Ground frost can occur inland.

The hot summer season extends over May to September with maximum day temperatures between 40° C. to 45° C.: the highest recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year averaging between 50 and 60 per cent by day and 75 to 80 per cent by night. Heavy dew may be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are prevalent from November to May giving a total annual rainfall of 10 mm. to 50 mm. Rain is rare during the remaining months while in some years there is none at all.

Throughout the year the prevailing winds are from the West to North North-East sector. They are strongest during November to April when they occasionally reach gale force. Gusts of up to 50 knots have been recorded (April) and a 24-hours mean wind speed of 32 knots from the North-West is on record (January) the Shamal or strong North-West wind may blow for periods up to three days and raise a rough sea with waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Jebel Dhanna. 'Land and Sea' breezes are experienced throughout the year.

Visibility is 10 nautical miles for 70% of the time and less than 2 nautical miles up to 5% of occasions due to dust haze or radiation fog. Fog can occur during any month of the year but is most frequent in Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards Sir Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C. (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' notice to the Ship's Agent. These stores are not permitted to be loaded at an oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents who are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertake the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipe-lines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any Ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All Ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where

explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   (a) Port of discharge.
   (b) Discharge quantity in tonnes.
   (c) Date(s) of discharge.
   (d) Name and nationality of vessel.
   (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

LOCATION: 24° 11′ N. 52° 38′ E.

OPERATOR: ADPPOC is service contractor to Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and minimum width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Buoys No. 13 and 20, leaving Alaq Island to starboard. From Buoys No. 13 and 20 the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is not available.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys No. 13 and 20 and North of Berths. This area marked by Buoy No. 15 to West, Buoy No. 22 to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,215 ft. can berth at Jebel Dhanna. 450,000 d.w.t. at SBM.

Also see Section "A" – "Restrictions".

VHF: Vessels are to maintain watch on VHF Channel 9 when berthed.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately adjacent to the accommodation ladder platform, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36 in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Accept-able* (ft.)	*Approx d.w.t.* accept-able*	*Max loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×16 in.	16,269
No. 2	46	85,000	6,000	2×16 in.	16,427
No. 3 (SBM)	49	450,000	5,000	2×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

* Deadweights shown for vessels loading full cargoes. Part cargoes may be greater. Berths No. 2, 3 and 4 can accommodate VLCCs but Berth No. 2 is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

N.B. The Port "Casevac" system for such emergencies will be put into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but concise description of the injury or sickness must be stated at the time of reporting. In the event a crew member has to be landed for hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious person) comprising:
  1. Time and cause of accident/sickness
  2. Time and description of medication administered, if any
  3. Further details of First Aid given, and/or symptoms noticed.
(e) Masters of vessels which are not berthed alongside the Ruwais jetties should prepare invalid cases for landing in a fast launch or picking up by helicopter e.g. Niel Robertson stretcher; and afford a weather lee (if possible) in adverse weather conditions.

Medical/Police Assistance: The Master of any vessel within the Port for which Medical or Police assistance is required shall make request for such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths and should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should be arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	*ASTM*

Fog can occur during any month of the year but is most frequent in Winter: normally it develops during the night and early morning and clears by 1000 hrs. Usually the fog banks drift to seaward towards Sir Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32° C. (Summer). During the Summer the 15 m. depth temperature is only a degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' notice to the Ship's Agent. These stores are not permitted to be loaded at an oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents who are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies undertake the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipe-lines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any Ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All Ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where

explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   (a) Port of discharge.
   (b) Discharge quantity in tonnes.
   (c) Date(s) of discharge.
   (d) Name and nationality of vessel.
   (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

LOCATION: 24° 11′ N. 52° 38′ E.

OPERATOR: ADPPOC is service contractor to Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and minimum width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Buoys No. 13 and 20, leaving Alaq Island to starboard. From Buoys No. 13 and 20 the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is not available.

ANCHORAGES: If berth not available, or if ships cannot sail immediately after loading, they can anchor in an area South of Buoys No. 13 and 20 and North of Berths. This area marked by Buoy No. 15 to West, Buoy No. 22 to East and by berths to South. Alaq Island lies in the middle of this area and is marked by 2 buoys No. 17 and N. Alaq and by S. Alaq Beacon.

MAX. SIZE: (Also see "Berthing"). Vessels up to 330,000 d.w.t. and max. LOA 1,215 ft. can berth at Jebel Dhanna. 450,000 d.w.t. at SBM.

Also see Section "A" – "Restrictions".

VHF: Vessels are to maintain watch on VHF Channel 9 when berthed.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately adjacent to the accommodation ladder platform, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:

1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys. Arrangements in advance by contacting Jebel Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36 in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth	*Draft Accept-able* (ft.)	*Approx d.w.t.* accept-able*	*Max loading rate* (t.p.h.)	*Strings of flexible hoses*	*Length of sea line* (ft.)
No. 1	45	83,000	6,000	2×16 in.	16,269
No. 2	46	85,000	6,000	2×16 in.	16,427
No. 3 (SBM)	49	450,000	5,000	2×16 in.	19,000
No. 4	49	90,000	9,500	2×16 in.	17,200

* Deadweights shown for vessels loading full cargoes. Part cargoes may be greater. Berths No. 2, 3 and 4 can accommodate VLCCs but Berth No. 2 is restricted to vessels having a max. LOA of 1,100 ft.

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipe-lines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on both sides.

S.B.M.: 30 sections × 30 ft. × 16 in.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban Crude contains concentrations of H_2S (Hydrogen Sulphide). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be readily available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured, thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in Berths 1 and 2, 8,500 t.p.h. in Berth 3, and 9,500 t.p.h. in berth 4. Availability of max. loading rates is dependent on the number of berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, then ADCO will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:

(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Port Authori or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water fo overside discharge must be clean and a declaration signed by the Maste and delivered to the representative of the Terminal to this effect. Ashes oil, oily water or other refuse must not be discharged overboard in por waters. Vessel's scuppers must be effectively plugged and leakage o spillage of oil aboard ship must not be swept or washed overboard whil in port waters.

It is essential that vessel is adequately ballasted to ensure saf handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loadin whilst discharging ballast or prior to completely deballasting to avoi having the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

MEDICAL: A hospital run by the Abu Dhabi National Oil Company (ADNOC) is situated adjacent to the Ruwais Industrial Complex. Ambulance facilities are available.

DENSITY: 1031.

FRESH WATER: Not available.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 of 1973 and ISGOTT Safety Guide.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity o board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Por Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vesse to another, prohibited without appropriate written permits from Por Officer.

Shipmaster's Report: 1978.

All alcoholic liquor must be under bond and sealed.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personne for which Agent requires Full Name/nationality/Seaman's Book/Passpor Number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made a other ports.

Shipmaster's Report: 1978.

Immigration Authorities require at least 4 days' notice and preferably 7 days' notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations to clocks during year.

POLICE/AMBULANCE/FIRE: The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and Ruwais and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Ruwais Hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait unti vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

(C) RUWAIS – REFINERY TERMINAL

OPERATOR: ADPPOC is the service contractor to Abu Dhabi National Oil Co., (ADNOC).

GENERAL: The ADNOC Ruwais Refinery Terminal is situated about 2.5 miles SE of the Jebel Dhanna Sea Berths and consists of a trestle jetty 3 km. in length with 2 deep water berths and 4 coastal tanker berths. Vessels will berth port or starboard side at the discretion of the Pilot having regard for the tide and weather conditions.

RADIO: *Format for information required from vessels prior to berthing at Ruwais Refinery Terminal:*

A. Firm ETA Ruwais 72, 48, 36, 24 and 12 hours prior to arrival.
B. Cargo(es) (with quantity in M.tons) to be loaded and acceptable loading rate per hour per line. Number of lines for each cargo.
C. Cargo(es) on board on arrival (if any), with tanks and last port loaded.
D. Will cargo(es) ex-Ruwais be commingled with cargo on board. If so, indicate details.
E. Stowage of clean ballast to be discharged overboard. Indicate under ballast details below if discharge will take place during or prior to loading, as applicable.
  1. Quantity of clean ballast in tanks No.... nominated for Cargo loading at Ruwais.....M.tons
  2. In segregated ballast tanks.....M.tons
  3. In permanent ballast tanks.....M.tons
  4. Total time required for ballast discharging, prior to loading.....Hours

Note: Clean ballast oil content must be below 15 p.p.m. and samples will be drawn for tests to ensure compliance.

F. Quantity of dirty ballast (if any) to be discharged to the Refinery dirty ballast system and time required for discharging. This is subject to acceptance by the Refinery. Dirty ballast must be free of lead and/or chemical washings.
G. Last three cargoes handled by vessel in the following sequence:
  (i) The very last Cargo(es)/Stowage arrangements.
  (ii) The 2nd last Cargo(es)/Stowage arrangements.
  (iii) The 3rd last Cargo(es)/Stowage Rrangements.
H. Full details of tanks washing and cleaning carried out since the discharge of the last Cargo(es).
I. Draft on arrival and maximum expected draft on sailing.
J. Maximum freeboard on arrival after discharging ballast prior to loading and expected freeboard on sailing (including height from deck to connections at manifold) in metres.
K. Distance from vessel's rails to manifold connection and height of rails from deck.
L. Distance between manifold connections centre to centre in metres.
M. Displacement on arrival and expected displacement on sailing.
N. Bunkers/Water requirements.
O. Any other requirements.
P. SOLAS Protocols with latest revisions are strictly applied in this port and vessels should fully comply with all relevant regulations while in the port area.
Accordingly, please advise if tanks are inerted per SOLAS requirements and condition of inert gas system fitted in vessel.

Please note vessels should arrive with all tanks properly inerted as applicable under SOLAS Protocol, unless otherwise advised by Ruwais Refinery to arrive in gas free condition to enable internal inspection at inner cabotage by Third Party Inspectors, prior to loading. In this case please advise time required to inert vessel's tanks after completion of inspection.

The above information should be made available 72 hours prior to arrival at Ruwais and is additional to the requirements of the Ruwais Port Officer.

Also see "Shipmaster's Report" dated January 1992.

VHF: The Refinery Terminal maintains VHF watch on Channel 16 and Channel 9 for ship/shore communications and once berthed, the vessel will be connected to the terminal by land line telephone.

The Pilot will bring on board UHF Hand Set for manoeuvring purposes only.

Arrival Telegram Ship/Shore: After the Pilot boards the Ship/Shore Arrival Telegram will be passed by VHF Radio Channel 16/9 as follows:

(1) Name of Vessel.
(2) Nationality and Port of Registry.
(3) a – Gross Registered Tonnage.
  b – Net Registered Tonnage.
  c – Summer Deadweight.
(4) Size of manifold.
(5) Are reducers to 12 in., 10 in. and 8 in. available on board?
(6) Are adequate nuts and bolts and gaskets available on board?
(7) Number of hours required to de-ballast and quantity.
(8) Vessel's maximum loading rate.
(9) Quantity and type of cargo.
  a –
  b –
  c –
(10) Last Port.
(11) Next Port.
(12) Master's Name.
(13) Date and time of arrival.
(14) Date and time of Pilot on Board.
(15) ETA at Berth.
(16) Arrival Draft.
(17) Estimated Departure Draft.
(18) Bunkers requirements (quantity and type).
(19) Drinking Water requirement quantity.
(20) Is the ballast lead free?

Also see "Shipmaster's Report" dated January 1992.

BERTHING:

Berth "B"

Berth "B" is designed to accommodate tankers in the range 9,100 to 104,000 tons displacement. Length of ship 118.5 m. to 280 m. The minimum depth alongside the berth is 12.7 m.

The berth consists of the Loading Platform, four mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of six cargo Chicksan arms serve to load or discharge ships, namely:

2×12 in. dia.	Each arm is provided for Fuel Oil loading and ballast unloading.
2×12 in. dia.	Each arm is provided for Gasoline (Premium and Regular), Kerosene, Jet Fuel and Diesel Oil.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Fuel Oil, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:
(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote Control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Berth "C"

Berth "C" is designed to accommodate vessels with range 26,000 to 130,000 tons displacement. Length of ship 180 m. to 295 m. The minimum depth alongside the berth is 16.8 m.

The berth consists of the Loading Platform, six mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of seven cargo Chicksan arms serve to load or discharge the ship, namely:

3×12 in. dia.	Each arm is provided for Crude Oil, ballast unloading and Fuel Oil loading.
2×12 in. dia.	Each is provided for Gasoline, Kerosene, Diesel Oil loading.
1×10 in. dia.	For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia.	For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Fuel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,500 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:
(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Also see "Shipmaster's Report" dated January 1992.

Coastal Berth 1

Coastal Berth 1 is the Inner Berth on the North side of the Cabotage Jetty. The Berth consists of the loading platform, four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m. The loading platform has a bank of five Chicksan loading arms with 8 in. diameter connections. The minimum depth alongside the berth is 9.1 m. Vessel size 2,600 to 9,100 tons displacement.

Products available are: Fuel Oil, Diesel, Kerosene/Jet Fuel, Gasoline, Bunker 'C' and Marine Diesel Oil. Ballast will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.	Marine Diesel Oil	300 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.	Bunker 'C'	900 cu.m./h.
Kerosene	900 cu.m./h.	Ballast	400 cu.m./h.
Diesel Oil	900 cu.m./h.	Drinking Water	100/300 cu.m./h.
Fuel Oil	800 cu.m./h.		

One 3 in. flanged connection for fresh water.

The loading arms are provided with:
(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berth 2
Coastal Berth 2 is the Inner Berth on the South side of the Cabotage Jetty and consists of the loading platform; four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement. The minimum depth alongside the berth is 8.7 m. The loading platform has a bank of two 8 in. diameter loading arms.

vis. 1×8 in. to discharge ballast.
1×8 in. to load Bunker 'C', Marine Diesel or Fuel Oil. TEL unloading facilities are available.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:
- (i) Electro hydraulic operation.
- (ii) Manual quick coupling and hydraulic emergency release.
- (iii) Range control system.
- (iv) Vacuum breaker.
- (v) Remote control system.
- (vi) Connecting flange mating device.

Coastal Berths 3 & 4
The Outer Berth North and South side of the Cabotage Jetty each consist of four breasting dolphins and three mooring dolphins with a fourth common mooring dolphin with Berths 1 & 2. Length of ship 70 m. to 118.5 m., size 2,600 to 9,100 tons displacement.

The minimum depth alongside the berth is 9.4 m. (No. 3) and 9.2 m. (No. 4). The berths are equipped with four 8 in. loading arms and a 3 in. water connection.

Products available are: Diesel Oil, Kerosene/Jet Fuel, Gasoline, Marine Diesel Oil, Bunker 'C'.

Ballast water will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

The loading arms are provided with:
- (i) Electro hydraulic operation.
- (ii) Manual quick coupling and hydraulic emergency release.
- (iii) Vacuum breaker.
- (iv) Remote control system.
- (v) Range control system.
- (vi) Connecting flange mating device.

BERTHING AIDS:
Berths 'B' and 'C' are equipped with a radar operated safety berthing system indicating by means of coloured lights the forward and aft berthing velocity of the ship.

Two groups of coloured lights one forward and one aft indicate the safe/acceptable/dangerous lateral approach of the ship from a distance of 50 m. off the berth.

BALLASTING/DEBALLASTING: Ruwais Refinery has dirty ballast water treatment equipment and all dirty ballast shall be discharged ashore for treatment. (No dirty ballast may be discharged into the sea and pollution of the waters of the port is an offence against the Port Regulation and the laws of Abu Dhabi).

Accepting dirty ballast into the refinery storage is subject to approval by refinery, a sample of the dirty ballast may be required for analysis, a letter from Master requesting permission to discharge is to be made (letter is provided for Master's signature).

During loading/unloading all deck scuppers must be plugged. All precautions shall be taken to prevent oil or oily waters escaping into the sea during connection and disconnection of loading arms.

Normally the terminal Control Room will give a 10 minutes warning before deballasting may commence. Deballasting shall commence at slow speed to check systems and back pressure.

Simultaneous deballasting with loading of cargo is permitted only in the case of cargo of Bunker 'C'.

While encouraging quick turn around and the use of minimum ballast upon arrival, sufficient ballast must be retained on board for the safe manoeuvring of the vessel at the Pilot's discretion.

LOADING AND UNLOADING:
- (i) The Master should give the terminal a 'STAND BY' warning 10 minutes before ready to commence loading or discharging.
- (ii) Upon 'COMMENCE LOADING' from the Master only one pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.
- (iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that the tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.
- (iv) During the hours of darkness vessels loading products or discharging crude oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

DERAT: There are no facilities for Derat at Ruwais.

FUEL: Bunkers are obtainable at Refinery berths and should be arranged through the ship's Agent.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the ship's Agent.

STORES/PROVISIONS: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

SHIPMASTER'S REPORT: January 1992.

Vessel called to load 25,000 tonnes of Reformate.

Documents:

1 copy Port Clearance.
2 copies Crew List.
2 copies Crew Personal Effects List.
2 copies Bonded Stores List.

As Customs and Immigration Officers do not come on board anymore for sealing Bonded Stores, etc., all paperwork is dealt with by ship's Agent. Consequently alcoholic liquor will not be under bond and sealed. However conveyance ashore or to another vessel is prohibited.

Restrictions: With winds of 18 knots or more, port is closed.

Radio: Prior to arrival, vessel received two telexes from ship's Agent, one for the Port Officer – Petroleum Ports Authority, and the other for Ruwais Refinery.

Message No. 1:

Following information required by Port Officer – Petroleum Port Authority 72 hours prior to the vessel's arrival, giving the following details in the given format:

Question	Answer
	ETA.
2.	Flag.
3.	G.r.t., n.r.t., and Summer d.w.t.
4.	Arrival and departure drafts.
5.	Cargo to be loaded/discharged.
6.	Type and quantity of ballast and deballasting time.
7.	Status of Inert Gas System (I.G.S.).
8.	Status of Air Conditioning (A.C.).
9.	Expiry of certificates.
I.	Load Line.
II.	Safety Construction.
III.	Safety Equipment.
IV.	Safety Radio.
V.	Oil Liability (Tovalop).
VI.	Oil Pollution Liability (C.L.C.).
VII.	International Oil Pollution Prevention (I.O.P.P.).
VIII.	Classification.
IX.	Certificate of Fitness (Gas Carriers).
X.	Derat Certificate.

The ETA is to be amended as necessary 48 hours, 24 hours and 12 hours prior to arrival.

Message No. 2:

Following information required by Ruwais Refinery Terminal:
- (AA) ETA Ruwais, this is in addition to the routine 72, 48, 36, 24 and 12 hours notice required prior to arrival.
- (BB) Cargo quantities (in tonnes) to be loaded with intended stowage and acceptable loading rate per hour per line, any preferred sequence of loading cargo, number of manifold connections available for each cargo with identification tags sequenced from fore to aft.
- (CC) Cargo(es) on board on arrival (if any) with stowage nomenclature and last port loaded.
- (DD) Will cargo(es) ex Ruwais be comingled with cargo onboard, if so, indicate in detail.
- (EE) Last three cargoes handled by vessel in the following sequence:
  1. The very last cargo(es) / stowage arrangements.
  2. The 2nd last cargo(es) / stowage arrangements.
  3. The 3rd last cargo(es) / stowage arrangements.
- (FF) Full details of tank washing and cleaning carried out since the discharge of the last cargo(es).
- (GG) Stowage of clean ballast to be discharged overboard, indicate under ballast, details below, if discharge will take place during or prior to loading as applicable.
  - (1) Quantity of clean ballast in Cargo Tank No. .... nominated for cargo loading at Ruwais .... m.tons
  - (2) In segregated ballast tanks .... m.tons
  - (3) In permanent ballast tanks .... m.tons
  - (4) Total time required for ballast discharging prior to loading ..... hours

  Note: Clean ballast oil content must be below 15 p.p.m. and sample will be drawn for tests to ensure compliance. Vessel may have to wait for test results prior to receiving permission to discharge.
- (HH) Quantity of dirty ballast/slops (if any) to be discharged to the Refinery dirty ballast system and time required for discharging. Possible source and composition of oil content of dirty ballast. This is subject to acceptance by the Refinery. Please note dirty ballast must be free of lead content and/or chemical washings.
- (JJ) Draft on arrival and maximum expected draft on sailing.
- (KK) Displacement on arrival and expected displacement on sailing.
- (LL) D.w.t., LOA, parallel body, flag and year of built.

(MM) Maximum freeboard on arrival after discharging ballast prior to loading, (including) height from deck to connections at manifold in metres and expected freeboard on sailing.

(NN) Distance from vessel's rails to manifold connection and height of rails from deck.

(PP) Number of cargo manifold available, numbered from forward to aft, distance between manifold connections centre to centre in metres and distance from forward to manifold, No. of bunker manifold, distances from the nearest (fore/aft) cargo manifold.

(QQ) Bunkers/water requirements.

(RR) Any special requirements by Charterers/Owners with respect to tank inspection, tendering of Notice of Readiness, restrictions of berthing prior to lay days, etc.

(SS) Any other requirements.

(TT) Solas protocols with latest amendments are strictly followed in this port, and vessels should fully comply with all relevant regulations while in the port area.

Accordingly please advise if tanks are inerted per Solas requirements and condition of Inert Gas System fitted in vessel.

Please note: Vessels should arrive with all (repeat all) tanks properly inerted as applicable under Solas Protocol, unless otherwise advised by Ruwais Refinery to arrive in gas-free condition to enable internal inspection at inner anchorage by third party inspectors, prior to loading. In this case, please advise time required to inert vessel's tanks after completion of inspection.

The above information should be made at least 72 hours prior to arrival at Ruwais, and is in addition to the requirements of the Port Officer – PPA, Ruwais (See Message No. 1).

Tugs: 2 tugs used for berthing/unberthing. Tugs use tug's lines (2 for berthing, 1 for unberthing).

Berthing: Berthed at ADNOC (Abu Dhabi National Oil Company) Jetty C, the most Northern jetty, portside alongside with 3 head/stern lines, 2 breast lines and 2 spring lines. All soft ropes.

Ship will always berth portside alongside.

Loading: Loaded on this occasion through 1×10 in. ASA 150 flange arm. Max. loading rate per arm 1,500 cu.m./hr.

On an earlier occasion, vessel loaded Naphtha through 2×10 in. arms. Max. loading rate 3,000 cu.m./hr.

Deballasting: Dirty ballast/slops can be discharged ashore as long as it does not contain any leaded petroleum residues or cleaning chemicals.

(D) RUWAIS – NGL TERMINAL:

LOCATION: 24° 09′ 49″ N. 52° 43′ 16″ E.

OPERATOR: ADPPOC is the service contractor to Abu Dhabi Gas Industries (GASCO).

GENERAL INFORMATION: The Terminal Regulations are issued for the information and guidance of Masters of vessels loading at the GASCO Jetty at Ruwais. After receipt of the first ETA advice from a gas carrier GASCO will cable the Master of the vessel instructions to carry out following tests and checks 24 hours prior to arrival:

1. Check condition (oxygen content) of atmosphere in void spaces around cargo tanks.
2. Check all reliquefaction units fully operational.
3. Check settings of cargo tank safety relief valves.
4. Test ESD (Emergency Shut Down) of cargo valves/pumps/ boosters from all activating stations.
5. Check gas detecting unit with suitable spangas and have unit working continuously.
6. Test water spray system deck area, flush all lines and check nozzles for proper operation and coverage.
7. Check ventilation of control room and compressor room and have ducts set for LPG.
8. Check over-pressurising and motor-trip system of motor room.
9. Check navigation equipment and steering gear fully operational.

The results of above tests should be cabled to GASCO not less than 18 hours prior to arrival.

On arrival at the terminal, the Terminal Representative will discuss with the Master the safety requirements. Attention is drawn to the International Safety Guide for Oil Tankers and Terminals (ISGOTT) and the Safety Inspection Guildelines and Terminal Safety Check List for gas carriers as published by the International Chamber of Shipping and Oil Companies International Marine Forum (OCIMF). For efficient loading it is essential that the ship should be fitted with adequate equipment. Improvisations made after the ship has arrived alongside the jetty are not sound practice and result in delays and possible damage to the loading arms and other equipment.

Abu Dhabi Gas Industries Ltd. (GASCO) have equipped their terminal with loading machinery and mooring arrangements which will ensure tankers and gas carriers receiving their cargoes at a reasonable rate, thereby extending to the ship the benefit of a rapid turnaround.

Mooring, loading and unmooring are carried out by night as well as by day. Co-operation between the Ship's Officers and Terminal Representatives is essential to secure the full benefit of the facilities provided.

MAX. SIZE: *Gas Carriers:* 28,000 cu.m. – 125,000 cu.m.

Tankers: Minimum Size – 15,000 tonnes S.D.W.T. Max displacement on arrival 95,000 tonnes. Max. LOA 320 m.

TUGS: Twin screw tugs (35 tons bollard pull) are used for both berthing and unberthing of vessels. The number of tugs to be used is to the discretion of the Pilot but will normally be two for berthing and one for unberthing. The tugs will use their own ropes and/or wires. The tugs are fitted with foam/water monitors, including one at approximately 19 m. above sea level, to assist in fire-fighting. Also fitted are spray booms to apply dispersants in case of oil spills.

BERTHING: *The Jetty:* The centreline of the GASCO-NGL Jetty Loading Platform is situated in 15 m. of water in position Lat. 24° 09′ 49″ N., Long. 52° 43′ 16″ E. with the berthing line in direction 305°/125°. Vessels are normally berthed heading 305°. A piping trestle and road, approximately 2,650 m. long, leads to the shore where the processing plant and storage tanks are located.

The jetty head comprises a loading platform (10 m. above chart datum), a utilities building, 4 breasting dolphins and 6 mooring dolphins. The dolphins are inter-connected by walkways. The distance between the 2 outermost dolphins is 340 m., between the 2 innermost breasting dolphins 42 m. and between the two outermost breasting dolphins 97 m.

On the loading platform there are 2×12 in. loading arms for loading Pentane Plus and discharge of dirty ballast/slops, 4×12 in. loading arms for loading/vapour return of Propane and Butane and 1×8 in. loading arm for bunkering (Rate – MFO 400 cu.m.p.h. and MDO 300 cu.m.p.h.). (For distance and disposition of loading arms see schematic layout). The LPG loading arms are fitted with an Emergency Release System (ERS). All loading arms except the bunker arms are fitted with an Emergency Shutdown System (ESD). Both ERS and ESD can be actuated automatically or manually. For detailed information about these systems you are referred to the separate letter on ESD/ERS handed over to you by the Terminal Representative. The Master is to ensure that the personnel responsible for cargo operations are fully familiar with these systems.

On the Western end of the loading platform is a gangway tower with a 1.5 ton crane forming a integral part of this tower. On the Eastern end of the platform there is a tower mounted fire water and foam monitor. This monitor can be controlled manually or remotely from the jetty head or from the foot of the jetty aided by a television monitor.

An additional manually controlled firewater monitor is situated on each of the 2 inner breasting dolphins. In addition to this, water spray deluge systems are covering the loading arms area, the gangway, the surge drum area and the utilities building. Gas detection equipment is strategically placed near the loading arms and will give alarm in case of inadvertent gas escape. The loading arms area and tanker manifold area are monitored by closed circuit television from the control room situated in the utilities building on the jetty and from the main control room.

On the Eastern side of the loading platform is a boat landing stage where the mooring boats can tie-up.

Draft: The minimum water depth alongside the jetty is 15 m. (49.2 ft.) below chart datum (C.D.). However, the Deep Water Channel imposes draft limitations on vessels departing from and entering the Port of Jebel Dhanna – Ruwais:

Also see Section "A" – "Restrictions".

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. Vessels will normally berth port side alongside on a heading of 305°. The breasting dolphins are each equipped with 1,250 KN double quick release hooks and a power operated capstan. The mooring dolphins are each equipped with 1,250 KN triple quick release hooks and power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by Terminal Personnel or dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

Experience has shown that wholly synthetic moorings have too much elasticity and allow the vessel to range or drift away from the berth during periods of adverse weather.

Therefore the moorings should preferably be all steel wires without use of nylon tails.

As it is recognised that some vessels are not fitted out with complete steel wire moorings, such vessels may use synthetic moorings for head or stern ropes, but breasting and spring moorings are to be steel wires. However, mooring lines leading to the same mooring dolphin should either be all steel wire or all synthetic fibre.

NOTE: (October 1982). With immediate effect all vessels calling at the GASCO NGL Jetty are to be fitted with wires, for spring lines. Vessels unable to comply will be subjected to an inspection of mooring ropes by the Pilot on arrival and will be berthed only if Pilot is satisfied with the mooring lines available. Pilot inspection of mooring lines will be carried out only during daylight hours.

The breasting dolphin's fender design criteria are based on providing for berthing energies acting in the horizontal plane for maximum displacement of 95,000 tonnes with an approach angle to the berthing line of 7° at a contact velocity of 15 cm. per second.

Yokohama Fenders protrude approximately 2.9 m. from the face of the loading deck, they provide for 100% contact of fenders on the vessel's perpendicular mid-body at light and loaded drafts, for the full range of vessel sizes.

Tension Winches: Vessels equipped with automatic tension winches should not use the automatic device and set the manual brake on these winches.

BALLAST: The jetty is equipped with dirty ballast/slops reception facilities. Tankers discharging dirty ballast/slops ashore will use the Pentane plus loading arms from where a 24 in. pipe-line runs to tanks in the Refinery adjacent to the LPG plant. The maximum ballast reception rate is 1,500 cu.m./hr. Prior to arrival the Master is to advise GASCO how much dirty ballast/slops he expects to discharge to the shore facilities.

When the vessel arrives with clean ballast for overside discharge, the ballast water must be clean and a declaration to this effect needs to be signed by the Master and delivered to the Terminal Representative. There is a danger of violating pollution regulation if ballast taken on in polluted water is discharged in port. If it is necessary to take on ballast in polluted areas, this should be discharged during passage and replaced by cleaner ballast.

Ashes, oil, oily water, garbage or other refuse must not be discharged overboard in port waters. Scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

It is essential that the vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Pilot's requests as to ballast quantity and disposition.

There must be no cleaning of boiler tubes whilst the ship is in port.

POLLUTION: Abu Dhabi Gas Industries Ltd. (GASCO) follows a clean seas policy and in this respect the Harbour Master is authorised by the Port Authority to inspect the vessel's "Oil Record Book" referred to in the International Convention for the Prevention of Pollution from Ships, 1973. Any vessel, the Master of which does not allow inspection of the "Oil Record Book," will be refused the use of the Company facilities at Ruwais.

If it is found that the information entered in the "Oil Record Book" is not in accordance with the requirements of the Convention the matter will be reported to the appropriate authority.

It is an offence to discharge dirty ballast, pump bilges or discharge refuse within the Port limits.

The Harbour Master, or his nominee, is authorised to take samples, in accordance with an approved procedure, of ballast water to be discharged, or being discharged at Ruwais. Should test carried out on these samples indicate an average oil in water content of more than 15 p.p.m. then this may be used in evidence in any proceedings against you brought by the Port Authority in accordance with the Law.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and other expenses and fines shall be borne by the vessel.

COOLDOWN OF GAS CARRIERS: Vessels, when presenting themselves to load at GASCO terminal should in all cases be ready to load in all respects. For a gas carrier this means that the cargo tank atmosphere should be compatible with the product to be loaded and the cargo tank temperature close to the temperature of the product to be loaded (Propane −45°C, Butane −8°C).

Notwithstanding the above and providing notice is given well in advance, GASCO may, in exceptional cases, accept gas carriers not fully cooled-down. Each occasion will be considered separately giving due regard to the shipping programme and any other circumstances or restrictions.

GASCO will not accept any responsibility for the failure by the Master of any gas carrier loading at Ruwais to take appropriate action to receive cold liquefied gas, prevent any damage to his vessel and jetty installation and/or injury to his crew or Terminal personnel.

VENTING: During the loading of Pentane Plus, vessels should only allow vapours to escape via the agreed venting arrangement. If there is little wind movement, vapour may persist on deck. When there is a wind, it may, in crossing a deck house or structure, create a low pressure on the lee side thereby causing vapour to be carried towards the house or structure.

Either of these wind conditions may result in high local vapour concentration and, if so, it may be necessary to stop loading while the conditions persist.

Gas carriers are not allowed to have any vapours escape to atmosphere. During loading the pressure in the cargo tanks should be controlled by the use of their reliquefaction plant or by the use of the vapour return line to the shore. The control room should be notified prior to returning vapour ashore via the vapour return line and before stopping the return of vapour ashore.

Your attention is drawn to the information, as provided to you by the Terminal, on the properties and dangers of the cargo to be loaded on board your vessel, together with the actions required in case of an accident.

LOADING: *Loading Arms:* The LPG and Pentane Plus loading arms presentation flanges are 12 in. ANSI – 150 – flat face spiral groove.

For centre to centre distances and disposition of the loading arms, see "Plan Section". The LPG arms operating envelope parameters are as follows:

Vertical plane : From 7.7 m. to 24.0 m. above chart datum.
Horizontal plane : From 4.1 m. to 8.7 m. off the jetty face over the full vertical plane.
Safety Provision : Horizontal plane drift of 4.6 m. on either side of the centre line.
Lateral plane drift of 4.6 m. outside the normal operating box envelope.

All four LPG loading arms can be connected to ships' manifold with a centre to centre spacing range of 1.6 m. to 3.5 m. for the full envelope including the outer drift envelope box.

The Pentane Plus loading arms operating envelopes are as follows:

Vertical plane : From 2.3 m. to 20.75 m. above chart datum.
Horizontal plane : From 6.4 m. to 9.3 m. off the jetty face over the full vertical plane.
Safety Provision : Horizontal plane drift of 4.6 m. on either side of the centre line.
Lateral plane drift of 4.6 m. outside the normal operating box envelope.

The Pentane Plus loading arms can be connected to ships' manifolds with a centre to centre spacing range of 0.6 m. to 2.1 m. for the full envelope including the outer drift envelope box.

Notwithstanding the above, the loading arms are fitted with ESD systems and additionally the LPG arms with ERS which is actuated before the loading arms reach the outer limits of their envelopes.

The LPG loading arms are linked to the shore system which provides the following flexibility:

Loading arms are numbered from the gangway tower to East.
No. 1 – Propane or Vapour return
No. 2 – Propane – Butane or Vapour Return
No. 3 – Propane – Butane or Vapour Return
No. 4 – Butane or Vapour Return

After berthing you are required to remove the blind flanges from the manifold connections to be used for loading and to indicate which product is to be loaded through them and which connections are to be used for the Vapour Return lines, if required. The connection/disconnection of the 12 in. ANSI 150 loading arms and 8 in. ANSI 150 bunker arm will be carried out by Terminal personnel. If your manifold sizes do not correspond with the loading/bunker arms, you are requested to provide and fit the appropriate reduction pieces accordingly. Masters of gas carriers are to ensure that the reduction pieces and gaskets used are suitable for loading of cryogenic cargoes.

Communications: To maintain necessary communications permanently during cargo operations and also in emergencies, you will be provided with a handie-talkie and a telephone.

We require that the handie-talkie is at all times attended to by the officer responsible for cargo operations. The handie-talkie enables the officer to communicate directly with the main control room and the jetty control room.

Furthermore, a telephone will be placed on your vessel. It is advisable that this telephone is located in such a way that it is guarded most of the time. Additionally a console for activating the ESD and ERS will be put on board.

A ship's crew member, able to converse in English, must be present near the ship's manifold at all times. The loading arm and ship's manifold area are covered by closed circuit televisions from the jetty control room and main control room.

Emergency Procedures: In case of an **emergency on board** your vessel, we require you to take the following action:

Raise the appropriate alarm and take the required action
Inform the Terminal via handie-talkie, telephone and jetty attendant or by activating the ESD or ERS system (see cautions on ESD/ERS information letter).
Cease all cargo operations immediately and shut-down cargo system completely.
Prepare to vacate the berth.

In case of an **emergency ashore,** we require you to take the following action:

Cease cargo operations immediately and shut-down cargo systems completely.
Stand-by on handie-talkie and telephone and keep contact with jetty attendant.
Stand-by to give any assistance.
Prepare to vacate the berth.

NOTE: The shore installation has been equipped with a range of safety devices and emergency shutdown systems, these could be activated automatically or manually from the jetty or on board the vessel as the situation will call. All shutdowns are preceded or accompanied by an alarm.

Loading Operations: The maximum loading rates for each product are as follows:

Product	*Tons/hr.*	*cu.m./hr.*
Propane	1,760	3,000
Butane	1,800	3,000
Pentane Plus	2,910	4,270

Propane and Butane can be loaded simultaneously. Loading rates can be adjusted either by stopping/starting one or more pumps or by opening/closing of the recirculation valves on the loading platform.

After berthing the terminal representative will discuss with you the loading operations and emergency procedures. You are reminded that the responsibility as to the quantity of cargo to be loaded, rests with you as Master of the vessel and no overage may be sent back ashore.

Whilst alongside the jetty, ships should be ready to move under their own power in the event of their breaking adrift, catching fire or emergencies. No repairs are to be carried out whilst alongside which would immobilise the ship or impair her fire-fighting efficiency.

CAUTION: The loading rates are controlled on shore and due to the long pipe-lines from the shore product tanks to the jetty head, and the high loading rates, an extremely dangerous situation can arise if ship's valves are closed against the flow of liquids, which could lead to pressure surges liable to cause the blowing out of pipe-line gaskets and/or severe damage to the loading arms.

Loading rates, loading rate reductions and stopping of cargo procedures will be discussed with you prior to commencement of loading.

While alongside the jetty, no craft are allowed alongside the vessel. The lowering of lifeboats whilst alongside the jetty is strictly prohibited except in emergencies.

Immediately after completion of loading the loading arms will be disconnected and the vessel must be ready to proceed to sea or anchorage as directed.

STORES: The taking-on and/or landing of stores and ship's spares over the jetty is not allowed.

SHORE LEAVE: Crew members are not permitted shore leave.

SIGNALS: Vessels, whilst alongside the GASCO NGL-jetty, shall, in addition to those described in the port regulations, display the following signals: by day: a red flag, by night: a red light visible from all directions.

SHIP OPERATOR'S REPORT: February 1982

The following criteria for gas carriers programmed to load propane butane at Ruwais Terminal.

1. Tanks' atmosphere compatible with product to be loaded.
2. Tanks' temperature close to temperature of product to be loaded (Propane – 42°C, Butane – 6°C).
3. Distance between ship's side and 12 in. manifold connections between 4.1 m. and 8.7 m.
4. Height of manifold above chart datum between 7.7 m. and 24.0 m.
5. Maximum height of railing i.w.c. manifold above chart datum 21.8 m.
6. Centre to centre distances between manifold connections between 1.1 m. and 3.5 m. if manifold connections centre to centre distances are between 1.1 m. and 1.6 m. only one grade can be loaded at the same time.
7. Vessel not to have carried ammonia on previous two voyages.
8. Vessel to inform GASCO Ruwais not less than 48 hours prior to arrival of disposition of manifold connections from bow to stern indicating

which connections to be used for propane, butane, vapour and liquid and also the centre distances between them.

also

9. Master should confirm ETA at 72, 48 and 24 hours prior to arrival to Gasha Tower by telex/cable.

10. Master to call Jebel Dhanna Pilot and Agent Jebel Dhanna on VHF Channel 9 or 16 four hours prior to arrival. Gasha buoy is in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 26″ E.

11. Please advise Agents vessel's call sign or telex no., d.w.t. in long tons, g.r.t., n.r.t., arrival draft, loading rate, etc.

SHIPMASTER'S REPORT: December 1981 (Vessel loading Propane/Butane, g.r.t. 45,000, d.w.t. 56,000, draft 13.1 m., capacity 79,970 cu.m.).

Ruwais lies in the same general port area that encompasses Jebel Dhanna and at the moment consists of a petroleum products jetty and another to the S.E. which handles Pentanes and LPG.

Further again to the S.E. there is more port development for an ammonia/fertiliser berth and dry-cargo berths.

Ruwais is administered by ADPPOC, Abu Dhabi Petroleum Ports Operating Company, while the LPG berth comes under the immediate control of GASCO, Abu Dhabi Gas Industries Ltd.

The LPG loading platform is situated in position: Lat. 24° 09.8′ N., Long. 52° 43.3′ E., the trend of the platform and mooring dolphins being about 305° True, more or less in line with the current flow.

Approach: The vessel should have B.A. Charts 3778, 3779, 3780 and the recommended track on these should be followed for arrival and departure since it provides adequate water for a vessel of this size and draft. The route is well marked with large buoys and light floats which show up well visually and on the radar. An approach in poor visibility should thus be possible and made with confidence.

See Pilot Books and "Guide to Port Entry".

A waiting anchorage is provided off Ghasha buoy.

Pilotage: Pilots board off 'Ghasha' Buoy from launch of about 12/16 m. length; at the moment two launches are in commission.

Pilot ladder required about 1 m. above the water.

The length of pilotage to the first line ashore is about 3.5 hours.

Communications: Through Bahrain Radio. There is considerable evidence pointing to huge delays in cables between this radio station and the eventual recipient.

Before arrival the Agents sent a comprehensive questionnaire requesting safety checks and ship information. This is a standard cable and originates from GASCO.

VHF contact originally made on Channel 16 with the Pilots and Port Control, but their usual working frequency is Channel 9.

On boarding the Pilot issues a copy of the Port Regulations which should be studied prior to berthing.

Berth: This consists of the loading platform and mooring dolphins at the end of a 3 km. trestle. Minimum reported depth alongside is 15 m. and this was borne out by echo sounder on arrival and departure.

The jetty head consists of the loading platform, 42 m. long with two breasting dolphins at each end. Beyond these are the mooring dolphins, three forward and aft, the total length of the mooring system being 340 m., thus providing adequate moorings for most vessels.

The loading platform carries seven Chicksans, two for Pentane, one for bunkers (yet to be commissioned) and four for LPG. There is a control building on the berth together with closed circuit TV, gas detecting equipment and fire fighting monitors.

The loading arms are all 12 in. 150 ASA, although shore personnel boarded and fitted special pieces between our manifold/reducers and the Chicksan. All Chicksans are fitted with automatic quick release and this will operate if the vessel surges more than 4 m. (two for'd and two metres aft) from her moored position. An automatic shutdown system is also fitted and the vessel is provided with a control box for these together with comprehensive instructions. A time of 10 secs. is quoted from operation to complete shutdown and emergency release.

There is provision for two vapour return lines and two loading lines within the four Chicksan configuration and these are interchangeable to a degree.

Ship/shore communication is provided by the terminal who place on board a Stornophone for that purpose.

Mooring: Wires only are recommended but there were no objections to our all polypropylene supply. The normal 3.2.2 was recommended and there is a large mooring boat to assist. Dolphins are fitted with quick release hooks.

Springs must be on mooring winches and the use of self tensioning winches is not allowed.

There are powerful tugs (3,300 h.p.) available for berthing.

Cooldown: There exist rather loose requirements for cooling down but it was no problem to explain to the Superintendent that this vessel could load into 'warm' tanks. If a vessel were to arrive under inerted tanks the situation may be rather different and it appears that the vessel would then leave the berth to cooldown.

Gangway: Ship's gangway should be turned in for berthing, a shore gangway is provided.

N.O.R.: Agent advised me to tender Notice of Readiness at the time of passing the Ghasha Buoy.

E.D.P.: There is no Early Departure Procedure, the Master must sign Bills of Lading before sailing. Allow three to four hours after completion of loading to complete all paperwork.

Load Rates: Invariably quoted in cu.m.p.h. Maximum for each product being quoted as Propane 3,000 cu.m.p.h., Butane 3,000 cu.m.p.h. The plant were able to supply at a very low initial rate at the commencement of loading.

Note: The Propane loaded at this call was very warm, −38°/−39.5°C. The Loading Superintendents did not find this amiss and the reported temperature in the shore tanks is about −40°C. There was a slight drop in temperature at the manifold after sunset.

Butane loading temperature was about 0°/−1°C.

Cargo Survey: Watson Gray attended on behalf of Charterers to gauge ship's tanks and their figures agreed closely with our own. However, there was a huge discrepancy (618 tonnes) between our figures and those from ullaging and flow meter readings ashore (Propane). Ship was in excess of the shore tonnage. Ship was under shore figures for Butane by about 35 tonnes.

Protest noted over cargo temperature and quantities. Vessel was given Outward Clearance only on issuing Agents with a letter of Authority to sign Bills of Lading.

Density: Water density 1031.

General:

Stores: Not available.

Shore Leave: Definitely not allowed under any circumstances other than extreme medical urgency.

Relief/Repatriation: Not possible.

Lloyd's Surveyor: A minimum of seven days' notice required.

Repairs: There are no repair facilities available. Whilst alongside main engines must be kept in immediate readiness.

Lifeboats: Permission *must* be sought from Port Authorities to carry out lifeboat drills.

Bonded Stores: No restrictions on tobacco. All alcohol should be collected and sealed. The Customs may allow a token issue (six cases of beer for the ship) but this is not to be relied upon. All cameras have to be collected and placed under seal.

Medical: Unless in cases of extreme urgency, totally unavailable.

Rat Guards: Must be fitted to all moorings.

Fresh Water: Not available.

Walport Films: Exchanges readily available with usual notice.

Entering Inwards: After the vessel's cargo nomination has been accepted she is allowed an "acceptance period" of three days in which to arrive at the port. Apparently this runs from 24 hours, BEFORE the day of acceptance to 48 hours afterwards. Thus we arrived 7.5 hours after the expiration of our acceptance period and a vessel arriving 20 hours later received priority. This should be brought to the notice of Owners or Charterers, before arrival.

Papers: 1 copy Crew Declaration.
1 copy Bonded Stores List.
2 copies Crew List and Maritime Declaration of Health.

Bonded stores' seal checked on sailing. Customs checked both bars.

Note: Abu Dhabi operates a boycott against Israel and South Africa. Suez Canal Transit is excepted.

The Master has to sign an undertaking to the effect that the cargo will not be discharged at a port under boycott and is given a form to be posted to Abu Dhabi from the discharge port as proof.

(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

The bulk cargo terminal (FERTIL) at Ruwais comprises a 512 m. long jetty with in line berths to suit the export of bulk/bagged Urea and Liquid Ammonia. Three mooring dolphins at the seaward end of the jetty serve a Liquid Ammonia berth. Max. draft is 11 m., a 500 m. turning circle is provided off the jetty and vessels will normally be berthed port side alongside with ship providing its own access. Mooring lines should preferably be all steel wires. If this is not possible ropes and wires are not to be led to the same dolphin. A shore deballasting system is provided.

Provision has been made along the jetty for bag and bulk conveyors to load vessels with urea from a fertiliser plant 1 km. inshore.

The loading of ammonia is carried out from a loading arm at the North end of the jetty where vessels can berth using 3×100 ton capacity mooring dolphins.

OPERATOR: ADPPOC is the service contractor.

LOCATION: The jetty alignment and conveyor main setting out line is 10° West of North. The seaward limit of the jetty works are defined by the Northernmost mooring dolphin.

The terminal is located in 12 m. of water, due East of the NGL Jetty, and West of the Construction Wharf and is approached from a deep water channel serving other Ruwais jetties.

A turning basin is located N.E. of the jetty and is of 500 m. diameter and has a minimum dredged depth of 12 m. below chart datum.

Vessels will normally be berthed against fender piles alongside the jetty on a heading of 350°.

NOTICE: *Ship's Arrival Advice:* It is strongly requested that full details of the vessel including the number of crew and their nationalities should be advised to us. This information is required by the oil installations protection unit. In the absence of this information the protection unit would refuse permission for berthing of the ship. Therefore, you must ensure timely availability of this information so that it can be forwarded to the authorities. Any delay caused in berthing due to non-availability of information shall be to your account.

Further, please note that the above information should be made available as soon as the ship is nominated but not later than 24 hours after the nomination is confirmed. *Signed*: Plant Manager, Fertil.

BERTHING: *Jetty:* The jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long (25,000 d.w.t.) bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

The jetty deck is of concrete construction and is supported by vertical 1 m. diameter tubular steel pipes.

Two turnround areas for jetty traffic are provided, one mid-way along the jetty, the other at the Northern end.

The jetty is designed to support up to 3 ship loaders with a backing conveyor system and up to 3×300 mm. diameter liquid ammonia lines.

The 3 mooring dolphins at the Northern end of the jetty serve the Ammonia Berth and each has a bollard capacity of 100 tonnes and is connected to the jetty by a system of concrete walkways.

The jetty and dolphins have a deck level 7.4 m. above Jebel Dhanna Chart Datum.

The minimum dredged depth at the berth is 12 m. below Chart Datum.

Fenders: The fender system has a design capacity of 55 tonne metres per fender pile and the recommended berthing angle is 5°. The fender system absorbs energy by deflection of single 1,300 mm. diameter tubular steel cantilever piles and twin Bridgestone Cell units which have a frontal frame 4.2 m. high by 1.7 m. wide.

The fender face is set 4 m. seaward of the jetty deck edge.

The fender spacing is generally 15 m. along the main length of jetty and this extends to 31 m. for the Northern fenders located East of the mooring dolphins.

The fenders are suitable for vessels between 5,000 d.w.t. and 25,000 d.w.t.

Mooring: Ship lines will be taken to 100 ton "Bean Type" mooring bollards located along the cope edge of the jetty. The general bollard spacing is 15 m. whilst at the shore end this extends to 30 m.

100 ton "Bean Type" bollards are positioned on the 3 mooring dolphins located at the seaward end of the jetty. Ships' lines may be taken to the dolphins by boat or via the concrete walkways provided from the jetty deck.

Landing Stage: A landing stage for small harbour craft is located adjacent to the jetty near Pile Bent 55, some 600 m. South of the outermost dolphin.

Access Ladders: Access ladders to water level are provided on the fender piles at a spacing of 60 m. All mooring dolphins are provided with access ladders.

Services: Provision has been made for future electrical and mechanical services in the jetty by ducts cast into the concrete deck or provision for hanger supports beneath the deck.

Loader Rails: A flat bottom loader rail having a gauge of 11 m. is secured to the concrete deck by Molyneaux Clips. Buffer stops are provided at both the inshore and offshore limit of the rail. Provision has been made for the future extension shorewards of the loader rail.

Approach From Shore: The approach to the jetty is via a dual carriageway off the Corniche Road. The access road leading to the jetty is 600 m. long and 8 m. wide and bounded on one side by the export conveyor housing.

Breakwaters: Rubble mound breakwaters protect the cooling water intake channel located West of the jetty.

Rubble mound reclamation bunds built just landward of the reef define the land area.

A rock armoured cooling water outfall channel is located within the reclamation and located mid-way between the jetty and construction wharf.

LOADING: *Urea Loading Operation Procedure:* Firstly, the Jetty Supervisor, after the arrival of the vessel, and after getting Clearance Certificate, will discuss the necessary loading sequence for keeping the vessel trim with ship's Cargo Officer.

When the sequence of operation has been agreed, the Jetty Supervisor will inform operational group in Bagging Control Room and shiploaders of the sequence required.

On receipt of this information, Bagging Control Operators will pre-set the bag counters or scales and line up other conveyors and machines depending upon the method of shipping required (i.e. bagged or bulk product) to the quantity agreed with the ship Cargo Master. Meanwhile, the Shiploader Operator will have positioned his machine ready for loading into the appropriate cargo hold defined by the sequence of operation.

Jetty Supervisor/Shiploader Operator will then give signal as "Shiploader in Loading Position" and Bagging Control Room Operator will start sending bag or bulk urea to jetty.

The pre-set bag counters or belt weighers will trip the conveyor system (excluding the jetty conveyors) when the pre-set capacity has been realised. The signal to start again will be given by the "Shiploader Running" signal. On receipt of this signal in the Bagging Control Room, the shiploader will have traversed to its new loading position and will be ready for the next batch of product.

Photocells are provided at the end of telescopic conveyor to indicate actual quantity of the bags loaded in ship hold. A cumulative reading (in numbers) is recorded in ship-loader operator's cabin.

For bulk urea loading, urea going to jetty conveyor is measured by weighing scales inside the Bagging Building. The weighing scale has load cells and belt speed detector for measuring the flow rate. The feed rate is indicated and also totalised cumulatively at Bagging Control Room, and also at the local control panel of weighing scale.

Normal operational shut-down shall be sequential and initiated from Bagging Control Room.

(F) ADNOC RUWAIS SULPHUR HANDLING TERMINAL

The ADNOC Ruwais Sulphur Handling Terminal is situated at the East of the existing Fertil's Bulk Cargo Terminal at Ruwais and consists of an overall water length of 350 m., which lies in a S.E. direction at the existing jetty. This facility will accommodate at the present, the export of only granulated sulphur in bulk into bulk cargo vessels between the range of 5,000 d.w.t. to 25,000 d.w.t.

The overall berthing arrangement includes 3 mooring dolphins and six breasting piles. The 2 centre breasting piles are equipped with quick release hooks for receiving vessels spring lines.

The loading of bulk sulphur is carried out by the telescopic boom of the quadrant shiploader which has 123 m. long travelling arc, having a design loading capacity of 3,000 tonnes per day.

OPERATOR: ADPPOC is the service contractor to ADNOC.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, United Arab Emirates. Tel: (971-52)730500. Cables: "Confidence", Abu Dhabi. Telex: Abu Dhabi 22248 ("Gacauh EM"). Fax: Abu Dhabi 731328.

KHOR FAKKAN, Sharjah: 25.22 N. 56.22 E. **(See Plan)**

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518.

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration: board on arrival
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Passports/Seaman's Identity Cards

Customs:
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Cargo Manifests (2 copies)
- List of Alcoholic Beverages (2 copies)

Port Operator:
- Certificate of Registry (1 copy) on request
- Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 24 hours prior to the vessel's arrival.
- Cargo Plan (1 copy)
- Discharge List (1 copy)
- Transhipment List (1 copy)
- Dangerous Cargo Manifest (1 copy)
- Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the Fairway Buoy. Port Khor Fakkan operates a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the Fairway Buoy. The extremity of the breakwater (Lat. 25° 21′ 28″ N., Long. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

"Gulf Pilot Khor Fakkan" on VHF Channel 16. Also on 2182, 2638, 2738, 3270, 3710 and 4136.3 kHz.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator. Otherwise, anchoring not permitted within 12 miles of Khor Fakkan as the area is a prime tourist area.

MAX. SIZE: Max. draft entering and leaving is 39 ft., range max. 3.0 m., height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio Pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid cholera certificate. The Health Officer will board when the vessel is alongside.

RADIO: Bahrain Radio A9M.

Notice of Arrival: Vessel should advise its Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival and confirm 48 hours and 24 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan Signal Station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 2 tugs of 2,100 h.p. each

BERTHING: Length of berth 430 m. Depth alongside 12.5 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Booatse Gantry Cranes, 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Operator.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew change facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

BANKS: British Bank of the Middle East, P.O.Box 10030, Khor Fakkan, U.A.E. *Telex*: 89011 Bbmefj EM (stating for KFK.)

Grindlays Bank Ltd., P.O. Box 10149, Khor Fakkan, U.A.E. *Telex* 89025 Grnly EM.

STORING: At anchorage – by off-shore crew change boats. Alongside – by truck alongside ship. Fork lift trucks and local labour available if required.

SHORE LEAVE: Shore leave is permitted.
GARBAGE DISPOSAL: Garbage skips can be arranged through the Port Authority and are placed alongside at the quay. Charges are U.A.E. Dirhams 50 per day.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (Fixed Link).
GENERAL: Pollution: The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.
DEVELOPMENTS: Additional 100,000 sq.m. of container area brought into use July 1991.

The quay is to be extended by 900 ft., completion expected in 1993.

SHIPMASTER'S REPORT: January 1986

If vessel calling for bunkers only Port Control insist that vessel anchors at least 4 miles off the Fairway Buoy. No Agent or port entry papers required in this case. If however, stores are taken or any crew members changed, an Agent must be appointed and port entry papers completed.

AUTHORITY: Sharjah Ports Authority, Port Khor Fakkan, P.O.Box 10542, Khor Fakkan, U.A.E. *Tel:* Khor Fakkan 85324/85027. *Telex:* 89023 SEAGUL EM. *Cables:* Mina Khor Fakkan. *Contact:* Captain Abdul Razik El Sharif, Harbour Master.

Port Operator: Khor Fakkan Container Terminal Ltd., (A Division of Gulftainer), P.O.Box 10326, Khor Fakkan, U.A.E. *Tel:* 85604/5. *Telex:* 89064 Servic EM. *Contact:* Captain N. Smith, Terminal Manager.

AGENT: See "Sharjah".

MINA SAQR, Ras Al Khaimah: 25.59 N. 56.03 E.

(See Plan)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.
LOCATION: The Port of Mina Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On Chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.
DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessel's arrival:

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ship's Certificates, etc. to be kept ready for inspection by the Officers.
PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at Approach Buoy (R and W pillar buoy Int. Qk. Fl.) in position Lat. 26° 00′ N., Long. 56° 02′ E. and in all cases a pilot ladder should be provided and a lee given. Pilotage service available 24 hours. Leading light PEL on 20 m. high tower, Red 3°, White 4°, Green 3°.

Master to contact "Mina Saqr Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.
ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. The co-ordinates of the anchorage on Chart B.A. 3737 are:

1	Lat. 25° 58′ 36″ N.,	Long. 56° 01′ 48″ E.
2	Lat. 25° 59′ 24″ N.,	Long. 55° 59′ 02″ E.
3	Lat. 26° 01′ 12″ N.,	Long. 56° 02′ 11″ E.

Depths are from 20 m. to 28 m.
MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 244 m. for easy berthing. Permissible draft in all the berths is 11.5 m. Range of tide is maximum 1.6 m.
HEALTH: Normal quarantine regulations apply and Pratique is granted subject to Port Health Authorities' approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.
RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.
VHF: Port equipped with VHF Radio standby Channel 16 with other working Channels, port working Channel 67. Port Signal Station is manned 24 hours a day and should be contacted at least 2 hours prior to vessel's arrival. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.
RADAR: Port is equipped with 2 radars with range of 90 miles.
TUGS: 3×5,000 h.p. Tugs join the vessel at anchorage, the practice being to secure alongside, using ship's lines. Derricks should be swung in and gangways hoisted. Tugs are fitted with VHF.
BERTHING: The harbour and entrance channel is 12.2 m. MLWST. A draft limit is imposed of 11.5 m. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,690 m. in length will provide berthing facilities for 8 ships. Included in this are 2 Ro/Ro ramps. 2 container cranes and supporting equipment are available.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 4.5 m.

All the 8 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using port cranes. All berths are general cargo berths. Berth Nos. 3 and 5 have ramps for Ro/Ro vessels.
CRANES: 2 shore cranes available at any berth. Max. capacity 45 tons at 29 m. and 29.5 tons capacity at 41 m. radius, to handle containers loaded up to 35 tons under automatic spreader, as well as bulk materials with 10 cu.m. max. grab capacity at maximum of 41 m. outreach, and 3 mobile cranes 35 tons capacity available for small ships up to 7,000 tons d.w.t.
BULK CARGO FACILITIES: Berth No. 5 is allocated for loading of bulk cargo and Berth No. 7 for loading bulk cement. Bulk cargoes handled at present are iron ore, gypsum, cement, bauxite, clinker and aggregates, and vessels with these cargoes are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present.
SPECIALISED CARGO HANDLING FACILITIES: 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. There is also one berth for bulk cement loading (Berth No.7). Length 180 m. Max. draft 11.5 m., rate of loading cement with hoses is 600 t.p.h. maximum.

An automatic moving shiploader for aggregate and limestone has been installed on Berth No. 5, length 200 m. Max. draft 11.5 m. alongside. The shiploader maximum loading rate is 1,500 t.p.h.

The port has container handling facilities at Quay No. 1, rate 50 – 60 TEU/hr.
STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by RAK Stevedoring Company. Telex No. 99129 RSC EM. Fax: (077) 67363., (who can be contacted via the Signal Station) and the gangs work on board the vessel directly under the supervision of the vessel's Officers RAK Stevedoring Company accepting no responsibility whatsoever for any damage either to the vessel or its cargo.

Working Hours: 0700 – 1400 hrs. and 1500 – 2100 hrs.
MEDICAL: Advisable for Agents to receive at least 24 hours' advance notice of required medical attention but can also attend to this at short notice. Hospital facilities are available. Officers/Crew should have valid Cholera and Yellow Fever Certificates.
TANKERS: No tanker berth in port. Tankers will discharge at Berths No. 1, 2 and 3 through bunker line – this will be fuel and diesel oils only. Fuel line 12 in., diesel line 8 in. and 6 in. hose. SBM offshore for loading crude oil (see "Hulaylah Terminal").
DENSITY: 1024 – 1028.
FRESH WATER: Fresh water available in Berths No. 1 to 6 with 2 points to service tanks fore and aft as required on a 24 hour basis. Cost of water will be Dh. 7/– per ton.
FUEL: Fuel oil, marine diesel oil, and gas oil can be supplied through RAK Refuelling (Shell) or E.G.P.C. Telephone and telex numbers are available through the Port Signal Station. All sizes of reducers are available and pumping rates are fuel oil 200 t.p.h. and gas oil 250 t.p.h. – 300 t.p.h., subject to vessel's receiving capacity. Presently there are 6 bunker points in Berths No. 1, 2 and 3.

Marine lubricants of all brands can also be supplied provided nomination through the suppliers is received sufficiently in advance.
FIRE PRECAUTIONS: The port has its own auxiliary fire brigade and, when required, the services of the Ras Al Khaimah Fire Brigade are available.
CONSULS: None at this port but most of the consulates can be contacted at Abu Dhabi or Dubai.
REPAIRS: Small repairs can be carried out in the port, but major work can only be carried out by companies in Dubai.
DRY DOCK: No dry dock in Mina Saqr. The nearest drydocks are at Ajman and Dubai.
SURVEYORS: Draft, on-off hire and Bunker surveys are arranged through the Port Authority. All Classification Societies, Salvage Associations and cargo inspection companies are available in Dubai and Sharjah.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
HATCHES: Opening/closing of the hatches to be carried out by the crew with the assistance of the stevedores, if necessary.
CUSTOMS ALLOWANCES: Normally, bonded stores are not sealed by the Customs Authorities. However, only limited stock should be left with the Officers/crew for their consumption on board vessel and the rest should be kept locked under the custody of the Master. Sale of bonded stores is strictly prohibited and persons indulging in this will be punished according to local custom.
REPATRIATION: Efficient crew changes and repatriation can be carried out on receipt of advance information.
AIRPORT: Ras Al Khaimah International Airport, situated about 45 km. South of Mina Saqr, operate daily flights to various destinations.
TIME: Local time is GMT plus 4 hours.
HOLIDAYS: Normal Muslim holidays during which time port working hours will be restricted. Fridays are the weekly holidays.
POLICE/AMBULANCE/FIRE: All police, fire and ambulance emergencies should be notified on 999. General telephone numbers are: 29351 for Police, 26668 for Ambulance and 21212 for Fire.
TELEPHONES: No telephones available for placing on board vessels. However, a telephone is available in the Port Signal Station 24 hours a day.

For international calls, Agent's offices situated outside port area should be used. Ras Al Khaimah has excellent communication to most countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. available in Ras Al Khaimah. Radio/radar repairs, tank cleaning equipment, scamping (underwater cleaning) facilities, etc. can be arranged. Garbage reception facilities available.

BANKS: National Bank of Ras Al Khaimah, Bank of Melli Iran, United Arab Bank, National Bank of Abu Dhabi, Bank of Baroda, Bank of Oman, British Bank of Middle East, Bank du Caire, Commercial Bank of Dubai, Bank of Arab Coast, Middle East Bank and Bank Libanaise pour le Commerce.

STORING: See "Prelims".

1. By truck or barge.
2. No restrictions.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Can be granted and for this purpose the Agents should hand over a Crew List to the Immigration Department who will issue shore passes in exchange for Seaman's Book or Passport. Prior to vessel's departure, Master to ensure that all shore passes are handed over to the Agents who will surrender them to the Immigration Department, Seaman's Books/Passports will then be returned. Agents should advise Immigration Department by letter if any crew changes to be effected.

GARBAGE DISPOSAL: Service available, drums are provided alongside. Tel: 668444. Charges Dhs 50.00 per trip (24 hour service).

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Local currency is the U.A.E. Dirham. U.S.$ 1.00 = 3.68 Dirhams (12.2.92).

REGULATIONS: None.

DELAYS: No berthing delays.

AUTHORITY: Ras Al Khaimah Port Services, P.O.Box 5130, Ras Al Khaimah, U.A.E. *Tel:* (07) 668444 (4 lines). *Telex:* 99280 Rakps EM. *FAX:* (07) 668533. *Cables:* Minasaqr. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

AGENT: International Shipping Agencies Co. (Ras Al Khaimah) Pvt. Ltd., P.O.Box 5162, Ras Al Khaimah, U.A.E. Cables: "Isaship", Ras Al Khaimah. Telex: 99226 ("Isarak EM"). Tel: 221266. After office hours 352449. Fax: 229499.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendez-vous positions off Dubai or off Fujairah.

MINA ZAYED, Abu Dhabi: 24.32 N. 54.23 E. (See Plan)

COURTESY FLAG: Vessels calling at ports in the Emirate of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag.

DOCUMENTS: 5 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement and IMO Class if any. It is essential that all this information against consignee/notify parties name, full contact address is given on the Manifest for each consignment. The Manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port Authorities 48 hours before the ship's arrival.

Also stowage particulars should be submitted with the Manifest in order that the Agent may advise the Port Authority of the equipment and labour required for efficient handling of the vessel.

Customs Require:
1 copy Crew List.
1 copy Stores List.
Immigration Require:
2 copies Crew List.
2 copies Passenger List, if any.
Quarantine Require:
Crew List
International Health Certificate.
Vaccination List.

PILOTAGE: Pilotage is compulsory for all vessels entering/leaving Mina Zayed. Pilotage 24 hours. Pilot will board incoming vessels within a radius of 1 nautical mile seaward of the Fairway Buoy (Lat. 24° 39.15′ N., Long. 54° 14.1′ E.). Ships should wait for Pilot in the area stated above and not enter the channel unless instructions to the contrary are given.

ANCHORAGE: Recommended anchorage for ships over draft of 9.45 m. is approximately 1 mile N.E. of Abu Dhabi Racon and for ships up to 9.45 m. draft approximately 0.9 miles S.W. of "Z 11" in position Lat. 24° 35.5′ N., Long. 54° 18.93′ E.

MAX. SIZE: Largest vessel up to draft 13.0 m. at general cargo berths, 13.0 m. at Container Terminal, no restriction on beam or length.

Max. rise and fall of tide is 2.0 m.

RADIO: Vessels are to give their ETAs by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harbour Office" at least 72 hours prior arrival. Port Control Tower equipped with HF transceiver operating on 2 frequencies and continuous watch on 2182 kHz.

VHF: Port Control Tower on VHF Channels 16, 12, 11, 9 and 6.

TUGS: 4 harbour tugs available, 2×2,400 h.p. and 2×1,250 h.p. Tugs fitted with VHF.

BERTHING: 21 deep water berths with a total quay length of 4,300 m. Berths No. 1, 2, 3 and 4 Container Terminal with depth 10.5 m. to 13.0 m.; Berths No. 5, 6, 7, 8 and 9 with depth 9.5 m.; Berths No. 10, 11, 12 and 13 with depth 6.0 m.; Berths No. 14, 15, 16, 17, 18 and 19 with depth 11.5 m.; Berths No. 20 and 21 with depth 10.5 m.

Storage: The Port has 13 closed storage sheds over an area of 102,300 sq.m. There are also 9 open sheds with a total area of 45,000 sq.m. and an open area (paved) of 1,104,000 sq.m. for the stacking or storage of various types of cargo such as timber, steel, construction materials and cars.

CRANES: Cranes for discharging available. Mobile cranes from 5 – 150 tons available. 3 container cranes 40 tons, fork-lift trucks and trailers, 2×40 tons straddle carriers.

CONTAINER HANDLING FACILITIES: *Container and Ro/Ro Facilities:* Container Terminal has 4 berths with a total length of 800 m. Two berths have a depth of 13.0 m. and 2 berths have a depth of 10.5 m. The berths are equipped with 3 Krupp modern container cranes of 40 tons capacity with an outreach of 39 m. 2×40 ton rail-mounted yard cranes, 2×40 tons, 2×15 tons, 2×8 tons Forklift trucks, 2×40 ton straddle carriers, 25 HK stacking containers, which accommodate 15,000 TEU's and there is a large LCL Terminal and a large area set aside for Ro/Ro equipment. 148 reefer plugs (480 volt, 32 amp), workshop for maintenance and repair of cranes and other equipment. Computer equipped control tower, radio network linking cranes, other equipment and offices and sheds.

BULK HANDLING FACILITIES: Bulk grain silo at Berth No. 19 has a storage capacity of 60,000 tons with discharge rate of 240 t.p.h.

STEVEDORES: Skilled manpower available for all kinds of cargo operations.

Working Hours: Working hours for stevedoring from 0700-2100 hrs. plus overtime on request.

Cargo is also handled on Fridays.

Container Terminal works 24 hours, 7 days a week.

MEDICAL: Fully equipped Government hospital, most medicines available. Private clinics available.

TANKERS: See "Das Island", "Umm Al Nar" and "Jebel Dhanna - Ruwais".

FRESH WATER: Available at all berths, or by barges.

FUEL: Diesel oil and gas oil is available by barges.

FIRE PRECAUTIONS: Port Zayed Fire Brigade is available 24 hours a day. The harbour tugs are fitted with fire-fighting equipment.

SURVEYORS: Lloyd's Agents: Abu Dhabi Maritime & Mercantile International, P.O.Box 247, Abu Dhabi, Tel: (2) 323131. Telex: 22245.

LAUNDRY: Reasonably good laundries available.

PROVISIONS: Can be arranged through ship's Agent.

AIRPORT: Abu Dhabi International Airport is 40 km. There are daily flights to all Gulf State Countries.

TIME: GMT plus 4 hours.

HOLIDAYS: Friday is weekly holiday. Cargo movement generally not affected by holidays.

SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid Seaman's Book.

GARBAGE DISPOSAL: Garbage collection service is available by providing drums alongside free of charge.

WASTE OIL DISPOSAL: Waste oil collection service is available. At present waste oil is collected by tankers which are provided by ship's agents at any time.

SEAMAN'S CLUBS: No clubs operating at the port. Public telephone service and postage facilities are available.

CURRENCY: U.A.E. Dirham (Drhs). U.S.$ 1.00 = Drhs 3.688 (10.4.91).

GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of all shipping agencies in Abu Dhabi, to supply the Traffic Department with the date of arrival of ships which are going to discharge their cargo at anchor.

To enable the Traffic Department to take the necessary action and to render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.

DEVELOPMENTS: Fishing harbour under construction South of the Dhow Harbour.

AUTHORITY: Abu Dhabi Seaport Authority, P.O.Box 422, Abu Dhabi, U.A.E., *Tel:* 725600. *Telex:* 22731 Prtex EM. *FAX:* 771023.

Officials: H.E. Hadef Mohd. Houfan Al-Mansouri, Under Secretary.
Mr. Mubarak Mohd. Al Bu-Ainain, Director General.
Captain Said Darwish Al-Rumeithy, Harbour Master.
Mr. Brayek Awad Amer Al-Mehri, Container Terminal Manager.
Mr. Salem Sultan Al-Meheirbi, Deputy Traffic Manager.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 730500 (10 lines). After office hours Tel: 790381, 794498. Fax: 731328. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz), Call sign "Confidence, Abu Dhabi". Telex: 22248 ("Gacauh EM").

MUBAREK TERMINAL, Sharjah: 25.49 N. 55.11 E. (See Plan)

Also see "Developments".

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.

DOCUMENTS: One Crew List and valid Health Certificate.

EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master including Bills of Lading.

PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Mooring Master shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.

NAVIGATION AIDS: A floating oil storage vessel (F.S.U.)*Mubaraka* (87,000 d.w.t.) is used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored to the SPM in position 25° 49′ N., 55° 10′ E. The *Mubaraka* is equipped with normal navigational warning lights and aids as required by convention.

A fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at Lat. 25° 50′ 43″ N., Long. 55° 11′ 49″ E. Said structures are equipped with 1 clear light and a fog horn, each with characteristics Mo(U) 30 secs. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at Lat. 25° 50′ 56″ N., Long. 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform. In addition, there are numerous oil well head structures within the restricted area described below. All structures have standard navigation aids with characteristics the same as mentioned above.

READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.

ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position Lat. 25° 46′ 45″ N., Long. 55° 13′ 13″ E.

RESTRICTED AREA: A restricted area of approx. 38 square miles has been established with a boundary formed by an imaginary line from:

(a) 25° 54′ 26″ N., 55° 13′ 49″ E. in a W.S.W. direction to
(b) 25° 15′ 14″ N., 55° 07′ 19″ E. thence in a S.S.E. direction to
(c) 25° 46′ 33″ N., 55° 09′ 37″ E. thence in a E.N.E. direction to
(d) 25° 49′ 44″ N., 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

Note: There are now 11 platforms within the restricted area and a New Central Platform is scheduled for installation late 1992 in position Lat. 25° 50.7′ N., Long. 55° 11.7′ E. (approx.).

RESTRICTIONS: Max. distance bow to manifold 590 ft. (180 m.).

MAX. SIZE: Max. berthing deadweight 250,000 tons.

HEALTH: When arriving fly "Q" flag by day, and red over white light at night for quarantine service.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", operating on a 24 hour basis or directly by telex to 68015 CRESPT EM.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 71 and 17 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 5" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position: Lat. 25° 49′ N., Long. 55° 10′ E.

Frequencies: Channels 71 and Marine Private 33 (157.650 MHz).

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 71 and 33. Vessel approaching the terminal not having Channel 71 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 71 is reserved and as an alternative Channel 17 for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 71, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in barrels at 60°F.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign Crescent-5, in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

Mooring: Mooring is by the "Tandem" method, with the bow of the export tanker moored to the stern of the storage tanker *Mubaraka*. Manoeuvring to the berth is effected with the aid of 2 tugs. The mooring rope is a standard 21 in. circumference × 200 ft. nylon SPM rope, fitted with a 3 in. OCIMF chafe chain.

After mooring, a tug will be made fast to the stern of the export tanker, and tension will be maintained in the "Tandem" mooring at all times.

Average loading rate is 16,000 b.p.h.

EQUIPMENT: Vessels must have suitable winches or capstans in good operating condition on the forecastle and poop decks.

All vessels should have ready messenger lines on forecastle head for bringing the mooring line aboard from single point mooring.

Mooring winches on forecastle head for handling 1×12 in. circumference synthetic fibre floating pick-up line.

Adequate mooring bitts to secure mooring line. A bow stopper designed to O.C.I.M.F. standard is preferable at all times.

Hose lifting winch, derrick and gear rigged for 7.5 tons.

HOSES: After the vessel is securely moored the cargo hose will be hoisted on the starboard side. The hose is lifted by ship's gear and crew, and all connecting of the hose will be done by them. The lifting derrick, equipment tackle, etc., should be topped off and ready on arrival. Terminal loading hose is fitted with ASA 150 pound flat face 12 in. "Camlock" coupling and ships should have adapters and fittings to enable this hose to be connected to the ship's manifold. The Company Mooring Master advises the ship's personnel in hose lifting and connecting procedure; however, a deck officer must be present and must direct the ship's crew in all handling. The Company Mooring Master may reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will be a continuous sounding of the ship's whistle from either export tanker or *Mubaraka*.

CARGO SPECIFICATIONS: Mubarek Condensate Blend: Approximate API 47°.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dubai.

REPAIRS: No repairs, painting, etc., are to be made while berthing unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship until time of leaving territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (except in case of emergency and subject to a doctor being available), or other services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GARBAGE DISPOSAL: No facilities (Offshore Terminal).

WASTE OIL DISPOSAL: No facilities.

CURRENCY: U.A.E. Dirham.

U.S.$ 1.00 = 3.66 Dirhams.
U.K.£ 1.00 = 6.71 Dirhams (11.2.92).

GENERAL: *Light Dues:* The Middle East Navigation Aids Service (MENAS) charges light dues according to the size of the vessel and the number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of Readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation area.

DEVELOPMENTS: It is planned in late 1992 to place the storage tanker on a permanent turret mooring constructed from the stern, and the SBM removed. After this, tankers will be berthed bow to bow with the storage tanker using the same O.C.I.M.F. 21 in. mooring and cafe chain, but in this case the floating hose will be secured to the visiting tanker's port side.

Note: During the mooring-up operation a tug is made fast to the stern of the visiting tanker and remains attached throughout the entire loading operation, in order to maintain both vessels in alignment.

Tug and mooring boats are supplied by the Terminal, also vessels should note that mooring crews must be available fore and aft. Normally the tug will use its own tow rope, therefore a good quality messenger must be ready aft, as well as forward.

SHIPMASTER'S REPORT: December 1979 (Updated 1988).
Pilotage: Pilot flies out from Sharjah by helicopter and he carries out all entry procedures. He will also take mail ashore for delivery to vessel's Agents. Mail must be placed in one envelope, addressed to Agents and marked ship's mail.
Tankers: Loading rate commences at 1,000 t.p.h. and when everything satisfactory increased to max. 2,000 t.p.h. Normal parcel is 500,000 bbls. ±0.0%. If vessel requires a plus % then give a Note of Protest to the Pilot.

AUTHORITY: Crescent Petroleum Company, P.O.Box 211, Sharjah, U.A.E. *Tel:* Sharjah 543000. *Telex:* 68015 Crespt EM. *Cables:* "Crespt Sharjah". *FAX:* Sharjah 54200. *Contact:* Captain R.Harcus, Marine Superintendent.

AGENT: Gulf Agency Co. (Sharjah) W.L.L., P.O.B. 435, Sharjah, U.A.E. Cables "Confidence", Sharjah. Telex 68019 ("Gacshj EM"). Telephone: 544446. After office hours 354249. Fax:524091.

MUBARRAZ ISLAND, Abu Dhabi: 24.26. N. 53.32 E. (HALAT AL MUBARRAZ) (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

FLAG: All vessels calling at Mubarraz are required to fly the national flag of U.A.E. which are available from ship's Agent.

LOCATION: Mubarraz Island is located approximately Lat. 24° 28′ N., Long. 53° 22′ E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced by Abu Dhabi Oil Company Limited (Japan). Crude oil produced from the Company's Mubarraz oilfield is transported to Central Facilities Platform (CFP) situated approximately 19 miles E.N.E. of Mubarraz Island by 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission line to the Island. The Company has tank storage for 2,238,000 barrels of crude oil on the island.

Tanker loading is accomplished by means of a single-buoy-mooring (SBM) system installed about 8 miles offshore East of the Island.

Average API Gravity of crude oil to be located is 36.5° and flash point is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarraz and its approaches cover the area bounded by straight lines connecting the following points:
(a) Lat. 24° 30.0′ N., Long. 53° 36.0′ E.
(b) Lat. 24° 24.0′ N., Long. 53° 36.0′ E.
(c) Lat. 24° 24.0′ N., Long. 53° 27.0′ E.
(d) Lat. 24° 26.7′ N., Long. 53° 21.7′ E.
(e) Lat. 24° 30.0′ N., Long. 53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarraz:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarraz. For tankers arriving at Mubarraz without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "A9M" Bahrain Radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarraz Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:
Japanese Charts No. 3173 and 3174
British Admiralty Charts No. 3733, 3734, 2889 and 3716.

Approaches to Mubarraz – Navigational Aids:

Anchorage Position	Lat. 24° 26.80′ N.	Long. 53° 34.00′ E.
S.B.M. Position	Lat. 24° 25.98′ N.	Long. 53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoys No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of squat at speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash white navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	Lat. 24° 35′ 44″ N.	Long. 53° 43′ 53″ E.
CFP	Lat. 24° 30′ 09″ N.	Long. 53° 42′ 09″ E.
AA Platform	Lat. 24° 26′ 10″ N.	Long. 53° 39′ 55″ E.

PILOTAGE: Pilot is provided by the Oil Company at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarraz for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of Buoy No. 5 and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of Buoy No. 17. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water varies from 15.5 to 18 m. (50 ft. to 59 ft.). The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat. 24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipe-lines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarraz Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarraz at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (A9M) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarraz Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarraz should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarraz.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.
(14) Acceptance of E.D.P. (Early Departure Procedure).

Radio Station in Mubarraz Terminal Office.

Short-range communication to Mubarraz Terminal Office can be made by calling "Mubarraz Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarraz Terminal".

Frequency:	*Reception*	*Transmission*
F3	Channel 16	Channel 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: One tug/workboat is always available for use for marine operations at this port and one mooring boat is available during loading.

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N., Long. 53° 31.54′ E.

Depth of Water: 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipe-line and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 32,700 bbls./hr. or 5,200 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches Buoy No. 5 at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the company

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(*a*) Jacob's Ladder on lee side.
(*b*) Hawser 1 each at fore and aft deck, polypropylene if possible.
(*c*) 1 steel crowbar.
(*d*) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

MEDICAL: The Company operates a small clinic at Mubarraz. Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarraz except in case of extreme emergency.

FUEL: Not available.

FIRE-FIGHTING: Tug/workboat stationed at Mubarraz Island is equipped for fire fighting and is usually on emergency stand-by during tanker loading operations.

CONSULS: No consular business is available at Mubarraz. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarraz. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarraz for repairs through notifying the ship's Agent.

SURVEYORS: Lloyd's, ABS, Veritas Surveyors are available in Abu Dhabi and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not board tankers at this port but upon arrival the Master is required to submit to the Customs through the ship's Agent a manifest of any cargo to be landed at Mubarraz.

After loading is completed the Mooring Master will sign on behalf of Customs an Outward Manifest and issue the port clearance. These will be handed to the Master by the Agent.

REPATRIATION: Not possible.

TIME: Local standard time at Abu Dhabi is GMT plus 4 hours throughout year.

GARBAGE DISPOSAL: Not available (S.B.M.).

WASTE OIL DISPOSAL: Not available (S.B.M.).

SEAMAN'S CLUBS: None.

TIDES: The maximum tidal range in this area is 6 ft., the average tidal range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below ISLW. Tidal stream is variable according to the place and the lay of the land. But the flowing tide usually runs South-Eastwards and ebbing tide North-Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Company, applicable to Mubarraz and the surrounding area, and will be obtained on application to the Company.

WEATHER: Local weather at Mubarraz is almost similar to that of Jebel Dhanna and Abu Dhabi City, being extremely hot and humid in Summer. Temperature sometimes soars as high as 50° Centigrade with almost 100 per cent humidity in July and August.

GENERAL: *Engine:* The main engines and all gear must be in an operable condition and in a state of immediate readiness whilst the vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to vessels where it is essential that a diver's services are required to enable a vessel to sail. All requests for such services should be routed through the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarraz Island can accommodate a vessel with maximum 12 ft. draft. Discharge of dry cargo must be arranged well in advance through ship's Agent in Abu Dhabi who will supply labour and barges from Abu Dhabi. No gear whatsoever is available at Mubarraz.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited except in the smoking room situated in the aft accommodation and which has been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these rooms rests with the ship, and the Company reserves the right to prohibit smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventilators must be closed during loading operations, and doors and openings to machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and boiler is not permitted. However, those appropriately equipped are considered safe for use, and their use will be mutually agreed between the Master and the Mooring Master.

Radio Equipment: Radio, radar or other electronic equipment must not be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these units recirculate the air within the accommodation but their use when drawing air from outside the accommodation may be permitted provided that the Master and the Mooring Master agree that no danger exists. Should any gas be detected within the accommodation or should there be any danger of gas within the accommodation these units must be stopped and the intakes closed. Window-type air-conditioners are forbidden at all times.

Ship's Fire-fighting Equipment: This equipment must be in constant readiness at all times with sufficient people on board for its efficient operation.

Fire Watches: While the vessel is within the port area a continuous and efficient fire watch shall be maintained on deck and in the engine room by the ship's crew. Fire-fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers must be available at the loading manifold while hoses are being connected and disconnected. Water should be available on deck service lines at all times and fire hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while vessels are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan), P.O.Box 630, Abu Dhabi, United Arab Emirates. *Tel:* Abu Dhabi 661100. *Telex:* 22260 Adoco EM. *Cables:* "Oiljapan Abu Dhabi". *Contact:* Manager – Marine & Transport Department.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. are appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shipping Agents for all vessels calling at Halat Al Mubarraz Terminal. The address particulars are as follows:

National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, United Arab Emirates, Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh EM"). Tel.: 730500 (10 lines). Fax: 731328. After office hours 794490.

ETA messages shall be sent to National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Dammam Radio.

Under favourable weather and transmitting conditions communication can also be performed over the VHF radio on the following frequencies: standing by on Channel 16 (156.8 MHz) and transmitting on Channel 10, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E. (See Plan)

FLAG: U.A.E.

DOCUMENTS: The following should be airmailed to Agent to arrive 48 hours prior to arrival of vessel.

8 Dangerous Cargo Lists.
3 Stowage Plans.
3 Hatch Lists.
8 Cargo Manifests.
1 each Bill of Lading.
3 Crew Lists.

Radio Officer's Report: May 1989.

Agent: 5 copies Crew List.

Customs:
2 copies Crew Declaration.
2 copies Goods in the Care of the Master (i.e. Foreign Currency).
2 copies Drugs and Firearms Declarations.
2 copies Bonded Stores List.

Quarantine:
1 copy Maritime Declaration of Health.
1 copy Vaccination List.

Immigration:

Officials will not board the ship. Shore passes are obligatory and can be obtained at the main gate. The Agent will provide the shore pass request forms and photographs if needed. Our ship was at the container terminal so this might be different to other parts of the port.

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N., Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13.5′ N., Long. 55° 17.3′ E. (Situated on top of the Dubai Trade Centre) Gp. Fl. (2) white every 30 secs. 157 m. above MHWST. Visible 30 miles. Also Racon Beacon with signal "TC".

Main leading lights on main breakwater front Position Lat. 25° 16.3′ N., Long. 55° 16.0′ E. Qk. Fl. every 0.5 secs. Rear Lat. 25° 15.5′ N., Long. 55° 16.0′ E. Occ. every 2 secs. Breakwater Entrance. Lee light Fl. (R) every 2.5 secs. Main light Gp. Fl. (2) green every 30 secs.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch and a regulation pilot ladder must be provided, with manropes, and a lee given. Large vessels calling should provide an accommodation ladder with its lower platform within about 12 ft. above the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

The Master must sign the indemnity form provided by the Pilot before entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control VHF, Channel 16 shifting to a working Channel as instructed. Failing instructions they should anchor approximately 2 miles from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

Vessels not working cargo immediately may enter port at the discretion of the Port Authority. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid Container Terminal is 13 m. and the tide is not expected to go as low as zero height on average more than 55 days in any one year. Therefore, Port Rashid Authority are prepared to berth vessels up to 42 ft. draft, at minimum speed at all times, provided vessels can discharge in such a manner as not to trim so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 37.7 ft. Depths of water at general cargo berths varies from 30.5 ft. – 37.7 ft.

Vessels in excess of 850 ft. length overall will be berthed at the Harbour Master's discretion.

Port Rashid Authority consider that keel clearance is at the Master's discretion, and are prepared to berth vessels with minimum of 6 in. keel clearance.

RADIO: The Port Signal Station (call sign "Dubai Port Control") is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channel 12 for port operations.

The Signal Station is situated at the seaward end of Berth No. 1 at a height of 57 ft. above sea level.

Vessels should contact the signal station by VHF Channel 16 and request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkering points should bunkers be required. Amended ETA should be advised by VHF. Vessels Agents will in turn pass on the above information to the Port Authority.

HEALTH: Normal quarantine regulations apply and Pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

TUGS: Three tugs of 2,400 h.p. are available with fire-fighting, pollution and salvage facilities, the practice being to secure alongside with 2 tug ropes therefore, gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

BERTHING:

Berth No.	*Length*	*Depth of Water (MLWS)*	
1-4	4×573 ft. (2,294 ft.)	No. 1	33 ft.
		No. 2	32 ft.
3-4			30 ft. 6 in.
5	600 ft.		30 ft. 6 in.
6-10	5×601 ft. (3,008 ft.)	No. 6-8	30 ft. 6 in.
		No. 9-10	35 ft.
11-15	5×599 ft. (2,996 ft.)		30 ft. 6 in.
16	700 ft.		37.7 ft.
17-24	8×600 ft. (4,864 ft.)		37.7 ft.
25	490 ft.		37.7 ft.
26-27	2×515 ft. (1,031 ft.)		37.7 ft.
28-30	3×597 ft. (1,792 ft.)		37.7 ft.
31-32	2×717 ft. (1,434 ft.)	No. 31	37.7 ft.
		No. 32	42 ft.
33-35	3×993 ft. (2,981 ft.)		42 ft.
S.O.T.			37.7 ft.
Depth over pipeline			37.7 ft.

General Cargo: 30 deep water berths with 17 storage sheds (each 120 m. × 60 m.) adjacent are available plus a coastal berth for small craft and vessels with less than 6.10 m. (20 ft.) draft. All berths are backed by extensive hard surface yard storage area.

Container Terminal: Comprising of Berths 31-35 with quay length of 1,350 m. served by 2×Tango 90 gantry and 2×Mitsubishi gantry cranes of 31 ton capacity, 2×Mitsubishi gantry cranes of 41 tons capacity, 1 Kocks crane of 41 tons capacity and 2 Reggiane cranes of 41 tons capacity.

Storage area of 45 hectares with 7×CFS sheds on terminal of 200 m. × 60 m. each.

Depth alongside: 13 m.

Working hours: 0700 hrs. to 1900 hrs. and 1900 hrs. to 0700 hrs. daily.

20 straddle carriers and 6 RTG's radio linked to controller, 44 terminal Ro-Ro tractors.

3×25 ton forklifts (2 Ro-Ro masted)

120×roll trailers

Bunkers and water available alongside.

Computer controlled stacking areas and container tracking available to Agents/Owners.

Berth No. 35 also has large Ro/Ro ramp and Berths No. 15 and 17 each have a small Ro/Ro ramp.

Side and quarter ramp vessels can be accommodated at all berths.

CARGO HANDLING: *General Cargo Working hours:* Saturday - Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Container Terminal: Shift arrangement. 0700-1900, 1900-0700, seven days a week, 365 days a year.

Working hours are at the discretion of the Port Operations Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Operations Manager may require full night work or special shifts in the interest of the Port. Overtime charges apply to all shifts worked outside of Normal 0700 hrs. – 1400 hrs. Saturday to Thursday, and all shifts worked on Fridays and Public Holidays.

Refrigerated cargoes should be stowed consignment by consignment to facilitate discharge and Direct Delivery to consignees.

Each general cargo berth is provided with fork-lift trucks and tractor units and trailers.

Pallets are provided free of charge to assist cargo handling.

STEVEDORES: Ship's gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used.

MEDICAL: A comprehensive range of medical and dental services are available at Dubai.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd. Capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at Berths No. 1 to 4, 6 to 9 and 17 to 35 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O.Box 307, Dubai. Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

CONSULS:

Belgium
China
Egypt
France
Germany
India
Iran
Japan
Jordan
Kuwait
Lebanon
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Taiwan
U.K.
U.S.A.

REPAIRS: All types of deck and engine-room repairs available.

Container repair yard located near container terminal.

DRY DOCK: *Dubai Dry Dock:* A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1 370 m.×66 m. (350,000 tonnes)
No. 2 525 m.×100 m. (1,000,000 tonnes)
No. 3 415 m.×80 m. (500,000 tonnes)

Dockside Cranes:

2×120 tonnes Safe working load at 65.5 m. radius.
1× 25 tonnes Safe working load at 80.0 m. radius.
2× 15 tonnes Safe working load at 70.0 m. radius.

Tank Cleaning: Facilities available.

SURVEYORS: Cargo, Ship, Classification Societies and Salvage Association Surveyors available locally.

JOINING/REPATRIATION: Arriving crew holding valid Seaman's Book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

According to the Immigration Regulation in force Agent is required to furnish the following Passport particulars to the Authorities for arranging the Transit Visa:

Full Name.
Father's Name.
Passport Number.
Place and Date of Issue.
Date of Expiry.
Place and Date of Birth.
Profession shown in the Passport.

At times Agent receives incomplete details and there were instances when Agent had to collect the full details from the transit passenger himself to process the application prior to his clearance.

It is absolutely essential that wives wishing to join their husbands onboard vessels off Dubai or Fujairah must carry a photocopy of their husband's Seaman's Book.

This is essential as if a photocopy of the husband's Seaman's Book cannot be shown to the Immigration Authorities, the wife will be repatriated immediately.

Repatriating crew can be brought ashore with a similar guarantee tendering the air ticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

Persons with South African entry stamps on their travel documents will not be allowed to enter the United Arab Emirates.

AIRPORT: International airport, 3.2 km.

EMERGENCY CO-ORDINATION CENTRE: Coastguard located adjacent port. Tel: 450520.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHIP SUPPLY SERVICE: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. Service is carried out by all local shipping Agents. See "Agent".

STORING: Complete shipchandling facilities available at short notice (via Agent).

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of Crew List. Temporary shore leave passes are issued by the Immigration Office against Passports and Crew Lists.

GARBAGE DISPOSAL: Use of garbage skips in the port is compulsory. Skips are provided alongside each vessel at a daily rate of Drhs 30 per day, collection as required. Skips are also available for rubbish other than garbage at a daily rate of Drhs 150 per skip. Additional skip or rubbish disposal can be arranged via the agents.

WASTE OIL DISPOSAL: A waste oil disposal service is available. The service is carried out by Dubai Labour Supply Co. Tel: 534020. Fax: 534082. There are no shore storage tanks available, so waste oil is disposed of at Municipality disposal dumps, prior permission is required from Dubai Municipality. Road tanker capacity up to 6,000 gallons. Arrangements for disposal can be made via the vessel's agent who will obtain costs on application.

SEAMAN'S CLUBS: Dubai International Seafarers Centre, situated outside Port Rashid, approximately 10 minutes walk from main port gate. The centre is a non-religious club catering for all nationalities. Facilities include telephone, food and coffee shop, bar, swimming pool, pool table, darts, currency exchange, postal service, library, TV and video, family room, barbeque area, table tennis, bus and information service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.687 (Fixed Rate).

AUTHORITY: Dubai Ports Authority – Port Rashid, P.O. Box 2149, Dubai, U.A.E. *Tel:* (04) 451545 (PABX to all Depts.). *Telex:* 47530 Dpa Em). *FAX:* (04) 452002 (HO), 450934 (Ops/Ct). *Contact:* P.S.H.Pollitt, General Manager Operations. Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendez-vous positions off Dubai or off Fujairah.

RAS AL-KHAIMAH: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and dredged to a depth of 3 m.

This is a small port for very small vessels only. *All* cargo vessels with cargo for Ras Al-Khaimah should assume discharge/loading will be carried out in Mina Saqr. For all other information, see entry for Mina Saqr.

Also see "Mina Saqr".

GARBAGE DISPOSAL: Available, drums are provided alongside. Service free of charge in daylight only. Tel: 332422.

AUTHORITY: Ras Al-Khaimah Port Services, P.O.Box 5130, Ras Al-Khaimah, U.A.E. *Tel:* 668444. *Telex:* 99280. *Cables:* Minasaqr. *FAX:* (07) 668533. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

AGENT: See "Mina Saqr".

SHARJAH (Mina Khalid): 25.22 N. 55.24 E. **(See Plan)**

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival or must be forwarded to ship's Agent prior to ship's arrival:

Immigration: The U.A.E. Immigration Department's office in Port Khalid, Sharjah operates 24 hours, 7 days per week. Master to submit Crew List, photographs of each crew member (photos not returned) and Passports/C.D.C. to Immigration Office on arrival. Passport/C.D.C. will be returned to vessel before sailing. Joining/leaving crew must report to the Immigration Office before proceeding to vessel/airport.

Customs:

2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic Beverages.
2 Cargo Manifests.

Port Operations:

2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

The original of all the ship's Certificates shall be produced to any Port Official on demand. Where a ship is more than 15 years old, a valid Certificate of Condition issued by a recognised Surveyor shall be on board.

Where Certificates are found to be invalid, the ship may be removed from the Port Area, at ship's expense and re-entry permitted only after validity has been established.

Failure to produce any Certificate to a Port Official when demanded renders the Master liable to a fine of up to Dh. 5000, and the removal of the ship from the Port Area.

PILOTAGE: Pilotage is compulsory for all ships entering and leaving the deep water harbour. On entry, Pilots will board to seaward of the Fairway Buoy; a pilot ladder should be provided. Port Khalid operates a 24 hour, 7 day week pilotage service. Notice is required before 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hrs.

ANCHORAGE: The Fairway Buoy in position Lat. 25° 22.9′ N. Long. 55° 22.9′ E. is a red and white pillar, Isophase every 6 secs. Vessels approaching should await Pilot to seaward of Fairway Buoy, anchoring if necessary.

Protected Anchorage: A limited number of vessels may anchor at moorings within the deep water harbour with prior approval of the Port Operator.

MAX. SIZE: Approach channel dredged to 12.0 m. MLLW. Max. draft 11.5 m.

HEALTH: Normal Quarantine Regulations apply.

Radio Pratique will be granted on receipt of radio message from Master, via his Agent, stating that no serious illness has occured during the preceding 30 days. All crew members must be in possession of valid cholera certificates. The Health Officer will only board when the vessel is alongside.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, LOA, and intended cargo operations to be performed, at least 72 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator.

VHF: Vessels should contact Port signal station on VHF Channel 16 (call sign "Sharjah Port Control") when within range. Working Channels 6, 12, 11, 74 and 67.

TUGS: Tug services are available for all ships entering the deep water harbour. At the discretion of the Port Operator ships may be obliged to use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors and foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Agent for necessary berthing as required.

Berth No.	*Depth at MLLW*	*Usage*
1A	11.5 m.	Containers
1	10.5 m.	Containers
2	10.5 m.	Containers
3	8.5 m.	General Cargo
4	8.5 m.	General Cargo
5	9.5 m.	General Cargo/Ro-Ro
6	9.5 m.	General Cargo/Ro-Ro
7	9.5 m.	General Cargo/Ro-Ro
8	8.5 m.	Reefer
9	8.5 m.	General Cargo/Reefer
10	8.5 m.	General Cargo
11	9.5 m.	General Cargo

Total length Berths No. 1A, 1 and 2 – 575 m. Total length Berths No. 3, 4, 5, and 6 – 725 m. Deep water Berth No. 6 – 274 m. Berth No. 7 – 220 m.

Total length Berths No. 8 and 9 – 360 m. Berth No. 10 – 210 m. Berth No. 11 – 195 m.

Equipment: The Sharjah Container Terminal (SCT) which comprises Berths No. 1A, 1 & 2 in the deep water harbour is equipped with 2 Liebherr T115 35 tonne gantry cranes; 2 Valmet 30 tons SWL transtainers. SISU TV10 tugmaster tractor units for Ro-Ro top lift container handlers and forklifts; LCL facilities available; 44 reefer points for containers. These berths are also equipped with specialised equipment to handle containers in the storage area. Each berth is provided with fork lift trucks, trailers and yard hustlers to facilitate the movement of cargo. Pallets are available to assist cargo handling. 2 heavy lift mobile cranes of 40 tons and 90 tons capacity are available on request from the Port Operator. Other equipment, including cranes, trailers, etc., will be made available upon request to the Port Operator with 24 hours' notice.

Lighterage; Lighterage services are available.

Storage Facilities: Storage facilities consists of 11 sheds (2 of which are located in the Container Terminal area) having an area under roof of 28,000 sq.m. In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.

Cold Store: A 5,000 ton capacity cold store (frozen and chilled) is located at Berth No. 8 with mechanical handling from ship's hold to store. Second cold store of 3,500 tons capacity also available.

STEVEDORES: The port will operate on 24 hour, 7 day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.

First shift	0600 to 1400 hrs.
Second shift	1400 to 2200 hrs.
Third shift	2200 to 0600 hrs.

Overtime Rate Applicable:
General Cargo/Container Vessels: 3rd shift, Fridays and holidays.
Reefer Cargo Vessels: Fridays and holidays.
Car Carriers: Nil.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator.

Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor. Distance to Al Qassemi Hospital in Sharjah is 8 km.

TANKERS: Tanker jetty situated in harbour on main breakwater. Max. size 60,000 d.w.t. Max. draft 9.5 m. Limited bunkering facilities.

DENSITY: 1025/1028.

FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours' notice.

FRESH WATER: Fresh water is obtainable at all berths.

REPAIRS: Good facilities for repairs. Divers available. Largest vessel for repairs 220,000 d.w.t.

DRY DOCKS: None.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

HOLIDAYS: The following are days that will be observed as public holidays. Premium tariff rates will apply on these days.

1st January	New Year's Day
*22nd February	Ascension of the Prophet Night
*26th April	Eid al Fitr
*27th April	
*28th April	
*2nd July	Eid al Adha
*3rd July	
*4th July	
*5th July	
*23rd July	Hirji New Year
11th October	Prophet's Birthday (Eid al Mawled)
2nd & 3rd December	U.A.E. National Day

*Dates are subject to change from year to year.

AIRPORT: Dubai and Sharjah. Distance to Sharjah International Airpor is 15 km.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted for crew members (0800 hrs. – 2000 hrs.) provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return. Also see "Documents."

GARBAGE DISPOSAL: Garbage skips can be arranged through the Port Authority and are placed alongside at the quay. Charges are U.A.E. Dirhams 50 per day.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (Fixed Link).

GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.

Ship's Chandlers: Complete ship chandlering facilities are available, handling provisions, laundry and bonded stores.

Chart: B.A. Chart No. 3714.

National Restrictions: No alcoholic beverages, explosives, firearms or contaminated food.

AUTHORITY: Sharjah Port Authority, P.O.Box 510, Sharjah, U.A.E. *Tel:* (06) 541666. *Telex:* Seagul EM 68138. *FAX:* (06) 541425. *Cables:* Seagul. *Contact:* Sheikh Saud Bin Khalid Al Qasimi, Chairman of Ports and Customs. Sheikh Abdul Rehman Bin Salem Al Qasimi, Deputy Chairman of Ports and Customs. Abdul Aziz Suleiman Al Sarkal, Director General of Ports. Mr A. Ashcroft, Port Engineer. Captain Mohammed Saleh – Port Operations Manager. Captain Maghdad Al Suwedy, Harbour Master. Mr. Simon Keen – Marketing Manager.

AGENT: Gulf Agency Co. (Sharjah) W.L.L., P.O.B. 435, Sharjah, U.A.E. Cables: "Confidence" Sharjah. Tel.: 544446. After office hours 354249. Telex: 68019 ("Gacshj EM"). Fax: 524091. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz). Call sign: "Confidence" Sharjah.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the airwaybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and airwaybill number.

UMM AL NAR, Abu Dhabi: 24.27 N. 54.29 E.

(See Plan)

LOCATION: The Umm Al Nar Petroleum Port is situated at the South Eastern tip of Abu Dhabi Island and consists of 2 island type berths connected to the shore through a causeway. Vessels will use Mina Zayed and Khawer Al-Bhagi navigation channels to the Port. The total length of both channels is 16 nautical miles. Vessels will berth port or starboard side to, at the discretion of the Pilot.

APPROACHES: *Water Depths:*

The channel depths are as follows:

(a) 13.0 m. for Mina Zayed navigation channel.
(b) 11.0 m. for Khawer Al Bhagi navigation channel keeping in mind that all levels are relative to C.D.

MAX. SIZE: The 2 jetties have been equipped with marine facilities to accommodate vessels having the following characteristics:

Max. size of vessel	30,000 d.w.t.
Min. Size of vessel	5,000 d.w.t.
Length overall	170 m.
Beam (max.)	26.50 m.
Draft (max.)	9.25 m.

HEALTH: Masters will be required to produce the standard International Bill of Health.

RADIO: *Arrival Telegram Ship/Shore:* On ship's arrival at the pilot station, a telegram shall be passed to the refinery through the ship's Agent with the following information:

ETA at berth.
Arrival draft.
Estimated departure draft.
Quantity and type of Cargo/Cargoes.
Vessel's maximum loading/discharging rate.
Quantity of dirty ballast and discharging rate.
Quantity of clean ballast to be discharged overboard and time required.
Size of manifold.
Are reducers to 6 in., 8 in. and 10 in. available on board?
Any vessel's requirements.
Master's Name.

BERTHING: Umm Al Nar Refinery Jetty consists of 2 berths, each of which accommodates vessels in the range of 5,000 d.w.t. to 30,000 d.w.t. and is provided with the following facilities:

(a) Loading platform.
(b) 4 mooring dolphins.
(c) 5 breasting dolphins (with 2.16 m. berthing line).
(d) 4 × 60 ton quick release hooks with capstan.
(e) 2 × 30 ton bollards.
(f) Hydraulically operated gangway.
(g) 2 fire-fighting monitor towers.

Each platform is provided with 6 loading arms having the following flexibility:

No.*	Size of Flanges inches	Cargo Flexibility	Max. Rate cu.m./hr.
1	6	Lub. oil	400
2	8	A.T.K.	1,000
3	6	Straight Run Residue	500
4	8	Mogas	1,000
5	10	Gas oil/Naphtha	1,500
6	10	Straight Run Residue/Ballast	1,000
7	3	Fresh water	13

*The loading arm numbers are from the gangway side.

Berthing Aids: Umm Al Nar Refinery Jetties are equipped with navigational aids to allow safe navigation during day and night, namely:

(a) 2 white coloured leading lights to affix navigation for channel's centre line, placed ashore at 5.0 m. and 11.0 m. above the ground level.

(b) 6 navigation lights with radar reflectors to define basin limits.

(c) Each jetty is provided with 4 red coloured lanterns, 2 at each end, at 5.0 m. above deck level. This is in addition to the operational flood lights.

(d) Each mooring dolphin is provided with flood lighting.

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. The breasting dolphins are each equipped with 60 ton quick release hooks and a power operated capstan. the mooring dolphins are each equipped with 60 ton quick release hook and a power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by terminal personnel, or as dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

LOADING/UNLOADING: Also see "Berthing."

(i) The Master must give the Terminal a "Stand By" warning 10 minutes before being ready to commence loading or discharging.

(ii) Upon "Commence Loading" from the Master or his deputy only 1 pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading/discharging products, lub. oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

Deballasting: The jetties are equipped with dirty ballast/slops receiving facilities. Vessel discharging dirty ballasts/slops ashore will use the deballasting arm. The maximum ballast reception rate is 1,000 cu.m./hr. Prior to arrival the Master is to advise Umm Al Nar Refinery (through the arrival telegram) how much dirty ballast/slops on board to be discharged to the shore facilities. (A "Declaration Letter" is provided for Master's signature) accepting clean ballast for overside discharge is subject to a declaration signed by the Master and delivered to the terminal representative.

Communications: To maintain the necessary continuous communications between refinery, vessels and shore control rooms during cargo operations and also in emergencies, the vessel will be provided with a walkie-talkie set. It is required that this set must remain at all times with the officer responsible for the cargo operation.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the Ship's Agent.

FUEL: No Bunker facilities in Umm Al Nar Refinery Terminal.

GENERAL: *Customs:* Custom's officers will board the ship on arrival and prior to sailing for necessary port clearance.

Stores and Provisions: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

South Basin: The South Basin has been closed for shipping recently due to its proximity to the intakes of the Power Station.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* 6023450/1 and 6026386. *Telex:* 22215 ADNOC EM. *FAX:* 562687, 660106. *Contact:* Captain H. Masri, PPA – Manager. Captain A. M. Massoud, Port Officer.

AGENT: See "Mina Zayed".

ZIRKU ISLAND, Jazirat Zarakku, Abu Dhabi: 24.52 N. 53.04 E. (See Plan)

LOCATION: Zirku Island is located at 24° 52′ N., 53° 04′ E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located in the N.N.W. with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

(A) SERVICE HARBOUR
(B) OIL TERMINAL

(A) SERVICE HARBOUR

PORT LIMITS:

(a) Lat. 25° 03.0′ N., Long. 52° 53.3′ E.
(b) Lat. 25° 00.0′ N., Long. 52° 53.3′ E.
(c) Lat. 24° 48.9′ N., Long. 53° 04.8′ E.
(d) Lat. 24° 48.9′ N., Long. 53° 11.0′ E.
(e) Lat. 24° 56.8′ N., Long. 53° 11.0′ E.
(f) Lat. 25° 03.0′ N., Long. 53° 04.4′ E.

Refer to British Admiralty Chart 3778.

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the Prevention of Collision at Sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations for the Prevention of Collisions at Sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available, accordingly, vessels calling at Zirku harbour should have very good manoeuvrability.

Navigation Aids:

1. Flashing lighthouse (Zirku, Zarakuh or Zarqa) located at the top of the pylon on the hill.
Height =200.86 m.
Lat. 24° 53.0′ N. Long. 53° 04.1′ E.
One flash every 10 seconds.

2. Flashing lighthouse at the end of the sea water intake.
Lat. 24° 53.0′ N. Long. 53° 05.3′ E.
Height=9 m.
V.Q. (3) 5 secs.

3. Flashing lighthouse at the end of the main jetty.
Lat. 24° 52.3′ N. Long. 53° 05.5′ E.
Flash=Fixed and flashing (1) 10 secs.
Height=11 m.
Colour=Green.
Obscured approximately 70° – 150° (80°).

4. *Aero Lights* (occasional).
Located on the airport control tower (green).
Lat. 24° 51.6′ N. Long. 53° 04.6′ E.
Located on the hill (red).
Lat. 24° 52.5′ N. Long. 53° 04.1′ E.
Height=67 m.

5. *Two Flares:*
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Height=145 m.
Fixed red lights.

6. *Pylon on the hill top.*
Height=200 m.
Fixed red lights.

7. *Anchorage Buoy.*
Lat. 24° 51.3′ N. Long. 53° 06.9′ E.
Yellow cylindrical.
Flashing yellow (1) 5 secs.

8. *Zirku Flare Platform "ZFP".*
Lat. 24° 51.5′ N. Long. 53° 02.6′ E. Mo "U" every 15 sec.
Height=85 m. Range=15 miles.

ANCHORAGE:

Waiting Anchorage: Small vessels and barges waiting for a berth alongside the main jetty can anchor beyond 0.5 mile in the S.S.E. of the end of existing jetty in approximately 7 m. of water depth.

Three fixed mooring buoys without lights have been installed at around 0.7 mile in the South and S.E. of the main jetty.

Sharp lookout must be kept when navigating in these areas.

An anchoring buoy (yellow Fl. (1) 5 secs.) has been installed in position: Lat. 24° 51.3′ N., Long. 53° 06.9′ E. marking the N.E. corner of the waiting anchorage area (see Admiralty Chart 3778).

Prohibited Anchorage Areas: To avoid the underwater oil pipe-lines being damaged, prohibited anchorage areas are defined as follows:

0.5 nautical miles on each side of the M.O.L. (Main Oil Line) input line.

0.5 nautical miles on each side of the loading lines.

0.5 nautical miles on each side of the SATAH lines.

M.O.L. input line from Zakum field comes ashore on the middle of the East Coast.

Loading lines to the oil terminal SPMs leave the Island from the N.N.W. point of the Island.

Anchorage Berths and Moorings: All vessels or barges entering the port should occupy such anchorage berth or mooring as may be directed by the Port Supervisor and shall move to any other anchorage, berth or mooring as and when required by this authority.

No vessel or barge shall shift or change the anchorage, berth or mooring allotted without Port Supervisor authorisation except if instructed to do so.

No claim will be accepted by Company for berthing or mooring due to arrival priority.

RADIO: International VHF Channels 16, 64, 68 and 19 have been allotted to "Zirku Island Traffic". Permanent watch maintained by "Zirku Island" on Channel 68, semi-duplex for vessels to Zirku Island and vice versa.

When contact established, change to Channel 64 or 19.

Channel 68 is to be used for ship to ship calling and conversation.

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges calling at Zirku harbour should advise their ETA at least 48 hours before their arrival by telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Zirku Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at Zirku as soon as a radio link can be set up on VHF Channel 62 or 68 with "Zirku Island" radio room.

Berthing prospects will be given to incoming ships by "Zirku Marine" at this time. If the vessel is instructed to anchor, she must keep a permanent watch on VHF Channel 16 or 68.

During berthing operations contact will be set up with "Zirku Marine" on VHF Channel 68.

Arrival Message: The first message should be sent according to the following form but any items which are the same as a recent previous voyage to this port may be omitted.

Name of vessel (tug or barge):
ETA Zirku.
Type of vessel.
Length.
Width.
Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only vessels and barges chartered by the Company Zadco (Zakum Development Company), acting on behalf of ADNOC (Abu Dhabi National Oil Company) and its contractors are allowed to moor alongside the jetties.

Jetties: The main jetty located on the East coast of the Island is allotted to the general supplying of the Island and the transit of equipment for the Company.

Temporary jetty "A" (on the South of the Island) is now completely silted up.

Temporary jetty "B" (on the West of the Island) is now deteriorating and no longer in use.

Vessels: Contractors shall charter tugs, barges, landing crafts, supply boats, etc. whose dimensions, weight and draft are suitable to the existing jetty.

Emergency use: Other craft may use this harbour only in emergency and must immediately report their arrival to the Port Supervisor.

All craft using the harbour are subject to the control of the port operating company representative. (Zirku Marine Superintendent or his deputy) and the Petroleum Ports Authority (Port Officer)

Berth Occupancy: The Port Supervisor will define the allocation of berth in accordance with the Company's requirements of priority upon Manager's recommendations.

Contractors should start discharging as soon as vessel or barge is berthed and should unload until all the cargo has been discharged.

Contractors should not store their cargo on the jetty. They must remove it as unloading proceeds.

Vessels and barges should leave as soon as the handling of cargo is completed in order to free the quays. The Port Supervisor can order vessels and barges to leave the quay at any time (even though not completely unloaded), so they must be able to move, therefore barge shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the East coast of the island is approximately 1,200 m. long and orientated N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. and is 12.5 m. long (41 ft.) at the inward end; 2.3 m.×40.5 m. long (132 ft.) in the centre and 3 m.×57 m. long (187 ft.) at the seaward end (water depth is calculated under chart datum C.D.)

The quay is fitted with 8×30 ton bollards, 12 pairs of rubber fenders from a level of 1.50 below C.D. to top of quay level and 3 steel ladders running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orientated N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is available for small launches though badly equipped with mooring points.

The Port Supervisor Office and Police ward room are located on the top part of the jetty. The jetty working area has been asphalted.

CRANES: Mobile cranes up to 100 tons are available.

Contractors have to supply the Island with their own mobile equipment to discharge vessels and barges, if not previously arranged with Company.

As soon as the unloading is completed users should remove their mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 ton crane (up to 45 tons for exceptional cases). For heavy loads two locations are defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. from the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. from the edges of the jetty seaward end.

MEDICAL: A medical officer is resident on the Island for emergency cases only. The Company maintains a small hospital.

FRESH WATER/FUEL:
Water and Fuel Loading and Unloading Critical Area:

Connection pipes are located on the inward and outward ends of the quay.

Inward end of the quay is fitted with 3 in. and 1 in. diesel oil connections and with 3 in. fresh water connection.

The outward end of the quay is fitted with 3 in. connections for fresh water and diesel oil and 8 in. line for fresh water. The Ship's Master should apply the safety rules and inform Zirku Marine about any unsafe conditions.

Ships coming for diesel oil or fresh water should be fitted with sufficient length of hoses to be connected to the Island fixed pipe.

A safety ball valve is required on shore and diesel oil hose.

SHORE LEAVE: No person may go on shore without authorisation from the Zirku Police Authority and only if in possession of Oil Field Security Pass.

SAFETY: *Reporting of emergency:* Should any vessel be in danger through fire, explosion, collision or whatsoever cause, the Master should immediately report the fact to the Port Supervisor and Port Officer (Petroleum Port Authority) by VHF Channel 62 or 68.

When alongside the main jetty they can report through the shore telephone system located on the jetty. Grey for Island Network, Red for Safety.

Phone Numbers:

Day and Night:	Safety	56333
	Radio Room	56666/56403
	Clinic	56222.
Day:	Marine Superintendent	56400.
	Port Officer (PPA)	56471

Fire fighting equipment: There are 2 monitors and 3 hydrants supplied by a 12 in. pipe able to reach any point of the main jetty on emergency call.

Ship's fire fighting equipment: This equipment must be in constant readiness at all times with sufficient skillful personnel on board for its efficient operation.

Particular safety requirements for vessels unloading inflammable products:

All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied with water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck.

Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ship's hoses' connection.

A checking will be performed by the Safety Supervisor jointly with the Port Supervisor and the vessel's Master, and a form will be signed by the same, after which offloading of said hazardous cargo will be authorized.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels. Barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island: The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. some 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

Zirku Island tide prediction supplied by operating company, copy can be obtained from Marine Zirku.

There is a tide recorder on the main jetty. Tidal information also available from Zirku Marine on VHF, Channel 68.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable Vessels: The Port Officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of Sea Pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National Courtesy Flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & Diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

GARBAGE DISPOSAL: See "Section B".

WASTE OIL DISPOSAL: See "Section B".

SEAMAN'S CLUBS: See "Section B".

CURRENCY: See "Section B".

(B) OIL TERMINAL

PORT LIMITS: The port area of Zirku Petroleum Port covers the area bounded by straight lines connecting the following points:

A:	Lat. 25° 03′ N.	B:	Lat. 25° 00′ N.
	Long. 52° 53.3′ E.		Long. 52° 53.3′ E.
C:	Lat. 24° 48.9′ N.	D:	Lat. 24° 48.9′ N.
	Long. 53° 04.8′ E.		Long. 53° 11′ E.
E:	Lat. 24° 56.8′ N.	F:	Lat. 25° 03′ N.
	Long. 53° 11′ E.		Long. 53° 04.4′ E.

Masters of all vessels entering the port must follow instructions given by the Company's Marine Superintendent as to approach, anchoring, berthing and unberthing.

DOCUMENTS: On arrival the tanker should prepare the following documents to be handed over to the different authorities coming on board:

Tanker Enquiry Form (ZADCO Form).
Navigation Aids Dues Certificate (M.E.N.A.S. Form).
Notice of Readiness.
Crew List.
Certificate of Registry.
Load Line Certificate.
Safety Certificate (Equipment).
Oil Liability TOVALOP/CLC.
Derat Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.
Suez Canal Tonnage Certificate.
Panama Canal Tonnage Certificate.

PILOTAGE:

1. *General:* On arrival and on departure the pilotage is compulsory within the Port Limits. The Company reserves the right to render the pilotage compulsory through the departure route for any reason. Nevertheless, upon Masters request Zirku Pilots could assist any tanker on Zirku Departure Route to and from Buoy No. 6 (Lat. 25° 13′ N., Long. 52° 59′ E.). Within Port Limits and on Zirku Departure Route the speed *shall not exceed 8 knots.*

2. *Direct Berthing:* Instructions for berthing having been received by voice communication the tanker should proceed to the agreed Pilot boarding point.

3. *Waiting:* In case of a berth not being available, the approaching tanker will be instructed to proceed to an anchorage area and anchor at the agreed location. The tanker will wait at this allotted location until further instructions.

4. *On Departure:* A Pilot will assist loaded tanker as stipulated in No. 1 above.

5. *Pilot Access:* The Pilot access should be in good condition, safe, clean and ready. Pilot ladders constructed of light material such as aluminium will not be accepted. Where the freeboard exceeds 10 m. the vessel should have a combination of accommodation ladder and pilot ladder rigged. The bottom of the accommodation ladder shall be at least 7 m. above the water line.

6. *Pilot Embarkation:* To embark the Pilot safely, the incoming tanker should reduce speed (no more than 5 knots), make a good lee to minimise adverse weather conditions and take the way off. On the tanker's deck the boarding of the Mooring/Loading Master should be attended by at least one officer and one A.B.

7. *Pilot Boats:*

Name	Jarada	Gain
Engine	2×955 h.p.	2×860 h.p.
Speed	20 knots	20 knots
Marked	Zirku Pilot	Zirku Pilot
Fibre Glass Hull		

NAVIGATION AIDS:

Separation Scheme: A traffic separation scheme between Zakum Field and Umm Shaif Field crosses the port area.

This scheme includes:

(a) A separation zone, 0.75 nautical miles wide.
(b) A traffic lane for Westbound traffic, 1.25 nautical miles wide.
(c) A traffic lane for Eastbound traffic, 1.25 nautical miles wide.

The main traffic directions are: 050° – 230°
072° – 252°

This scheme is marked by the following two light buoys.

1. Zakum Middle
Lat. 25° 59.15′ N. Long. 53° 08.50′ E.
R.W.V.S. Pillar L.Fl. 10 sec.

2. Zakum West
Lat. 24° 56.60′ N. Long. 52° 59.85′ E.
R.W.V.S. ISO 6 sec.

Reference Charts: British Admiralty 3733, 3952, 2889, 3778.

Zirku Island:
Zirku, Zarakuh or Zarqa beacon:
Lat. 24° 53.0′ N. Long. 53° 04.2′ E.
Fl. 10 sec. 22 miles Height 200 m.

Main Jetty:
Lat. 24° 52.2′ N. Long. 53° 05.4′ E.
Fixed Green 7 miles and Flash 10 sec. Height 11 m. 9 M.

Sea Water Intake:
Lat. 24° 53′ N. Long. 53° 05.3′ E.
3 Fl. W. 5 sec. Height 9 m.

Radio Tower:
Lat. 24° 53′ N. Long. 53° 04.1′ E.
Fixed Red light – Height 198 m.

Zirku Flare Platform 'ZFP":
Lat. 24° 51.5′ N. Long. 53° 02.6′ E.
Flashing White light, morse "U" every 15 sec. Range 15 miles.

Flares:
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Fixed Red light – Height 145 m.

Repeater Platform:
Lat. 25° 01.7′ N. Long. 52° 55.7′ E.
2 White flashing lights Morse "U" 15 sec. at level +18 m.
2 Red lights at level +34 m.
2 Red lights at level +51 m.
Horn Morse "U" every 30 sec.

Isolated Danger Mark:
Capped well-head.
Lat. 24° 59.8′ N. Long. 52° 57.1′ E.
Black-Red-Black – Pillar Fl. 2.5 sec.

Navigation Warning within Port Limits:

All vessels transiting through the Zarakkuh Port Limits are to follow the following procedures:

1. Vessels transiting along the Separation Zone may do so as normal.
2. Vessels intending to cross the Separation Zone Northwards must inform Zarakkuh Radio on Channels 16 or 68 of their intention and follow the instructions given.
3. Vessels Southbound, intending to cross the Northern Port Limits, must inform Zarakkuh Radio of their intention on Channels 16 or 68 and follow the instructions given.
4. No vessel is to pass between Buoy No. 1 (Lat. 25° 02′ N., Long. 53° 00.8′ E.) and the oil loading terminal or enter the no unauthorised entry limts around the oil loading terminal or the Repeater Tower (Lat. 25° 01′ 42″ N., Long. 52° 55′ 40″ E.), or "ZFP" (Lat. 24° 51.5′ N., Long. 53° 02.6′ E.).

MAX. SIZE: The SPMs are suitable for berthing tankers from 30,000 d.w.t. up to 350,000 d.w.t. loaded at 80% of their capacity.

The max. draft allowed for departure is 21 m.

ANCHORAGES: *Small Vessels Anchorage:* Located close to Zirku Main Jetty is designated for small vessels to service harbour.

1 Yellow buoy Fl. 5 sec. in N.E. corner (Lat. 24° 51.3′ N., Long. 53° 06.9′ E.).

Limits:	Lat. 24° 51.3′ N.	Lat. 24° 50.0′ N.
	Long. 53° 07.0′ E.	Long. 53° 07.0′ E.
and		
	Lat. 24° 51.3′ N.	Lat. 24° 50.0′ N.
	Long. 53° 05.4′ E.	Long. 53° 05.4′ E.

Tankers East Anchorage:

Limits:	Lat. 24° 56.8′ N.	Lat. 24° 54.8′ N.
	Long. 53° 11′ E.	Long. 53° 11′ E.
and		
	Lat. 24° 56.8′ N.	Lat. 24° 54.8′ N.
	Long. 53° 07.8′ E.	Long. 53° 07.8′ E.

Tankers North Anchorage:

Limits:	Lat. 25° 03′ N.	Lat. 25° 00′ N.
	Long. 53° 02.2′ E.	Long. 53° 02.2′ E.
and		
	Lat. 25° 03′ N.	Lat. 25° 00′ N.
	Long. 53° 04.4′ E.	Long. 53° 04.4′ E.

where 2 buoys are installed at Eastern corners. Colour yellow – Flash yellow 5 sec.

This area is designated for incoming and outgoing deep draft tankers.

Prohibited Anchorage Area: Anchorage within Port Limits, outside waiting anchorage areas is prohibited. Exceptional authorisation may be given by the Port Officer.

Sea-bed: The sea-bed in the Terminal area is rock, covered by a few inches of loose sand. Some patches of coral can be found. Holding is poor and vessels are advised to pay out more cable than usual.

RADIO: Messages can be sent to the Company by the following means:

Telex or Telegram through Bahrain Radio addressed to ZADCO Marine. Telex No.: 22948 ZDCAUH EM. Cable: ZIR Marine.

Voice communication to "Zirku Marine" by SSB. Operation Mode A3J Upper Side Band within a range of approximately 250 km.

Permanent watch on carrier frequency: 2036.4 kHz.

Talking on standard Marine Duplex HF Channel: 405, 605, 828

Notice of Arrival: Arrival Message shall be sent to ZADCO Marine 96 hours before arrival at the Port Limits.

Confirmation shall be given 72 hours, 48 hours, 24 hours, and 6 hours from ETA.

Voice contact shall be made with "Zirku Marine" by SSB or VHF 6 hours prior to arrival.

Arrival Message: Arrival Message should contain the following:

Vessel's name and Master's Name/Abu Dhabi Agent's Name/Port of Registry/n.r.t.
ETA Port Limits
Arrival drafts/Departure draft forward and aft
Quantity of ballast
Estimated deballasting time
Possibility of simultaneous operation/permanent ballast
Cargo required
Maximum loading rate and IGS and air-conditioning operative.
Part cargo and slops/to comingle
Expiry date Tovalop/CLC/IOPP
Derrick capacity/No. and size of manifolds/mooring brackets
Last Port of call and next Port/EDP accepted
Direction of approach

VHF: Voice communication to "Zirku Marine" by VHF Channels: 16, 19, 64 and 68. Channel 68 is used by the Pilots.

Permanent simultaneous watch maintained on these Channels.

Arrival: VHF contact should be made with Zirku Marine requesting instructions.

Once contact has been established through Channel 16 further conversation should be conducted on either Channel 64 or 19 upon operator's instructions.

Pilot/Loading Master on board: Although he will bring on board his own VHF communication units with private frequencies, the tanker VHF should remain operational at all times.

At Anchorage: Permanent watch should be kept on Channel 16 and on other Channels (64 or 68) as requested by the Zirku Marine operator.

Traffic Separation: North-bound vessels intending to cross the Separation Scheme, and South-bound vessels intending to cross the North port limit, should report their intention on Channels 16 or 68 and follow instructions.

TUGS: A tug of 2×1,500 h.p. and a mooring launch of 2×275 h.p. will assist the berthing.

SPMs: The terminal of Zirku Petroleum Port is located about 8 nautical miles N.N.W. of Zirku Island and consists of two single Point Mooring buoys whose exact coordinates are as follows:

SPM "Alpha"	Lat. 25° 00′ 32″ N.	Long. 52° 59′ 02″ E.
SPM "Bravo"	Lat. 25° 01′ 36″ N.	Long. 52° 59′ 30″ E.

A small mooring buoy for small craft is in position: 0.3 miles West of No. 1 channel buoy.

SPM Description: Both buoys are identical.

Buoy Body: The buoy is a circular steel structure with a diameter of approximately 12.5 m. It has a rotating assembly. The colour is orange.

Hoses: The buoy is equipped with 2×20 in. floating hoses with a 16 in. tail end hose connection. The outer hose string is 296 m. and the inner one 285 m. Each string is equipped with winker lights.

Hawser: The mooring systems consist of a single 18 in. circumference grommet hawser of double braided nylon, with an overall length of 53.4 m., ended by a short length of 76 mm. diameter chafe chain.

Light: The buoy is fitted with a navigation light emitting a Morse "U" flashing signal every 15 seconds visual on 360° up to a 5 nautical miles range.

Fog Horn: Fitted on the buoy, emits a Morse "U" blast every 30 seconds and is activated when necessary by a remote control system.

Radar Reflector: A radar reflector is installed on the buoy structure.

Water Depth: The minimum water depth in the vicinity of the SPM Buoys is 27 m. above chart datum.

MOORING: All vessels arriving at this port are required to have adequate draft and trim for safe manoeuvring purposes. The propeller should be completely immersed. The recommended trim for manoeuvring in ballast is 3.0 m. List will not be tolerated.

Tanker Material Equipment: The tanker must have the port side derrick rigged for lifting the shore equipment on board, the minimum derrick capacity shall be 10 tons.

A good messenger line of approximately 4 in. circumference nylon line to be ready on the forecastle.

The forecastle should be fitted with Smit or Chain Stopper type brackets, strong mooring bitts and Panama Leads.

Terminal Material Equipment: One basket will be lifted on board with hose connection equipment and tanker mooring equipment if necessary.

Procedure: Full power must be available on tankers' main engine.

Once the optimum approach route has been selected the tug will pull away the hose strings and the tanker will proceed toward the buoy at a suitable speed.

When approximately 300 m. from the buoy the mooring launch will be instructed to bend on the messenger line from the Panama Lead to the mooring hawser pick up line.

The tanker will be brought to a dead stop at 60 m. from the buoy.

The chafe chain will then be winched aboard and secured.

Once the tanker is secured, the tug will pass its towline to the tanker's stern and then maintain tension on the towline throughout, to avoid any buoy kissing.

Emergency Fire Wire: All ships shall have a fire wire hanging from the bow and the stern to enable tugs to immediately connect in case of emergency – Circumference of wire to be at least 6 in.

Weather Limits: Mooring operation can be carried out in up to 25 knots wind speed and significant waves up to 5 ft.

HOSE CONNECTION: *Terminal Connection Team:* After mooring is completed, the hose connection team will board, to assist the crew.

Tanker Connection Team: An officer should attend the hoses with at least 3 deck hands and 1 boatswain. In addition one skilful winchman will be required.

Tanker Material Required: Miscellaneous tools, shackles, wires, ropes plus fire hose and extinguisher should be ready close to the manifold. The area around the manifold should remain free of all equipment to enable safe hose handling.

Terminal Material Supplied: 16 in. to 16 in. Spool pieces. Chain hoists, tirfors, gaskets, wrenches, flange bolt sets, butterfly valve handles, set of miscellaneous chains, ropes, slings, etc.

Flange size: The tail end hose flange size is a 16 in. camlock coupling. Before berthing the tanker manifold should be ready for direct connection, blind flange removed, and 16 in. to 16 in. spool piece fitted.

The two tanker manifold connections should be chosen in such a way that access to both flanges is possible.

Procedure: Having completed the mooring operation, the mooring launch will proceed to the end of the floating hoses to tow them to a position beneath the tanker's derrick hook.

The inner (or shorter) of the hoses will be lifted above deck level and the end swung inboard.

The hose will be lifted by such length to match the distance between the rail and the tanker manifold, then held with snubbing chains and the hose end lowered and connected to the manifold flanges.

The same operation will be performed on the outer (or longer) one.

LOADING: *Rate:* The maximum loading rate will be 12,500 cu.m.p.h. using both hoses.

Care will be taken not to exceed the rated working pressure to be supported by the hoses which is 15.5 bars (225 p.s.i.).

Procedure: Once the hoses have been connected and checked, the butterfly valves opened and the tanker pipe network set up, the Loading Master can give the go-ahead upon request from the Chief Officer and pumping will commence at slow speed at the beginning (by gravity), approximately 7,000 bbls./p.h., then the rate increased up to the rate requested by the Chief Officer.

An inspection of the floating hose strings and the buoy, including waters around the terminal, should also be made during the first few minutes of cargo transfer to ensure there is no leakage.

Once reached, the flow rate will be maintained until further instruction is given by the Chief Officer to the Mooring/Loading Master.

Valve Closure: No valves which will stop or seriously impair or reduce the flow rate of oil from the shore pumps are to be operated without prior agreement with the shore control room (ZCC) through the Loading Master.

10 minutes' notice should be given to the Loading Master for reducing the loading rate or stopping.

The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the shore is to be advised and the pumping rate will be reduced to the required level.

The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship.

It cannot be over-emphasised that to do so can be extremely dangerous and cause extensive damage to equipment in addition to possible oil pollution.

Failure of Communication: In case of failure of communications between the Loading Master and Zirku Control Room (ZCC), the loading will be automatically stopped.

Accommodation: Cabins: Two single cabins on board the tanker must be allotted to the Mooring/Loading Master and his Assistant.

Terminal Team: A rest room must be allotted to the hose connection team (3/4 people) should they be required to stay on board by the Mooring/Loading Master. This will only be the case in adverse weather conditions.

Working Location: The working location of the Mooring/Loading Master is the cargo control room.

A portable unit of around 25 kgs. will be installed in this room and operate from either a 110/115 v. or 220/240 v., 50/60 kHz. supply, such a socket must be available in the cargo control room.

Terminal Personnel: As long as the tanker is secured to the Buoy a permanent watch will be performed by the Mooring/Loading Master and or his assistant in the cargo control room with the portable unit.

Contact will be permanently kept with the Zirku Control Room (ZCC) private VHF Channel.

Tanker Personnel: A tanker officer speaking English should be permanently on duty with the Mooring/Loading Master. The Chief Officer must be available at any time during the deballasting and loading operations (room and telephone number).

In addition to the tanker officer at least two crew members will be in contact with control room through adequate W/T and must be on duty permanently on the deck keeping watch on the tanker and terminal equipment.

Accommodation ladder will be continuously adjusted by the crewmen with regard to the sea state and tanker draft to provide safe access to the deck at any time of the operations.

Ullages: Ullage measurements shoud be taken by remote gauge while loading.

Opening the tank ullage lids should be avoided.

When necessity involves opening the lids the Mooring/Loading Master's approval must first be obtained.

The Mooring/Loading Master will check and approve the ullage report according to ullage measurements.

Characteristics:

API: around 34.5
S.G.: around 0.85
Temperature 20°C. to 35°C.

More accurate characteristics will be transmitted to the tanker on arrival.

BALLAST: *Quantity:* Tankers arriving at Zirku Petroleum Port for berthing should keep onboard at least 30% of their d.w.t. as ballast until further instructions received from the Mooring/Loading Master.

Tankers capable of deballasting and loading simultaneously should have on board a total of not less than the 30% d.w.t. requested for berthing so that in normal circumstances they will not be flying light whilst moored at the buoy.

Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring/Loading Master consider it necessary.

Quality: Vessels arriving with ballast on board to be discharged into the sea must ensure that the ballast, lines and pumps are clean and free from oil before commencing discharge. If necessary the initial quantity and the drainings should be pumped into the slop-tank. A permanent deck watch shall be kept during this operation with overside lights displayed at night on both sides of the vessel at the discharge points.

Deballasting Facilities: There are no deballasting facilities at Zirku Terminal for receiving dirty ballast.

UNMOORING/DEPARTURE: As soon as the loading operation is completed, the vessel will vacate the berth.

The tanker's cargo manifold valves and butterfly valves at the hose end will be closed. The hoses once disconnected will be swung outboard and lowered to the water with the derrick and released.

The tanker will leave the terminal by slipping the mooring. Once the mooring is slipped, the tanker will put the engines astern, drop back until clear of the floating hose, and then steam clear of the terminal.

The mooring launch will be positioned to tow the floating hoses clear, where necessary. The tug will help the tanker to clear the terminal if so required by the Mooring/Loading Master. The mooring connection team will disembark at this stage and the terminal equipment be lowered into the tug. It will be necessary to make a lee to perform these operations safely.

Waiting Area: In the case of no "Early Departure Procedure" arrangements having been made, the tanker will be anchored in one of the anchorage areas waiting for cargo, documents which will be sent by the pilot boat as soon as possible.

In case of the tanker being delayed from sailing for any reason (engine repairs, waiting order, etc) the Mooring/Loading Master will disembark once securely anchored.

When the tanker is ready to sail through the North Departure Route, 2 hours' notice will be given to the Mooring/Loading Master.

Departure Route: Any deep draft tanker leaving Zirku Petroleum Port will proceed through the following departure route at a speed not exceeding 8 knots.

Buoy No. 1 East Mark	Lat. 25° 02′ N. Long. 53° 00.8′ E. BYB VQ(3)5s.
Buoy No. 2 Safe Water	Lat. 25° 04.4′ N. Long. 53° 02.4′ E. RW Occ 15s.
Buoy No. 3 Safe Water	Lat. 25° 06.4′ N. Long.53° 03.0′ E. RW LFI 10s. Crossing Pipe 30 in.
Buoy No. 4 Safe Water	Lat. 25° 09.8′ N. Long. 53° 02.6′ E. RW Occ 8s. Crossing 3 pipes 18 in. & 30 in.
Buoy No. 5 Safe Water	Lat. 25° 11.2′ N. Long 53° 00.2′ E. RW MO(A) 10 s.
Buoy No. 6 West Mark	Lat. 25° 13.0′ N. Long 52° 58.9′ E. YBY VQ(9) 10s.

To Das Channel Buoy No. 10. Leave to starboard.

MEDICAL: Although a medical officer is resident on Zirku Island, consultations will be possible only on an emergency basis.

DENSITY: The salinities are high as a result of the high rate of evaporation.

At the terminal, the water density depending on the sea temperature ranges from 1030 to 1035.

SERVICES: Following services are NOT available at Zirku Petroleum Port:

Bunkers.
Fresh Water.
Food.
Engine Repairs.
Deratisation.
Shore leave for the crew.
Crew changes.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams. U.S.$ 1.00=3.680Dh. (18.6.92).

WEATHER: *Seasons:* Two principal seasons can be distinguished in the Gulf. The cool "Winter" season extends from mid November to mid March and the hot "Summer" season from mid May to mid September. The two intermediate periods are transitional and the weather experienced may have either Summer or Winter characteristics.

Winds: The most frequent (54% of the time) is named 'Shamaal' and blows from W.N.W. to N. principally in Winter. The 'Noshi' blows from N.N.E. to E.N.E. for 20% of the time.

Local effects of Monsoon, called the 'Kaus', blows from E. to S. 17% of the time.

Finally, during Winter only, the 'Suhaili', blows for 9% of the time from W.S.W. to W.

The strength of these winds is approximately proportional to their probability of occurrence but at their strongest they can give rise to sandstorms and rough seas for several consecutive days.

Temperature: The extreme monthly mean values of air temperature are 20°C in February and 34°C in August with a lowest minimum of 9°C and a highest maximum of 44°C during the same months.

Tides: Around Zirku Island the tide is variable with small diurnal predominance. However this semi diurnal effect is not of great significance and for all practical purposes it can be said that there is only one high water and one low water per day.

The maximum range is about 1.5 m.

The mean usual range is 1.0 m.

Currents: At the terminal tidal currents are semi diurnal.

The current speed reaches 1 knot regularly at each tide.

Roughly the flood runs S.W. and the ebb N.E. but the turn of tide is very slow when the current directions are variable.

Predictions may be found to be considerably influenced by strong winds, especially the 'Shamaal'.

GENERAL: *Navigation Aids Dues:* The light dues for the Gulf navigational aids will be levied for the account of M.E.N.A.S.

These dues will be paid once per voyage at the first port of call in the Gulf.

Masters are requested to keep the receipt as a voucher if requested by any other Port authority within the Gulf.

Agency: Ship-owners must have their own representative Agency in Abu Dhabi.

Zadco will be acting as a sub-Agency to liaise with the main Agency in Abu Dhabi for all queries regarding mail, telexes, medical assistance, letters of Protest etc.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* Abu Dhabi 6023450/1 or 6056471. *Telex:* 22948 ZDC AUH EM – Zirku. *FAX:* 6056472. *Contact:* Captain A. M. Gabal, PPA – Asst. Manager. Captain H. Al-Holli or Captain M. Abu Shahba, Zirku – Port Officers.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 730500. After hours 794490. Fax: 731328.

NOTES

Please also advise Shipping Guides Ltd.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations) 1979.

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of

(a) death, other than by accident,

(b) illness where the person or persons concerned

(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;

(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of

(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease

(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority

or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);

(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the excepted area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. The Port Health/Medical Officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £2,000.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

INTERNATIONAL CODE OF SIGNALS PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request Free Pratique	Q
	*I require Health Clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)..........(indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate Pratique signal.	
ZY	You have Pratique.	
ZZ	You should proceed to anchorage for Health Clearance (at place indicated).	
	ZZ1 Where is the anchorage for Health Clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring Health Clearance. These lights should *only* be about 2 m. (6 ft.) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon *as nearly as possible*.

Health Clearance may be given in three ways:

(a) Wholly in plain language.

(b) Partly in the above signal code, remainder in plain language.

(c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdom.

GENERAL:

Regulations for tankers entering or leaving ports in the United Kingdom:

Application of the Regulations: The British Government have issued the following regulations, which came into force on 15th October, 1981, applicable to tankers of 1,600 g.r.t. and over of any nationality which:

Have a cargo of chemicals, gas or oil in bulk, or;

Have not been declared gas free after having carried such a cargo.

Reports: Before entering the limits of any harbour a report must be made to the Harbour Master of that harbour giving the following information:

(a) Name and call sign.

(b) Country of register.

(c) Length, draft and beam.

(d) Destination. (This may not be the same as the harbour through which the tanker is passing).

(e) ETA at pilot station or harbour limits.

(f) Brief description of cargo and quantity in tonnes.

(g) Is vessel fitted with inert gas system?

(h) If inert gas system is fitted, is it operational?

(i) Have cargo tanks been rendered non-inflammable?

(j) Has a certificate been issued that the vessel complies with the IMO Codes for the Construction and Equipment of Ships carrying:

(i) Dangerous chemicals in bulk, or;

(ii) Liquefied gases in bulk?

(k) Any defect in the hull, machinery, or equipment which may:

(i) affect the safe manoeuvrability of the tanker or;

(ii) affect the safety of other vessels in the vicinity of the harbour, or;

(iii) constitute a hazard to the marine environment, or;

(iv) constitute a hazard to persons or property in the vicinity of the harbour.

Any changes to the above which occur before entering the harbour limits or while within those limits must be notified to the Harbour Master.

Check List: A Check List is required by the Pilot and the Harbour Master giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and radio equipment.

State of Safety Certificates and other documents.

Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transport Marine Offices at the following ports: Aberdeen, Avonmouth, Belfast, Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, Hull, Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcastle, Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986.

Ship Movement Reporting in the English Channel and Dover Strait.

From 1st July, 1986, a revised message format is to be used in the voluntary ship movement reporting system for the English Channel and Dover Strait (MAREP). The changes will bring the MAREP system into agreement with the General Principles for Ship Reporting Systems adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also includes amendments to the description of the MAREP system which was given in former Notice No. 1520/81.

Ship Movement Reporting (MAREP):

Introduction:

(1) The objective of the MAREP scheme is to assist the Mariner, to improve safety of navigation in the English Channel and Dover Strait, and to reduce the risk of pollution of the coasts of the United Kingdom and France in this area. Participation in the scheme is voluntary and the International Maritime Organisation (IMO), through its Maritime Safety Committee, has recommended that ships to which the scheme applies should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ships to report-in to a number of designated shore stations in the area of the Traffic Separation Schemes and associated Inshore Traffic Zones off Ushant, off Casquets and in the Dover Strait. Broadcasts will be made by shore stations on a regular basis and as required and will include information on any known situations which could affect the safe navigation of ships in these Traffic Separation Schemes or associated Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are also invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the areas described in paragraph 5 below are invited to participate:

(a) All loaded oil and chemical tankers and loaded gas carriers of 1,600 g.r.t. and over.

(b) Any ship "not under command" or at anchor in a traffic sparation scheme or associated inshore zone.

(c) Any ship "restricted in her ability to manoeuvre", ships engaged in towing, deep draft ships, or ships with a defect in their propulsion or steering.

(d) Any ship with a defect in those navigational aids which could adversely affect her navigation under prevailing conditions.

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

(a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:

(i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.

(b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:

(i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.

(ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.

(iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a) Ushant	Ouessant Traffic	16 – 11
(b) Casquets	Jobourg Traffic	16 11
	Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c) Dover Strait	Gris Nez Traffic	16 – 69
	Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by a forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

APPENDIX:

Ship Reporting System:

System Identifier	MAREP	
Type of Report	POSREP	(Position Report) or
	DEFREP	(Defect Report) or
	CHANGEREP	(Change Report)

Heading	*Text*	*Explanation or Example*
Identification of message	MAREP	
Type of message		POSREP
Identity of ship	ALFA+name of ship plus call sign	
Group date/hour	BRAVO+6 figure (Zulu)	Date of month: 2 figures. Hours and minutes: 4 figures
Position	CHARLIE+Latitude and Longitude	Latitude: 4 figures followed by N or S Longitude: 5 figures followed by E or W
	or CHARLIE+name of port of departure	If the vessel is sailing from a port in the coastal zone
	or DELTA+bearing – distance in relation to a sea mark	Bearing: 3 figures in degrees. Distance: 2 figures in miles from land/sea mark indicated
True Course	ECHO+true course	3 figures in degrees from North
Speed	FOXTROT+speed in knots and tenths of knots	3 figures
Destination	INDIA+name of port of destination and probable time of arrival	
Radio-Communications	MIKE+VHF Channel number	Give number of VHF Channel monitored and if applicable number of second Channel monitored
Draft	OSCAR+maximum present draft	4 figures in metres and centimetres
Cargo	PAPA+industrial name of product or IMDG Code No.+quantity	Nature of cargo. Quantity expressed in tonnes
Navigational Restrictions	QUEBEC+brief description in clear	Stopped, moored, hampered by draft; generally any restriction on manoeuvrability
Additional Comments	X-RAY+brief particulars	Any other information which may be useful.

Note: The headings QUEBEC and X-RAY can be omitted when there is nothing to report.

GARBAGE/WASTE OIL DISPOSAL: *General Information:* Ports and terminals in the United Kingdom must by law provide reception facilities for oily mixtures, chemicals and garbage from ships which need to discharge these substances. The level of provision varies according to the requirements of the ships usually visiting the port, some facilities are only provided to meet specialised needs, whilst facilities for garbage are almost universal. In some ports waste disposal companies are contracted to provide the service, this is often by means of road vehicles.

Advance Notice Requirements: The use of specialised facilities may demand advance notice and when this is required arrangements are usually made by the ship's agent or by radio. Information on advance notice requirements is detailed, where available, under the relevant ports entry, and is also available from the ports or terminals.

Fees: Ports and terminals may make a reasonable charge for the use of reception facilities.

General: The responsible authorities must be informed if any waste to be landed is contaminated by pest or disease organisms or where its disposal on land would present a risk to human or animal health or to the environment.

Should any inadequacies be observed in the system, then such information should be reported to the local Marine Office of the Department of Transport, which are listed below.

Marine Offices, Department of Transport:

London District, Central Court, 1 B Knoll Rise, Orpington BR6 0JA. Tel: 0689-890400. Telex: 8812573 dtisurg. Fax: 0689-890446.

Bristol Channel District, Oxford House, Hills Street, Cardiff CF1 2TD. Tel: 0222-29556. Telex: 497663 dtisurg. Fax: 0222-229017.

South and South West of England District, Southwestern House, Canute Road, Southampton SO9 1NP. Tel: 0703-223061. Telex: 47124 dtisurg. Fax: 0703-335818.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations) 1979.

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of
(a) death, other than by accident,
(b) illness where the person or persons concerned
(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;
(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or
(2) the presence on board of
(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease
(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.
(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:
(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority
or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;
(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);
(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;
(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the excepted area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. The Port Health/Medical Officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £2,000.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

(ii) Liquefied gases in bulk?
(k) Any defect in the hull, machinery, or equipment which may:
(i) affect the safe manoeuvrability of the tanker or;
(ii) affect the safety of other vessels in the vicinity of the harbour, or;
(iii) constitute a hazard to the marine environment, or;
(iv) constitute a hazard to persons or property in the vicinity of the harbour.

Any changes to the above which occur before entering the harbour limits or while within those limits must be notified to the Harbour Master.

Check List: A Check List is required by the Pilot and the Harbour Master giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and radio equipment.

State of Safety Certificates and other documents.

Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transport Marine Offices at the following ports: Aberdeen, Avonmouth, Belfast, Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, Hull, Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcastle, Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986.

Ship Movement Reporting in the English Channel and Dover Strait.

From 1st July, 1986, a revised message format is to be used in the voluntary ship movement reporting system for the English Channel and Dover Strait (MAREP). The changes will bring the MAREP system into agreement with the General Principles for Ship Reporting Systems adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also includes amendments to the description of the MAREP system which was given in former Notice No. 1520/81.

Ship Movement Reporting (MAREP):

Introduction:

(1) The objective of the MAREP scheme is to assist the Mariner, to improve safety of navigation in the English Channel and Dover Strait, and to reduce the risk of pollution of the coasts of the United Kingdom and France in this area. Participation in the scheme is voluntary and the International Maritime Organisation (IMO), through its Maritime Safety Committee, has recommended that ships to which the scheme applies should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ships to report-in to a number of designated shore stations in the area of the Traffic Separation Schemes and associated Inshore Traffic Zones off Ushant, off Casquets and in the Dover Strait. Broadcasts will be made by shore stations on a regular basis and as required and will include information on any known situations which could affect the safe navigation of ships in these Traffic Separation Schemes or associated Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are also invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the areas described in paragraph 5 below are invited to participate:
(a) All loaded oil and chemical tankers and loaded gas carriers of 1,600 g.r.t. and over.
(b) Any ship "not under command" or at anchor in a traffic sparation scheme or associated inshore zone.
(c) Any ship "restricted in her ability to manoeuvre", ships engaged in towing, deep draft ships, or ships with a defect in their propulsion or steering.
(d) Any ship with a defect in those navigational aids which could adversely affect her navigation under prevailing conditions.

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

(a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:
  (i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.

(b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:
  (i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.
  (ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.
  (iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a) Ushant	Ouessant Traffic	16 – 11
(b) Casquets	Jobourg Traffic	16 – 11
	Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c) Dover Strait	Gris Nez Traffic	16 – 69
	Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by a forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

APPENDIX:

Ship Reporting System:

System Identifier	MAREP	
Type of Report	POSREP	(Position Report) or
	DEFREP	(Defect Report) or
	CHANGEREP	(Change Report)

Heading	*Text*	*Explanation or Example*
Identification of message	MAREP	
Type of message		POSREP
Identity of ship	ALFA+name of ship plus call sign	
Group date/hour	BRAVO+6 figure (Zulu)	Date of month: 2 figures. Hours and minutes: 4 figures
Position	CHARLIE+Latitude and Longitude	Latitude: 4 figures followed by N or S Longitude: 5 figures followed by E or W
	or CHARLIE+name of port of departure or	If the vessel is sailing from a port in the coastal zone
	DELTA+bearing – distance in relation to a sea mark	Bearing: 3 figures in degrees. Distance: 2 figures in miles from land/sea mark indicated

GARBAGE/WASTE OIL DISPOSAL: *General Information:* Ports and terminals in the United Kingdom must by law provide reception facilities for oily mixtures, chemicals and garbage from ships which need to discharge these substances. The level of provision varies according to the requirements of the ships usually visiting the port, some facilities are only provided to meet specialised needs, whilst facilities for garbage are almost universal. In some ports waste disposal companies are contracted to provide the service, this is often by means of road vehicles. *Advance Notice Requirements:* The use of specialised facilities may demand advance notice and when this is required arrangements are usually made by the ship's agent or by radio. Information on advance notice requirements is detailed, where available, under the relevant ports entry, and is also available from the ports or terminals.

Fees: Ports and terminals may make a reasonable charge for the use of reception facilities.

General: The responsible authorities must be informed if any waste to be landed is contaminated by pest or disease organisms or where its disposal on land would present a risk to human or animal health or to the environment.

Should any inadequacies be observed in the system, then such information should be reported to the local Marine Office of the Department of Transport, which are listed below.

Marine Offices, Department of Transport:

London District, Central Court, 1 B Knoll Rise, Orpington BR6 0JA. Tel: 0689-890400. Telex: 8812573 dtisurg. Fax: 0689-890446.

Bristol Channel District, Oxford House, Hills Street, Cardiff CF1 2TD. Tel: 0222-29556. Telex: 497663 dtisurg. Fax: 0222-229017.

South and South West of England District, Southwestern House, Canute Road, Southampton SO9 1NP. Tel: 0703-223061. Telex: 47124 dtisurg. Fax: 0703-335818.

United Kingdom

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations) 1979.

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these new rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of

(a) death, other than by accident,

(b) illness where the person or persons concerned

(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;

(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of

(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease

(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority

or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);

(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the excepted area of the Council of Europe i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. The Port Health/Medical Officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £2,000.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

INTERNATIONAL CODE OF SIGNALS PRATIQUE MESSAGES

ZS	My vessel is "healthy" and I request Free Pratique	Q
	*I require Health Clearance	QQ
ZT	My Maritime Declaration of Health has negative answers to the six health questions.	
ZU	My Maritime Declaration of Health has a positive answer to question(s)..........(indicated by appropriate number(s)).	
ZV	I believe I have been in an infected area during the last thirty days.	
ZW	I require Port Medical Officer.	
	ZW1 Port Medical Officer will be available at (time indicated).	
ZX	You should make the appropriate Pratique signal.	
ZY	You have Pratique.	
ZZ	You should proceed to anchorage for Health Clearance (at place indicated).	
	ZZ1 Where is the anchorage for Health Clearance?	
	I have a doctor on board.	AL
	Have you a doctor?	AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring Health Clearance. These lights should *only* be about 2 m. (6 ft.) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon *as nearly as possible*.

Health Clearance may be given in three ways:

(a) Wholly in plain language.

(b) Partly in the above signal code, remainder in plain language.

(c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdom.

GENERAL:

Regulations for tankers entering or leaving ports in the United Kingdom:

Application of the Regulations: The British Government have issued the following regulations, which came into force on 15th October, 1981, applicable to tankers of 1,600 g.r.t. and over of any nationality which:

Have a cargo of chemicals, gas or oil in bulk, or;

Have not been declared gas free after having carried such a cargo.

Reports: Before entering the limits of any harbour a report must be made to the Harbour Master of that harbour giving the following information:

(a) Name and call sign.

(b) Country of register.

(c) Length, draft and beam.

(d) Destination. (This may not be the same as the harbour through which the tanker is passing).

(e) ETA at pilot station or harbour limits.

(f) Brief description of cargo and quantity in tonnes.

(g) Is vessel fitted with inert gas system?

(h) If inert gas system is fitted, is it operational?

(i) Have cargo tanks been rendered non-inflammable?

(j) Has a certificate been issued that the vessel complies with the IMO Codes for the Construction and Equipment of Ships carrying:

(i) Dangerous chemicals in bulk, or;

(ii) Liquefied gases in bulk?

(k) Any defect in the hull, machinery, or equipment which may:

(i) affect the safe manoeuvrability of the tanker or;

(ii) affect the safety of other vessels in the vicinity of the harbour, or;

(iii) constitute a hazard to the marine environment, or;

(iv) constitute a hazard to persons or property in the vicinity of the harbour.

Any changes to the above which occur before entering the harbour limits or while within those limits must be notified to the Harbour Master.

Check List: A Check List is required by the Pilot and the Harbour Master giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and radio equipment.

State of Safety Certificates and other documents.

Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transport Marine Offices at the following ports: Aberdeen, Avonmouth, Belfast, Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, Hull, Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcastle, Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986.

Ship Movement Reporting in the English Channel and Dover Strait.

From 1st July, 1986, a revised message format is to be used in the voluntary ship movement reporting system for the English Channel and Dover Strait (MAREP). The changes will bring the MAREP system into agreement with the General Principles for Ship Reporting Systems adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also includes amendments to the description of the MAREP system which was given in former Notice No. 1520/81.

Ship Movement Reporting (MAREP):

Introduction:

(1) The objective of the MAREP scheme is to assist the Mariner, to improve safety of navigation in the English Channel and Dover Strait, and to reduce the risk of pollution of the coasts of the United Kingdom and France in this area. Participation in the scheme is voluntary and the International Maritime Organisation (IMO), through its Maritime Safety Committee, has recommended that ships to which the scheme applies should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ships to report-in to a number of designated shore stations in the area of the Traffic Separation Schemes and associated Inshore Traffic Zones off Ushant, off Casquets and in the Dover Strait. Broadcasts will be made by shore stations on a regular basis and as required and will include information on any known situations which could affect the safe navigation of ships in these Traffic Separation Schemes or associated Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are also invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the areas described in paragraph 5 below are invited to participate:

(a) All loaded oil and chemical tankers and loaded gas carriers of 1,600 g.r.t. and over.

(b) Any ship "not under command" or at anchor in a traffic sparation scheme or associated inshore zone.

(c) Any ship "restricted in her ability to manoeuvre", ships engaged in towing, deep draft ships, or ships with a defect in their propulsion or steering.

(d) Any ship with a defect in those navigational aids which could adversely affect her navigation under prevailing conditions.

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

- (a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:
  - (i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.
- (b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:
  - (i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.
  - (ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.
  - (iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

	Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a)	Ushant	Ouessant Traffic	16 – 11
(b)	Casquets	Jobourg Traffic	16 – 11
		Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c)	Dover Strait	Gris Nez Traffic	16 – 69
		Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by a forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

ABERDEEN: 57.09 N. 02.03 W. (See Plan)

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory except for vessels under 60 m. in length and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has ben handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	*Depth MHWS*
Tidal Harbour	732 m.	9.3 – 10.3 m.
Albert Basin	1,806 m.	8.7 – 13.6 m.
River Dee (Navigable)	913 m.	8.4 – 10.8 m.
River Dee Dock	417 m.	9.3 – 10.8 m.
Upper Dock	463 m.	9.0 – 10.3 m.
Victoria Dock	1,532 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 140 m. long with 9.3 m. at MLWS. Two-storey transit shed. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 205 m. long with 9.9 m. at MLWS. Open quay. 2×6 ton and 1×50 ton electric portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor, outreach of boom 27 m.

No. 3 Waterloo Quay: This is 180 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 228 m. long with 9.9 m. at MLWS. Two transit sheds. 2×8 ton level luffing electric portal cranes capable of handling 11 tons at 25 m. radius. Excellent road connections. Forest products terminal in operation.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	64	11.6	5.5	1,000 tonnes

There is also 1 privately owned slipway and 1 drydock.

SURVEYORS: Lloyd's and Det Norske Veritas.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:

Danish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Faroes Commercial Attache, 150 Market Street, Aberdeen. Tel: 592777.
Finnish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
French Consulate, (Home address) Corrennie, Sauchen. Tel: (03303) 257.
German Consulate, 12 Albert Street, Aberdeen. Tel: 634467.
Icelandic Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Italian Consulate, 6 King Street, Aberdeen. Tel: 640916/647135.
Netherlands Consulate, 16 Union Terrace, Aberdeen. Tel. 639106.
Norwegian Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Swedish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air U.K. operate direct services from Aberdeen to Amsterdam, Bergen, London (Stansted), Stavanger, Edinburgh, Leeds/Bradford, Humberside, Norwich and Teesside.

TIME: BST is GMT plus 1 hour. GMT during Winter months.

HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.

GARBAGE DISPOSAL: The Port Authority provide skips for ship's garbage. These skips are placed in suitable positions all around the harbour and there is no charge for this service. There are numerous private local companies which can supply skips, and the agent can supply details of these.

WASTE OIL DISPOSAL: A collection service by road tankers is in operation. There are several local companies, details of which local agent can supply. There are no barges or shore storage tanks within the port.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory except for vessels under 60 m. in length and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has ben handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	Depth MHWS
Tidal Harbour	732 m.	9.3 – 10.3 m.
Albert Basin	1,806 m.	8.7 – 13.6 m.
River Dee (Navigable)	913 m.	8.4 – 10.8 m.
River Dee Dock	417 m.	9.3 – 10.8 m.
Upper Dock	463 m.	9.0 – 10.3 m.
Victoria Dock	1,532 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 140 m. long with 9.3 m. at MLWS. Two-storey transit shed. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 205 m. long with 9.9 m. at MLWS. Open quay. 2×6 ton and 1×50 ton electric portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor, outreach of boom 27 m.

No. 3 Waterloo Quay: This is 180 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 228 m. long with 9.9 m. at MLWS. Two transit sheds. 2×8 ton level luffing electric portal cranes capable of handling 11 tons at 25 m. radius. Excellent road connections. Forest products terminal in operation.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	64	11.6	5.5	1,000 tonnes

There is also 1 privately owned slipway and 1 drydock.

SURVEYORS: Lloyd's and Det Norske Veritas.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:
Danish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory except for vessels under 60 m. in length and there are 10 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has ben handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	*Depth MHWS*
Tidal Harbour	732 m.	9.3 – 10.3 m.
Albert Basin	1,806 m.	8.7 – 13.6 m.
River Dee (Navigable)	913 m.	8.4 – 10.8 m.
River Dee Dock	417 m.	9.3 – 10.8 m.
Upper Dock	463 m.	9.0 – 10.3 m.
Victoria Dock	1,532 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 140 m. long with 9.3 m. at MLWS. Two-storey transit shed. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 205 m. long with 9.9 m. at MLWS. Open quay. 2×6 ton and 1×50 ton electric portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor, outreach of boom 27 m.

No. 3 Waterloo Quay: This is 180 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 228 m. long with 9.9 m. at MLWS. Two transit sheds. 2×8 ton level luffing electric portal cranes capable of handling 11 tons at 25 m. radius. Excellent road connections. Forest products terminal in operation.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	64	11.6	5.5	1,000 tonnes

There is also 1 privately owned slipway and 1 drydock.

SURVEYORS: Lloyd's and Det Norske Veritas.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.

GARBAGE DISPOSAL: The Port Authority provide skips for ship's garbage. These skips are placed in suitable positions all around the harbour and there is no charge for this service. There are numerous private local companies which can supply skips, and the agent can supply details of these.

WASTE OIL DISPOSAL: A collection service by road tankers is in operation. There are several local companies, details of which local agent can supply. There are no barges or shore storage tanks within the port.

SEAMAN'S CLUBS: Royal National Mission to Deep Sea Fishermen, 5 Palmerston Road, Aberdeen. Tel: 584651.

CURRENCY: U.K. Pound (U.K.£).

AUTHORITY: Aberdeen Harbour Board, 16 Regent Quay, Aberdeen AB9 1SS, United Kingdom. *Tel:* (0224) 592571. *FAX:* (0224) 571507. *Contact:* R.B.Braithwaite, General Manager. Captain B. Atkinson, Harbour Master.

AMLWCH: 53.27 N. 04.20 W.

S.B.M. DISCHARGE FACILITY CEASED OPERATIONS IN 1988. BUOY REMOVED.

ARBROATH: 56.33 N. 02.35 W. (See Plan)

APPROACHES: Arbroath, situated between Dundee and Montrose, has been recently downgraded from a commercial port to a fishing harbour.

There is a bar 400 m. S.E. of the Piers, depth 0.609 m. LWS, which is dangerous in heavy Easterly weather.

MAX. SIZE: Largest vessel, 65 m. length, 4 m. draft.

BERTHING: Outer harbour has an area of 1.5 ha., depth of 4.57 m. at HWST. Length of quayage 451 m.

Inner harbour has an area of 1 ha. Length of quayage 390 m.

FRESH WATER: Available.

FUEL: Diesel available.

AIRPORT: Dundee, 29 km.

REPAIRS: Can be carried out at repair yard.

DRY DOCKS: None. Patent Slipway 122 m. long. Length of cradle 32.6 m. Lifting power 150 tonnes.

POLICE/AMBULANCE/FIRE: Dial 999.

Arbroath Harbour is a station for a R.N.L.I. Lifeboat "Shoreline" and an inshore inflatable boat.

GARBAGE DISPOSAL: A skip is provided free of charge and is sited by the slipway.

WASTE OIL DISPOSAL: No collection service available within the port, but BCS (Waste Oil) Ltd, Tel: Montrose 671267, may collect waste oil. A portable hand pump with a vertical lift of 18 ft. and a filter through which oily bilges can be pumped is available free from Harbour Master. Small quantities of oil may be placed in sealed 5 gallons drums and placed in the skip for disposal.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Tayside Regional Council, Harbour Office, Arbroath Harbour, Tayside, DD11 1PD. *Tel:* Arbroath (0241) 72166. *Contact:* Captain G.D. Easton, Harbour Master.

ARDROSSAN: 55.38 N. 04.49 W. (See Plan)

DOCUMENTS: Normal documents required:
Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.

PILOTAGE: Pilotage compulsory for vessels over 80 m. LOA. Pilotage operated by Clyde Pilotage Authority. Pilot boards off Little Cumbrae Island. Pilot boat on VHF Channels 16 and 14.

24 hours notice required and amendment if ETA changes.

ANCHORAGE: In 12 to 15 fathoms 1 mile S.W. of breakwater.

RESTRICTIONS: 3 red lights vertically day and night above Port Control Tower (see "Plan") indicates "Port Closed".

MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.

HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: VHF Channels 12, 14, and 16. Radio telephone via Portpatrick.

TUGS: On application to Clyde Tug Owners.

BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.

STEVEDORES: Orders to be given by 1130 hrs. previous day.

MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospitals being at Irvine, 6 miles and Kilmarnock 16 miles.

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available continually at all berths.

FUEL: Marine oils available by road tanker.

FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.

CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: C.A. Mair (Shipping) Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 605284.

REPAIRS: Limited repair facilities.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CERTIFICATES: Following Certificates are requested: Load Line, Safety Radio, Safety Equipment, Safety Construction, Derat, and Current Trinity House Light Bills.

CUSTOMS ALLOWANCES: Standard U.K. allowances.

REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.

AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.

TIME: BST, that is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: 1st and 2nd January; Easter Monday; May Day, First Monday in May; Third Monday in July; First Monday in October; Christmas Day and Boxing Day. Cargo work may be available on certain holidays by special arrangement.

POLICE/AMBULANCE/FIRE: Police Tel. Saltcoats 63966; Ambulance, Fire: Ask telephone operator.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service available. Can be arranged by ship's agent through Ardrossan Harbour Co. Ltd. Charges on application (1991 cost £45 per collection).

WASTE OIL DISPOSAL: No shore tanks/barges or special berth available. The following companies operate a collection service:
Surface Control Ltd., Lloyd Street, Rutherglen.
Ailsa Industrial Services, 37 Clark Street, Paisley.
Mitchell Thomson Ltd., Robslee Drive, Thornliebank.
Amicoil, Braybrooke Chemical Services, Uddingston.
Kelvin Tank Services, Twechar Works, Kilsyth.
Tank Cleaners (Glasgow) Ltd., Robslee Drive, Giffnock, Glasgow G46 7TY.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (UK£). U.S.$ 1.00 = U.K.£0.5789 (30.5.91).

DEVELOPMENTS: Roll-on/Roll-off berth for specialised traffic.

AUTHORITY: Ardrossan Harbour Company Limited, Harbour Office, Ardrossan, Ayrshire, KA22 8DB, United Kingdom. *Tel:* (0294) 63972. *Telex:* 777954. *FAX:* (0294) 605305. *Contact:* Captain W.D. Gillespie, Managing Director and Harbour Master.

AYR: 55.28 N. 04.38 W. (See Plan)
TROON: 55.33 N. 04.40 W. (See Plan)

LOCATION: *Ayr:* On the West coast of Scotland, at the mouth of the River Ayr.
Troon: 14.5 km. (9 miles) North along the coast from Ayr.

DOCUMENTS:
Customs Require:
2 copies Form XS1.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Passenger List.
Crew List.
Port Health Require:
Derat Certificate.
Agents Require:
1 copy Form XS4.
Bills of Lading.
2 copies Manifest.

PILOTAGE: Compulsory for vessels over 65 m. LOA. Pilot boards off Bar Light Buoy. 24 hours' notice of ETA required for Pilot via Agent or Dock Authority. Ayr Pilots listen on Channel 16 and work on Channel 14 VHF. VHF watch hours: 24 hours, 7 days a week.

ANCHORAGE: To Pilot's advice. Easterly winds Ayr Bay, Westerly gales anchor East side of Arran Island.

RESTRICTIONS: Draft restriction at LW. Enter on Pilot's advice.

MAX. SIZE: Dock: Length 95 m. Max. draft 6.00 m. River (Ayr): Length depending on berth. Max. draft 6.20 m. Max. length for turning 110 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: VHF radio only, operating on Channel 14 and listening on Channel 16.

TUGS: 1 tug of 5 tonnes bollard pull.

RADAR: No radar station.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Depth of Water* (m.)	*Maximum Size of Vessel* *Length* (m.)	*Beam* (m.)	*Draft* (m.)
Ayr:					
Tidal	610	6.0	95	18.0	5.8
River (North)	549	6.2	—	—	6.2
River (South)	488				
Troon:					
Tidal	366	6.0	55	12.2	—
Outer	1,372	7.0	146	No restriction	6.2

Storage and Warehousing Facilities: Open storage space totalling 2.7 hectares.

Cranage and Mechanical Handling: 2 mobile cranes 3 tonnes; 1 mobile crane 35 tonnes, 8 mechanical shovels from 0.5 to 5.0 cu.m. capacity. 2 conveyors loading speed 300 – 650 tonnes/p.h. There is also a fixed coaling appliance capable of loading 600 tonnes/p.h. 2 forklifts 2.7 tonnes, 1 forklift 8.2 tonnes, 2 forklifts 5 tonnes, 1 forklift 4 tonnes.

STEVEDORES: 24 hours notice of ETA should be given to stevedores.
Port Working Hours: Monday-Thursday 0800 – 1700 hrs., Friday 0800 – 1600 hrs. Overtime by arrangement.

Saturday 0600 – 1200 hrs. Sunday 0800 – 1700 hrs. Any other hours by arrangement.

MEDICAL: Hospital facilities nearby in town.

DENSITY: Varies according to weather.

FRESH WATER: Available at all berths.

FUEL: All grades available, 24 hours notice.

REPAIRS: Most engine and deck repairs available.

DRY DOCKS: Two at Troon, Ailsa–Perth Ltd.
No. 1 Dock: 85.3 m. long, 11 m. wide, 3.5 m. depth over sill.
No. 2 Dock: 140.4 m. long, 17 m. wide, 4.7 m. depth over sill.

GANGWAY/DECK WATCHMEN: Deck watchman required; may be supplied by arrangement with stevedores.

OPENING/CLOSING HATCHES: Performed by ship's crew.

AIRPORT: Glasgow.

Air UK flights from Edinburgh to Aberdeen, Amsterdam, Leeds/ Bradford, London (Gatwick and Stansted) and Norwich.

TIME: GMT plus 1 hour, reverting to GMT in Winter months.

HOLIDAYS: Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999, and ask for service required.

TELEPHONES: No connection on board vessel.

SERVICES: Special arrangements can be made for tank washing and compass adjusting through Glasgow.

SHORE LEAVE: No restrictions on shore leave.

IDENTIFICATION CARDS: Seamen's identity cards should be carried.

AUTHORITY: Associated British Ports – Ayr & Troon, Port Office, Ayr KA8 8AH, United Kingdom. *Tel:* (0292) 281687. *Telex:* 778853 Kenny G. *FAX:* (0292) 287787. *Cables:* Dainnex Ayr. *Contact:* P.J.Condliffe, Port Manager. Captain N.Brown, Harbour Master.

BANGOR: 54.39 N. 05.40 W. (See Plan)

PORT LIMITS: A line drawn from Wilson's Point to Luke's Point.

DOCUMENTS: Standard U.K. documentation.

PILOTAGE: Not compulsory but advisable if unfamiliar with the area. Pilot may be obtained from the pilot station at Carrickfergus after call on VHF Channel 16.

ANCHORAGES: 2 cables off North Breakwater or in Ballyholme Bay with offshore winds.

RESTRICTIONS: Due to limited amount of berthing facilities, permission should be sought from the Harbour Master before entering the Harbour.
MAX. SIZE: LOA 70 m. Draft 4.0 m. at HWOST. Vessels of up to 75 m. in length are able to berth at the New Centre Pier, which is a steel piled structure with a depth alongside of 2.9 m. at LW.
HEALTH: Standard regulations apply. Vessels should inform Port Health Officer Belfast of any sickness on board.
VHF: A listening watch is kept on VHF Channel 11 throughout 24 hours.
TUGS: Can be ordered from Belfast if required. Work boat of 28 h.p. available.
BERTHING: See "Max. Size" and "Developments".
BRIDGES: None.
STEVEDORES: None locally.
MEDICAL: Full hospital facilities available.
TANKERS: No facilities.
FRESH WATER: Available on Central Pier.
FUEL: Petrol and diesel available from tank on pier or by road tanker.
CONSULS: Nearest at Belfast.
REPAIRS: Minor repairs only.
SURVEYORS: Available from Belfast.
GANGWAY/DECK WATCHMEN: Not usually available.
HATCHES: Opening/closing done by ship's crew.
CUSTOMS ALLOWANCES: U.K. Regulations apply.
CARGO GEAR: The harbour's 5 tonne crawler crane has been removed, and in future vessels will have to use their own cargo gear, or hire one of the available mobile road cranes in the district.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Aldergrove Airport, or Belfast City Airport (12 miles).
TIME: GMT plus 1 hour from late March – late October. GMT for rest of year.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: Cannot be placed on board. Several in vicinity of berth.
GARBAGE DISPOSAL: Bins available in waste compound and collection service is available.
WASTE OIL DISPOSAL: 300 gallons tank available. Arrangements should be made for large quantities.
SEAMAN'S CLUBS: None. All town facilities within walking distance.
SHORE LEAVE: No restrictions.
DELAYS: Berthing times will depend on the arrival drafts and fishing traffic.
DEVELOPMENTS: The new North Breakwater runs in a Northwesterly direction with seaward side built of S.H.E.D. units, and the sheltered S.W. side of corrugated steel piling, where safe berthing is available over a distance of 95 m. with a minimum depth of 3.7 m. at LW.

A 600 berth marina has been constructed in the inner harbour, where the minimum depth is approximately 2.0 m. at LW.
AUTHORITY: North Down Borough Council, Town Hall, Castle Grounds, Bangor, Co. Down, Northern Ireland BT20 4BT. *Tel:* (0247) 270371. *Contact:* Andrew Jaggers, Harbour Manager, Bangor Marina, Bangor BT20 5ED. Tel: (0247) 453297. Fax: (0247) 453450.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan)

PORT LIMITS: The seaward boundaries of the port extend from Scarth Channel in the North to Lightning Knoll Buoy in the South (Position – Lat. 53° 59.8′ N., Long. 03° 14.2′ W.).
DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.

PILOTAGE: Pilot boards at Lightning Knoll Buoy, using Pilot cutter, usually 2 or 3 hours before high water.

Barrow Pilot Vessel on VHF Channels 16 and 12. Vessels bound for Barrow should communicate their ETA at the Pilot Station through their local Agents or to the Harbour Master Barrow, at least 12 hours before arrival.
ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 70 km. away, for shelter.
RESTRICTIONS: A new dock entrance was constructed in 1991. The new entrance allows access from 2.5 hours before H.W. until 1 hour after H.W. The width of the new entrance is 36.6 m. with a sill 3.0 m. below L.A.T. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the New Ramsden Dock entrance sill can range from 13.00 m. at highest high water springs to 9.4 m. at high water neaps.
MAX. SIZE: Length approx. 200 m. Beam 35 m. (approx.). Draft according to tide.
HEALTH: Vessels arriving from abroad are given Pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.
RADIO: Local stations: Anglesey Radio, Port Patrick Radio.
VHF: Port VHF service. Call sign 'Ramsden Dock Radio'. Channel 16 (156.8 MHz) Calling and Safety. Channel 12 (156.6 MHz) Port Operations.
TUGS: Liverpool tugs available on request. Notice required.
BERTHING:

Docks	*Water area in Hectares*	*Width of entrance*
Ramsden	22.5	30.48 m.
Buccleuch	13.0	30.48 m.
Devonshire	5.0	24.4 m.

Walney Channel Deep-water Berth: 140 m.×25 m.×8 m. depth.

Ramsden includes: Ramsden Dock Basin with 3 berths with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.
DENSITY: 1015 to 1025.
FRESH WATER: Available from quayside hydrants.
FUEL: Can be obtained from bunkering facility at No. 3 Berth, Ramsden Dock Basin.
CONSULS: Netherlands, Portugal, Spain (Vice-Consul) represented by James Fisher & Sons PLC. Tel. Barrow-in-Furness 22323.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Handled by ship's crew.
AIRPORT: Manchester Airport.
TIME: As for other UK ports.
HOLIDAYS: As for other ports in England.
POLICE/AMBULANCE/FIRE: In emergency Tel. 999; for enquiries and other calls – Police: Barrow 824532; Ambulance: Carlisle (0228) 20345; Fire Service: Barrow 821363.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Seaman's Book or Passport required by non-British crew.
GARBAGE DISPOSAL: Garbage skips will be provided by waste disposal contractors on request.
WASTE OIL DISPOSAL: Waste oil may be connected by waste disposal contractors on request.
SEAMAN'S CLUBS: None.
DEVELOPMENTS: Walney Channel and the approaches to Barrow were dredged during 1991 to provide deeper access for the new dock entrance.
AUTHORITY: Associated British Ports – Barrow and Silloth, Port Office, Ramsden Dock Road, Barrow-in-Furness, Cumbria, LA14 2TW. *Tel:* (0229) 822911. *FAX:* (0229) 835822. *Contact:* Captain J.W. Green, Port Manager and Harbour Master.

BARRY: 51.24 N. 03.16 W. (See Plan)

DOCUMENTS: Required for arrival:

C.142	2 copies	Crew Declaration
C.14	3 copies	Stores Declaration
C.13	2 copies	General Declaration (completed by Agent)
C.16	2 copies	Cargo Inward Declaration
C.74	1 copy	Master's Authority (Agent's complete)
C.1320	2 copies	Cargo in un-registered spaces.

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.
PILOTAGE: Telegraphic address of pilot station: A.B.P. Pilots, Pier Head, Barry Docks. Amount of advance notice of ETA required: 24 hours. Final confirmation to be given by VHF or R/T when within 2 hours of pilot station. VHF channel or frequency to be used when contacting pilot boat or pilot station: VHF Channel 16 thence working Channels 6, 8, 10, 11, 22.

Pilot boat: Motor launch black hull with "Pilot" in white on same and white superstructure.

Exact area where pilot boat is located normally between Nash Point and Breaksea Lanby Buoy. Smaller vessels may be boarded in Barry Roads.
ANCHORAGE: Barry Roads, 10 fathoms, safe anchorage. Large vessels should anchor West of Breaksea Lanby Buoy. Small vessels 0.75 mile S.E. of Barry Dock Entrance.
RESTRICTIONS: Entrance only 4 hours before HW to 4 hours after HW.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Barry Docks Radio, Channels 10 and 11.
VHF: Channels 16, 10, 11 and 22.
TUGS: Join vessel at Barry Roads. Tug's or ship's lines utilised.
BERTHING:

Dock	*Quay Length (Total)* (m.)	*Normal Depth of Water* (m.)	*Max. Size of Vessel* *Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Max. d.w.t.*
No. 1 Dock	2,894	9.8	178	23	9.1	23,000
No. 2 Dock	(9,490 ft.)	9.8	178	23	9.1	23,000
No. 3 Dock Basin		Semi-tidal	178	23	9.1	23,000

Vessels up to 22.9 m. beam can be accepted on favourable tides. Max. 23,000 d.w.t. with draft of 9.1 m.

Storage and Warehousing Facilities: 3,700 sq.m. transit shed and 1,860 sq.m. temperature controlled holding store within dock basin. No. 2 Dock provides a further 2 transit sheds totalling 7,413 sq.m. Additional covered storage within the port area comprises 4 sheds totalling 7,686 sq.m. (82,650 sq. ft.). Ample open storage space is also available.

Cranage and Mechanical Handling: Basin: 4 × 6 tonne. No. 2 dock South Side: 4 × 6 tonne and 2 × 5 tonne. Berth No. 31: 5 × 10/11.5 tonne grabbing cranes.

Specialised Facilities:

(i) One of the largest tank storage facilities in Britain with tank capacity of more than 200,000 cu.m. suitable for oil, chemicals, and natural gas.

(ii) The port is licensed to handle explosives both in dock and at specially approved anchorages.

(iii) A bulk loading conveyor installed at No. 2 Dock is capable of handling coal and coke at a speed of 450 tonnes per hour and is served by road and rail, with stocking areas.

(iv) Windward Terminal: Banana Terminal used by Geest Industries. 6,400 sq.m. of storage area (temperature controlled). 4 × 6 ton quay cranes. Terminal can accommodate vessels of 10,000 d.w.t.

BRIDGES: Bridge swung to vessel's requirements.

STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.

Port Working Hours: Monday – Thursday: 0700 – 1630 hrs. Friday 0700 – 1530 hrs.

Daily and weekend overtime available and shiftwork can also be arranged on request.

MEDICAL: Hospital facilities available. Advance notice desirable.

TANKERS: 6 tanker berths, maximum draft 28 ft.

DENSITY: Density 1020.

FRESH WATER: 15/20 t.p.h. per hose.

FUEL: By barge or road transport.

CONSULS: None. Many located at Cardiff 8 miles East of Barry.

REPAIRS: All types of repair undertaken by private ship repairers.

DRY DOCKS: One dry dock, length 286.5 m. and width 23.9 m. – not in use.

GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.

OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.

CUSTOMS ALLOWANCES: Refer to Customs. Tel: Barry (0446) 420240.

REPATRIATION: All facilities available.

AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.

TIME: GMT, except late March – late October when British Summertime (GMT plus 1 hour) is in operation.

HOLIDAYS: Bank Holidays. Arrangements made to work if essential.

POLICE/AMBULANCE/FIRE: Call operator by dialling 999.

TELEPHONES: At main berths.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.

IDENTIFICATION CARDS: Not needed by Port Authority.

AUTHORITY: Associated British Ports, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH. *Tel:* (0222) 471311. *Telex:* 498542. *FAX:* (0222) 471100. *Contact:* Mr. B. J. Harding, Port Manager, Cardiff and Barry. N.G. Glenton, Operations Manager. Captain R.S. Grubb, Dock and Harbour Master.

BELFAST: 54.36 N. 05.56 W. (See Plan)

DOCUMENTS:

1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.

PILOTAGE: Pilotage compulsory for vessels over 100 m. LOA in the Outer Harbour and vessels over 75 m. in the Inner Harbour. Pilot station is situated at Belfast. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 2 hours. Pilots may be ordered through:

Port Operations Station, Tel. Belfast 781143 or VHF Channel 12.

Belfast Harbour Office, Tel. Belfast 234422 Ext. 231, 0900 – 1700 hrs. Monday-Friday.

There are two motor launches servicing Pilots. "Pilot Boat I" is 33 ft. long and "Mabel Helen" is 46 ft. 8 in. long. Both vessels are painted black with word Pilot in white letters on each side.

Pilot launches may be contacted on VHF Channel 12.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.

ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.

RESTRICTIONS: Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson Wharf – 26 ft. below datum.

Musgrave Channel, 24 ft. below datum.

Herdman Channel, 21 ft. below datum.

MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing" and "Tankers".

HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorised officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, Free Pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify "Portelth Belfast" by radio in advance.

Also see "Health – All Ports" before first U.K. port.

RADIO: The best station for messages, cables, etc., is Port Patrick, call signal GPK.

VHF: Belfast Port Operation and Information Service is situated at Port Control Office, located North of Richardson's Wharf in Herdman Channel. A continuous watch is maintained on VHF on Channel 12. Call sign is Belfast Harbour Radio.

TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. Belfast 743278. They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs normally meet inward bound vessels in vicinity of No. 20 beacon. Use of tugs' lines is optional. Charge for use of each tug line is £15.

BERTHING: The following berths are equipped for handling containers or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Victoria Terminal 1 Ro/Ro	24
Victoria Terminal 2 Ro/Ro	24
Donegall Quay 2 (1×35 tonne Scotch derrick)	18
Donegall Quay 4	18
Donegall Quay 5 (No cranes)	18
Ballast Quay (1×25 tonne derrick crane) also Ro/Ro and 600 ton heavy Ro/Ro pad	18
York Dock A (No cranes)	24
York Dock 1 and 2 (New self-contained container terminal, 2×30 ton transporter cranes)	24
Herdman Channel West (2×30 tonne transporter cranes)	18
Gotto Wharf (2×30 tonne transporter cranes)	21
Stormont Wharf 2 (200 tonne cantilever crane)	28
Pollock Dock 7 (1×35 tonne derrick crane)	28

Numerous general cargo berths and cranage from 3 – 15 tonnes.

Gatx Terminals Ltd. have constructed a bulk liquid terminal for the storage of petroleum, chemical products, etc. Special tankers ship liquid gas to the storage installation of Calor Kosangas (Northern Ireland) Ltd. and Flogas at Musgrave Channel.

STEVEDORES: Two schooling times per day for stevedoring gangs – 0800 and 1300 hrs. Gangs for all week-end work are schooled at 1300 hrs. on Fridays.

MEDICAL: All kinds of medical treatment are available. Agent should be given as much notice as possible for arrangements to be made.

TANKERS: Tankers have to observe (i) Chamber of Shipping Tanker Safety Code. (ii) The Merchant Shipping (Tankers) (EEC requirements) Regulations 1981. (iii) The Dangerous Substances in Harbour Areas Regulations (Northern Ireland) 1991.

6,000 tons of tank washings can be processed at B.P. Oil Berth No. 4.

Tanker Berths: Oil Berth No. 4 – 35 ft. Oil Berth No. 1 – 28 ft. Oil Berth No. 2 – 28 ft. Oil Berth No. 3 – 28 ft.

DENSITY: Average density of water in Inner Harbour is about 1012, and Outer Harbour is about 1024.

FRESH WATER: Available at almost all berths. Delivery is by hose at a rate of approx. 30 t.p.h. Arrangements can be made through Dept. of Environment (Water Services Division). Tel. 746581.

FUEL: All grades of fuel oil are available by road tanker only. 48 hours' advance notice of requirements should be given.

FIRE PRECAUTIONS: Special precautions for vessels carrying petroleum, explosives, calcium carbide and dangerous goods are set out in the appropriate by-laws. A copy of general port fire notice, delivered to all ships on arrival.

Also see "Tankers".

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Belfast Dry Dock, length of floor 1,100 ft. breadth of floor 167 ft., breadth of entrance 165 ft., level of sill 26 ft. 6 in. below datum.

Harland and Wolff Building Dock, length of floor 1,825 ft., breadth of floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Two other dry docks available.

GANGWAY/DECK WATCHMEN: Normally, a member of ship's company acts as watchman. Shore watchmen may be obtained through Agent.

OPENING/CLOSING HATCHES: Conventional beams and hatches and slab hatches are opened and closed by stevedores. MacGregor or patent steel hatches are worked by ship's personnel. Ship's personnel required to work all types of hatches at grain silos.

CERTIFICATES: Register. Radio Certificate. Load Line Certificate. Safety Equipment Certificate. Safety Construction Certificate. Light Bills. Passenger Certificate if applicable. Chain Register. Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.

REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.

AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast Harbour Airport has daily flights to several U.K. cities.

Air UK flights to Leeds/Bradford.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast 222222; Ambulance Belfast 241212; Harbour Police Belfast 232235; *or* through Belfast Harbour Radio on VHF Channel 12.

TELEPHONE: Telephone can be placed on board at certain berths.

SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.

SHORE LEAVE: Normally no restrictions on shore leave.

IDENTIFICATION CARDS: Seamen's identity cards required.

GARBAGE DISPOSAL: Services available through local agent.

WASTE OIL DISPOSAL: Service available through local agent.

SEAMAN'S CLUBS: Stella Maris (Residential), and Flying Angel. All services and facilities available.

AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 234422. *Telex:* 74204. *FAX:* (0232) 242663. *Contact:* Captain Hugh O'Byrne, Harbour Master. Mr.G.Irwin, Chief Executive. Mr.J.F.McNamee, Chief Engineer. Mr.W.Wilson, Port Services Manager. Capt. D.R.Hawkins, Port Operations.

BLYTH: 55.08 N. 01.30 W. (See Plan)

DOCUMENTS:

Certificate of Registry.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment.
Safety Construction.
Light Dues Payments.
Customs Forms C13 and C142.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by VHF Channels 12 and 16 when approximately 2 hours off port. Pilot boats have black hull with white superstructure with word "Pilot" in black letters on the superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.

RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.

MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio, VHF Channel 26.

VHF: Details of movements within port given over VHF from Port Control Office (Tel: (0670)-352678). Calling Channel 16, working Channel 12.

TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.

BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (0670) 352066. ETA requested day before arrival.

MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.

DENSITY: Sea water. Fresh water effect negligible.

FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.

FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grade – gas oil.

CONSULS: (At Newcastle-upon-Tyne) Denmark, Norway, Netherlands.

REPAIRS: All types of deck and engine repairs possible.

GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit. Wine up to 0.75 litres. Spirits up to 0.375 litres.

REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.

AIRPORT: 24 km. Served by regular airlines.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.

POLICE/AMBULANCE/FIRE: Tel: 999.

TELEPHONES: Can be fixed aboard by arrangement.

IDENTIFICATION CARDS: Seaman's Book or Passport desirable.

GARBAGE DISPOSAL: Disposal skips are provided on BHC general cargo quays, for ships domestic garbage. Arrangements for other garbage should be made direct by agents or through the port authority for a contractor. As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: 0670 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: 091-4106621).

WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

Cleanaway Ltd., Waste Services Division, Service Centre, Meadowfield, Ponteland, Newcastle upon Tyne, NE20 9SN. Tel: 0661 72640.

Hargreaves Clearwaste Ltd. Environment & Construction Materials Division, Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham DH3 2QN. Tel: 091 4106621.

Effluents Services Ltd., 140 Moss Lane, Macclesfield, Cheshire, SK11 7YT. Tel: 0625 29666.

SEAMAN'S CLUBS: None.

CURRENCY: U.K. Pound (U.K.£).

AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *FAX:* (0670) 368540, 355169. *Contact:* P. J. Camp, General Manager. R.G.Elwen, Secretary.

BOSTON: 52.58 N. 00.02 W.

DOCUMENTS: Usual U.K. requirements.

PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards at Clay Hole from launch in the approaches to River Witham or at Boston Roads (non-compulsory). Pilot Office Tel: 0205-362114.

ANCHORAGES: Vessels awaiting tide anchor to South of Buoy No. 9 in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.

Lock Dimensions: Length 91.4 m., width 13.6 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m. Larger vessels may be accepted, tides permitting.

HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-363271.

VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 2.5 hours before till 1.5 hours after HW.

TUGS: 1 tug available, 7 tons bollard pull.

BERTHING: *Boston Dock:*

North Quay: Length 251 m.
South Quay: Length 257 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.

CRANES: At Boston Dock:

4×6 tonnes electric portal cranes.
1×25 tonnes Scotch Derrick.
4 mobile cranes.
1 Manitowic heavy lift mobile crane (up to 74 tons).
At Riverside Quay: 1×7.5 tonnes electric portal crane.
Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos, each capable of storing 5,000 tonnes.

(i) King's Lynn Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. Mobile shiploaders available.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (2.1 ha.) with 2×35 tonne top lift trucks available.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.
MEDICAL: Doctors, dentists and hospital available locally.
FRESH WATER: Available.
FUEL: Available from road tankers. Contact Agents to make arrangements.
CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.
REPAIRS: Can be undertaken by local companies. Divers available.
CUSTOMS ALLOWANCES: Usual U.K. Regulations. H.M. Customs, Tel: 0205-363070.
TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).
POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.
GARBAGE DISPOSAL: MARPOL skips situated on dock. Larger quantities by arrangement with the port.
WASTE OIL DISPOSAL: By arrangement with Orcol (Tel: 0532-533571) or Hall & Campy, Nottingham (Tel: 0602-780321).
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5780 (8.4.91).
AUTHORITY: Port of Boston Ltd., Dock Office, Boston PE21 6BN. *Tel:* 0205-365571. *Telex:* 378114 Bosdock G. *FAX:* 0205-310126. *Cables:* Neptune, Boston. *Contact:* Captain B.D.C.Franklin, Harbour Master. Tel: 0205-362328 (direct). S.Aliwell, Port Manager.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Exxon Chemical Olefins Inc. and Shell U.K. Exploration and Production, as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Exxon Chemical Olefins Inc. and exports ethylene in ships between 4,000 cu.m. and 12,000 cu.m. capacity.

The Western jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m. Ships of less than 15,000 cu.m. may be accommodated by special arrangement provided their moorings are suitable and their manifolds are compatible with the loading arm envelope.

Each jetty carries out loading operations independently, while the co-ordination and administration of marine activities is the responsibility of the Braefoot Bay Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Exxon Chemical Olefins Inc. with direct responsibility for the Management of all ship-related activities at Braefoot Bay.

The products from Mossmorran are Ethylene, Propane, Butane and Natural Gasoline, of which the Ethylene is manufactured and handled over the Eastern jetty of the Terminal by Exxon Chemical Olefins Inc., while the other products are handled by Shell U.K. Exploration and Production over the Western jetty of the Terminal.

DOCUMENTS: See "Leith".

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports Authority and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 16 and 71, with working Channels 12 and 20.

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are licensed by the Forth Pilotage Authority and must be ordered for both inward and outward passages through the ship's agent.

Vessels bound for the Forth must give 4 hours' notice of ETA and should confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

MAX. SIZE: Western jetty: Depth 15.0 m. Eastern jetty: Depth 10.0 m. Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

Pilotage Exemption Certificates are not acceptable at Braefoot Bay Marine Terminal.

(b) (i) *Vessels are not allowed to berth at or sail from the Braefoot Bay jetties if the mean wind speed exceeds 27 knots.*
(ii) *Vessels will not be accepted for berthing at Braefoot Bay, and departures will not be authorised unless visibility is at least half a nautical mile at the Braefoot Bay jetties.*

(c) In accordance with the agreement of the Terminal and Forth Ports Authority, the following directions for Navigation apply or as advised by the Terminal from time to time:
(i) All vessels bound for the Western (Shell) jetty or vessels of greater than 145 m. overall length bound for the Eastern (Exxon) jetty shall only approach the Terminal through the Western Channel of Mortimers Deep. Vessels will berth port side alongside on the flood tide with timing dependent on tidal range.
(ii) Vessels of less than 145 m. overall length bound for the Eastern (Exxon) jetty may approach the Terminal via the Eastern or Western Channel of Mortimers Deep. Those vessels approaching from the East will berth starboard side alongside on the ebb tide whilst vessels approaching from the West berth port side alongside on the flood tide. Berthing times are dependent on tidal range.
(iii) It is a requirement of the Forth Ports Authority that all vessels departing from the Terminal shall do so through the Eastern Channel from Mortimers Deep.

Vessels berthed starboard side to the Eastern jetty are required to turn off the berth when departing.

Also see "Regulations".

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message, excluding items (l) to (s) will be sent to Natural Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may affect cargo operations or manoeuvrability.
(b) Confirm vessel has full P & I Club cover.
(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters are operational and fully submerged.
(d) Last port of call.
(e) Last 3 cargoes.
(f) Amount and grades of any cargo required.
(g) Anticipated maximum loading rate.
(h) Anticipated loading time
(i) Arrival drafts.
(j) Sailing drafts.
(k) Confirm that only clean segregated ballast will be discharged at the Terminal.
(l) Confirm that remotely-operated valves have been operated through a complete open/closed cycle to ensure proper functioning and ascertain valve type (Ball, Gate, etc.) and actual valve closing time.
N.B. Remote valves must close within 30 seconds of operation but so that the final 20% of valve movement takes at least 6 seconds.
(m) Gas detection system is operational and set (high or low sensors). Calibrated for the cargo to be loaded.
(n) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.
(o) Ensure operation of the Tank high level and pressure alarms and interlocks.
(p) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be loaded.
(q) Confirm fire-fighting equipment including water spray system fully operational and tested. Ship's fire main to be pressurised whilst alongside at Terminal.
(r) Manifold configuration and presentation (forward to aft), e.g. LVVL. It is most important that the specific duty (Ethylene, Propane, etc., liquid or vapour service) of each presentation flange is known to the Terminal at least 24 hours prior to the ship's arrival. Delays consequential on non-compliance with this requirement will be for ship's account.
(s) If loading more than one grade, confirm that both can be loaded concurrently.
(t) For first time callers – Manifold configuration.
  (i) Size rating and standard of connecting flanges, e.g. 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300.
  (ii) Distance of manifold centre line from bow.
  (iii) Height above uppermost continuous deck.
  (iv) Distance of manifold from ship's side.
  (v) Maximum loaded draft.
  (vi) Minimum draft whilst at berth.
  (vii) Distance from face to first retaining bracket (maximum acceptable is 1,200 mm.).
  (viii) Height of manifold above keel.
  (ix) Distance between manifold flange centres.
(u) Details of *any defects in vessel or equipment* affecting cargo operations or manoeuvrability or confirmation that there are no known defects.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Do not forget to send this message otherwise you may be delayed outside port limits.

Telex: A telex machine is sited at Braefoot Bay. The number is 728245 MOSHIP G and is operable 24 hours per day. This telex number should be used when relaying ETA, pre-arrival or other information related to expected loading. Otherwise messages should be transmitted through the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The Fax number is 0383-892100.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.
REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.
AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast Harbour Airport has daily flights to several U.K. cities.

Air UK flights to Leeds/Bradford.

TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.

As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: 0670 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: 091-4106621).
WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

Cleanaway Ltd., Waste Services Division, Service Centre, Meadowfield, Ponteland, Newcastle upon Tyne, NE20 9SN. Tel: 0661 72640.

Hargreaves Clearwaste Ltd. Environment & Construction Materials Division, Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham DH3 2QN. Tel: 091 4106621.

Effluents Services Ltd., 140 Moss Lane, Macclesfield, Cheshire, SK11 7YT. Tel: 0625 29666.

SEAMAN'S CLUBS: None.
CURRENCY: U.K. Pound (U.K.£).
AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *FAX:* (0670) 368540, 355169. *Contact:* P. J. Camp, General Manager. R.G.Elwen, Secretary.

BOSTON: 52.58 N. 00.02 W.

DOCUMENTS: Usual U.K. requirements.
PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards at Clay Hole from launch in the approaches to River Witham or at Boston Roads (non-compulsory). Pilot Office Tel: 0205-362114.
ANCHORAGES: Vessels awaiting tide anchor to South of Buoy No. 9 in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.
Lock Dimensions: Length 91.4 m., width 13.6 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m. Larger vessels may be accepted, tides permitting.
HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-363271.
VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 2.5 hours before till 1.5 hours after HW.
TUGS: 1 tug available, 7 tons bollard pull.
BERTHING: *Boston Dock:*

North Quay: Length 251 m.
South Quay: Length 257 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.
CRANES: At Boston Dock:

4×6 tonnes electric portal cranes.
1×25 tonnes Scotch Derrick.
4 mobile cranes.
1 Manitowic heavy lift mobile crane (up to 74 tons).
At Riverside Quay: 1×7.5 tonnes electric portal crane.
Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos, each capable of storing 5,000 tonnes.

(i) King's Lynn Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. Mobile shiploaders available.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (2.1 ha.) with 2×35 tonne top lift trucks available.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.
MEDICAL: Doctors, dentists and hospital available locally.
FRESH WATER: Available.
FUEL: Available from road tankers. Contact Agents to make arrangements.
CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.
REPAIRS: Can be undertaken by local companies. Divers available.
CUSTOMS ALLOWANCES: Usual U.K. Regulations. H.M. Customs, Tel: 0205-363070.
TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).
POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.
GARBAGE DISPOSAL: MARPOL skips situated on dock. Larger quantities by arrangement with the port.
WASTE OIL DISPOSAL: By arrangement with Orcol (Tel: 0532-533571) or Hall & Campy, Nottingham (Tel: 0602-780321).
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5780 (8.4.91).

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Exxon Chemical Olefins Inc. and Shell U.K. Exploration and Production, as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Exxon Chemical Olefins Inc. and exports ethylene in ships between 4,000 cu.m. and 12,000 cu.m. capacity.

The Western jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m. Ships of less than 15,000 cu.m. may be accommodated by special arrangement provided their moorings are suitable and their manifolds are compatible with the loading arm envelope.

Each jetty carries out loading operations independently, while the co-ordination and administration of marine activities is the responsibility of the Braefoot Bay Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Exxon Chemical Olefins Inc. with direct responsibility for the Management of all ship-related activities at Braefoot Bay.

The products from Mossmorran are Ethylene, Propane, Butane and Natural Gasoline, of which the Ethylene is manufactured and handled over the Eastern jetty of the Terminal by Exxon Chemical Olefins Inc., while the other products are handled by Shell U.K. Exploration and Production over the Western jetty of the Terminal.

DOCUMENTS: See "Leith".

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports Authority and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 16 and 71, with working Channels 12 and 20.

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are licensed by the Forth Pilotage Authority and must be ordered for both inward and outward passages through the ship's agent.

Vessels bound for the Forth must give 4 hours' notice of ETA and should confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

MAX. SIZE: Western jetty: Depth 15.0 m. Eastern jetty: Depth 10.0 m.

Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

Pilotage Exemption Certificates are not acceptable at Braefoot Bay Marine Terminal.

(b) (i) *Vessels are not allowed to berth at or sail from the Braefoot Bay jetties if the mean wind speed exceeds 27 knots.*

(ii) *Vessels will not be accepted for berthing at Braefoot Bay, and departures will not be authorised unless visibility is at least half a nautical mile at the Braefoot Bay jetties.*

(c) In accordance with the agreement of the Terminal and Forth Ports Authority, the following directions for Navigation apply or as advised by the Terminal from time to time:

(i) All vessels bound for the Western (Shell) jetty or vessels of greater than 145 m. overall length bound for the Eastern (Exxon) jetty shall only approach the Terminal through the Western Channel of Mortimers Deep. Vessels will berth port side alongside on the flood tide with timing dependent on tidal range.

(ii) Vessels of less than 145 m. overall length bound for the Eastern (Exxon) jetty may approach the Terminal via the Eastern or Western Channel of Mortimers Deep. Those vessels approaching from the East will berth starboard side alongside on the ebb tide whilst vessels approaching from the West berth port side alongside on the flood tide. Berthing times are dependent on tidal range.

(iii) It is a requirement of the Forth Ports Authority that all vessels departing from the Terminal shall do so through the Eastern Channel from Mortimers Deep.

Vessels berthed starboard side to the Eastern jetty are required to turn off the berth when departing.

Also see "Regulations".

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message, excluding items (l) to (s) will be sent to Natural Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may affect cargo operations or manoeuvrability.
(b) Confirm vessel has full P & I Club cover.
(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters are operational and fully submerged.
(d) Last port of call.
(e) Last 3 cargoes.
(f) Amount and grades of any cargo required.
(g) Anticipated maximum loading rate.
(h) Anticipated loading time
(i) Arrival drafts.
(j) Sailing drafts.
(k) Confirm that only clean segregated ballast will be discharged at the Terminal.
(l) Confirm that remotely-operated valves have been operated through a complete open/closed cycle to ensure proper functioning and ascertain valve type (Ball, Gate, etc.) and actual valve closing time.

N.B. Remote valves must close within 30 seconds of operation but so that the final 20% of valve movement takes at least 6 seconds.

(m) Gas detection system is operational and set (high or low sensors). Calibrated for the cargo to be loaded.
(n) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.
(o) Ensure operation of the Tank high level and pressure alarms and interlocks.
(p) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be loaded.
(q) Confirm fire-fighting equipment including water spray system fully operational and tested. Ship's fire main to be pressurised whilst alongside at Terminal.
(r) Manifold configuration and presentation (forward to aft), e.g. LVVL. It is most important that the specific duty (Ethylene, Propane, etc., liquid or vapour service) of each presentation flange is known to the Terminal at least 24 hours prior to the ship's arrival. Delays consequential on non-compliance with this requirement will be for ship's account.
(s) If loading more than one grade, confirm that both can be loaded concurrently.
(t) For first time callers – Manifold configuration.
    (i) Size rating and standard of connecting flanges, e.g. 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300.
    (ii) Distance of manifold centre line from bow.
    (iii) Height above uppermost continuous deck.
    (iv) Distance of manifold from ship's side.
    (v) Maximum loaded draft.
    (vi) Minimum draft whilst at berth.
    (vii) Distance from face to first retaining bracket (maximum acceptable is 1,200 mm.).
    (viii) Height of manifold above keel.
    (ix) Distance between manifold flange centres.
(u) Details of *any defects in vessel or equipment* affecting cargo operations or manoeuvrability or confirmation that there are no known defects.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Do not forget to send this message otherwise you may be delayed outside port limits.

Telex: A telex machine is sited at Braefoot Bay. The number is 728245 MOSHIP G and is operable 24 hours per day. This telex number should be used when relaying ETA, pre-arrival or other information related to expected loading. Otherwise messages should be transmitted through the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The Fax number is 0383-892100.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.
REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.
AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast Harbour Airport has daily flights to several U.K. cities.

Air UK flights to Leeds/Bradford.
TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.
POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast 222222; Ambulance Belfast 241212; Harbour Police Belfast 232235; *or* through Belfast Harbour Radio on VHF Channel 12.
TELEPHONE: Telephone can be placed on board at certain berths.
SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.
SHORE LEAVE: Normally no restrictions on shore leave.
IDENTIFICATION CARDS: Seamen's identity cards required.
GARBAGE DISPOSAL: Services available through local agent.
WASTE OIL DISPOSAL: Service available through local agent.
SEAMAN'S CLUBS: Stella Maris (Residential), and Flying Angel. All services and facilities available.
AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 234422. *Telex:* 74204. *FAX:* (0232) 242663. *Contact:* Captain Hugh O'Byrne, Harbour Master. Mr.G.Irwin, Chief Executive. Mr.J.F.McNamee, Chief Engineer. Mr.W.Wilson, Port Services Manager. Capt. D.R.Hawkins, Port Operations.

BLYTH: 55.08 N. 01.30 W. (See Plan)

DOCUMENTS:
- Certificate of Registry.
- Load Line Certificate.
- Safety Radio Certificate.
- Safety Equipment.
- Safety Construction.
- Light Dues Payments.
- Customs Forms C13 and C142.
- Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
- List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by VHF Channels 12 and 16 when approximately 2 hours off port. Pilot boats have black hull with white superstructure with word "Pilot" in black letters on the superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.
ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.
RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.
MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.
HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.
RADIO: Cullercoats Radio, VHF Channel 26.
VHF: Details of movements within port given over VHF from Port Control Office (Tel: (0670)-352678). Calling Channel 16, working Channel 12.
TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.
BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.
STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (0670) 352066. ETA requested day before arrival.
MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.
DENSITY: Sea water. Fresh water effect negligible.
FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.
FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grade – gas oil.
CONSULS: (At Newcastle-upon-Tyne) Denmark, Norway, Netherlands.
REPAIRS: All types of deck and engine repairs possible.
GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.
REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.
AIRPORT: 24 km. Served by regular airlines.
TIME: BST is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: Can be fixed aboard by arrangement.
IDENTIFICATION CARDS: Seaman's Book or Passport desirable.
GARBAGE DISPOSAL: Disposal skips are provided on BHC general cargo quays, for ships domestic garbage. Arrangements for other garbage should be made direct by agents or through the port authority for a contractor. As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: 0670 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: 091-4106621).
WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message, excluding items (l) to (s) will be sent to Natural Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may affect cargo operations or manoeuvrability.
(b) Confirm vessel has full P & I Club cover.
(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters are operational and fully submerged.
(d) Last port of call.
(e) Last 3 cargoes.
(f) Amount and grades of any cargo required.
(g) Anticipated maximum loading rate.
(h) Anticipated loading time
(i) Arrival drafts.
(j) Sailing drafts.
(k) Confirm that only clean segregated ballast will be discharged at the Terminal.
(l) Confirm that remotely-operated valves have been operated through a complete open/closed cycle to ensure proper functioning and ascertain valve type (Ball, Gate, etc.) and actual valve closing time.
  N.B. Remote valves must close within 30 seconds of operation but so that the final 20% of valve movement takes at least 6 seconds.
(m) Gas detection system is operational and set (high or low sensors). Calibrated for the cargo to be loaded.
(n) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.
(o) Ensure operation of the Tank high level and pressure alarms and interlocks.
(p) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be loaded.
(q) Confirm fire-fighting equipment including water spray system fully operational and tested. Ship's fire main to be pressurised whilst alongside at Terminal.
(r) Manifold configuration and presentation (forward to aft), e.g. LVVL. It is most important that the specific duty (Ethylene, Propane, etc., liquid or vapour service) of each presentation flange is known to the Terminal at least 24 hours prior to the ship's arrival. Delays consequential on non-compliance with this requirement will be for ship's account.
(s) If loading more than one grade, confirm that both can be loaded concurrently.
(t) For first time callers – Manifold configuration.
  (i) Size rating and standard of connecting flanges, e.g. 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300.
  (ii) Distance of manifold centre line from bow.
  (iii) Height above uppermost continuous deck.
  (iv) Distance of manifold from ship's side.
  (v) Maximum loaded draft.
  (vi) Minimum draft whilst at berth.
  (vii) Distance from face to first retaining bracket (maximum acceptable is 1,200 mm.).
  (viii) Height of manifold above keel.
  (ix) Distance between manifold flange centres.
(u) Details of *any defects in vessel or equipment* affecting cargo operations or manoeuvrability or confirmation that there are no known defects.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Do not forget to send this message otherwise you may be delayed outside port limits.

Telex: A telex machine is sited at Braefoot Bay. The number is 728245 MOSHIP G and is operable 24 hours per day. This telex number should be used when relaying ETA, pre-arrival or other information related to expected loading. Otherwise messages should be transmitted through the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The Fax number is 0383-892100.

CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted per man and issues are made at 8 day intervals. Wine and/or Spirits: Wine, beer and spirit issues are made, in moderation, at 4 day intervals.
REPATRIATIONS: Crew may be changed and repatriations arranged. Immigration must be informed.
AIRPORT: Aldergrove Airport is approximately 17 miles from Belfast. There are daily flights to all parts of United Kingdom. Belfast Harbour Airport has daily flights to several U.K. cities.

Air UK flights to Leeds/Bradford.
TIME: British Standard Time is kept, that is GMT plus 1 hour. Reverting to GMT in Winter months.
HOLIDAYS: Stevedore holidays are 1st January, 17th March, Easter Monday and Easter Tuesday, 12th and 13th July and 25th and 26th December.
POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999 and ask for services required. Additionally: Fire Brigade Belfast 222222; Ambulance Belfast 241212; Harbour Police Belfast 232235; *or* through Belfast Harbour Radio on VHF Channel 12.
TELEPHONE: Telephone can be placed on board at certain berths.
SERVICES: All principal makes of radio, radar and gyro equipment can be serviced. Compass adjusting and D/F calibration can be carried out.
SHORE LEAVE: Normally no restrictions on shore leave.
IDENTIFICATION CARDS: Seamen's identity cards required.
GARBAGE DISPOSAL: Services available through local agent.
WASTE OIL DISPOSAL: Service available through local agent.
SEAMAN'S CLUBS: Stella Maris (Residential), and Flying Angel. All services and facilities available.
AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 234422. *Telex:* 74204. *FAX:* (0232) 242663. *Contact:* Captain Hugh O'Byrne, Harbour Master. Mr.G.Irwin, Chief Executive. Mr.J.F.McNamee, Chief Engineer. Mr.W.Wilson, Port Services Manager. Capt. D.R.Hawkins, Port Operations.

BLYTH: 55.08 N. 01.30 W. (See Plan)

DOCUMENTS:

Certificate of Registry.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment.
Safety Construction.
Light Dues Payments.
Customs Forms C13 and C142.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by VHF Channels 12 and 16 when approximately 2 hours off port. Pilot boats have black hull with white superstructure with word "Pilot" in black letters on the superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.
ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.
RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT. and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.
MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.
HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.
RADIO: Cullercoats Radio, VHF Channel 26.
VHF: Details of movements within port given over VHF from Port Control Office (Tel: (0670)-352678). Calling Channel 16, working Channel 12.
TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.
BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.
STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (0670) 352066. ETA requested day before arrival.
MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.
DENSITY: Sea water. Fresh water effect negligible.
FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.
FUEL: BHC operate a bunkering Agency on behalf of Shell UK Ltd. 24 hours notice usually required. Grade – gas oil.
CONSULS: (At Newcastle-upon-Tyne) Denmark, Norway, Netherlands.
REPAIRS: All types of deck and engine repairs possible.
GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.
REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.
AIRPORT: 24 km. Served by regular airlines.
TIME: BST is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: Can be fixed aboard by arrangement.
IDENTIFICATION CARDS: Seaman's Book or Passport desirable.
GARBAGE DISPOSAL: Disposal skips are provided on BHC general cargo quays, for ships domestic garbage. Arrangements for other garbage should be made direct by agents or through the port authority for a contractor. As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: 0670 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: 091-4106621).
WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

Cleanaway Ltd., Waste Services Division, Service Centre, Meadowfield, Ponteland, Newcastle upon Tyne, NE20 9SN. Tel: 0661 72640.

Hargreaves Clearwaste Ltd. Environment & Construction Materials Division, Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham DH3 2QN. Tel: 091 4106621.

Effluents Services Ltd., 140 Moss Lane, Macclesfield, Cheshire, SK11 7YT. Tel: 0625 29666.
SEAMAN'S CLUBS: None.
CURRENCY: U.K. Pound (U.K.£).
AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *FAX:* (0670) 368540, 355169. *Contact:* P. J. Camp, General Manager. R.G.Elwen, Secretary.

BOSTON: 52.58 N. 00.02 W.

DOCUMENTS: Usual U.K. requirements.
PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards at Clay Hole from launch in the approaches to River Witham or at Boston Roads (non-compulsory). Pilot Office Tel: 0205-362114.
ANCHORAGES: Vessels awaiting tide anchor to South of Buoy No. 9 in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.
RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.
Lock Dimensions: Length 91.4 m., width 13.6 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.
MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m. Larger vessels may be accepted, tides permitting.
HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-363271.
VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 2.5 hours before till 1.5 hours after HW.
TUGS: 1 tug available, 7 tons bollard pull.
BERTHING: *Boston Dock:*

North Quay: Length 251 m.
South Quay: Length 257 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps.

Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.
CRANES: At Boston Dock:

4×6 tonnes electric portal cranes.
1×25 tonnes Scotch Derrick.
4 mobile cranes.
1 Manitowic heavy lift mobile crane (up to 74 tons).
At Riverside Quay: 1×7.5 tonnes electric portal crane.
Forklifts available at both Boston Dock and Riverside Quay.

BULK CARGO FACILITIES: Two silos, each capable of storing 5,000 tonnes.

(i) King's Lynn Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. Mobile shiploaders available.
SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (2.1 ha.) with 2×35 tonne top lift trucks available.
BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.

STEVEDORES: Several local companies can supply stevedores.

MEDICAL: Doctors, dentists and hospital available locally.

FRESH WATER: Available.

FUEL: Available from road tankers. Contact Agents to make arrangements.

CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.

REPAIRS: Can be undertaken by local companies. Divers available.

CUSTOMS ALLOWANCES: Usual U.K. Regulations. H.M. Customs, Tel: 0205-363070.

TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).

POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.

GARBAGE DISPOSAL: MARPOL skips situated on dock. Larger quantities by arrangement with the port.

WASTE OIL DISPOSAL: By arrangement with Orcol (Tel: 0532-533571) or Hall & Campy, Nottingham (Tel: 0602-780321).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5780 (8.4.91).

AUTHORITY: Port of Boston Ltd., Dock Office, Boston PE21 6BN. *Tel:* 0205-365571. *Telex:* 378114 Bosdock G. *FAX:* 0205-310126. *Cables:* Neptune, Boston. *Contact:* Captain B.D.C.Franklin, Harbour Master. Tel: 0205-362328 (direct). S.Aliwell, Port Manager.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Exxon Chemical Olefins Inc. and Shell U.K. Exploration and Production, as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Exxon Chemical Olefins Inc. and exports ethylene in ships between 4,000 cu.m. and 12,000 cu.m. capacity.

The Western jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m. Ships of less than 15,000 cu.m. may be accommodated by special arrangement provided their moorings are suitable and their manifolds are compatible with the loading arm envelope.

Each jetty carries out loading operations independently, while the co-ordination and administration of marine activities is the responsibility of the Braefoot Bay Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Exxon Chemical Olefins Inc. with direct responsibility for the Management of all ship-related activities at Braefoot Bay.

The products from Mossmorran are Ethylene, Propane, Butane and Natural Gasoline, of which the Ethylene is manufactured and handled over the Eastern jetty of the Terminal by Exxon Chemical Olefins Inc., while the other products are handled by Shell U.K. Exploration and Production over the Western jetty of the Terminal.

DOCUMENTS: See "Leith".

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports Authority and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 hours before entering and 1 hour before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 16 and 71, with working Channels 12 and 20.

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are licensed by the Forth Pilotage Authority and must be ordered for both inward and outward passages through the ship's agent.

Vessels bound for the Forth must give 4 hours' notice of ETA and should confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (other than in emergency) should apply to the Forth Navigation Service (Harbour Master) for direction to a designated anchorage.

MAX. SIZE: Western jetty: Depth 15.0 m. Eastern jetty: Depth 10.0 m. Eastern exit channel bar depth (Hawkcraig Point leading line) – least depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

Pilotage Exemption Certificates are not acceptable at Braefoot Bay Marine Terminal.

(b) (i) *Vessels are not allowed to berth at or sail from the Braefoot Bay jetties if the mean wind speed exceeds 27 knots.*

(ii) *Vessels will not be accepted for berthing at Braefoot Bay, and departures will not be authorised unless visibility is at least half a nautical mile at the Braefoot Bay jetties.*

(c) In accordance with the agreement of the Terminal and Forth Ports Authority, the following directions for Navigation apply or as advised by the Terminal from time to time:

(i) All vessels bound for the Western (Shell) jetty or vessels of greater than 145 m. overall length bound for the Eastern (Exxon) jetty shall only approach the Terminal through the Western Channel of Mortimers Deep. Vessels will berth port side alongside on the flood tide with timing dependent on tidal range.

(ii) Vessels of less than 145 m. overall length bound for the Eastern (Exxon) jetty may approach the Terminal via the Eastern or Western Channel of Mortimers Deep. Those vessels approaching from the East will berth starboard side alongside on the ebb tide whilst vessels approaching from the West berth port side alongside on the flood tide. Berthing times are dependent on tidal range.

(iii) It is a requirement of the Forth Ports Authority that all vessels departing from the Terminal shall do so through the Eastern Channel from Mortimers Deep.

Vessels berthed starboard side to the Eastern jetty are required to turn off the berth when departing.

Also see "Regulations".

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival and thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance of arrival and thereafter advise of any variation of more than 4 hours. (When voyage duration is less than 72 hours, Masters should send ETA as soon as possible.)

A standard pre-arrival message will be sent to each gas carrier requesting the following information/confirmation. A similar message, excluding items (l) to (s) will be sent to Natural Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may affect cargo operations or manoeuvrability.

(b) Confirm vessel has full P & I Club cover.

(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters are operational and fully submerged.

(d) Last port of call.

(e) Last 3 cargoes.

(f) Amount and grades of any cargo required.

(g) Anticipated maximum loading rate.

(h) Anticipated loading time

(i) Arrival drafts.

(j) Sailing drafts.

(k) Confirm that only clean segregated ballast will be discharged at the Terminal.

(l) Confirm that remotely-operated valves have been operated through a complete open/closed cycle to ensure proper functioning and ascertain valve type (Ball, Gate, etc.) and actual valve closing time.

N.B. Remote valves must close within 30 seconds of operation but so that the final 20% of valve movement takes at least 6 seconds.

(m) Gas detection system is operational and set (high or low sensors). Calibrated for the cargo to be loaded.

(n) Cargo transfer emergency stops tested from all locations to ensure correct operations of valves, alarms and interlocks.

(o) Ensure operation of the Tank high level and pressure alarms and interlocks.

(p) Where adjustable setting safety valves are installed, confirm they are set for the cargo to be loaded.

(q) Confirm fire-fighting equipment including water spray system fully operational and tested. Ship's fire main to be pressurised whilst alongside at Terminal.

(r) Manifold configuration and presentation (forward to aft), e.g. LVVL. It is most important that the specific duty (Ethylene, Propane, etc., liquid or vapour service) of each presentation flange is known to the Terminal at least 24 hours prior to the ship's arrival. Delays consequential on non-compliance with this requirement will be for ship's account.

(s) If loading more than one grade, confirm that both can be loaded concurrently.

(t) For first time callers – Manifold configuration.

(i) Size rating and standard of connecting flanges, e.g. 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300.

(ii) Distance of manifold centre line from bow.

(iii) Height above uppermost continuous deck.

(iv) Distance of manifold from ship's side.

(v) Maximum loaded draft.

(vi) Minimum draft whilst at berth.

(vii) Distance from face to first retaining bracket (maximum acceptable is 1,200 mm.).

(viii) Height of manifold above keel.

(ix) Distance between manifold flange centres.

(u) Details of *any defects in vessel or equipment* affecting cargo operations or manoeuvrability or confirmation that there are no known defects.

Note: The foregoing information is required in addition to the pre-arrival information requirements of the Forth Ports Authority – SI.1077 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Do not forget to send this message otherwise you may be delayed outside port limits.

Telex: A telex machine is sited at Braefoot Bay. The number is 728245 MOSHIP G and is operable 24 hours per day. This telex number should be used when relaying ETA, pre-arrival or other information related to expected loading. Otherwise messages should be transmitted through the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The Fax number is 0383-892100.

VHF: "Braefoot Terminal" maintains a listening watch on VHF from at least 3 hours before a vessel's berthing time until clear of port limits on departure on Channel 16 and may work on Channels 15, 44, 48, 69 or 73. (Channel 69 is the normal working Channel for Braefoot Bay Marine Terminal). Vessels at other times may establish need for communication with Braefoot Bay Marine Terminal via Forth Navigation Service or ship's agent.

RADAR: Port and Estuary Radar Service operated by Forth Navigation Service. (See "Leith").

TUGS: Only tugs licensed by the Forth Ports Authority to operate at Braefoot Bay Marine Terminal may do so. Tugs are expected to be available, provided 24 hours' notice of requirement is given through the ship's agent to Forth Estuary Towage Ltd.

The Companies reserve the right to suspend berthing/unberthing operations if, in the reasonable opinion of the Braefoot Bay Supervisor, vessels have not obtained adequate tug attendance. Delay costs incurred from such suspension will be for the vessel's own account.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call out procedures set out in the published Tariff. Tug orders placed through ships' Agents are to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:

1×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×30 tonne bollard pull Voith Schneider.

Minimum Requirements: As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

East Jetty Towage Requirements:

LPG Carriers (Port side alongside):

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)

Tugs may be Escort or Full Towage berthing or sailing, however, on arrival, irrespective of vessel's size, all tugs must be made fast. Vessels berthed port side alongside fitted with an operational bow thruster are not required to make fast tug when sailing.

LPG Carriers (Starboard side alongside):

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)

Tugs may be Escort or Full Towage berthing. In any case, they must be made fast. On sailing, however, vessels will have to swing off the berth, therefore tugs will require to be made fast and will be subject to full towage.

Western Jetty Towage Requirements:

LPG Carriers:

	Under 20,000 cu.m.	20,000 – 40,000 cu.m.	Over 40,000 cu.m.
Berthing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 2 × Medium (68 tonnes B.P.)
Sailing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 1 × Medium (49 tonnes B.P.)

All Berthings and Sailings are classed as Full Towage.

Condensate Carriers with Bow Thrusters:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (19 tonnes B.P.)

All Berthings and Sailings of vessels over 25,000 cu.m. are classed as Full Towage. Vessels under 25,000 cu.m. may use the tug in Escort mode for berthing/sailing and are not required to make tug fast when sailing.

Condensate Carriers without Bow Thruster:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	2 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (38 tonnes B.P.)

All Berthings and Sailings of vessels over 25,000 cu.m. are classed as Full Towage. Vessels under 25,000 cu.m. may use the tug(s) in Escort mode. In any case, the tugs must be made fast.

Tugs attending vessels will normally rendezvous with arriving ships North of Inchkeith Island, and also escort departing vessels to Buoy No. 9. Tugs will make fast East of the Oxcars when approaching from the West and Braefoot Buoys No. 1 and 2 when approaching from the East.

Out of hours and in emergency tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16.

Boatmen: Only boatmen licensed by the Forth Ports Authority and approved by the Companies to do so may operate at Braefoot Bay Marine Terminal. Mooring boats will be available provided 24 hours' notice of requirement for berthing and reasonable notice of unberthing is given through ship's agent to the Mooring Contractor.

Pre-ordered mooring boats will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF Channel 69.

Cancellation charges will be levied in the event of less than 3 hours' notice being given for amendments to previously confirmed berthing sailing arrangements.

MOORING:

(a) All vessels will be required to deploy 3 headlines/sternlines, 2 breastlines, and 2 springs at each end. For vessels equipped with an all wire mooring system, 2, 2 and 2 at each end is acceptable. Wire ropes should have pennants fitted complying with OCIMF standards. If weather conditions dictate, then this minimum may be increased. Mooring ropes made fast on drum ends backed up on bitts are not acceptable.

Spring lines should be of the same material (preferably wire). Where wire springs are fitted with rope pennants, they shall comply with OCIMF standards.

(b) Mooring lines used in any particular direction of service (head stern lines, breast lines, springs) shall be of similar breaking strength, elasticity and material. Under no circumstances will a mixture of wire and synthetic ropes in the same direction of service and to the same dolphin be acceptable, except moorings additional to the requirements of (a) above.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected.

(d) Once moored, ship's winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

(e) Masters of vessels are responsible for ensuring that:

- (i) their vessels are safely secured in accordance with the preceeding paragraphs.
- (ii) a strict watch is kept on the vessel's moorings and that they are tended as required to prevent slack or overtaut lines and undue movement of the vessel.
- (iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose.
- (iv) sufficient persons are on duty to attend moorings whilst vessel is alongside.

(f) Whilst not removing the responsibility from the Master of ensuring that his vessel is securely moored, regular checks on moorings will be undertaken by the Braefoot Bay Supervisor, accompanied by a Ship's Officer.

(g) Failure of vessels to adequately tend to moorings will be considered as a breach of the Jetty Regulations.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any ship operations commence a meeting will take place between the Braefoot Terminal Supervisor and the Ship's Master (or his authorised deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safety Inspection in accordance with the O.C.I.M.F. Standards.

(b) Discuss any deficiencies shown up by (a) above and agree any additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:

Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (see "Loading" – Pressure Surges)
Deballasting procedure (see "Ballast")
Vapour return procedure
Cargo line cooldown procedures.
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Shore ESD Pendant.
Ensure that ship has on board data sheets for product being handled
Emergency Procedures (see "Safety").
Assigned smoking areas.
Static precautions.

(d) Check the previous cargo record (last 3 cargoes) and agree that ships' tanks are ready to receive product.

The Companies reserve the right to:

- (i) Sample and analyse the condition of ships' tanks or quality of cargo and ballast tanks before commencing to load or discharge.
- (ii) Instruct a third party independent surveyor for the sampling and measurement of cargo and/or tanks, the costs of which will be for the account of the Jetty Operating Company.
- (iii) Place approved portable equipment on board as required for sampling, testing or communication purposes during loading/discharging operations.
- (iv) Refuse to load product and/or accept return vapour when ships' tanks are not within specification for product to be loaded.

(e) The Master shall certify that, in accordance with the cargo plan of operation that has been tabled and discussed, the stress on the vessel's hull will not exceed tha maximum permissible level by the Classification Society and that she will have adequate stability throughout to leave the berth at any time.

BERTHING FACILITIES:

Western Jetty:

Jetty Operating Company: Shell U.K. Exploration and Production.

Manifold Limitations:

LPG/GASOLINE 12 in. 150 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
9.6 – 3.0	19.65	5.15
2.7	13.00	5.15
2.0	8.00	5.15

For multiple 12 in. arm connections, centre-to-centre distances for adjacent connections are minimum 1.3 m. and maximum 3.0 m.

For connection to 8 in. flange manifold, maximum allowable manifold height above waterline is 12.8 m.

LPG 8 in. 300 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
8.6 – 2.0	11.15	1.95

For connection of 2×8 in. arms, centre-to-centre distances for adjacent connections are minimum 0.75 m. and maximum 2.5 m.

N.B. For connection to any arm: Distance between ship's outboard presentation flange and the ship's first manifold piping restraining bracket must not exceed 1,200 mm. to prevent cantilever overstressing of ship's manifold pipework.

Berth Limitations: Minimum acceptable dimensions are: From mid-point of manifold to bow – 50 m.; from mid-point of manifold to stern – 60 m., providing that adequate moorings can be deployed.

Product Loading and Vapour Return Facilities: Marine loading arms are capable of liquid or vapour service. Arrangement of loading arms is as follows when viewed from seaward:

West <———> East

Arm No.	7	4	3	2	1	6	5
Size (in.)	8	12	12	12	12	8	8
ASA	150	150	150	150	150	300	300
Duty	Unused	Butane or Gasoline	Butane or Gasoline	Propane	Propane	Butane or Propane	Butane or Propane

Only one loading arm can be designated for liquid duty for each product loaded. Provided vessel's manifold arrangement is suitable, propane and butane may be loaded simultaneously using 12 in. loading arms. For LPG loading, 2 arms will be connected for each product, one for liquid duty and the other for vapour return.

The following loading rates are available:

LPG via 12 in. arm	3,000 cu.m./hr.
LPG via 8 in. arm	1,100 cu.m./hr.
Gasoline via 12 in. arm	2,000 cu.m./hr.

LPG Loading: Product will be delivered to ships in a fully refrigerated state, i.e. Propane −42°C and Butane −4°C.

The operating company, at its sole discretion, will accept vapour return to storage, always subject to quality being acceptable to the company. Vapour samples will be taken from ship's tanks on arrival and provided the following specification is not exceeded, then vapour return to storage will normally be authorised.

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non-condensable gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 1.0% vol. nitrogen
(vi) 10 ppm ammonia
(vii) 10 ppm VCM
(viii) 5 ppm water vapour
(ix) 1 ppm H_2S

Acceptance for vapour return to storage does not imply ship's tanks are suitable for loading from a commercial cargo contamination point of view.

In an emergency or in exceptional circumstances, the use of the shore vapour system to the flare will be permitted to prevent possible venting of cargo vapours to atmosphere. Under no circumstances may the shore vapour system be used if the oxygen content of the vapour contained within the ship's tanks exceeds 4% volume.

Eastern Jetty:

Jetty Operating Company: Exxon Chemical Olefins Incorporated.

Manifold Limitations:

Ethylene 6 in. 300 ASA flanged presentation arms:

	Max. (m.)	*Min.* (m.)
Manifold height above waterline	11.2	2.75
Manifold set back from ship side	4.6	0.85

For connection of 2 arms, the minimum centre-to-centre adjacent connection distance is 0.75 m. and the maximum distance is 1.5 m.

Ethylene: Vapour return arm will be connected before loading operations commence to enable vessels to return vapour to storage tanks or flare. Vapour return may go to flare, always provided the oxygen content of such vapour to flare does not exceed 2.0% by volume maximum, as may be established under the pre-operations meeting/inspection.

Exxon Chemical Olefins Inc., at its sole discretion, may accept vapour return to storage, always subject to the quality being acceptable to Exxon Chemical Olefins Inc. and provided that the last cargo was Ethylene or that the vessel has been purged with Ethylene vapour to the satisfaction of Exxon Chemical Olefins Inc.

Specification for ship's vapour for return to Shore Storage Tanks:

(i) Ethylene	99.90 min. Mol %
(ii) Methane and Ethane	1,000 max. Mol ppm
(iii) Ethane	500 max. Mol ppm
(iv) Hydrogen	10 max. Mol ppm
(v) Propylene and Heavy Hydrocarbons	10 max. Mol ppm
(vi) Acetylene	5 max. Mol ppm
(vii) Carbon Monoxide	2 max. Mol ppm
(viii) Carbon Dioxide	5 max. Mol ppm
(ix) Oxygen	5 max. Mol ppm
(x) Sulphur	2 max. Mol ppm
(xi) Ammonia	1 max. Vol ppm
(xii) Nitrogen	100 max. Vol ppm
(xiii) Water	10 max. Wt ppm
(xiv) Solvents	10 max. Vol ppm
(xv) Oil	Negligible Vol ppm

However, Exxon at its sole discretion may accept vapour return from any vessel to shore storage provided that the quality of such vapour return is acceptable to Exxon. When appropriate, ships returning vapour to shore storage will be automatically credited for such returns.

Ethylene Loading/Vapour return rates available to ships are, via 6 in. loading arms, upto 460 cu.m./hr.

Note: Ethylene is delivered to ships in fully refrigerated state, i.e. approximately −101°C.

There are no cargo heating facilities at this Terminal.

LOADING:

Marine Loading Arms: All products are delivered to ships via marine loading 'hard arm' units which are individually fitted with Emergency Release Systems (ERS).

The emergency release systems consist of 2 ball valves located above the presentation flange. Only after closure of the ball valves, will the hydraulic clamp between the ball valves open, leaving one ball valve closing off the ship's manifold and the other closing off the loading arm. The loading arm then returns to a position clear of the vessels's manifold.

On hearing 'ERS' alarm (an audible oscillating tone accompanied by a flashing red beacon) all staff should vacate the vicinity of the manifold/loading arms. The emergency release system will be manually initiated from onshore or AUTOMATICALLY in the case of over extension of the loading arms, e.g. if ship drifting outside the loading arm envelope.

Pressure Surge Precautions: Non-routine closing of the loading systems, automatic intervention or 'fail-safe' closure of shipboard Emergency Shut Down (ESD) valves can generate dangerous surge pressures. A careful check of ship's ESD system will be made prior to loading. The Master (or his deputy) will be asked to operate the system to enable timing of the valves and may be requested to have valves adjusted according to the provisions of the IMO Codes for Ships Carrying Liquified Gases in Bulk. The Terminal Operating Companies reserve the right to restrict loading rates if valve closure times are not compatible with rates otherwise agreed. Excess loading times caused by such a restriction will be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge pressures which can be generated and safe emergency shut down will be accomplished by using the shore ESD pendant control provided to vessels.

In the event of an emergency the pendant 'ESD' must be activated, which will immediately result in:

1. The stoppage of some shore loading pumps.
2. On shore loading valves closure.
3. The stoppage of cargo flow.

Only Then may the Vessel Manually Activate its Own ESD. Ships Must Never Close Valves Against the Shore Loading Pumps

Masters are referred to ICS Safety Guide (Liquified Gas) paras, 1.8.2 and 4.5.2 and the International Safety Guide for Oil Tankers and Terminals paragraphs 6.5.5, 7.3 and 7.6.8 and Appendixes A and B.

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer. The Master must take adequate precautions to ensure the safety of Company workers and ensure that, where necessary, suitable guard rails are provided.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern jetty, 10 cu.m. at the Western jetty.)

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations, ship will confirm with the shore at intervals not exceeding 1 hour that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY.

All such displaced vapour must be reliquified on board by ship's systems and/or returned to shore via the vapour line

During loading of liquified gas carriers, the jetty operator must be advised of and log the ship's tank pressure every half hour or at the discretion of the Braefoot Bay Supervisor.

In all cases, the LPG vapour return line will be connected and available for pressure relief.

Displaced Natural Gasoline vapour shall only be vented to atmosphere as prescribed in the International Safety Guide for Oil Tankers and Terminals, Sections 3.3.2, 6.2.3 and 7.6.3. Closed loading procedure to be adopted at all times.

(f) * During transfer operations:

(i) An Operator/Technician will remain on the jetty at all times.

(ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times. A portable radio will be provided on loan from the Terminal.

(iii) A responsible member of the ship's crew capable of understanding and relaying the jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
  (a) observe the manifold connections
  (b) observe the gangway
  (c) exchange visual/vocal signals with the jetty Operator/Technician.
  (d) keep a visual check on moorings.

VHF: "Braefoot Terminal" maintains a listening watch on VHF from at least 3 hours before a vessel's berthing time until clear of port limits on departure on Channel 16 and may work on Channels 15, 44, 48, 69 or 73. (Channel 69 is the normal working Channel for Braefoot Bay Marine Terminal). Vessels at other times may establish need for communication with Braefoot Bay Marine Terminal via Forth Navigation Service or ship's agent.

RADAR: Port and Estuary Radar Service operated by Forth Navigation Service. (See "Leith").

TUGS: Only tugs licensed by the Forth Ports Authority to operate at Braefoot Bay Marine Terminal may do so. Tugs are expected to be available, provided 24 hours' notice of requirement is given through the ship's agent to Forth Estuary Towage Ltd.

The Companies reserve the right to suspend berthing/unberthing operations if, in the reasonable opinion of the Braefoot Bay Supervisor, vessels have not obtained adequate tug attendance. Delay costs incurred from such suspension will be for the vessel's own account.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call out procedures set out in the published Tariff. Tug orders placed through ships' Agents are to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:
1×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×30 tonne bollard pull Voith Schneider.

Minimum Requirements: As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

East Jetty Towage Requirements:

LPG Carriers (Port side alongside):

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)

Tugs may be Escort or Full Towage berthing or sailing, however, on arrival, irrespective of vessel's size, all tugs must be made fast. Vessels berthed port side alongside fitted with an operational bow thruster are not required to make fast tug when sailing.

LPG Carriers (Starboard side alongside):

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (24 tonnes B.P.)

Tugs may be Escort or Full Towage berthing. In any case, they must be made fast. On sailing, however, vessels will have to swing off the berth, therefore tugs will require to be made fast and will be subject to full towage.

Western Jetty Towage Requirements:

LPG Carriers:

	Under 20,000 cu.m.	20,000 – 40,000 cu.m.	Over 40,000 cu.m.
Berthing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 2 × Medium (68 tonnes B.P.)
Sailing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 1 × Medium (49 tonnes B.P.)

All Berthings and Sailings are classed as Full Towage.

Condensate Carriers with Bow Thrusters:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (19 tonnes B.P.)

All Berthings and Sailings of vessels over 25,000 cu.m. are classed as Full Towage. Vessels under 25,000 cu.m. may use the tug in Escort mode for berthing/sailing and are not required to make tug fast when sailing.

Condensate Carriers without Bow Thruster:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	2 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (38 tonnes B.P.)

All Berthings and Sailings of vessels over 25,000 cu.m. are classed as Full Towage. Vessels under 25,000 cu.m. may use the tug(s) in Escort mode. In any case, the tugs must be made fast.

Tugs attending vessels will normally rendezvous with arriving ships North of Inchkeith Island, and also escort departing vessels to Buoy No. 9. Tugs will make fast East of the Oxcars when approaching from the West and Braefoot Buoys No. 1 and 2 when approaching from the East.

Out of hours and in emergency tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16.

Boatmen: Only boatmen licensed by the Forth Ports Authority and approved by the Companies to do so may operate at Braefoot Bay Marine Terminal. Mooring boats will be available provided 24 hours' notice of requirement for berthing and reasonable notice of unberthing is given through ship's agent to the Mooring Contractor.

Pre-ordered mooring boats will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF Channel 69.

Cancellation charges will be levied in the event of less than 3 hours' notice being given for amendments to previously confirmed berthing sailing arrangements.

MOORING:

(a) All vessels will be required to deploy 3 headlines/sternlines, 2 breastlines, and 2 springs at each end. For vessels equipped with an all wire mooring system, 2, 2 and 2 at each end is acceptable. Wire ropes should have pennants fitted complying with OCIMF standards. If weather conditions dictate, then this minimum may be increased. Mooring ropes made fast on drum ends backed up on bitts are not acceptable.

Spring lines should be of the same material (preferably wire). Where wire springs are fitted with rope pennants, they shall comply with OCIMF standards.

(b) Mooring lines used in any particular direction of service (head stern lines, breast lines, springs) shall be of similar breaking strength, elasticity and material. Under no circumstances will a mixture of wire and synthetic ropes in the same direction of service and to the same dolphin be acceptable, except moorings additional to the requirements of (a) above.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected.

(d) Once moored, ship's winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

(e) Masters of vessels are responsible for ensuring that:

(i) their vessels are safely secured in accordance with the preceeding paragraphs.

(ii) a strict watch is kept on the vessel's moorings and that they are tended as required to prevent slack or overtaut lines and undue movement of the vessel.

(iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose.

(iv) sufficient persons are on duty to attend moorings whilst vessel is alongside.

(f) Whilst not removing the responsibility from the Master of ensuring that his vessel is securely moored, regular checks on moorings will be undertaken by the Braefoot Bay Supervisor, accompanied by a Ship's Officer.

(g) Failure of vessels to adequately tend to moorings will be considered as a breach of the Jetty Regulations.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any ship operations commence a meeting will take place between the Braefoot Terminal Supervisor and the Ship's Master (or his authorised deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safety Inspection in accordance with the O.C.I.M.F. Standards.

(b) Discuss any deficiencies shown up by (a) above and agree any additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:
Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (see "Loading" – Pressure Surges)
Deballasting procedure (see "Ballast")
Vapour return procedure
Cargo line cooldown procedures.
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Shore ESD Pendant.
Ensure that ship has on board data sheets for product being handled
Emergency Procedures (see "Safety").
Assigned smoking areas.
Static precautions.

(d) Check the previous cargo record (last 3 cargoes) and agree that ships' tanks are ready to receive product.

The Companies reserve the right to:

(i) Sample and analyse the condition of ships' tanks or quality of cargo and ballast tanks before commencing to load or discharge.

(ii) Instruct a third party independent surveyor for the sampling and measurement of cargo and/or tanks, the costs of which will be for the account of the Jetty Operating Company.

(iii) Place approved portable equipment on board as required for sampling, testing or communication purposes during loading discharging operations.

(iv) Refuse to load product and/or accept return vapour when ships' tanks are not within specification for product to be loaded.

(e) The Master shall certify that, in accordance with the cargo plan of operation that has been tabled and discussed, the stress on the vessel's hull will not exceed tha maximum permissible level by the Classification Society and that she will have adequate stability throughout to leave the berth at any time.

BERTHING FACILITIES:

Western Jetty:

Jetty Operating Company: Shell U.K. Exploration and Production.

Manifold Limitations:

LPG/GASOLINE 12 in. 150 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline Maximum* (m.)	*Minimum* (m.)
9.6 – 3.0	19.65	5.15
2.7	13.00	5.15
2.0	8.00	5.15

For multiple 12 in. arm connections, centre-to-centre distances for adjacent connections are minimum 1.3 m. and maximum 3.0 m.
For connection to 8 in. flange manifold, maximum allowable manifold height above waterline is 12.8 m.

LPG 8 in. 300 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	Manifold height above waterline Maximum (m.)	Minimum (m.)
8.6 – 2.0	11.15	1.95

For connection of 2×8 in. arms, centre-to-centre distances for adjacent connections are minimum 0.75 m. and maximum 2.5 m.

N.B. For connection to any arm: Distance between ship's outboard presentation flange and the ship's first manifold piping restraining bracket must not exceed 1,200 mm. to prevent cantilever overstressing of ship's manifold pipework.

Berth Limitations: Minimum acceptable dimensions are: From mid-point of manifold to bow – 50 m.; from mid-point of manifold to stern – 60 m., providing that adequate moorings can be deployed.

Product Loading and Vapour Return Facilities: Marine loading arms are capable of liquid or vapour service. Arrangement of loading arms is as follows when viewed from seaward:

	West	<———	———	> East			
Arm No.	7	4	3	2	1	6	5
Size (in.)	8	12	12	12	12	8	8
ASA	150	150	150	150	150	300	300
Duty	Unused	Butane or Gasoline	Butane or Gasoline	Propane	Propane	Butane or Propane	Butane or Propane

Only one loading arm can be designated for liquid duty for each product loaded. Provided vessel's manifold arrangement is suitable, propane and butane may be loaded simultaneously using 12 in. loading arms. For LPG loading, 2 arms will be connected for each product, one for liquid duty and the other for vapour return.
The following loading rates are available:

LPG via 12 in. arm	3,000 cu.m./hr.
LPG via 8 in. arm	1,100 cu.m./hr.
Gasoline via 12 in. arm	2,000 cu.m./hr.

LPG Loading: Product will be delivered to ships in a fully refrigerated state, i.e. Propane −42°C and Butane −4°C.

The operating company, at its sole discretion, will accept vapour return to storage, always subject to quality being acceptable to the company. Vapour samples will be taken from ship's tanks on arrival and provided the following specification is not exceeded, then vapour return to storage will normally be authorised.

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non-condensable gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 1.0% vol. nitrogen
(vi) 10 ppm ammonia
(vii) 10 ppm VCM
(viii) 5 ppm water vapour
(ix) 1 ppm H_2S

Acceptance for vapour return to storage does not imply ship's tanks are suitable for loading from a commercial cargo contamination point of view.

In an emergency or in exceptional circumstances, the use of the shore vapour system to the flare will be permitted to prevent possible venting of cargo vapours to atmosphere. Under no circumstances may the shore vapour system be used if the oxygen content of the vapour contained within the ship's tanks exceeds 4% volume.

Eastern Jetty:

Jetty Operating Company: Exxon Chemical Olefins Incorporated.

Manifold Limitations:

Ethylene 6 in. 300 ASA flanged presentation arms:

	Max. (m.)	Min. (m.)
Manifold height above waterline	11.2	2.75
Manifold set back from ship side	4.6	0.85

For connection of 2 arms, the minimum centre-to-centre adjacent connection distance is 0.75 m. and the maximum distance is 1.5 m.

Ethylene: Vapour return arm will be connected before loading operations commence to enable vessels to return vapour to storage tanks or flare. Vapour return may go to flare, always provided the oxygen content of such vapour to flare does not exceed 2.0% by volume maximum, as may be established under the pre-operations meeting/inspection.

Exxon Chemical Olefins Inc., at its sole discretion, may accept vapour return to storage, always subject to the quality being acceptable to Exxon Chemical Olefins Inc. and provided that the last cargo was Ethylene or that the vessel has been purged with Ethylene vapour to the satisfaction of Exxon Chemical Olefins Inc.

Specification for ship's vapour for return to Shore Storage Tanks:

(i)	Ethylene	99.90 min. Mol %
(ii)	Methane and Ethane	1,000 max. Mol ppm
(iii)	Ethane	500 max. Mol ppm
(iv)	Hydrogen	10 max. Mol ppm
(v)	Propylene and Heavy Hydrocarbons	10 max. Mol ppm
(vi)	Acetylene	5 max. Mol ppm
(vii)	Carbon Monoxide	2 max. Mol ppm
(viii)	Carbon Dioxide	5 max. Mol ppm
(ix)	Oxygen	5 max. Mol ppm
(x)	Sulphur	2 max. Mol ppm
(xi)	Ammonia	1 max. Vol ppm
(xii)	Nitrogen	100 max. Vol ppm
(xiii)	Water	10 max. Wt ppm
(xiv)	Solvents	10 max. Vol ppm
(xv)	Oil	Negligible Vol ppm

However, Exxon at its sole discretion may accept vapour return from any vessel to shore storage provided that the quality of such vapour return is acceptable to Exxon. When appropriate, ships returning vapour to shore storage will be automatically credited for such returns.

Ethylene Loading/Vapour return rates available to ships are, via 6 in. loading arms, upto 460 cu.m./hr.
Note: Ethylene is delivered to ships in fully refrigerated state, i.e. approximately −101°C.

There are no cargo heating facilities at this Terminal.

LOADING:

Marine Loading Arms: All products are delivered to ships via marine loading 'hard arm' units which are individually fitted with Emergency Release Systems (ERS).

The emergency release systems consist of 2 ball valves located above the presentation flange. Only after closure of the ball valves, will the hydraulic clamp between the ball valves open, leaving one ball valve closing off the ship's manifold and the other closing off the loading arm. The loading arm then returns to a position clear of the vessels's manifold.

On hearing 'ERS' alarm (an audible oscillating tone accompanied by a flashing red beacon) all staff should vacate the vicinity of the manifold/loading arms. The emergency release system will be manually initiated from onshore or AUTOMATICALLY in the case of over extension of the loading arms, e.g. if ship drifting outside the loading arm envelope.

Pressure Surge Precautions: Non-routine closing of the loading systems, automatic intervention or 'fail-safe' closure of shipboard Emergency Shut Down (ESD) valves can generate dangerous surge pressures. A careful check of ship's ESD system will be made prior to loading. The Master (or his deputy) will be asked to operate the system to enable timing of the valves and may be requested to have valves adjusted according to the provisions of the IMO Codes for Ships Carrying Liquified Gases in Bulk. The Terminal Operating Companies reserve the right to restrict loading rates if valve closure times are not compatible with rates otherwise agreed. Excess loading times caused by such a restriction will be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge pressures which can be generated and safe emergency shut down will be accomplished by using the shore ESD pendant control provided to vessels.

In the event of an emergency the pendant 'ESD' must be activated, which will immediately result in:

1. The stoppage of some shore loading pumps.
2. On shore loading valves closure.
3. The stoppage of cargo flow.

Only Then may the Vessel Manually Activate its Own ESD. Ships Must Never Close Valves Against the Shore Loading Pumps

Masters are referred to ICS Safety Guide (Liquified Gas) paras, 1.8.2 and 4.5.2 and the International Safety Guide for Oil Tankers and Terminals paragraphs 6.5.5, 7.3 and 7.6.8 and Appendixes A and B.

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer. The Master must take adequate precautions to ensure the safety of Company workers and ensure that, where necessary, suitable guard rails are provided.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern jetty, 10 cu.m. at the Western jetty.)

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations, ship will confirm with the shore at intervals not exceeding 1 hour that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY.

All such displaced vapour must be reliquified on board by ship's systems and/or returned to shore via the vapour line

During loading of liquified gas carriers, the jetty operator must be advised of and log the ship's tank pressure every half hour or at the discretion of the Braefoot Bay Supervisor.

In all cases, the LPG vapour return line will be connected and available for pressure relief.

Displaced Natural Gasoline vapour shall only be vented to atmosphere as prescribed in the International Safety Guide for Oil Tankers and Terminals, Sections 3.3.2, 6.2.3 and 7.6.3. Closed loading procedure to be adopted at all times.

(f) * During transfer operations:

(i) An Operator/Technician will remain on the jetty at all times.
(ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times.
A portable radio will be provided on loan from the Terminal.
(iii) A responsible member of the ship's crew capable of understanding and relaying the jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
  (a) observe the manifold connections
  (b) observe the gangway
  (c) exchange visual/vocal signals with the jetty Operator/Technician.
  (d) keep a visual check on moorings.

(iv) The ship must inform the terminal and the terminal must advise the ship of any deviation from the agreed Loading/Discharge Plan.

(g) At least 5 minutes' notice must be given of transfer rate changes being required, and at least 15 minutes' notice for final completion of loading, except in emergency when the requirements of "Pressure Surge Precautions" (see above) must be observed.

(h) If for any reason there is an unusual evolution or accumulation of gas, loading shall be stopped or the loading rate into a particular tank reduced at the discretion of either the Terminal Supervision or responsible Ship's Officer.

(i) The vessel must by day fly Flag 'B' of the International Code, and by night exhibit an all round red light.

(j) Prior to, and on completion of loading/discharging an Operating Company representative will witness ship's dips/ullages and obtain from the Master the quantity loaded according to ship's figures.

(k) Operations shall be stopped during electrical storms in the vicinity of the ship and all cargo valves shall be closed.

(l) During periods of high winds and/or on the instruction of either the Harbour Master or Braefoot Bay Supervisor, operations shall be stopped and the loading arms disconnected in accordance with tables (tables are in "Jetty Regulations and Information", supplied to vessel).

(m) At suitable intervals with regard to the estimated duration of cargo transfer, the responsible Terminal Representative and Ship's Officer will carry out a repetitive check and confirm that:

The Safety Check List remains valid
Operational procedures are satisfactory
Jetty Regulations are not being contravened.

BALLAST: *Avoidance of Pollution:*

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the terminal, the approaches or in the River and Firth of Forth.

No garbage, or other materials, either liquid or solid shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge overboard of the clean ballast contained in the cargo tanks of clean petroleum product tankers is permitted, but only after inspection has been carried out by the Terminal Supervisor, who shall also obtain the approval of the Harbour Master prior to commencement of such ballast discharge. Discharge of clean segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection either before or during discharge shows ballast water is contaminated and such discharge shall immediately cease.

Except as herein specified, all ballast water other than that contained in segregated ballast tanks shall be retained on board.

DIRTY BALLAST CANNOT BE DISCHARGED AT THIS TERMINAL

(c) By arrangement with the Terminal Supervisor oily residues and bilge slops may be discharged ashore via flexible hose provided that such discharge is not concurrent with product transfer via hard arms and that delays so incurred are for ship's own account if port time/laytime is exceeded.

The onshore oily slops reception tank has a limited handling capacity and in no case will slops quantities in excess of 100 tonnes be accepted from any one vessel. Slops transfer to this facility for ships at the Eastern jetty is via a 20 cu.m. holding tank and transfer rates limited to 5 tonnes per hour.

(d) Prior to Oil (including Natural Gasoline) or slops transfer the Anti-Pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage or spillage has been cleaned up to the satisfaction of the Terminal Supervisor and the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship, without the authority of the Master but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is statutory requirement that any pollution be immediately reported to the Harbour Master.

MEDICAL: Doctors and Hospitals in Kirkcaldy and Inverkeithing.

DENSITY: 1015 – 1025 (depending on rainfall).

FRESH WATER: Potable fresh water is normally available from hydrants at each jetty. Ships requiring water are responsible for supplying and connecting their own hoses to the jetty hydrant as indicated available by the jetty operator.

FUEL: Supply of Bunker Fuel Oil is not possible from the jetties, however, bunkering arrangements can be made at anchorage or, if suitable, from Grangemouth.

CONSULS: See "Leith".

REPAIRS/DRY DOCKS: See "Grangemouth".

AIRPORT: Edinburgh Airport 20 miles.

POLICE/AMBULANCE/FIRE: Control have a direct line.

TELEPHONES: A public telephone is located at the jetty trestleway root. This telephone will only accept phone cards, a supply of which can be purchased from the ship's agent.

Smoking is expressly prohibited in the telephone kiosk, infringements by individuals of this regulation will necessitate withdrawal of the facility.

A public coin-operated payphone is located in the Security Gatehouse at the main entrance. There is also a metered telephone available at the Gatehouse for use at the Master's discretion, all charges being authorised by the Master for payment by ship's agent.

STORING: *General cargo, bunkering and stores handling:*

(a) Handling of general cargo is not permitted at the Terminal.

(b) Bunker services are not available to ships ex-jetty.

(c) The handling of ship's stores may be permitted during cargo operations provided the Terminal is given prior notice of the requirement. On arrival, the Braefoot Bay Supervisor and Master will agree the timing for taking stores and any special precautions required, subject to the following:

(i) the cargo operations remain adequately supervised.
(ii) any cargo operation which may allow vapours to escape on deck should be stopped whilst stores are being handled e.g. sampling or disconnection of loading arms.

(d) Flammable or dangerous goods in drums or other containers, liquified gas in cylinders, drums of oil or paint, steel plates and any other heavy metal parts shall not be handled during:

(i) loading or transfer of LPG, Ethylene or Natural Gasoline.
(ii) gas-freeing, purging or tank cleaning.
(iii) whenever loading arms are connected.

(e) Stores items contained within section (d) should not be landed directly onto a vessel's steel deck. Rubber or suitable matting should be used to prevent possible spark generation. At no time may drums or gas cylinders be rolled along the deck or jetty.

(f) The jetty cranes are for hose-handling and other jetty purposes. They may only be operated by Terminal staff and may only assist in loading items of ship's stores, provided that Terminal staff are available to operate a crane without detriment to their other duties.

(g) Under no circumstances will stores delivery vehicles be allowed on the jetty head or approach beyond the designated points for setting down ship's stores. One vehicle at a time is permitted to visit a vessel. Other vehicles scheduled to deliver stores must queue outside the main gate until given permission to enter. All delivery vehicles are to be parked as directed by Terminal staff, such that access for the Emergency Services is not obstructed.

(h) The size and weight of ship's stores delivered by road vehicle are to be such that they can always be physically manhandled and carted between set-down point and ship by delivery staff or ship's crew. Larger deliveries of stores and heavy items of equipment may be loaded from a barge by arrangement with agents and subject to Regulation 15.

(i) Delays due to storing are for vessel's account where lay/port time is exceeded.

GARBAGE DISPOSAL: The terminal provides facilities for the reception and disposal of ship's garbage. Under SI.1988 No.2293, "Garbage" is defined as all kinds of victual, domestic and operational waste, excluding fresh fish and parts thereof, generated during the normal operation of the ship and liable to be disposed of continuously or periodically, except sewage originating from ships.

To comply with the regulations, the following arrangements have been made:

(a) 6 Eurobins (capacity 1.1 cu.m.) and 1 skip for plastic, wood and glass only, are positioned at the jetty root. These are locked and braked, with the Terminal Supervisor holding the keys. Charges will be levied through ship's Agent as advised from time to time.
(b) All garbage must be double-bagged and sealed. A stock of heavy-duty plastic bags and ties are held and issued on request to vessels requiring to land garbage.
(c) After berthing, vessel confirms request to land garbage by completing relevant section in Ship/Shore Check List. All garbage must be sealed and labelled as to their contents. No leaking or open bags will be acceptable and cost of cleaning shore facilities in the event of spillage will be passed on to vessel. Garbage bags must not be thrown from the ship onto the jetty. They must be either hand-carried or the shore crane utilised.
(d) Ship's crew must collect the Eurobins from the jetty root area and return them there after completion of landing garbage. The bins should not be filled to such extent that the covers will not close.
(e) The Eurobins are mounted on wheels for easy transportation.
(f) Note: Vessels requiring to dispose of hypodermic needles, pharmaceutical compounds, pyrotechnics, etc., must make special arrangements through their agents.

WASTE OIL DISPOSAL: The terminal regulations state that:

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the Terminal, the approaches or in the River and Firth of Forth.

No garbage or other materials, either liquid or solid, shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrrangements made for disposal ashore.

(b) Discharge of clean, segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection, either before or during discharge, shows ballast water is contaminated and such discharge shall immediately cease.

All ballast water other than that contained in segregated ballast tanks shall be retained on board.

(c) By arrangement with the Terminal Supervisor, oily residues and bilge slops may be discharged ashore provided that such discharge is not concurrent with product transfer and that delays so incurred are for ship's account if port time/lay time is exceeded.
(d) Prior to oil (including natural gasoline) or slops transfer, the anti-pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.
(e) Vessels are prohibited from the internal transfer of oil whilst alongside.
(f) Dirty ballast cannot be discharged at this Terminal.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage has been cleaned up to his satisfaction and that of the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship without the authority of the Master, but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is a statutory requirement that any pollution be immediately reported to the Harbour Master.

SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5882 (10.4.91).
SAFETY: *Emergency Signals:*

(a) Fire and onshore emergency alarm.
1. At the Western Jetty: Intermittent siren.
2. At the Eastern Jetty: Continuous sound for 30 seconds.

In the event of siren failure alarm will be sounded by air horns.

(b) Onshore emergency (other than fire).
1. At the Western Jetty: Air Horns.
2. At the Eastern Jetty: Continuous warble for 30 seconds.

(c) Shipboard emergency (or reported from ship): At least 6 blasts, each of not less than 10 seconds duration.

NOTE: Onshore, alarm may be raised by activating one of the "Break Glass" fire alarms situated at numerous points throughout the terminal – this will also automatically activate the jetty spray systems.

Actions in Event of Emergency:

Ashore: Sound alarm signal.
Terminal staff will communicate with you via:
1. The UHF portable radio (supplied on arrival).
2. The jetty operator.
3. The jetty loudspeaker system.
4. The Marine VHF Channel 16.

In any emergency, terminal staff will shut down loading operations, may activate fixed water spray system and implement the Terminal Emergency Plan as appropriate to the incident:

Aboard: Sound alarm signal.
Inform terminal by communications systems as listed above.
You must be prepared to:
1. Cease all cargo operations.
2. Close all cargo valves.
3. Disconnect ship to shore pipe-lines (shore hard loading arms may be emergency disconnected by terminal staff).
4. Move your ship (engines to immediate readiness) subject to the overriding control of the Harbour Master.

Emergency Towing Wires: Emergency towing wires of adequate strength and condition must be positioned on both the offshore bow and quarter of the ship with the towing eyes maintained just above water level.

They must be properly made fast on the ship's bollards while having sufficient slack flaked out on deck for effective towing, the slack being secured from running free by rope yarns or other easily broken means.

Emergency Precautions: In order to meet emergencies ships must:

(a) Retain sufficient suitable crew members on board at all times to man emergency services and to move the ship if so directed by Terminal or Port Authority personnel.

(b) Have adequate emergency equipment and fire fighting appliances, including main emergency fire pumps, ready for immediate use. Fire main to be pressurised *before berthing* and for the duration of berth occupancy. The appliances will include at least:
(i) Two fire hoses, fitted with jet/spray nozzles, uncoiled and connected to the fire main on the main deck.
(ii) Portable fire extinguishers, of the dry chemical type, conveniently placed near the ship's fire manifold.
(iii) An International Ship/Shore Connection available and *clearly signposted* at an agreed position on the ship's fire main for ready connection to the shore main.
(iv) Where a vessel is equipped with a fixed dry powder system, hoses should be run out and control boxes open for access.
(v) The ship's offshore lifeboat shall be rigged ready for lowering and use as an emergency escape.
(vi) A pilot ladder or accommodation ladder shall be rigged or positioned on the outboard side of the vessel ready for immediate lowering as a means of escape in the event of an emergency.

In the event of an emergency, the Master must proceed as agreed in the "Pre-operations Meeting and Inspection".

State of Readiness and Engine Immobilisation:

(a) The ship must be able to move under its own power at short notice.

(b) Repairs or other work which may immobilise the vessel are not allowed. If unavoidable breakdown occurs, then repairs may be allowed alongside provided approval is given in writing by the Braefoot Bay Supervisor who shall also obtain the Harbour Master's agreement and is conditional on the Master hiring sufficient standby tugs to move the vessel if so required.

(c) Should immobilisation as in (b) above occur, the respective jetty Operating Companies reserve the right to order tug or tugs as above on the Master's behalf.

Vehicle and Personnel Access and Security:

(a) Only authorised persons or those with entry permits issued by the Terminal Management will be allowed through the terminal security gates.

Ship's personnel must have a temporary pass for clearance with the security guard at the entrance gate.

Masters will be provided with a supply of suitable pass forms by the Braefoot Bay Supervisor. The Master or ship's Agent is required to furnish a list of chandlers, services, new crew members and authorised visitors expected during the ship's stay at the terminal. Ship's agent is required to provide Security staff with a crew list as soon as possible after berthing.

Persons who have not been authorised or notified as above will be refused entry to the terminal until the Security Guard has been given clearance from the Braefoot Bay Supervisor.

(b) As pedestrians (other than plant employees and authorised personnel) are not allowed passage through the terminal, transport to the main gate will be provided by Security staff on request from the jetty root (West Jetty) or the safety boat landing (East Jetty), by calling "Braefoot Control" on the radios provided.

(c) Visiting vehicles are not normally allowed beyond the gatehouse parking area and must not proceed onto the jetty trestleways without the express permission of the Braefoot Bay Supervisor. No vehicle may proceed past any "NO ENTRY" sign indicating that Class A petroleum is being handled or that petroleum vapour may be present.

Vehicles and their contents which are permitted to enter the Marine Terminal do so at the owners' risk and drivers must obey all traffic signs, plant traffic regulations, or directions given by Terminal Staff. Such vehicles shall not be parked in position obstructing fire hydrants, roadside alarms or other traffic. If parked, keys will be left in ignition, the ignition switched off and the doors unlocked. If required, any unattended vehicle may be moved by Terminal Staff.

(d) In the interests of Safety and Security any vehicle or person entering or leaving the terminal is liable to be searched for contraband material or unauthorised persons. Acceptance of this requirement is a condition of entry. Persons who appear to be under the influence of alcohol or drugs will not be allowed access to or from ships at the terminal unless escorted by a responsible Ship's Officer.

Personnel Access to/from Ships:

(a) When available, access between jetty and vessel will be provided by the Company by means of a gangway tower structure. The operation of such gangway will be the responsibility of the jetty Operating Company, but Masters shall ensure that personnel can safely transfer between the ship's main deck and the gangway. When, for any reason, the gangway tower is not available, Masters of vessels shall provide a means of safe access between jetty and ship, which shall when necessary include an upper platform and bulwark ladder to provide safe access to the ship's deck. The means of access shall be provided with stanchions, guard ropes, securing lines and safety netting, shall be adequately illuminated and shall be maintained in a clean and well tended condition.

A lifebuoy with at least 25 m. of lifeline attached shall be positioned on the vessel near the gangway.

(b) No person other than H.M. Customs and Excise, Port Health Authorities, Pilots or other H.M. Customs Authorised personnel is allowed to board or disembark from a vessel berthing at the Marine Terminal from a foreign port until Clearance and the Master's permission has been obtained.

(c) Boarding and disembarking shall be by gangway only except in emergency.

Scuppers and Drip Trays: During transfer of natural gasoline and slops, deck scuppers and drain holes must be suitably plugged and accumulated water drained off as required. Scuppers should otherwise remain open during LPG loading operations.

Drip trays must be placed under connections and likewise drained of accumulated water.

Prior to transfer of any oil product the ANTI-POLLUTION CHECK LIST MUST BE COMPLETED.

Portable R/T Sets, Hand Lamps and Electrical Equipment: Portable R/T sets, lamps and hand lamps, electric or otherwise shall not be used unless of an approved type (e.g. B.A.S.E.E.F.A.).

The use of portable electric lamps and equipment on wandering electric cables is prohibited in any cargo or adjacent ballast space, pumproom, compressor room, cofferdam, bunker compartment, hold or anywhere over the cargo tanks.

Portable domestic radios, photographic flash equipment, electronic calculators, tape recorders or any other battery powered equipment of non-approved type shall not be used on the main deck nor in any other place where petroleum gases may be encountered.

Ship's Radio and Radar Equipment: Except for VHF and UHF communications (with radiated power of 1 watt or less), ship's main radio station, including emergency transmitters, shall not be used while the ship is within 400 m. of the Terminal. While berthed at the Terminal, the transmitting aerials shall be disconnected and earthed.

It is *prohibited* to operate ship-borne radar having a *peak pulse in excess of 60 kW.* within the following distances of the Terminal:
1. Radar operating below 2 GHz – 400 metres.
2. Radar operating above 2 GHz – 200 metres.

The preceding prohibitions and restrictions do not preclude the testing of a vessel's normal communications transmitter operating on a frequency between 415 kHz and 26 kHz or ship-borne radar with a peak pulse power exceeding 60 kW in the area of the Terminal, providing the vessel's associated electrical equipment does not present a source of ignition, *and that the express permission of the Harbour Master and Marine Superintendent have been obtained prior to testing.*

Repair Work: Repair work involving either hot or cold work or the use of naked lights is prohibited unless the permission of the Braefoot Bay Supervisor has been requested and granted in writing and the conditions and precautions required by the Braefoot Bay Supervisor are rigidly observed.

Repair work includes but is not restricted to boiler tube clearing, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar and radio installations).

If permission is granted a list of shore workmen employed on the vessel must be given to the Braefoot Bay Supervisor before work commences.

(The Harbour Master's permission is also required in the case of hot work and certain repair work including test transmissions of radio or radar equipment.)

Tank Cleaning/Gas Freeing: Tank cleaning, inerting, purging or gas freeing *may not* be carried out at this terminal. In unavoidable and exceptional cases, and then under specific circumstances, approval in writing may be granted in advance or under a repair work permit as in "Repair Work" above.

Movements of Tugs and Other Craft: During berthing, unberthing and cargo handling operations no vessel or small craft shall be allowed alongside the vessel unless authorised by the Braefoot Bay Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless tanks are gas free.

GENERAL:
Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through "Braefoot Control".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.
2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.
3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.
4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.
5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.
6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.
7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).
Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:
Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:
Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.
ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.
RESTRICTIONS: In accordance with state of tide and draft restrictions.
HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.
Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.
VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working 12 and 14.
TUGS: None available.
BERTHING: No cargo vessels. Fishing harbour handles fishing vessels and yachts.
MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.
DENSITY: Sea water.
FRESH WATER: Unlimited quantity available. Delivery from shore pipeline at the rate of 3 t.p.h.
FUEL: All grades available. Delivery by road tankers.
CONSULS: No local Consuls. Nearest port of availability is Hull.
REPAIRS: Limited engine and deck repairs.
REPATRIATION: No facilities exist for crew change.
AIRPORT: Yeadon, 45 miles, served by regular airlines.
HOLIDAYS: Normal Bank Holidays. Fish landings can be worked on these days.
POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambulance 0482 – 881198; Fire 73585.
TELEPHONES: No arrangements exist for placing telephones aboard.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: A skip is provided for depositing bagged garbage and other refuse.
WASTE OIL DISPOSAL: A tank (approx. capacity 160 galls.) is provided for waste sump oil, etc. Collection can be arranged through the Harbour Master's Office.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Bridlington Harbour Commissioners, Harbour Office, Harbour Road, Bridlington, Yorkshire YO15 2NR, United Kingdom. *Tel:* (0262) 670148/9. *FAX:* (0262) 602041. *Contact:* P.H.Thornton, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W. **(See Plan)**

DOCUMENTS:
1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).
In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the pilot station.

From the English and Welsh Grounds Lightfloat inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over and for vessels carrying dangerous substances in bulk of 70 m. LOA and over.

Boarding and landing station is one mile North of Breaksea Lanby. Pilots board from 50 ft. motor pilot boat, black hull, white superstructure, "Bristol and Gloucester Pilots" in white letters amidships, operating from Barry Harbour. Pilots can also board or clear at Ilfracombe. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0272) 822257. Fax: (0272) 235320. Telegraphic Address: "Brispilot Avonmouth". Details of rates and other particulars available from Haven Master, R.E. Dock Entrance, Avonmouth.
Dock pilotage: Pilotage all docks from locks to berth available but not compulsory.
ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot.
RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW.
MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., draft 40 ft.
Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.
Avonmouth Dock through Junction Cut from Royal Edward: Max. length 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Lands End (HF, VHF), Ilfracombe (HF, VHF), Celtic (VHF).
Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel. (0272) 224494 or by Fax (0272) 235320 or by Telex 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".
VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lanby, English and Welsh Grounds Light Float and Welsh Hook Buoy. Radar coverage of King Road area maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

In August 1991, there was a change of ownership of the port. First Corporate Shipping Ltd. acquired, on a long lease from Bristol City Council, the management and assets of the Port of Bristol, and now operates as the Bristol Port Company.

In general, conventional and combi vessels are handled at Avonmouth, with Royal Portbury catering for unit load traffic, Ro/Ro or dedicated user traffic.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths are equipped with shore cranes.

Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 25,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offers fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 18 and 10 hectares.

The Bristol Port Co., in a joint venture with National Power, is building the most advanced bulk terminal in Europe on Berths No. 5 and 6.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a £25 million plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. New for 1992 is Proton Cars of Malaysia, which has commenced construction of its new U.K. Headquarters, covering a 9 acre site.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.
BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times.
STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.
MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.
DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.
FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

GENERAL:
Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through "Braefoot Control".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.

2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.

3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.

4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.

5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.

6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.

7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.
DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.
FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

GENERAL:
Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through "Braefoot Control".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.

2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.

3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.

4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.

5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.

6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.

7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:
Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:
Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.
ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.
RESTRICTIONS: In accordance with state of tide and draft restrictions.
HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.
Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.
VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working 12 and 14.
TUGS: None available.
BERTHING: No cargo vessels. Fishing harbour handles fishing vessels and yachts.
MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.
DENSITY: Sea water.
FRESH WATER: Unlimited quantity available. Delivery from shore pipeline at the rate of 3 t.p.h.
FUEL: All grades available. Delivery by road tankers.
CONSULS: No local Consuls. Nearest port of availability is Hull.
REPAIRS: Limited engine and deck repairs.
REPATRIATION: No facilities exist for crew change.
AIRPORT: Yeadon, 45 miles, served by regular airlines.
HOLIDAYS: Normal Bank Holidays. Fish landings can be worked on these days.
POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambulance 0482 – 881198; Fire 73585.
TELEPHONES: No arrangements exist for placing telephones aboard.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: A skip is provided for depositing bagged garbage and other refuse.
WASTE OIL DISPOSAL: A tank (approx. capacity 160 galls.) is provided for waste sump oil, etc. Collection can be arranged through the Harbour Master's Office.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Bridlington Harbour Commissioners, Harbour Office, Harbour Road, Bridlington, Yorkshire YO15 2NR, United Kingdom. *Tel:* (0262) 670148/9. *FAX:* (0262) 602041. *Contact:* P.H.Thornton, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W. **(See Plan)**

DOCUMENTS:
1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).
In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the pilot station.

From the English and Welsh Grounds Lightfloat inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over and for vessels carrying dangerous substances in bulk of 70 m. LOA and over.

Boarding and landing station is one mile North of Breaksea Lanby. Pilots board from 50 ft. motor pilot boat, black hull, white superstructure, "Bristol and Gloucester Pilots" in white letters amidships, operating from Barry Harbour. Pilots can also board or clear at Ilfracombe. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0272) 822257. Fax: (0272) 235320. Telegraphic Address: "Brispilot Avonmouth". Details of rates and other particulars available from Haven Master, R.E. Dock Entrance, Avonmouth.
Dock pilotage: Pilotage all docks from locks to berth available but not compulsory.
ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot.
RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW.
MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., draft 40 ft.
Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.
Avonmouth Dock through Junction Cut from Royal Edward: Max. length 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Lands End (HF, VHF), Ilfracombe (HF, VHF), Celtic (VHF).
Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel. (0272) 224494 or by Fax (0272) 235320 or by Telex 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".
VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lanby, English and Welsh Grounds Light Float and Welsh Hook Buoy. Radar coverage of King Road area maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

In August 1991, there was a change of ownership of the port. First Corporate Shipping Ltd. acquired, on a long lease from Bristol City Council, the management and assets of the Port of Bristol, and now operates as the Bristol Port Company.

In general, conventional and combi vessels are handled at Avonmouth, with Royal Portbury catering for unit load traffic, Ro/Ro or dedicated user traffic.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths are equipped with shore cranes.
Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 25,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offers fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 18 and 10 hectares.

The Bristol Port Co., in a joint venture with National Power, is building the most advanced bulk terminal in Europe on Berths No. 5 and 6.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a £25 million plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. New for 1992 is Proton Cars of Malaysia, which has commenced construction of its new U.K. Headquarters, covering a 9 acre site.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.
BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times.
STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.
MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.
DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.
FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

GENERAL:
Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through "Braefoot Control".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.
2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.
3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.
4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.
5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.
6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.
7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:
Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.
ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.
RESTRICTIONS: In accordance with state of tide and draft restrictions.
HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.
Also see "Health – All Ports" before first U.K. port.
RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.
VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working 12 and 14.
TUGS: None available.
BERTHING: No cargo vessels. Fishing harbour handles fishing vessels and yachts.
MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.
DENSITY: Sea water.
FRESH WATER: Unlimited quantity available. Delivery from shore pipeline at the rate of 3 t.p.h.
FUEL: All grades available. Delivery by road tankers.
CONSULS: No local Consuls. Nearest port of availability is Hull.
REPAIRS: Limited engine and deck repairs.
REPATRIATION: No facilities exist for crew change.
AIRPORT: Yeadon, 45 miles, served by regular airlines.
HOLIDAYS: Normal Bank Holidays. Fish landings can be worked on these days.
POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambulance 0482 – 881198; Fire 73585.
TELEPHONES: No arrangements exist for placing telephones aboard.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: A skip is provided for depositing bagged garbage and other refuse.
WASTE OIL DISPOSAL: A tank (approx. capacity 160 galls.) is provided for waste sump oil, etc. Collection can be arranged through the Harbour Master's Office.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Bridlington Harbour Commissioners, Harbour Office, Harbour Road, Bridlington, Yorkshire YO15 2NR, United Kingdom. *Tel:* (0262) 670148/9. *FAX:* (0262) 602041. *Contact:* P.H.Thornton, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W. **(See Plan)**

DOCUMENTS:
1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).
In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the pilot station.

From the English and Welsh Grounds Lightfloat inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over and for vessels carrying dangerous substances in bulk of 70 m. LOA and over.

Boarding and landing station is one mile North of Breaksea Lanby. Pilots board from 50 ft. motor pilot boat, black hull, white superstructure, "Bristol and Gloucester Pilots" in white letters amidships, operating from Barry Harbour. Pilots can also board or clear at Ilfracombe. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0272) 822257. Fax: (0272) 235320. Telegraphic Address: "Brispilot Avonmouth". Details of rates and other particulars available from Haven Master, R.E. Dock Entrance, Avonmouth.
Dock pilotage: Pilotage all docks from locks to berth available but not compulsory.
ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot.
RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW.
MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., draft 40 ft.
Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.
Avonmouth Dock through Junction Cut from Royal Edward: Max. length 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Lands End (HF, VHF), Ilfracombe (HF, VHF), Celtic (VHF).
Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel. (0272) 224494 or by Fax (0272) 235320 or by Telex 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".
VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lanby, English and Welsh Grounds Light Float and Welsh Hook Buoy. Radar coverage of King Road area maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

In August 1991, there was a change of ownership of the port. First Corporate Shipping Ltd. acquired, on a long lease from Bristol City Council, the management and assets of the Port of Bristol, and now operates as the Bristol Port Company.

In general, conventional and combi vessels are handled at Avonmouth, with Royal Portbury catering for unit load traffic, Ro/Ro or dedicated user traffic.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths are equipped with shore cranes.

Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 25,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offers fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 18 and 10 hectares.

The Bristol Port Co., in a joint venture with National Power, is building the most advanced bulk terminal in Europe on Berths No. 5 and 6.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a £25 million plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. New for 1992 is Proton Cars of Malaysia, which has commenced construction of its new U.K. Headquarters, covering a 9 acre site.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.
BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times.
STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.
MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.
DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.
FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

GENERAL:
Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports Authority is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports Authority, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through "Braefoot Control".

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.
2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.
3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.
4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.
5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.
6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.
7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:
Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" – pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:
Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restrictions.

HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route ETA, etc.

VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working 12 and 14.

TUGS: None available.

BERTHING: No cargo vessels. Fishing harbour handles fishing vessels and yachts.

MEDICAL: Agents require advance notice of required medical attention. Hospital facilities available. Relevant medical information, i.e. fever, etc., required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from shore pipeline at the rate of 3 t.p.h.

FUEL: All grades available. Delivery by road tankers.

CONSULS: No local Consuls. Nearest port of availability is Hull.

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Fish landings can be worked on these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambulance 0482 – 881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones aboard.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: A skip is provided for depositing bagged garbage and other refuse.

WASTE OIL DISPOSAL: A tank (approx. capacity 160 galls.) is provided for waste sump oil, etc. Collection can be arranged through the Harbour Master's Office.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Bridlington Harbour Commissioners, Harbour Office, Harbour Road, Bridlington, Yorkshire YO15 2NR, United Kingdom. *Tel:* (0262) 670148/9. *FAX:* (0262) 602041. *Contact:* P.H.Thornton, Harbour Master.

BRISTOL (Avonmouth): 51.30 N. 02.42 W. **(See Plan)**

DOCUMENTS:
1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

APPROACHES: *Cautionary Advice:* Several points should be borne in mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) and their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the pilot station.

From the English and Welsh Grounds Lightfloat inwards, navigation becomes more difficult as the channel for deep draft vessels narrows. Traffic is heavier and more congested with vessels entering and leaving the docks, some of which are small vessels without Pilots.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over and for vessels carrying dangerous substances in bulk of 70 m. LOA and over.

Boarding and landing station is one mile North of Breaksea Lanby. Pilots board from 50 ft. motor pilot boat, black hull, white superstructure, "Bristol and Gloucester Pilots" in white letters amidships, operating from Barry Harbour. Pilots can also board or clear at Ilfracombe. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0272) 822257. Fax: (0272) 235320. Telegraphic Address: "Brispilot Avonmouth". Details of rates and other particulars available from Haven Master, R.E. Dock Entrance, Avonmouth.

Dock pilotage: Pilotage all docks from locks to berth available but not compulsory.

ANCHORAGES: Barry Road affords good anchorage in moderate weather for vessels awaiting a Pilot.

RESTRICTIONS: Royal Portbury and Royal Edward Locks are manned from 4.5 hours before to 3.5 hours after HW.

MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 130 ft., draft 40 ft.

Royal Edward: Max. length 690 ft., max. beam 95 ft., draft 34 ft.

Avonmouth Dock through Junction Cut from Royal Edward: Max. length 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Note: The above quoted drafts are for tides that reach below Mean High Water i.e. on many tides a greater draft could be accommodated, on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: Lands End (HF, VHF), Ilfracombe (HF, VHF), Celtic (VHF).

Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel. (0272) 224494 or by Fax (0272) 235320 or by Telex 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".

VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lanby, English and Welsh Grounds Light Float and Welsh Hook Buoy. Radar coverage of King Road area maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Ships for Royal Portbury Docks are normally met by tugs West of Portishead.

Other vessels docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys. Ship's line always used.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

In August 1991, there was a change of ownership of the port. First Corporate Shipping Ltd. acquired, on a long lease from Bristol City Council, the management and assets of the Port of Bristol, and now operates as the Bristol Port Company.

In general, conventional and combi vessels are handled at Avonmouth, with Royal Portbury catering for unit load traffic, Ro/Ro or dedicated user traffic.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipe-line systems. The majority of berths are equipped with shore cranes.

Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 25,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offers fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 18 and 10 hectares.

The Bristol Port Co., in a joint venture with National Power, is building the most advanced bulk terminal in Europe on Berths No. 5 and 6.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a £25 million plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. New for 1992 is Proton Cars of Malaysia, which has commenced construction of its new U.K. Headquarters, covering a 9 acre site.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.

BRIDGES: Avonmouth Docks. Junction between Avonmouth Dock and Royal Edward available at all times.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.

FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

BANKS: National Westminster Bank Ltd., 1 Gloucester Road, Avonmouth. Tel: 823991.
Barclays Bank Ltd., Gloucester Road, Avonmouth. Tel: 822814.
Lloyds Bank Ltd., 265 Avonmouth Road, Avonmouth. Tel: 827191/2.
(Major international banks located in Bristol's finance sector centred mainly around the "Corn Street" locality).
SHIP SUPPLY SERVICE: At Avonmouth limited services could be provided by the tug company, Cory-King, Towage, Tel: (0272) 822021.
The Pilotage Authority occasionally assists with sick crew members, limited numbers of personnel and small packages. Tel: (0272) 822354.
IDENTIFICATION CARDS: Not necessary unless being repatriated.
GARBAGE DISPOSAL: Palladin bins available throughout the docks. Free collection twice weekly. Bins placed alongside at ship's request, £ 15 charge for ship's stay. Waste is incinerated by Port Authority, as is dunnage. Contact Keith Young. Tel: 820000.
WASTE OIL DISPOSAL: Drums placed around dock for oily waste. Waste oil is collected by Port Authority and is taken to motor shop and recycled (750 galls. tank). If ship's waste is in ship's own drums, the Port Authority will collect on request. Private companies can be contracted by ship if required.
SEAMAN'S CLUBS: Avonmouth International Seafarers Centre, Gloucester Road, Avonmouth, Bristol. Tel: 0272-822335. Facilities include shop, telephone, postal facilities, currency exchange, snooker, pool, table tennis, chapel, TV and video, books, bar and transport on request.
CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.56 (10.6.92).
DEVELOPMENTS: See "Berthing".
AUTHORITY: The Bristol Port Company, St.Andrew's Road, Avonmouth, Bristol BS11 9DQ. *Tel:* (0272) 820000. *Telex:* 44240. *FAX:* (0272) 820698. *Contact:* T. Mordaunt, Chairman.

AGENT: LHW Shipping, Avonmouth Docks, Avonmouth, Bristol BS11 9DN. Tel: (0272) 823251. After office hours: (0454) 633490. Telex: 449059. Fax: (0272) 826272. Cables: "James Avonmouth".

BRIXHAM: 50.24 N. 03.30 W. (See Plan)

PORT LIMITS: The area below the level of high water enclosed by:
(a) An imaginary line drawn from Shoalstone Point in the Parish of Brixham, extending in a W.N.Westerly direction for a distance of 6,500 ft. or thereabouts, until it intersects the imaginary line next described:
(b) An imaginary line drawn from the centre of the Old Quarry at O.S. Ref. SX91445723, in a N.Easterly direction for a distance of 3,000 ft., or thereabouts, until it intersects the imaginary line first described, and:
(c) The land line of the coast from the centre of Old Quarry aforesaid to the said Shoalstone Point.
DOCUMENTS:
1 Crew List,
1 Passenger List,
2 General Declarations (Customs),
1 Health Document,
1 Manifest,
1 Each Bill of Lading,
1 Ship's Papers,
1 Ship's Certificates,
or
as for other small U.K. Ports.
PILOTAGE: Competant Harbour Authority (C.H.A.) pilot. Tel. Brixham (0803) 882214. If no reply after hours, Tel. Brixham (0803) 882060.
DEEP SEA AND COASTAL PILOTAGE: Pilots for all European and U.K. ports including the Baltic.
Ships requiring a Pilot at Brixham should cable at least 48 hours before arrival to "Hutchinson, Gravesend" or "Hammond, Dover" advising and updating ETA Brixham.
2 hours before arrival Brixham – contact "Brixham Pilots" on VHF Channel 9. Pilots board by fast launch 1 mile N.E. Berry Head (or by arrangement). Pilot boats, length 40 ft. and 50 ft., black hull, orange wheelhouse, with "Pilot" in black on wheelhouse. Listening VHF Channel 9.
Also see "London" – Pilotage.
ANCHORAGES: In Torbay or outside port limits. Contact pilot station on VHF Channel 9 for advice.
MAX. SIZE: Unlimited at anchor. Also see "Berthing".
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Landsend Radio/Niton Radio/Portishead Radio.
VHF: Brixham Coastguard – Channel 16.
Harbour Office – "Brixham Port Radio" – Channels 16 and 14.
Pilots and/or Agents – "Brixham Pilots" – Channel 9.
TUGS: By arrangement.
BERTHING: Small coastal vessels in inner harbour by arrangement with Harbour Master, however M.F.V.'s have priority for berthing. Prince William Marina is situated in S.E. corner of outer harbour (see "Plan"). Tel. Brixham (0803) 882711 or VHF Channel 37.
CRANES: 1×8 tons.
MEDICAL: Contact Brixham and Torbay Shipping Agents.
DENSITY: 1025.
FRESH WATER/FUEL: Available by arrangement.
REPAIRS: Electronic, gyro, engine welding, plumbing by local firms.
SURVEYORS: West Marine Surveyors & Consultants Limited. Consulting Marine Surveyors, Engineers & Naval Architects, Totnes, Devon. Tel: Totnes (0803) 865810, 865835. Telex: 42962 Survey G.
REPATRIATION: See "Services".
AIRPORT: Exeter 35 miles away, Plymouth 34 miles away (daily flights to/from London).
POLICE/AMBULANCE/FIRE: Brixham 2231 or 3065 or 999.
SERVICES: No tank cleaning.
Torbay and Brixham Shipping Agents Ltd. (0803) 882214. Telex 42737. Cables: Dencade. VHF: Channel 9 and 16. Services offered: Boarding and landing deepsea and river pilots, technicians/service engineers, superintendents, repair squads, surveyors, crew changes, full repatriation facilities, medical assistance, divers/underwater inspections, chemist, charts/publications, compass adjuster, spares, stores, provisions, engine/radio/radar/gyro repairs.
Small loads and personnel by fast launch.
Supply boats/barge facilities for storing.
Vessels serviced off-limits, underway or safe deep water anchorage.
SHORE LEAVE: Allowed.
GARBAGE DISPOSAL: Collection service available. Skips provided alongside. Contact Haul Waste. Tel: 0803-557181. Cleanaway. Tel: Bovey Tracey 833755.
WASTE OIL DISPOSAL: No waste oil disposal system or service is available. Collection may be arranged through BCS Waste Oil Ltd., Unit 2, Whittons Yard, Station Road, Cullompton. Tel: 0884-33316 J.R.Transport, Honiton, Devon. Tel: 0404-84378. 3,000 gallons capacity per tanker.
SEAMAN'S CLUBS: Royal National Mission to Deep Sea Fishermen, Overgang, Brixham, TQ5 8AR. Tel: 0803-859123. Facilities include telephone, church services, postage, cafe.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Borough of Torbay, Town Hall, Torquay, TQ1 3DR, United Kingdom. *Tel:* (0803) 296244, ext. 356. *Telex:* 42929. *FAX:* 0803-26244, ext. 337. *Contact:* Captain R. Wells, Harbour's Administrator. Captain R. Knowles, Harbour Master. J.A.Karon, Deputy Harbour Master. Mr.D.B.Booth, Deputy Harbour Master.

BUCKIE: 57.41 N. 02.57 W. (See Plan)

PILOTAGE: Pilots keep VHF watch (Channel 16) 1 hour prior to arrival of vessel.
ANCHORAGES: 1 mile West of West Mucks Beacon.
RESTRICTIONS: Vessels with max. draft berth/sail at HW only.
MAX. SIZE: LOA 82 m., beam 12 m., draft 4.5 m.
BERTHING: Depth at entrance 3.3 m. below LAT. Depth alongside 5.2 m. below LAT.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Deck, engine, radio and radar repairs undertaken.
AIRPORT: Dyce (Aberdeen), 55 miles away.
GARBAGE DISPOSAL: Drums and skips are provided alongside. No charges at present. Collection is at the Harbour Master's discretion.

WASTE OIL DISPOSAL: Limited waste oil disposal service available.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Harbour Master – Buckie, Harbour Office, 28B Commercial Road, Buckie AB56 1SB. *Tel:* 0542 – 31700. *Telex:* 739148 (Ref-328). *FAX:* 0542-34742. *Cables:* "Harbourmaster". *Contact:* Captain W.S.Mackay, Harbour Master.

Grampian Regional Council, Woodhill House, Westburn Road, Aberdeen AB9 2LU.

BUDE: 50.50 N. 04.33 W. (See Plan)

DOCUMENTS/HEALTH/CONSULS: Port not equipped to accept vessels from abroad.
PILOTAGE: Not normally available (special arrangements may be made).
ANCHORAGES: Outer Harbour dries out at half tide.
Inner Harbour (Canal) 8 ft. draft maximum.
MAX. SIZE: Inner Harbour (Entry via Lock): Length 90 ft. Beam 25 ft. Draft 8 ft.
RADIO: MF Ilfracombe Radio. VHF Severn and Celtic Radio.
VHF: Bude Harbour Office listens on VHF Channel 16 when a vessel is expected.
FRESH WATER: Available via 0.5 in. hose pipe.
TELEPHONE NUMBERS: Harbour Master Bude 353111 (Office), Bude 354719 (Home), Coastguard Falmouth (0326) 317575*, Police Bude 352131.
*Nearest Coastguard.
GENERAL: Port little used by commercial shipping.
GARBAGE DISPOSAL: By arrangement.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
SPECIAL REGULATIONS: Entry to the Harbour is made by leaving Chapel Rock (linked to the Main Land by a Breakwater) to starboard. Head towards the Lock in the Channel marked by 2 pairs of Leading Beacons.

The outer pair of Beacons, bearing 075° 30′ (T) consist of a front mark – white Spar with Yellow Diamond Topmark, rear mark – white flag staff, both on cliff top on North side of Harbour.

The inner pair of Beacons, bearing 131° 30′ (T) consist of a front beacon – white Pile Beacon with Yellow Triangle Topmark, rear beacon – white spar with Yellow Triangle Topmark, placed 0.5 cable West of Lock Entrance.

The approach to Bude, either from the North or South, should be made from a S.W. direct direction in line with the first pair of Leading Marks.

Immediately on passing Barrel Rock (0.5 cable North of Chapel Rock and marked by a Beacon Barrel) turn to starboard and pick up the inner pair of Leading Marks from which the Lock is clearly visible.

Entry to the Harbour at night not recommended.

Heavy ground swell and breaking seas may prohibit entry and exit.

The Harbour dries out at each Tide and entry of vessels is normally restricted to 2 hours either side of High Water.

For Locking, 18 ft. minimum of water above Chart Datum is required to Lock. A heavy swell may also prohibit the operation of the Lock.

Prior notification of arrival should be made to the Harbour Master if possible.
AUTHORITY: North Cornwall District Council, Trevanion Road, Wadebridge, Cornwall PL27 7NU. *Tel:* (0208) 815073 or (0288) 353111. *FAX:* (0208) 815316. *Contact:* M.G.Vanstone, Harbour Master (Home *Tel:* (0288) 354719).

BURNTISLAND: 56.03 N. 03.14 W. (See Plan)

DOCUMENTS: See "Leith".
PILOTAGE: Compulsory. See "Leith".
RESTRICTIONS: Dock gates normally opened from 3 hours before HW until HW.
MAX. SIZE: Width of dock gate 18.2 m. Max. width through gates 16.8 m. Max. depth 8.6 m. MHWS.
RADIO: See "Leith".
RADAR/VHF: Through Forth Navigation Service from Leith.
TUGS: Available from Leith.
BERTHING: 443 m. of quayage at East Dock. Depth 8.6 m. MHWS.
CRANES: 2×10 tonnes grabbing cranes. Mobile cranes available.
BULK CARGO FACILITIES: Bauxite vessels discharge into 2×8,000 tonne barges at anchor. The barges are unloaded by shore cranes in the East Dock.
STEVEDORES: Forth Ports Authority. Tel: (0333) 26725.
REPAIRS: Fabrication yard situated in West Dock. 2×300 ft.×85 ft. bays, depth 19 ft. Local repair companies available.
GARBAGE DISPOSAL: No service is available at the port. All garbage collection is arranged via ship's agents who maintain a list of contractors offering this type of service.
WASTE OIL DISPOSAL: No service is available at the port. All garbage collection is arranged via ship's agents who maintain a list of contractors offering this type of service.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Forth Ports Authority. All enquiries to Forth Ports Authority, Dock Office, Methil, Fife KY8 3RE. *Tel:* (0333) 26725. *Telex:* 72208. *FAX:* (0333) 24873. *Contact (at Methil):* Captain T. S. Sutherland, Port Superintendent. *Tel:* Leven (0333) 26725.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when they have entered the sea lock structures.
DOCUMENTS: Masters of craft on through passage must report to the Sea Lock Office at Corpach with the ship's measurement certificates to enable toll declaration to be made. Masters of craft on partial passage starting and returning to the East coast should report to the Clachnaharry Canal Office.
PILOTAGE: Approach pilotage compulsory at Inverness end. Contact Inverness Pilots by Link Call through Inverness 232845 or 235264 (Ships of NRT under 100 tons are exempted). Pilotage within the Canal and West approaches optional. For Pilotage into Corpach from the West contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and for Canal Pilotage, by Link Call to Caledonian Canal Office, Inverness 233140.
RESTRICTIONS: Entrances to sea locks restricted for 2 hours either side of LW springs. There is generally no restriction at LW neaps. The Canal is operated on normal manning from 0800 hrs. until 1700 hrs. (Sundays excepted).
MAX. SIZE: 48.77 m. (160 ft.) length overall × 10.67 m. (35 ft.) beam × 2.74 m. (9 ft.) draft fresh water or, alternatively, 45.72 m. (150 ft.) × 10.67 m. (35 ft.) × 4.11 m. (13 ft. 6 in.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of size 61.87 m. (203 ft.) length overall × 10.67 m. (35 ft.) beam × 4.11 m. (13 ft. 6 in.) draft fresh water.

All dimensions are overall and *NOT* moulded.
HEALTH: Vessels from foreign ports will be boarded by the Customs/Immigration/Health at the sea locks and they should fly the appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.
RADIO: Western approaches via Oban Radio. Eastern approaches via Wick or Stonehaven Radio.
VHF: VHF at Corpach Sea Lock. Call Sign "Corpach Dock".
RADAR: None.
TUGS: A Canal tug is available if required. Service should not be required on normal passage.
BERTHING: At Corpach Old and New Wharves (limited Customs approval). At Inverness Glenmhor and Glen Albyn Wharves below Muirton and Upper Muirton Wharf at the top of Muirton. Water depth available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear or road mobile cranes used.
BRIDGES: Road and rail swing bridges are operated to permit the passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhead electric cables near Inverness.

Kessock Bridge at Inverness: Headroom restricted to 28.96 m. (95 ft.) over HW springs.
STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpach unloaded by Pulp Mill gangs. Elsewhere arranged through Shipping Agent.
MEDICAL: Normal General Practitioners service available at main centres along the Canal. Full Hospital facilities at Inverness.
FRESH WATER: Fire hose supply available at Glen Albyn Wharf, Inverness. Small domestic supplies available at the main lock flights.
FUEL: Available by road tanker from principal oil companies by telephoning Shell, Inverness 238850 or Fort William 2404; Esso, Inverness 237222 or Fort William 2903.
REPAIRS/DRY DOCK: Limited repairing facilities at the Inverness Boatbuilding, Inverness.

Dry dock facilities at Lochaber Marine, Corpach.
AIRPORT: Highlands and Islands domestic flights from Inverness (Dalcross).
POLICE/FIRE/AMBULANCE: Emergency calls to these services on 999.
GARBAGE DISPOSAL: Eurobins at all locations.
WASTE OIL DISPOSAL: This can be arranged through local companies.
SEAMAN'S CLUBS: None.
GENERAL: The Caledonian Canal is part of the Customs Port of Inverness.
AUTHORITY: British Waterways Board. Caledonian Canal Office, Seaport Marina, Muirtown Wharf, Inverness IV3 5LS. *Tel:* Inverness (0463) 233140. *FAX:* (0463) 710942.
Contact: At Corpach: Mr. P. Kennedy. Tel: (03977) 249. At Inverness: Mr. H. Ross, Waterway Supervisor. Tel: (0463) 233140.

CAMPBELTOWN: 55.25 N. 05.36 W. (See Plan)

DOCUMENTS: 2 Crew Lists; 2 Passenger Lists; 1 Store List; 1 Personal Effect List; Ship's Register; 1 Manifest or Bill of Lading.
PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.

ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe Bank Buoy, for smaller vessels a wider area can be used but South side of loch best holding.

HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first U.K. port.

RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents.

RADAR/VHF: No port radar service. Direct contact with Harbour Authority on VHF Channels 12, 13 and 14. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.

TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further North on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.

BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissible draft 12 ft. (Salt water). Discharge by shore crane. Maximum lifting 5 tons.

SPECIALISED CARGO HANDLING FACILITIES: One berth for Roll-on/Roll-off ferry inside harbour, max. draft of vessel 12 ft. General cargo discharged.

STEVEDORES: Agents arrange all cargo discharges, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.

MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by air or road, according to condition. Five local doctors.

TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/552226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.

FRESH WATER: Available at all times, delivery by hose.

FUEL: Marine gas oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.

REPAIRS: Minimal repairs only. Notify Agent as early as possible.

SURVEYORS: Arrange through shipping Agents.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Ship's option.

CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.

REPATRIATION: Air service available once daily in forenoon, except Sunday.

AIRPORT: Machrihanish – 3 miles distant.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: New Years Day (1st January) Christmas Day, Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight in August.

Work can be carried out by arrangement with Stevedores.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: Coastguard, New Quay, Campbeltown, Tel: 2770.

TELEPHONES: By arrangement.

SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.

IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.

BANKS: Bank of Scotland, 9 Longrow, Campbeltown. Tel: 552274.

Royal Bank of Scotland, 11 Castlehill, Campbeltown. Tel: 553617.

Clydesdale Bank, 19 Longrow, Campbeltown. Tel: 552130.

Trustees Savings Bank, Bolgam Street. Tel: 552550.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

GARBAGE DISPOSAL: Skips are provided on the quay and are collected on Tuesdays and Thursdays.

WASTE OIL DISPOSAL: No service available locally.

SEAMAN'S CLUBS: No Seamen's Clubs. Sporting events can be arranged with prior notice to local clubs.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5623.

GENERAL: Basin of the Clyde Lat. 55° 25′ 0″ N., Long. 5° 35′ 30″ W.

Yacht pontoons available, to the North of the Old Quay. Dredged to 3.0 m. MLWST to accommodate 40 yachts.

Tides: Spring rise 8.9 ft; Neap rise 7.5 ft.; depth at sea entrance, 12 ft. low water spring tide; there is a rise of 8 ft. in spring tide in harbour.

AUTHORITY: Strathclyde Regional Council, Harbour Office, Old Quay, Campbeltown. *Tel:* Campbeltown (0586) 552036 or 552552. *FAX:* (0586) 554739. *Contact:* W.MacDonald, Harbour Master, Campbeltown.

P.O.L. Depot, Campbeltown. Officer-in-Charge, Kilkerran Road, Campbeltown.

CARDIFF: 51.29 N. 03.10 W. (See Plan)

PORT LIMITS: A vessel is considered as "arrived" when it is in the lock.

DOCUMENTS: Documentation required for arrival:

C142	2 copies	Crew Declaration
C14	3 copies	Stores Declaration
C13	2 copies	General Declaration (completed by Agent)
C16	2 copies	Cargo Inward Declaration
C74	1 copy	Master's Authority (Agents complete)
C1320	2 copies	Cargo in un-registered spaces

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.

PILOTAGE: Pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

A.B.P. Pilot cutters are marked with "Pilots" in white on each side and operate radio continuous watch on VHF. Tel: Barry (0446) 498180. Minimum of 24 hours notice required of ETA. VHF Channels 16, 9, 14 and 11.

ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 m. to 11 m.) about 0.5 miles S.W. of the entrance to Barry Docks. Clay bottom.

RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.

MAX. SIZE:

Queen Alexandra Dock: LOA 650 ft., beam 88 ft. 3 in., max. draft 34 ft.

Roath Dock: LOA 650 ft., beam 85 ft., max. draft 33 ft.

Vessels near maximum dimensions may be accepted on certain tides after consultation with the Dock and Harbour Master.

HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No Pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Ilfracombe Radio and Portishead Radio.

VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14 or Channel 11. There is also "Severn Radio".

TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.

BERTHING: Arranged through Dock and Harbour Master, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.

Dock	*Quay Length (Total) (m.)*	*Normal Depth of Water (m.)*	*Max. Size of Vessel Length (m.)*	*Beam (m.)*	*Draft (m.)*	*Approx. d.w.t.*
Queen Alexandra	2,234	11.3	198.12	26.9	10.37	33,000
Roath Dock and	2,181	11.0	198.12	26.06	10.37	33,000
Roath Basin	1,174	11.0	158.00	21.30	8.50	18,000

Storage and Warehousing Facilities: Quayside: 5 transit sheds – 32,810 sq.m. (351,050 sq.ft.).

Back sheds: 13,870 sq.m. (149,280 sq.ft.).

Open storage: 8.7 hectares (21.5 acres) with a further 17.4 hectares (43 acres) managed by independent terminal operators.

Cranage and Mechanical Handling: Crane capacity: 1×15 tonnes; 8×7.5 tonnes; 3×5 tonnes; 7×3 tonnes.

2 additional 10 tonne grabbing cranes are provided by a terminal operator within the docks. The port provides a fleet of fork lift trucks for quayside cargo handling ranging from 4,000 lb. to 88,000 lb. capacity.

SPECIALISED CARGO HANDLING FACILITIES:

(i) Cold Storage: King's Wharf Cold Store, owned by Associated British Ports has a capacity of approximately 9,000 tonnes and can operate with temperatures down to −20°C.

(ii) Cool Storage: Cool store with a capacity of approximately 60,000 cartons at any one time. The store is equipped with cooling machinery to maintain temperatures at 50°F – 55°F. (10°C – 13°C.).

(iii) Timber Terminals: Bulk carriers received at deep water berths, discharge of 2,000 cu.m. of timber in a single gang shift, large hardstanding storage areas plus covered accommodation for woodpulp and specialised timber products.

(iv) Combi Vessels. A modern front loading truck of 40 tonne capacity, capable of stowing containers three-high, available for handling.

(v) Bulk Cargoes: 1 grain loading appliance.

(vi) 2 Scrap Berths.

BRIDGES: Bridges throughout the port can be operated on tide times.

STEVEDORES: Arrangements for employment of stevedores undertaken by A.B.P. through ship's Agent.

Port Working Hours:

	Day Work	*Shift Work*
Monday – Friday	0700 – 1630	0600 – 1400 1400 – 2200
Saturday	0700 – 1130	0600 – 1000 1000 – 1400
Sunday	0600 – 1400	0600 – 1400 1400 – 2200

Vessels may also choose to work 0700 – 1630 (2 hours extra to finish if need be), Monday – Friday.

MEDICAL: All facilities available. Agents should be advised in advance if medical services required.

TANKERS: 2 tanker berths available, one in Queen Alexandra Dock and one in Roath Dock. Special instructions are issued to Master on arrival at port. Average discharge approximately 448 cu.m.p.h.

DENSITY: 1008-1018.

FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.

FUEL: Fuel of all grades available.

FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures.

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at Berth, (name of berth)". In event of the ship-to-shore telephone being inaccessible or out of order, use short blasts on ship's siren to alert Police and Port Authority. VHF can be used on tide times.

REPAIRS: All types of repairs possible.

DRY DOCKS:

	Length	Width at Entrance
Bute Dry Dock	182 m. (597 ft.)	21.7 m. (71 ft.)

Bute Dry Dock owned and operated by Bristol Channel Ship Repairs Ltd.

GANGWAY/DECK WATCHMEN: Performed by ship's crew and necessary for tankers.

OPENING/CLOSING HATCHES: Carried out by ship's crew.

CUSTOMS ALLOWANCES: Usual U.K. allowances.

REPATRIATION: Facilities exist to exchange crews and repatriate to any part of world.

AIRPORT: Airport 11 miles from Cardiff, serving other airports to all parts of world.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Whit Monday (Spring Holiday); May Day (1st Monday in May); August (Summer Holiday) one day; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 999 on public telephone service and ask for service required, or short blasts on ship's siren to alert Dock and Harbour Master.

TELEPHONES: Ship/Shore telephone supplied at certain berths – service organised through ship's Agent.

SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their Tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: A covered skip can be provided by the port authority on request. The charge is £70 and this facility can be arranged on application to Dock and Harbour Master.

WASTE OIL DISPOSAL: Service available by road tanker only.

SEAMAN'S CLUBS: The Mission to Seamen, Maritime Road, Bute Docks, Cardiff. Tel: 0222-487634.

CURRENCY: U.K.Pound (U.K.£).

GENERAL: Cardiff is a port which has very big range of tides and important that accurate ETAs and max. drafts supplied by ship's Master in order that Agent may place orders for tugs and Pilots in sufficient time to be in attendance when required.

AUTHORITY: Associated British Ports – Cardiff and Barry, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH, United Kingdom. *Tel:* (0222) 471311. *Telex:* 498542 ABPCB G. *FAX:* (0222) 471100. *Contact:* B. J. Harding, Port Manager. J.P.L. Davey, Operations Manager. Captain R.S. Grubb, Dock and Harbour Master.

CARRICKFERGUS: 54.43 N. 05.48 W. (See Plan)

PORT LIMITS: No. 1 Buoy Belfast Lough.

DOCUMENTS:

2 Crew Lists,
2 Passenger Lists,
1 Stores List,
1 Personal effects List,
Ships Register,
1 Manifest or Bill of Lading.

PILOTAGE: Port Pilotage not compulsory but advisable. Pilots based at Carrickfergus Harbour. All Pilotage carried out by Belfast Pilots. Pilots board at No. 1 Buoy, Belfast Lough. Pilots can be contacted by VHF Channel 12.

ETA Messages: Advise Agents at least 24 hours before arrival through any British Coast Station and Pilots not less than 1 hour before arrival. (A) ETA No. 1 Buoy (B) ETA GMT or BST (C) Draft SW.

ANCHORAGE: Midway between Harbour and Greypoint.

HEALTH: No Certificates required, in event of disease contact Agents. Also see "Health – All Ports" before first U.K. port.

RADAR/VHF: No Port Radar Service. Harbour VHF Channels 14, 12 and 16 operated approximately 3 hours before HW to 1 hour after if ships are due. Contact Harbour on Channel 16.

TUGS: Tug available in harbour. Notice required 30 minutes.

BERTHING: Harbour Tidal:

Depth alongside all berths MHWST	4.88 m.
Depth alongside all berths MLWST	1.83 m.
Max. draft of vessels	4.88 m.
Max. Beam of vessels	12.20 m.
Width at entrance	19.80 m.
Quays:	
Length of Commercial Quay	278 m.
No. 1 Berth (Caustic Acid)	64 m.
No. 2 Berth (Tanker Berth)	74 m.
No. 3 Berth (Most bulk cargoes)	76 m.
No. 4 Berth (Coal,Sulphur, Meal, etc.)	64 m.

Vessels discharging take bottom on soft mud.

Average discharge 2 grabs 150 t.p.h. at No. 3 and 4 Berth.

STEVEDORES: Provided by Messrs. John Kelly Ltd., Tel: 62612. Telex: 74210 and Kane Shipping, Tel: 51999.

MEDICAL: One hospital available.

TANKERS: Discharge controlled by Texaco Ltd., as plant is owned by them privately. Rate of discharge approximately 200 t.p.h. 2×8 in. diameter pipes and 1×6 in. pipe.

Usual safety precautions prevail.

Tankers not to enter port without permission of Harbour Master.

Max. draft MHWST 4.88 m.

DENSITY: 1024.

FRESH WATER: Supplied alongside quay approximately 10 t.p.h.

FUEL: Supplied by road tankers. All grades available from major Oil Companies.

CONSULS: None. Most countries are represented at Port of Belfast approximately 9 miles from harbour.

REPAIRS: Light repairs and welding only major repairs can be arranged at Belfast.

DRY DOCKS: None. Nearest at Belfast.

SURVEYORS: Most Classification Societies based at Belfast.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: All vessels by crew.

CERTIFICATES: Ship's Register on arrival.

CUSTOMS ALLOWANCES: 200 cigarettes each crew member. Spirit, wine, etc., at discretion of Water Guard.

CARGO GEAR: Three crawler mounted diesel grab cranes, 3,100 kg. and 3,045 kg.

REPATRIATION: Good facilities for crew changes. Good railway and bus services.

AIRPORT: Belfast Airport approximately 22 miles served by regular lines.

TIME: GMT, plus 1 hour in Summertime.

HOLIDAYS: New Years Day, Easter Monday and Tuesday. 12th and 13th July, Christmas Day and Boxing Day.

POLICE/FIRE/AMBULANCE: Carrickfergus 62021.

TELEPHONES: Not possible to place on board. Good phone service convenient to ships.

SERVICES: All services readily available from Port of Belfast.

SHIP SUPPLY SERVICE: Off-shore service operated from the Port of Carrickfergus by 2 tugs, the "Ceres" and "Cobh".

Lagan Marine Services, 2 Downhill Park, Newtownabbey, Co. Antrim, BT36 6TX, Northern Ireland. Tel: Glengormley 2353, Belfast 746051.

GARBAGE DISPOSAL: Skips provided for general garbage but no galley slops allowed. They are collected once weekly by Carrickfergus Borough Council, free of charge.

WASTE OIL DISPOSAL: Service available using 16 tonne tanker trucks. Contact Irish Waste, 116-120 Duncrue St., Belfast BT3 9AR, Tel: Belfast 746327.

SEAMAN'S CLUBS: Nearest seamans clubs are in Belfast, 12 miles distant. Mission to Seamen and Stella Maris.

CURRENCY: U.K.Pound (U.K.£).

SHORE LEAVE: After clearing inwards no restriction on shore leave.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Carrickfergus Borough Council and Harbour Master, Town Hall, Carrickfergus, Co. Antrim, BT38 7DN. *Tel:* (09603) 51604 (Council) 51292 (Harbour Master). *FAX:* (09603) 66676 (Harbour Master). *Contact:* Captain R. S. Heddles, Harbour Master/Manager.

CASTLETOWN, Isle of Man: 54.04 N. 04.40 W.

PORT LIMITS: Castletown Bay, North of line between Scarlet Point and Langness Lighthouse.

DOCUMENTS: Same as U.K.

PILOTAGE: If required, Pilot will board East of can buoy in bay.

ANCHORAGE: About 2 cables East of red can buoy. Exposed to S.-S.W.'ly weather.

RESTRICTIONS: Berthing at HW only. Max. draft 11.5 ft. Springs, 9.5 ft. Neaps.

MAX. SIZE: LOA 170 ft., beam 27.5 ft., draft subject to tides.

HEALTH: Same as U.K. ports.

VHF: Calling Channel 16, working Channel 12. Listening only when vessels due.

TUGS: None.

BERTHING: 4 berths, 170 ft. max. length. All dry out.

CRANES: Mobile crane, SWL 7.5 tons available.

BRIDGES: At entrance to Inner Harbour. Opened on request.

STEVEDORES: 24 hours notice should be given to Agent.

MEDICAL: Full hospital facilities available.

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available ex-hydrant at all berths.

FUEL: Diesel available.

FIRE PRECAUTIONS: Usual.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: None.

SURVEYORS: I.O.M. Harbour Board, Marine Administration. Tel: (0624) 23813. Telex: 629335 Iomhar G.

HATCHES: Crew or stevedores to operate hatches.

CUSTOMS ALLOWANCES: Same as U.K.

CARGO GEAR: Ship's gear or mobile crane used.

AIRPORT: 2 miles away. Daily flights to U.K. and Eire.

TIME: GMT and BST.

HOLIDAYS: December 25th and 26th, January 1st and 2nd, Good Friday, Easter Monday, Spring Bank Holiday, July 5th and August Bank Holiday.

POLICE/AMBULANCE/FIRE: Police – Tel: 0624-822222. Ambulance/Fire – Tel: 999.

EMERGENCY CO-ORDINATION CENTRE: Liverpool Coastguard, Tel: 051-9313341.

SERVICES: Compass adjusting.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book sufficient.

AUTHORITY: Department of Highways, Ports and Properties, Harbour's Division, Sea Terminal Buildings, P.O.Box 11, Douglas, Isle of Man. *Tel:* (0624) 23813 (extension 153). *Telex:* 629335 Iomhar G. *FAX:* (0624) 27238. *Contact:* Captain W.B. Kinley, Chief Harbour Master (I.O.M.).

CLYDE PORT (Including Glasgow, Greenock, Finnart and Hunterston): 55.51 N. 04.16 W. **(See Plan)**

PORT LIMITS: For limits of jurisdiction see "Plans" – "Firth of Clyde and Sea Lochs".

DOCUMENTS: Following required on arrival:
3 Crew Lists on IMO Standard Form.
3 General Declarations. Customs Form C13.
3 Ships Stores Declarations. Customs Form C14.
2 Cargo Manifests. Customs Form C16.
1 Personal Effects Declaration. Customs Form C142.
1 Declaration of Health.
Bills of Lading.
Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Derat or Derat Exemption Certificate.

PILOTAGE: Compulsory pilotage.

1. 'The Seaward Limit of Compulsory Pilotage' means an imaginary line commencing at the intersection of the line of Longitude 05° 06′ W., with the North shore of Loch Striven, and then proceeding due South to the North shore of the Island of Bute, and by the same line of Longitude, from the South shore of the Island of Bute, to the Latitude of Gull Point on Little Cumbrae Island; thence by a line extending due East (T) to Gull Point; thence by a line proceeding in the direction 143° (T) for a distance of 7 nautical miles; and thence by a line proceeding in the direction 053° (T) to the Northern boundary of the Harbour of Saltcoats.

'The Landward Limit of Compulsory Pilotage' means the West side of Albert Bridge in the City of Glasgow.

'The Upper Pilotage Area' means that part of the River and Firth of Clyde, which lies between the landward limit of Compulsory Pilotage and an imaginary line between Estuary Control Tower, Greenock and Ardmore Head.

'The Middle Pilotage Area' means that part of the Firth of Clyde and including the Gare Loch, Loch Long, Loch Goil and the Holy Loch contained within the area bounded by an imaginary line from Estuary Control Tower, Greenock to Ardmore Head, and an imaginary line from Kempock Point due West to the Cowal shore.

'The Lower Pilotage Area' means that part of the Firth of Clyde and Loch Striven within the area bounded by an imaginary line from Kempock Point due West to the Cowal shore and the seaward limit of Compulsory Pilotage.

'The Compulsory Pilotage District' means that part of the area of jurisdiction of the Clyde Port Authority as defined in the Clyde Port Authority Confirmation Act 1965 and subsequent amendment(s) contained between the seaward limit of Compulsory Pilotage and the landward limit of Compulsory Pilotage.

2. All vessels of 25 m. length overall (LOA), carrying in excess of 12 passengers while navigating within the jurisdiction of the Clyde Port Authority, shall engage the services of an authorised Clyde Pilot, other than if the Master or First Mate of the vessel has been granted a Pilotage Exemption Certificate by Clyde Port Authority.

3. All vessels over 80 m. length overall (LOA), carrying dangerous substances as defined in the Dangerous Substances in Harbour Areas Regulations, 1987, in bulk, and all vessels which are not gas free, shall engage the services of a licensed Clyde Pilot while navigating within the limits of the Compulsory Pilotage District, other than if the Master or First Mate of the vessel has been granted a Pilotage Exemption Certificate by the Clyde Port Authority.

4. A vessel not carrying passengers navigating within the Compulsory Pilotage District and complying with the following conditions shall be exempt from Compulsory Pilotage:

In the *Upper Pilotage Area*, a vessel not exceeding 25 m. length overall (LOA).

In the *Middle Pilotage Area*, a vessel not exceeding 60 m. length overall (LOA), provided that a vessel in transit through the area to or from an anchorage or berth in Loch Long, shall be exempt from Compulsory Pilotage if not exceeding 80 m. length overall (LOA).

In the *Lower Pilotage Area*, a vessel not exceeding 80 m. length overall (LOA), provided that a vessel in transit through the area and neither proceeding to or from a berth or anchorage within the area, shall be exempt from Compulsory Pilotage if not exceeding 120 m. length overall (LOA).

5. The Clyde Port Authority directs that vessels, which are subject to Compulsory Pilotage as aforementioned, shall:

(1) Give such notice of estimated time of arrival or departure as may be required by Clyde Port Authority Notice to Mariners or other appropriate notification. Failure to provide such notice, or failure to arrive or depart within 2 hours of the notified time, will be penalised by a charge in accordance with that specified in the Authority's Schedule of Charges.

(2) Board or disembark a Pilot at a previously arranged location determined by the Pilotage Area to be served and weather conditions prevailing.

ANCHORAGES: Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

Anchorages are allocated by Clyde Port Estuary Radio. The anchorage positions are shown on Admiralty Charts Nos. 1907 and 1994.

RESTRICTIONS: Vessels entering the river channel are restricted to a maximum fresh water draft of 32 ft. Entry time for deeply laden vessels is dependent on the rise of tide.

Damaged vessels and vessels that are not in class must have a current Seaworthy Certificate and prior permission from the Harbour Master before entering the area of jurisdiction of the port.

MAX. SIZE: As agreed by Clyde Port Authority for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.

HEALTH: Masters should report by radio to "Porthealth Glasgow" any infectious illness which has occurred, or which has been suspected during the voyage.

Also see "Health – All Ports" before first U.K. port.

RADIO: Traffic should be routed through any British coast station.

VHF: Clyde Port Estuary on Channels 16, 14, 12 and 11 for all communications regarding pilotage and navigation.

RADAR: There is no port radar.

TUGS: As required by Master and under advice of the Pilot. Tug's lines are always used.

BERTHING: *General Cargo:* Discharged and loaded at Shieldhall Riverside Quay and King George V Dock, Glasgow.

Forest Products and Container Vessels: Handled at Greenock Terminal where 2 ships can work simultaneously. Berth is equipped with 1×40 ton and 2×35 ton transporter cranes with an outreach of 105 ft. beyond the line of the cope. The quay is 1,200 ft. long with a depth of 42 ft. at LWOST.

Ro-Ro Units: Can be handled at King George V Dock, Glasgow and at James Watt Dock and Garvel Basin, Greenock.

BULK HANDLING FACILITIES: Iron ore and coal are handled at Hunterston Terminal where discharging vessels up to 350,000 d.w.t. and loading vessels up to 70,000 d.w.tonnes can be accommodated. Depth alongside up to 29 m. Max. draft 26.0 m. 2 unloaders, rates up to 3,000 tonnes per hour for ore and 1,000 tonnes per hour for coal.

Scrap iron and minerals are handled at Rothesay Dock (Clydebank) and Meadowside Quay (Glasgow) where vessels up to 535 ft. in length with a draft of 32 ft. in fresh water can be accommodated. With prior arrangement vessel in excess of 535 ft. may be accepted.

Sugar and molasses are handled at James Watt Dock, Greenock. Vessels using the dock are restricted to a salt water draft of 27 ft. 9 in. and a beam of 70 ft. The max. length accepted for sugar vessels is 550 ft. and for molasses vessels 500 ft.

Grain is grab discharged at Meadowside Quay (Glasgow) to the 132,000 tonne granary which is situated behind the dockside goods sheds. Max. draft for vessels using Meadowside Quay is 32 ft. in fresh water.

CRANES: Cranes presently in use by Clyde Port Authority at Glasgow are: 4×5 tons, 2×10 tons, 1×25 tons, 1×30 tons, 1×35 tons, 1×160 tons.

BRIDGES: Erskine Bridge, which spans the navigable river channel, has a 59.92 m. on centre line, clearance above chart datum 1975.

STEVEDORES: Arranged by ship's Agent in accordance with Master's advice of ETA.

MEDICAL: Full medical and hospital facilities available.

TANKERS: BP Oil Ltd.: Privately operated crude oil terminal at Finnart.

The terminal is located on the East side of Loch Long (Lat. 56° 07′ N., Long. 04° 50′ W.) 25 miles from the pilot station off Little Cumbrae. There are 2 berths of which No. 3 accommodates about 300,000 d.w.t. tankers with a max. draft 75 ft. and No. 2 Berth, to the S.W., is used for about 200,000 d.w.t. with a max. draft 54.5 ft. and smaller tankers.

Berth Approach and Berthing: The berths are well sheltered, the water in Loch Long is deep and, with little tidal flow, berthing can be done at any state of the tide.

Berthing is done only in daylight, but ships can sail at any time. Vessels are turned about 0.5 miles seaward with tug assistance and backed up to the berth port side to, head out.

Tugs push on the off-shore side to breast the vessel alongside until secured.

Moorings: Ship's moorings are landed by launches. The usual pattern of moorings at Berth No. 3 is 5 head ropes, 5 stern ropes, 1 ship's breast rope at each end and 2 backsprings at each end to the jetty head. A 5.5 in. wire with "braidline" tail is provided by the shore as an additional breast mooring at each end. All ship's ropes are secured to quick release hooks.

At Berth No. 2 vessels secure to bollards with 4 head ropes, 4 stern ropes and 1 backspring at each end to the jetty head. A shore wire is provided at each end as a breast mooring.

Gangway: At Berth No. 3 a shore gangway is provided. At Berth No. 2 the ship must provide a safe gangway. Access to and from the ship must be by the gangway only.

Limitation on Height of Ship's Manifold: Prior notice must be given to the terminal if the height of the ship's manifold will exceed 68 ft. above waterline.

Cargo Handling: Each berth has the following Woodfield Combination hose/booms: 4 for crude oil (10 in. on Berth No. 2, 16 in. on Berth No. 3), and 2 for fuel oil imports and bunkering (8 in. on Berth No. 2, 10 in. on Berth No. 3). These connect with tankfarm by 2×12 in. fuel oil pipelines and 14×12 in., 24 in., 42 in. crude oil pipe-lines.

The maximum pressure allowed is 200 p.s.i.

There are facilities for loading lube oils.

Ballast and Slops: There is no facility for receiving dirty ballast or slops at the terminal. The tank cleaning berth at Greenock is no longer in operation.

Density of Water: The specific gravity averages 1.012 at the berths.

Services: No bunkers are available over the jetty. Ample prior notice is required for delivery by barge. Fuel and diesel oils are delivered by a barge with a fuel oil capacity of 440 tons and a diesel oil capacity of 118 tons. A 6 in. hose is used and the barge delivers both grades at 100 t.p.h.

Fresh water, of good soft quality, is piped to the berths at 50 t.p.h. Maximum quantity is 500 tons.

Normal domestic services, stores, laundry, etc. may be handled over the jetty with permission of the Terminal Authority.

A 1.5 ton crane is available for use at the berths.

A coin-operated telephone will be put on board, upon request.

Esso: Located at Bowling. This is a privately owned product distribution terminal, located 11 miles from Kempock Point (Gourock Pilots) and 9 miles up the River Clyde on the North Bank. The terminal is now supplied by land pipeline. There is an ocean tanker berth and a coaster berth. Both non-operational, but on a care and maintenance basis.

DENSITY: Glasgow – Fresh; Greenock – Brackish; Hunterston – Salt.

FRESH WATER: Available by hose at all berths operated by the Clyde Port Authority.

FUEL: Most major oil companies are represented in Glasgow. All grades of bunker oil can be supplied by barge or road tanker and by pipeline at Bowling Terminal.

FIRE PRECAUTIONS: Masters of vessels at the Authority's berths are given, on arrival, a copy of the Port Fire Protection Regulations.

Oil tanker berths are privately owned and the operators issue their own Fire Regulations.

CONSULS:

Belgium
Brazil
Canada
Cyprus
Denmark
Domincan Republic
Ecuador
Finland
Gambia
Germany
Greece
Iceland
India
Italy
Netherlands
Norway
Panama
Peru
Philippines
Poland
Portugal
Spain
South Africa
Sweden
Thailand
Uruguay

REPAIRS: All types of repairs can be effected in the area.

DRY DOCKS: Largest dry dock is 1,000 ft. long with 145 ft. clear width at entrance.

In addition there are 4 other smaller dry docks in the Glasgow and Greenock area and 2 Patent slipways at Renfrew (1×1,000 tons and 1×125 tons).

SURVEYORS: The following are represented in the area: Lloyd's Register of Shipping, Norske Veritas Register of Shipping, Bureau Veritas Register of Shipping, American Bureau of Shipping, The Salvage Association.

In addition, a number of independent marine and cargo surveyors are available.

GANGWAY/DECK WATCHMEN: Shore watchmen are available from private contractors but need only be engaged at the discretion of the Master.

HATCHES: Opening and closing of hatches may be carried out by ship's crew.

CUSTOMS ALLOWANCES: Standard United Kingdom allowances.

CARGO GEAR: Under normal circumstances, cargo is handled by shore equipment.

REPATRIATION: Repatriation can be arranged to all countries.

AIRPORT: Glasgow Airport (12 miles from city centre) and Prestwick Airport (30 miles from city centre) are both served by a number of major airlines.

Air UK have flights from Glasgow to Amsterdam and London (Gatwick and Stanstead).

TIME: GMT, but British Summer Time (1 hour ahead of GMT) in force during the Summer.

HOLIDAYS: Details of official dock holidays on which cargo work cannot be arranged can be obtained from the Marketing Department of the Port Authority, on request.

POLICE/AMBULANCE/FIRE: Can be called on the public telephone system by dialling 999 or by contacting Clyde Port Estuary Radio on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coast Guard (Marine Rescue and Co-Ordination Centre), Navy Buildings, Eldon Street, Greenock. Tel: (0475) 29988. Telex: 777006.

TELEPHONES: British Telecom can supply telephones at most berths. Agent will arrange and advise costs.

SERVICES: Facilities are available for repairs and service to radio equipment and navigation aids. A compass adjuster is based at Glasgow.

There are no facilities for cleaning oil tankers, but small quantities of oil/sludge may be removed by road vehicles.

BANKS: All National and many European and International banks have branches in Glasgow.

SHIP SUPPLY SERVICE: *Surface Craft:* Clyde Marine Motoring Co. Ltd., Princes Pier, Greenock, Renfrewshire.

Clyde Shipping Tugs Ltd., Clydesdale Bank Building, Greenock, Renfrewshire.

Cory Ship Towage (Clyde) Ltd., 12 Brymer Street, Greenock, Renfrewshire.

Maritime Craft Services (Clyde) Ltd., 87 Main Street, Fairlie, Ayrshire.

R. Ritchie, Esq., 1 Royal Street, Gourock, Renfrewshire.

Talisman Offshore Services, 46 Cambusdoon Place, Kilwinning, Ayrshire.

Helicopters: Air Charter (Scotland) Ltd., Glasgow Airport, Paisley.

Burnthills Aviation Ltd., Glasgow Airport, Paisley.

McAlpine Helicopters Ltd., Glasgow Airport, Paisley.

SHORE LEAVE: Shore leave is at Master's discretion.

IDENTIFICATION CARDS: Not required to be carried.

GARBAGE DISPOSAL: Disposal carried out by contractors with covered skips.

WASTE OIL DISPOSAL: Disposal carried out by contractors with road tankers.

SEAMAN'S CLUBS: Stella Maris Guest House, 10 Hillhead Street, Glasgow. Tel: 041-339 2494.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5655 (9.4.91).

REGULATIONS: Tankers having on board or having carried cargo with a flashpoint below 73°F are prohibited from proceeding East of Bowling.

Special regulations apply to the handling and transit of explosives.

There are special requirements in force regarding the production of a gas free certificate for OBO and ore/oil vessels calling at Hunterston Ore/Coal Terminal.

It is a requirement of the Clyde Port Authority that every vessel in excess of 1,600 g.r.t., constructed or adapted for the carriage of oil, chemicals or gas in bulk, complies with the reporting procedures as specified in Statutory Instrument 1981 No. 1077, entitled, The Merchant Shipping (Tankers) (EEC Requirements) Regulations 1981.

AUTHORITY: Clyde Port Authority, 16 Robertson Street, Glasgow G2 8DS. *Tel:* (041) 221-8733. *Telex:* 778446. *FAX:* (041) 248-3167. *Contact:* J. Mather, Chairman and Chief Executive. Captain W. W. Clements, Harbour Master (Tel: (0475) 26221. Fax: (0475) 27006. Telex: 778976).

COLCHESTER: 51.54 N. 00.55 E. (See Plan)

PORT LIMITS: Brightlingsea Anchorage.

DOCUMENTS: As normal British port.

PILOTAGE: If Pilot required from Sunk to Brightlingsea, as much notice as possible should be given to Harwich Pilots by R/T or VHF Channel 16/9. Pilots board near Sunk Light Vessel. ETA's for ships proceeding directly to Brightlingsea can be passed through Harwich, which has a far greater range than Colchester. River pilots can also be ordered directly via "Colchester Harbour Radio", if during operating hours on Channel 68.

ANCHORAGES: Off Brightlingsea, in 3 to 4 fathoms.

RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.

MAX. SIZE: Max. length at Colchester, 200 ft. Max. length at Rowhedge and Wivenhoe, 250 ft. Berthing arranged for larger vessels up to 280 ft. at Rowhedge and Wivenhoe, depending on type. Max. draft at Colchester, 12 ft. 06 in. Spring tides, 8 ft. 06 in. Neap tides. Max. draft at Rowhedge and Wivenhoe, 14 ft. 06 in. Spring tides, 10 ft. Neap tides.

HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kHz.

VHF: "Colchester Harbour Radio", VHF Channel 68. Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 68 when manoeuvring.

RADAR: None.

TUGS: Small motor tug available through Harbour Master. Private tugs also available.

BERTHING: 1,000 ft. of private quays. 3,200 ft. of public (corporation) quays. All berths use shore equipment and handle all cargoes. Port dries at LW. (Berths at Wivenhoe 450 ft., at Rowhedge 500 ft. additional to above.)

CRANES: A number of 4 ton – 6 ton mobile cranes.

BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.

STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 100 t.p.h.

MEDICAL: Advance notice if possible. Hospital available.

TANKERS: No facilities.

DENSITY: Density varies with tide, average 1015.

FRESH WATER: Fresh water points on quays, rate approximately 9 tonnes/p.h., cost £13.0 to £25.0, based on size of vessel.

FUEL: All fuel deliveries by road tanker.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No facilities.

SURVEYORS: Lloyd's Agent (W. Fieldgate & Son) or ship's Agent can arrange.

GANGWAY/DECK WATCHMEN: Not normally required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: British standard allowance.

CARGO GEAR: Shore gear, no heavy lifts.

REPATRIATION: Arranged by Agents.

AIRPORT: London 70 miles. Stansted 30 miles.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: Normal British holidays, work sometimes arranged.

POLICE/AMBULANCE/FIRE: Tel. 999.

EMERGENCY CO-ORDINATION CENTRE: U.K. Coastguard – Dial 999 or VHF Channel 16 or Tel: Walton-on-Naze 5518.

TELEPHONES: None.

SERVICES: Compass adjusting arranged by Agents.

BANKS: Barclays, Midland, Nat-West, Lloyd's and Williams & Glyn all have branches in the town.

STORING: See "Prelims".

1. By truck.
2. Not applicable.
3. Yes, subject to cargo handling.
4. Yes
5. Normal U.K. Requirements.
6. Yes.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

DELAYS: Normally tidal delays only.

AUTHORITY: Colchester Borough Council, Harbour Office, Hythe Quay, Colchester, Essex, United Kingdom. *Tel:* Colchester (0206) 827316. *FAX:* (0206) 827023. *Contact:* Captain L. Street, Harbour Master.

COLERAINE: 55.08 N. 06.40 W. (See Plan)

PORT LIMITS: 5.5 mile tidal stretch of the River Bann to the river entrance.

River entrance: 55° 10′ N., 06° 46′ W.

DOCUMENTS: Normal U.K. requirements.

PILOTAGE: Compulsory, order through Agents or direct from Harbour Office or Pilot. 24 hours notice preferred. Pilot Station, Portstewart Bay. Pilot boat call sign "S. G. Martin", call on Channel 12, working Channel 12.

ANCHORAGES: Vessels awaiting tide can anchor in Portstewart Bay in offshore winds or in Skerry Roads, East of Portrush.

RESTRICTIONS: The port is tidal and deeper vessels are restricted to high tides. Limited night working.

MAX. SIZE: The recommended maximums are 75 m. length, 12.0 m. breadth and 4.2 m. draft.

HEALTH: Normal U.K. procedure.

TUGS: Not normally required, nearest available tug is at Londonderry Harbour.

BERTHING: Main Quay 900 ft., 2 detached wharves 140 ft. and 150 ft. and separate Oil Jetty. Max. draft vessels may ground safely on mud at LWST.

CRANES: Two Priestman Lion 35 grabbing cranes for bulk coal, etc. One NCK Pentland for bags, pallets, etc. 1×35 ton Henderson derrick crane for containers or heavier lifts.

SPECIALISED CARGO HANDLING FACILITIES: No facilities for Ro/Ro traffic.

BRIDGES: A railway bridge with 60 ft. lifting span crosses the river 0.5 miles down stream from the Harbour.

STEVEDORES: Messrs Wm. Dalzell & Sons Ltd. Tel: (0265) 54365. Telex: 74512. Fax: (0265) 58230.

MEDICAL: Full hospital/medical facilities available.

DENSITY: Varies between fresh and salt, depending on weather and tide conditions.

FRESH WATER: Fresh water is available from mains hydrants at all berths.

FUEL: All grades available, 48 hours notice advisable.

REPAIRS: Local engineers can carry out most repairs. Divers also available for underwater work.

DRY DOCKS: None.

HATCHES: Hatches normally opened or closed by the crew.

AIRPORT: Belfast International (Aldergrove) 40 miles. Belfast (harbour airport) 60 miles, Eglinton, 24 miles.

HOLIDAYS: 1st January, Easter Monday/Tuesday, May Day, 12th/13th July, Last Monday in August, 25th/26th December.

POLICE/AMBULANCE/FIRE: Tel: 999 in emergencies.

GARBAGE DISPOSAL: Plastic bags made available and removed by harbour staff. No charge. Skips can be arranged at cost through the harbour office. 6 cu.m. skip costs £30, 3 cu.m. skip costs £22, 2 cu.m. skip costs £20. Prices correct at February 1992.

WASTE OIL DISPOSAL: Service available using local contractors: For clean waste oil, contact Capital Fuels, Ballynahinch, Tel: 0238-561574. For dirty waste oil, contact Irish Waste Services, Belfast, Tel: 0232-746327. Disposal fee £100 plus £34 per hour (April 1991). Small quantities can be accepted at harbour's own facility.

SEAMAN'S CLUBS: No seaman's clubs.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5783 (February 1992).

DELAYS: Vessels may be delayed by swell at the river entrance in bad weather conditions.

AUTHORITY: Coleraine Harbour Commissioners, The Harbour Office, The Quay, Coleraine BT52 1BJ, Co. Londonderry. *Tel:* 0265-42012. *Contact:* W. R. Dalzell, Harbour Master.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W.

PORT LIMITS: As shown on British Admiralty Charts.

DOCUMENTS: As for "Portsmouth".

PILOTAGE: Pilotage is compulsory for vessels of 50 m. and above in length overall and passenger vessels of 20 m. and above in length overall whilst carrying more than 12 passengers/sub-standard ships.

Boarding/landing points for Cowes Pilots: Vessels up to 61 m. in length overall, in vicinity of Prince Consort Buoy. Vessels of 61 m. and above in length overall (bound to/from Cowes): (a) Western Limit ABP Southampton, in vicinity of Gurnard North Cardinal Buoy. (b) Eastern Inner Limit ABP Southampton (North Sturbridge Buoy).

Note: 6 hours (minimum) notice required.

Cowes Pilots also conduct vessels to berths in Newport Harbour area of jurisdiction.

Pilots board from launches "Thosbro"/"Blaavand", which are equipped with multi-channel VHF radio. A Pilot can be obtained by making a link call to Isle of Wight (0983) 292812 or 292501 (24 hour service). During office hours Pilots can be obtained by link call to the Harbour Office Cowes (0983) 293952 or by VHF radio ("Cowes Harbour Radio") Channel 16/69. After office hours telephone (0983) 295733/293812/292033.

Note: Vessels of 61 m. to 150 m. in length overall may board an ABP Southampton Pilot on a voluntary basis at the Eastern Outer Limit (Nab Tower). For boarding/notification arrangements see "Southampton". Such vessels preceding into Cowes Harbour/River Medina will board a Cowes Pilot in the vicinity of the Prince Consort Buoy.

ANCHORAGES: Vessels waiting to proceed to Cowes or Newport should anchor within the area bounded by Old Castle Point, "Prince Consort" light-buoy and the harbour entrance light-buoy. The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoy is reserved for the Trinity House lighthouse tender and naval vessels. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.

MAX. SIZE: Cowes – 300 ft. long, 17 ft. draft at HWS. Vessels must expect to take the bottom in soft mud at LW. Newport – 150 ft. long, 8 ft. draft. Newport Harbour practically dries out at LW.

RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.

FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round flashing white light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away. The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.

HEALTH: See "Portsmouth".

RADIO/VHF: See "Southampton" for Sea Pilot communications. See "Pilotage" for local communications.

Commercial vessels should establish contact with Floating Bridge, call sign "Cowes Chain Ferry", on VHF Channel 69 before passing, both inward and outward.

Southampton VTS, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton VTS on VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Niton Radio.

TUGS: Harbour tug (3.5 ton bollard pull) and tow-boat launches are available to assist vessels.

BERTHING: *Medina Wharf:* Vessels 17 ft., Spring draft, LOA 270 ft. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc. *Kingston Wharf:* As for Medina Wharf, above.

STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800 – 1700 hrs. Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.

MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.

DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.

FRESH WATER: Available on all commercial wharves.

FUEL: Fuel and Diesel oil available by arrangement with Agent.

CRANES: Hammerhead crane at Souter Shipyard Ltd., 50 tons. Medina Wharf: 2 grabbing cranes of 4.5 cu.m. for bulk cargoes.

OPENING/CLOSING HATCHES: By ship's crew.

REPAIRS: All hull and engine repairs undertaken to vessels capable of Cowes entry. Graving dock for ships up to 200 ft. in length and 14 ft. draft.

SERVICES: Compass adjuster, radar and radio mechanics available locally. Charts and general stores available locally.

SHIP SUPPLY SERVICE: *Thomas Bros.:* 2×40 ft. launches (20 knots) available throughout 24 hours for stores – 12 persons – liberty boats, surveys, etc., and marine contract work – U.K. and Northern France. Tel: (0983) 293812.

Solent Cruises: 2×45 ft. fast vessels with twin screw, D.O.T. Load Line Exemption, able to carry up to 89 persons (reduced number in Winter).

Solent Cruises are contractors to the local authorities for the transfer of sick persons from the Isle of Wight to the mainland.

Contact on VHF Channel 16, (Jenny Lee – 2 RAH) when afloat or Telephone Isle of Wight (0983) 64602.

A 24 hour service is offered for transport of personnel, stores and passengers.

Marine Support and Towage Limited: Tel: (0983) 295369, 296424, 297363 (24 hours). Office (0983) 296934.

Details of Vessels:

Name	*Length*	*General Description and Capabilities*
Roperunner	33 ft.	Heavily fendered steel work launch, used for running mooring ropes/wires for large vessels 6,000 tons – 250,000 tons. Large open after work space, forward wheelhouse. Fitted with radar and multi-channel VHF radio. 120 h.p. diesel, 1 ton bollard pull. Speed 8 knots.
A. Stopford	40 ft.	Keith Nelson twin screw diesel fast launch, for personnel transport and light storage duties, open after cockpit with towage facility. Licenced for 12 passengers. 2×145 h.p. diesels. Speed 16 knots – 18 knots. Fitted with radar, VHF radio and echo sounder.
Beaver	32 ft.	Steel work launch used for running mooring ropes/wires and towage. Large open after work space, forward wheel house. Fitted with multi-channel VHF radio, radar pending, diesel engine, 2 tonne bollard pull.
Trio	47 ft.	Steel work launch used for running mooring ropes/wires and towage duties. Fitted with radar and multi-channel VHF radio, diesel engine, 4 tonne bollard pull.

These vessels are available on hourly, daily or long term charter, U.K. coast or continent. Company is experienced in offshore back-up, ship supply, etc. A 24 hour office facility call out is maintained.

St. Helens Laundry Ltd.: Tel: (0983) 872250, 873731.
Able to supply laundry and dry cleaning services to any vessels at Southampton Docks, Fawley Terminal, Netley, The Solent, Portsmouth Harbour or Docks, and the St. Helens Roads and Nab Anchorages.
OIL POLLUTION: Cowes and the Solent are world-famous yachting centres. Pollution is dealt with severely.
GARBAGE DISPOSAL: All commercial wharves are privately owned and operated. Owners/operators are required to provide garbage collection. Shipping agents can arrange.
WASTE OIL DISPOSAL: By arrangement with shipping agents.
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Cowes Harbour Commissioners, Harbour Office, Town Quay, Cowes, Isle of Wight, PO31 7AS. *Tel:* (0983) 293952. *FAX:* (0983) 290018. *Contact:* Captain H. N. J. Wrigley, Harbour Master/Chief Executive Officer. Captain P.G.Wood, Deputy Harbour Master.

CROMARTY FIRTH PORT (See Plan)

(A) INVERGORDON/EVANTON: 57.41 N. 04.10 W.
(B) NIGG OIL TERMINAL: 57.41 N. 04.02 W.

(A) INVERGORDON/EVANTON

DOCUMENTS: *At Boarding on arrival:*
1 copy Derat Exemption.
Form I.S.6 – List of members of the crew who are aliens or who were engaged outside the United Kingdom. (in duplicate).
Form C.13 – General Declaration (in duplicate).
Cargo Manifest in duplicate).
Form C.142 – Crew Declaration (in duplicate).
Form C.196 Coastwise Shipping (Transire).
Form C.44d Coastwise removal of uncleared foreign cargo.
Vessels arriving from outside the E.C. require Form C 1600A (For presentation of goods carried).
Delivery of forms. When a vessel is not boarded by a Customs Officer on arrival, 1 copy of each of the forms listed must be delivered by the Master or his authorised agent to the proper place at the port of arrival. The Regulations require delivery of these forms within 3 hours of the vessel's arrival at the place of loading or unloading. The second copy of Forms C.13 and C.142 must be retained on board by the Master or other responsible officer for use by Customs Officers who may subsequently visit the vessel.
Certificate of Registry.
Certificate of British Tonnage.
Light Dues Certificate relating to the vessel.
To the Agent:
Bills of Lading.
Cargo Manifests.
PILOTAGE: Pilotage available 24 hours. Vessels under 300 g.r.t. are exempt. Cruising station of pilot boat is the Cromarty Lighthouse where Pilot will board. Pilot boat painted black hull, white upper structure.
Pilot boards from tug at Fairway Buoy for large tankers and oil rigs.
Approaching vessels may give their ETA to pilot station via VHF Channel 16, when in the vicinity of 30 miles, but a 24 hour notice will be required. In the event of bad weather, vessels will be guided by Pilot launch to safety where Pilot will board. Watch kept on VHF Channels 16 and 11 (24 hours) by Cromarty Firth Port Authority. Call sign "Cromarty Firth Port Control". Local weather forecasts available.
ANCHORAGES: Large tankers anchor 1 mile South of Fairway Buoy (L. Fl. 10 secs. Racon). Main anchorage West of Cromarty Ness Light.
RESTRICTIONS: Vessels bound for Invergordon or Evanton with a draft over 43 ft. are not handled below water.
MAX. SIZE: Max. permissible length 900 ft., max. draft 40 ft.
Nigg Oil Terminal: See "Section B".
HEALTH: International quarantine signals to be used. Advise "Port Health Dingwall" in advance if any suspected diseases on board.
Also see "Health – All Ports" before first U.K. port.
RADIO: Vessels approaching from North should pass their ETA cable via Wick Radio GKR 431, and vessels approaching from East via Stonehaven Radio GND 458 their Agents.
VHF: Link calls through Cromarty Radio (based at Wick) Channel 16 and working Channel 28 and 1. Also see "Pilotage".
TUGS: J.P.Knight (Caledonian) Ltd. – Tel: Invergordon 852611. Suitable tugs up to 50 tonnes bollard pull stationed at the port which work in conjunction with Pilots. Tug's lines used.
BERTHING: *Admiralty Wharf:* The wharf is the property of M.O.D. (Navy), however the berths are used regularly by commercial vessels.
Berths 1 and 2 (Outer South): Lengths 443 ft. Max. draft 36 ft. Max. LOA 900 ft. Also see "Tankers".
Berth 3: Max. draft 18 ft. Max. LOA 290 ft.
Berth 6: Max. draft 18 ft. Max. LOA 200 ft.
British Alcan Pier: Outer Berth: Length 318 ft. Dredged depth 38 ft. MLWS (1974). Max. berthing length 750 ft. approx. using dolphins. (50,000 d.w.t.)
Inner Berth: Length 200 ft. Depth 20 ft. MLWS (1974).
Invergordon Oilfield Support Base, Invergordon: Front berth 150 m., side berth 60 m. Front dredged to 8.9 m. below C.D. Side 5.5 m. minimum. Bunkers diesel – see "Fuel".
A Ro/Ro freight service to Kirkwall operates from the West Harbour, Invergordon to Kirkwall, passage time 9 hours. Also see "Developments".

Queen's Dock: Length 150 m. Depth at Chart Datum 12.0 m. Also see "Developments".
Highland Deephaven – Evanton: Berthing face length 35 m. Minimum dredged depth 6.0 m. at Chart Datum. Berthing is mainly used by pipe-spooling vessel "Apache" for mooring stern on to berth. Berth also used for conventional coasters and supply vessels up to about 80 m. length and 6.0 m. draft.
CRANES: Mobile cranes up to a maximum 130 tonnes available from stevedoring firms, plus crane-barge of up to 200 tonnes capacity from J.P.Knight (Caledonian) Ltd.
STEVEDORES: F. Lyons (Stevedores and crane hirers) – Burghead STD (0343) 835360. James Jack (Stevedores and crane hirers) – Tel: Invergordon (0349) 853000. Bannerman Bros. (Stevedores and crane hirers) – Tel: (0862) 892322.
MEDICAL: Medical cases can be dealt with at short notice through local Agent. Hospital facilities available.
TANKERS: Vessels up to 800 ft. Max. draft 36 ft. may use Admiralty Wharf, Berths 1 and 2 combined. Also see "Section – B".
DENSITY: 1022.
FRESH WATER: Obtainable alongside quay. Rate of delivery 30 t.p.h., each hydrant. Rate of delivery at Supply Base is 80 t.p.h.
FUEL: This can be ordered through local Agent, delivery by road tanker, or ex-quay at Invergordon Supply Base (up to 2,500 tonnes of diesel). Heavy fuel is available by arrangement ex-quay at Admiralty Pier.
REPAIRS: General repairs undertaken by Cromarty Firth Engineering Co. Ltd. – Tel: Evanton 830551; MacKay & MacLeod – Tel: Evanton (0349) 830363 and James Jack (Eng.) Ltd. – Tel: (0349) 853939. Scottish Rig Repairers – Tel: Invergordon 852788.
GANGWAY/DECK WATCHMEN: Ship's gangway and safety net required. Watchmen from ship's personnel.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: The following Certificates are required to be held on board for production when required:
International Load Line Certificate.
International Tonnage Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Oil Pollution Prevention Certificate.
Oil Pollution Insurance Certificate (Tankers).
CUSTOMS ALLOWANCES: Following quantities are generally left out for use on board by each member of crew:
Ships arriving from foreign ports within Home Trade Limits: Tobacco 125 gm. (4 oz. or 100 cigarettes). Spirits 0.25 litre, wine 1.0 litre.
All other ships from foreign ports: Tobacco 250 gm. (8 oz. or 200 cigarettes). Spirits 0.5 litre, wine 2 litres.
REPATRIATION: Can be arranged.
AIRPORT: Dalcross Airport at Inverness, flights by British Airways, Dan Air and Loganair, distance from Invergordon 30 miles.
TIME: British Summer Time, 1 hour advanced on GMT. GMT in Winter months.
HOLIDAYS: 1st and 2nd January and Christmas Day. These holidays can be worked by arrangement.
POLICE/AMBULANCE/FIRE: Police, tel. Invergordon 852222 or dial 999; Ambulance, arrangements through local doctor, tel. Invergordon 852522; Fire Station, dial 999 and ask for their service.
TELEPHONES: H.M. ships only. Other vessels by arrangement at Supply Base.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Garbage skips available. Contact ship's Agent for service.
WASTE OIL DISPOSAL: Various waste oil disposal contractors available. Contact ship's Agent for service.
SEAMAN'S CLUBS: None.
GENERAL: Permit must be obtained from Port Authority or Ministry of Defence when burning or welding is to be carried out at Admiralty Pier.
DEVELOPMENTS: The newly completed Queen's Dock, opened in late 1987, includes warehousing and nearly 30 acres of lay down area for cargoes such as timber, coal, scrap, containers, etc. A Ro-Ro Berth is planned.
A new Ro/Ro Terminal opened in Spring 1992, and is served by M.V. "Contender" (owned by Orcargo), which operates a daily service to Kirkwall in the Orkney Islands. The M.V. "Contender" is 80 m. in length, 2,292 g.r.t., and carries 12 freight trailers and 12 passengers.

(B) NIGG OIL TERMINAL

LOCATION: Nigg Oil Terminal operated by B.P., provides shipping facilities for crude oil piped ashore from the Beatrice Field in the Moray Firth. The terminal is located on the North side of the Cromarty Firth in approximate position Lat. 57° 41.5′ N., Long. 4° 02.5′ W. and comprises a single berth jetty linked to the shore by a trestled roadway.
PILOTAGE: Pilotage is compulsory. Invergordon Pilot will board from a tug at the Fairway Buoy. Call "Invergordon Pilots" on VHF Channels 16 or 11, working on Channel 13.
RESTRICTIONS: *Depth alongside berth:* A minimum depth of water of 21 m. below chart datum is available alongside the berth.
Channel depths: The least depth in the approaches to the terminal in March 1988 was 15.1 m. below C.D. and occurred in the buoyed fairway approximately 0.5 nautical miles within the port limits. Loaded tankers may sail with a draft up to 17.5 m. dependent on the tide. Advice should be sought from Cromarty Firth Port Authority prior to vessel's arrival.
Tidal range: M.L.W.S. 0.8 m., M.H.W.S. 4.3 m.
Tidal restrictions: Subject to draft, vessels will be able to berth and sail at any state of the tide, possibly excepting Spring ebbs. Berthing head Eastwards is to be preferred.

ANCHORAGE: The recommended anchorage for vessels awaiting a berth is 1 mile South of the fairway buoy in approximate position Lat. 57° 40′ N., Long. 3° 54′ W. An anchorage within the Cromarty Firth may be made available by the Port Authority.

MAX. SIZE: *Length restrictions at berth:* Max. 290 m. LOA. Minimum 190 m. LOA. *Max. displacement:* 157,500 tonnes.

VHF:

Communications:	Port Authority	Channel 11 & 16
	Port Emergency	Channel 11
	Invergordon Pilot	Channel 13
	Tugs	Channel 13
	Pollution Control	Channel 10
	Nigg Oil Terminal	Channels 49, 50

Portable VHF/UHF sets: These must not be used within the Terminal Area unless they are classed as "intrinsically safe". The Terminal will lend approved VHF equipment if necessary.

TUGS: Berthing and unberthing operations will be assisted by a minimum of 2 tugs of 50 tons and 38 tons bollard pull respectively. A relief tug of 40 tons bollard pull may be substituted for either of these tugs. A third tug of 34 tons bollard pull will also be available if required. The vessel's agent will arrange for tugs as required by the Master. A firefighting tug will remain on standby at all times when a tanker is at the Nigg Oil Terminal Jetty. Whilst underway within Port limits a 1 tug escort is required.

BERTHING: *Berthing velocity:* Vessels must not exceed a berthing velocity of 20 ft./min., regardless of displacement, and should aim to achieve a berthing velocity of less than 10 ft./min.

Mooring arrangements: The Plan (see "Plan") depicts a mooring arrangement for a typical 80,000 d.w.t. vessel. Similar configurations will be employed for all vessels in the range 40,000/160,000 d.w.t.

Seebeck quick release mooring hooks are fitted on all dolphins.

Each mooring dolphin is fitted with a 3-hook assembly; each hook of 100 tonnes capacity.

Each berthing dolphin is fitted with a 2-hook assembly; each hook of 100 tonnes capacity.

The 50 tonnes bollards at the corners of the jetty head are for use by small craft only.

LOADING: *Loading arms:* 3×16 in. Emco Wheaton loading arms, each designed to ANSI 150 lb. pressure rating, are installed on the jetty head. Each arm may be used either for deballasting or for loading and these operations can take place concurrently provided that the terminal approves the system of onboard separation.

The minimum acceptable ship's figure size is 12 in. Nominal Bore. The M.I.B. couplings can be adjusted to 12 in., 14 in. or 16 in. flange sizes. Vessels must present manifold flanges with a minimum clearance of 8 in. behind the flange and 3 ft. axial clearance around the centre of the flange face in order to provide adequate clearance for the coupling jaws. If necessary spool pieces must be fitted. Flanges of steel or nodular iron must be presented. Cast iron manifold materials are not acceptable. The vessel's manifold connections must remain within an envelope between 2.85 m. and 6.1 m. off the berthing face and between 4.6 m. and 25.6 m. above chart datum.

If ranging or drift-off exceeding 2.7 m. occurs the coupling ball valves will close and the couplings will automatically disconnect.

If sustained wind speeds exceed 35 knots loading operations will stop and arms will be drained. Arms will be disconnected if wind speeds exceed 40 knots.

Loading rates and pressures: Loading rates of 50,000 bbls.p.h. are attainable utilising 2 loading arms. the maximum pressure permitted at the ship's rail is 128 p.s.i.

Ballast reception: Ballast water reception facilities are available at the Terminal. Ballast must not be discharged overboard within the port. Vessels not having segregated ballast tanks must deballast ashore. Vessels with segregated ballast must retain their ballast onboard for inspection and analysis after berthing, and disposal of this ballast is subject to the results of this inspection and analysis. Permission will not be granted for the overboard discharge of segregated ballast with an oil content in excess of 5 parts per million.

FRESH WATER: Fresh water is available on request from the Terminal from a connection on the jetty head. Approximate maximum delivery rate is 30 t.p.h.

FUEL: Bunkers are not available at Nigg Oil Terminal but may be available at Invergordon (See Section "A").

REPAIRS: Repairs may only be commenced upon receipt of a work permit signed by the Terminal Superintendent. Immobilisation of a vessel alongside the jetty is only permitted with the written permission of the Terminal Superintendent and of the Port Authority.

Readiness to vacate berth: Engines and all other essential equipment of vessels alongside the jetty must be maintained in a state of readiness for vacating the berth at short notice.

STORING: Loading of stores onto a vessel alongside the jetty may be carried out only with the specific permission of the Terminal Superintendent and in a manner and at a time approved by him.

SHORE LEAVE: A pass system will operate. Shore leave will normally be by launch from the jetty launch landing pontoon. Shore leave arrangements are the responsibility of the vessel's Master and will normally be made by the ship's Agent. Details of the arrangements are to be provided to the Terminal Superintendent.

GARBAGE/WASTE OIL DISPOSAL: See Part (A).

GENERAL: *Loading Master:* A B.P. Loading Master remains on board the vessel at all times during the vessel's stay at Nigg Oil Terminal.

Permanent watch: During operations a responsible member of the ship's crew must be stationed in the vicinity of the manifold.

Smoking: No smoking is permitted in the Terminal Area or on the weather deck of any vessel in the Terminal Area. Smoking may be permitted at the Master's discretion in two onboard locations, to be approved by the Terminal Superintendent.

Emergency: In the event of an emergency any assistance required mu be summoned via the Terminal Control Room.

Craft alongside: Craft may not lie alongside a vessel at the jetty withou the written permission of both the Master of the vessel and the Termina Superintendent.

Refuse: No refuse or waste may be disposed of overboard from a vesse within the Port.

I.S.G.O.T.T.: Vessels must be provided with a copy and be familiar wi the contents of the International Safety Guide for Oil Tankers an Terminals. Reference copies are available on temporary loan from th Terminal.

Important telephone numbers:

Nigg Oil Terminal: Nigg (086 285) 631.
Cromarty Firth Port Authority: Invergordon (0349) 852308.

AUTHORITY: Cromarty Firth Port Authority, Port Office, Shore Road Invergordon, Ross-shire IV18 0HD. *Tel:* Invergordon (0349) 85230 *Telex:* 75263. *FAX:* (0349) 854172. *Contact:* Captain D. R. F. Miller Harbour Master. Captain P. J. Taylor, Port Manager. Captain I. Dunderdale, Deputy Harbour Master. Captain W. Thomas, Pilot Marine Officer. Captain N. Robertson, Pilot/Marine Officer.

DARTMOUTH (Including Totnes): 50.21 N. 03.34 W. (See Plan)

PORT LIMITS: A line from Inner Froward Point to Combe Point.
DOCUMENTS: Normal documents for U.K. ports.
PILOTAGE: No direct radio contact with Pilots. Contact local Agent, Harbour Authority or Berry Head Coastguard Station who will telephone Pilot.

Pilot station 5 cables S.S.E. Castle Ledge Conical Buoy.

ANCHORAGE: Anchor at pilot station.
MAX. SIZE: Max. length 500 ft., max. draft 28 ft.
HEALTH: Pratique granted by Customs on arrival.

Also see "Health – All Ports" before first U.K. port.

RADIO: Route cables, etc., through Niton or LandsEnd Radio Stations.
VHF: Watch maintained on Channel 11, 0900 – 1700 hrs. during weekdays. Call sign "Dartnav".
TUGS: Tugs can be arranged.
BERTHING: All berthing on midstream buoys.
Totnes: Max. Size: At Spring Tides coasters of about 1,000 tons up to 240 ft. LOA and drawing 12.5 ft. proceed up river to the Baltic Whar which lies half a mile below Totnes Bridge.

Berthing: 750 ft. quay. Dries out all tides

MEDICAL: All medical services are available; if possible give notice of requirement.
DENSITY: Normally salt. 1025.
FRESH WATER: Available at the South Embankment.
FUEL: Diesel available by barge.
FIRE PRECAUTIONS: Normal.
GANGWAY/DECK WATCHMEN: It is advisable to have watchmen.
OPENING/CLOSING HATCHES: Crew open.
CARGO GEAR: Ship's gear.
REPAIRS: All repairs unless of a major or underwater type can be carried out.
SURVEYORS: West Marine Surveyors & Consultants Limited Consulting Marine Surveyors, Engineers & Naval Architects, 59 Fore Street, Totnes, TQ9 5NJ. Tel: 080-865810. Fax: 0803-865349. Telex: 42962 – Survey G.
REPATRIATION: Facilities exist.
AIRPORT: 35 miles from Exeter airport. Internal and short range Continental flights.
TELEPHONES: Not normally available except for H.M. ships.
HOLIDAYS: Not applicable.
POLICE/AMBULANCE/FIRE: Dial 999 for emergencies. Local hospital adjacent to Harbour Office.
SHORE LEAVE: Permitted. Seaman's Book adequate.
GENERAL: Dartmouth does not now operate as a commercial port except for small vessels up to about 800 d.w.t. en route to Totnes, although the harbour is suitable for ships of 18,000 d.w.t., and mooring buoys are available for such vessels.

Lay-up facilities available for vessels up to 22,000 tons displacement.

AUTHORITY: Dart Harbour and Navigation Authority, Dart House, Oxford Street, Dartmouth, Devon TC9AL. *Tel:* 0803-832337/833767. *Cables:* "Harbour Master Dartmouth". *FAX:* 0803-832196. *Contact:* Captain C.J.Moore, Harbour Master.

DOUGLAS, Isle of Man: 54.09 N. 04.28 W. (See Plan)

PORT LIMITS: That part of the coast including all creeks, bays and headlands from HW mark Ordinary Spring Tides which extends from Port Soderick Landing Jetty (Lat. 54° 07′ 24″ N., Long. 04° 31′ 48″ W.) in a Northerly direction to the most Easterly point of Clay Head (Lat. 54° 11′ 42″ N., Long. 04° 23′ 05″ W.) thence in a straight line drawn in a 135° True (S.E.) direction for 3 nautical miles, thence in a straight line drawn to a position 3.5 nautical miles 135° True (S.E.) from Port Soderick Landing Jetty, thence in a straight line drawn to Port Soderick Landing Jetty.

All shipping entering the above defined area should contact Douglas Radio on Channel 16 VHF.

DOCUMENTS: Same as for all U.K. Ports.

PILOTAGE: Not compulsory. Arrangements usually made at least 24 hours before vessels' arrival, through Ships' Agent, or to Harbour Master, Douglas – Tel: 686628. Call Douglas Radio on Channel 16 and then transfer to Channel 12 for instructions 1 to 2 hours before ETA Douglas Bay.

RESTRICTIONS: Enter only on Harbour Master's instructions.

Traffic Signals: International Port Traffic Signals (see Admiralty Notice to Mariners 568/83) are exhibited when required, by day and night, from a mast at the head of Victoria Pier, visible from seaward and from inside the harbour, as follows:

Signal	*Meaning*
3 fixed red lights, disposed vertically	Vessels may not proceed
Fixed green, white, green lights, disposed vertically	A vessel having received specific permission by RT may proceed
3 fixed green lights disposed vertically	All vessels may proceed

Supplementary signals will be exhibited simultaneously in lights from a panel on the roof of a building near the head of Victoria Pier, visible from seaward and from inside the harbour, as follows:

Signal	*Meaning*
Red St. Andrew's Cross	Vessels unless specified may not proceed
White arrow	Vessels may proceed in the direction indicated

The panel will have a flashing orange light at each top corner.

ANCHORAGES: In Douglas Bay:

Douglas Head bearing	196° (T)	7 cables in 6 fathoms
" " "	199° (T)	9.3 cables in 7 fathoms
" " "	200° (T)	8 cables in 6.5 fathoms
" " "	212° (T)	7.9 cables in 10 fathoms

MAX. SIZE: Max. size of cross channel vessels 115 m. LOA, draft 5.0 m. Max. size of cargo vessels 62 m. LOA, draft 4.0 m. Spring tides, 2.75 m. Neaps to Inner Harbour, dries out at LW.

Max. size of tankers 90 m. LOA, draft 5.5 m. at LWOST.

HEALTH: See "Health – All ports" before first U.K. port.

RADIO: Port Patrick for vessels coming from North. Anglesey for vessels coming from South.

VHF: Douglas Harbour Radio manned at all times. Channel 16 and 12 only.

RADAR: Port Radar available for use in fog or when required. Used with Channel 12 VHF.

TUGS: None available.

BERTHING: Passenger vessels – 6 berths for vessels of 350 ft. in length, 13 ft. draft LWST at Victoria Pier and King Edward Pier.

Office Berth – vessels 68 m. LOA, draft 5.0 m. spring tides. 3.5 m. neap tides, dries out at LW.

Coffee Palace Berth will accommodate vessels of 62 m. LOA, draft 4.0 m. Springs, 2.75 m. Neaps, dries out at LW.

Market Berth same as Coffee Palace Berth.

Battery Pier – Tankers up to 90 m. LOA, draft 5.5 m. at LWOST. Discharging of cargo vessels and container vessels can be done by shore crane.

All berths at Douglas are salt water.

CRANES: *Mobile Cranes:* 2×25 tonnes, 1×72 tonnes, 1×5 tonnes and 1 mobile grab crane.

BULK CARGO FACILITIES: Bulk cargoes of coal and scrap metal are handled at Coffee Palace and Market Berths described above, and timber at King Edward Pier.

Rate of discharge for coal about 60 t.p.h. – 70 t.p.h. by grab crane.

SPECIALISED CARGO HANDLING FACILITIES: Ro/Ro service operated to Victoria Pier by I.O.M. Steam Packet Co.

Ro/Ro cargo service operated by Isle of Man Steam Packet Co. to King Edward VIII Pier.

LPG cargoes are handled at Battery Pier as described above.

BRIDGES: Swing Bridge only to Inner Harbour.

STEVEDORES: Advice required to Ship's Agent. Rate of discharge – cement 60 t.p.h.; coal 60 – 70 t.p.h.

MEDICAL: Advise Agent when possible, alternatively contact Harbour Master with advance warning. Hospital available.

TANKERS: Tankers pipe-lines 6 in. Tanker berth at Battery Pier – Max. draft. 5.5 m. at LW Spring tides. Discharging rate 180 t.p.h. – 200 t.p.h.

DENSITY: Density of water salt (1025).

FRESH WATER: Fresh water available on request to Agent or Harbour Master.

FUEL: Fuel delivered by road tanker only. Contact Manx Petroleum or Esso.

FIRE PRECAUTIONS: Fire precautions as normal.

CONSULS: None.

REPAIRS: Limited facilities only.

DRY DOCKS: None.

SURVEYORS: Four I.O.M. Marine Department Surveyors.

GANGWAY/DECK WATCHMEN: Could be arranged by Agent.

OPENING/CLOSING HATCHES: Handled by crew.

CUSTOMS ALLOWANCES: Same as U.K.

CARGO GEAR: Cargo can be discharged by ship's own gear or mobile cranes.

REPATRIATION: Repatriation only done through arrangement with Agents.

AIRPORT: Ronaldsway Airport 8 miles from Douglas and served by regular airlines.

TIME: Same as U.K.

HOLIDAYS: Good Friday, Easter Monday, Spring Holiday, T.T. Friday (1st week in June), Tynwald Day (5th July), August Holiday, Christmas Day, Boxing Day, New Year's Day.

TELEPHONES: Connections to ships can be arranged at passenger piers.

POLICE/AMBULANCE/FIRE: Police Tel: 631212; Ambulance Tel: 663322; Fire Brigade Tel: 673333.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Liverpool. Tel: 051 9313341.

STORING: See "Prelims".

1. By truck.
2. Not applicable.
3. Trucks can go alongside vessels except tankers when working cargo or ballasting.
4. Fork lift trucks could be permitted.
5. U.K. Customs regulations.
6. Storing usually done by crew.

SERVICES: None.

SHIP SUPPLY SERVICE: General Marine Services Limited (Tel: (0624) 628904 or 629710), who operate the pilot launch and ship to shore transfers of personnel, stores, etc. This launch is kept afloat and a 24 hour-service is available.

There is no helicopter service on the Island.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Identification Cards not required for British Ships. Same as U.K.

REGULATIONS: No unusual regulations.

DELAYS: Delays can be expected due to tidal conditions, or awaiting a berth; also delays caused by N.E. gales, which make Douglas Outer Harbour untenable.

GARBAGE DISPOSAL: 4 skips are available on harbour property. Contact Island Skip-Hire (Tel: 0624-629525) or Merit Skip-Hire (Tel: 0624-824569). Charges are £58.75 for 2/3 days hire.

WASTE OIL DISPOSAL: Not available.

SEAMEN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5698 (8.4.91).

AUTHORITY: Isle of Man Department of Highways, Ports and Properties, Harbours Division, Sea Terminal Building, P.O.Box 11, Douglas, Isle of Man. *Tel:* 0624-686628. *Telex:* 629335 Iomhar G. *FAX:* 0624-626403. *Contact:* Deputy Harbour Master.

DOVER: 51.07 N. 01.18 E. (See Plan)

PORT LIMITS: The seaward boundary of the Port extends 1 mile off both the Eastern and Western entrances.

DOCUMENTS: Required on arrival:

Crew List H.O. Form I.S.6. or IMO FAL Form 5 (in duplicate).
Crew Declaration Form C.142 (in duplicate).
Ship's General Declaration (in duplicate) C13.
Ship's Surplus Stores Declaration (in triplicate) C14.
Derat Certificate available for inspection.

It is required to report and clear a vessel at Customs House if remaining in port more than 24 hours for loading and discharging cargo or embarking and disembarking passengers, with following:

Passenger List. Cargo Manifests (2 copies). Ship's documents.

PILOTAGE: Requests for pilotage are normally made by local agents. Pilotage is compulsory for all ships navigating within the Dover Pilotage Area (defined as port limits above) subject to the following exceptions:

(a) Ships of less than 20 m. overall, fishing boats of less than 47.5 m., H.M. Ships and foreign war ships.

(b) Ships (other than those referred to in (a) above) of less than 80 m. overall length, provided that any such ship is either not carrying dangerous substances in bulk or not substandard or in any way hampered.

All ships subject to compulsory pilotage shall board or land pilots at or close to the seaward limit of the Dover Pilotage area.

DEEP SEA AND COASTAL PILOTS: For Channel, North Sea and British Coast.

Contact agency 48 hours before arrival by radio, giving ETA Dover and destination port(s).

Agencies are: "Hutchinson Gravesend" and "Hammond Dover".

On approaching Dover contact Port Control by VHF for instructions.

Pilots will also board at any U.K. or continental port as required.

ANCHORAGE: Limited space available in Outer Harbour. Contact Port Control in advance for instructions.

The Outer Harbour comprises an area of approximately 600 acres. The Northern extremity indicated by two buoys 'East' and 'West' and 4 intermediate marker buoys, the Southern extremity denoted by a line through the Southern most tip of the Prince of Wales Pier and the Southern most tip of the Eastern Arm. The Eastern boundary is formed by a S.E.'ly line drawn through East Buoy and the Western boundary is formed by a S.E.'ly line drawn through West Buoy.

The maximum depth at MLWS is 7.3 m.

RESTRICTIONS: Attention is drawn to the strict requirement of obtaining permission from Port Control to enter or leave the harbour.

It will be noted that although the traffic control signal may be exhibited for entry/departure, every vessel manoeuvring to enter or leave the port is required to obtain specific permission to enter or leave, as the case may be.

Vessels awaiting permission to proceed should keep at a safe distance of at least 1.5 miles clear of the entrance until so authorised. Responsibility for entering or leaving with caution and the safe navigation of each vessel subsequent to the receipt of permission to proceed continues to remain the responsibility of the Master.

Explosives – Dangerous Cargo: Declaration is to be made and permission obtained prior to entering the harbour. Dover Harbour Board is not compellable to receive within the harbour any articles which in their opinion would endanger safety of harbour or vessels or goods.

HEALTH: Pratique, obtained by radio via Coastguard Station giving name of ship, ports of call during voyage, nature of cargo, number of crew and passengers, port of destination and Agent, condition and health of all on board with details of any sickness. Coastwise vessels from U.K. ports have automatic Pratique.

Also see "Health – All Ports" before first U.K. port.

RADIO: Vessels from East use North Foreland Radio call sign GNF and vessels from Westward use Niton Radio call sign GNI.

RADAR/VHF: Port Control and Admiralty Pier Signal Station are fitted with radar and VHF, vessels can make initial contact with "Dover Port Control" on VHF Channels 74, 16 and 12. Operational frequency is Channel 74. See "Pilotage".

TUGS: Two tugs of 2,900 h.p. each. Tug names 'Deft' and 'Dextrous'. Twin engined Voith Schneider. Tugs will normally join vessels inside harbour entrance, but may meet vessels outside by arrangement. Tug's rope used. Tug charges on application from Dover Harbour Board.

BERTHING: All berths in the Outer Harbour can be reached at all times. There are 3 berths available on the Eastern Arm fitted with Yokohama fenders, depth at MLWS is 8.5 m. Berths are used for lay-by, general cargo and vessels taking water, stores and crew changes. There is one berth on the South Jetty of Eastern Docks having 200 m. of quay available with a depth of 8.5 m. at MLWS. There is also 4,000 sq.m. of cargo shed and open storage space and during 1992 there will be additional temperature controlled storage of 3,625 sq.m.

Those berths in the Wellington and Granville Docks can normally be reached from 1 hour before each high water. All berthing requirements are allocated by Port Control.

Western Docks: This comprises the International Hoverport, Jetfoil Terminal, the Admiralty Pier, and Train Ferry Berth, the Inner Harbour, Tidal Basin incorporating the tug haven, Granville and Wellington Docks.

Granville Dock: This dock is non-tidal and comprises an area of 4.5 acres with depths of water of 21 ft. (6.4 m.) at MHWS, 17 ft. (5.2 m.) at MHWN. The entrance is 65 ft. (19.8 m.) wide and depth on the sill at MHWS is 21 ft. (6.4 m.). Transit sheds and open storage space are available at the Dockside.

Berth No.	*Length (m.)*		
1/2	146	Fruit/Veg/General	Portal cranes
3	76	Fruit/Veg/General	Portal cranes
4	40	Lay-by/Ro/Ro	
5	73	For lay-by only (no hot work)	
6	137	Grain	No cranes
7	96	Coal/Limestone/Coke/Pumice (leased to Cory Bros.)	

Wellington Dock: This dock is non-tidal and comprises an area of 8 acres with depth of water 15 ft. (4.6 m.) at MHWS, 11 ft. (3.4 m.) at MHWN. The entrance is 70 ft. (21.3 m.) wide and depth on the sill at MHWS is 15 ft. (4.6 m.). Transit sheds and open storage space are available. A slipway 567 ft. (173 m.) in length is capable of taking private and commercial vessels on its cradle, up to 53.3 m. in length.

This dock is now principally used by pleasure craft.

Prince of Wales Pier: This separates the inner and outer harbours. Please note that berthing alongside the Prince of Wales Pier is only permitted by special arrangement with the Harbour Superintendent.

Hoverport: All hovercraft services operate from the Hoverport adjacent to and West of the Prince of Wales Pier. "Hoverspeed" operate daily services for passengers and accompanied cars to Boulogne and Calais.

Admiralty Pier: Length 4,140 ft. (1,260 m.), with depths alongside ranging from 6.0 m. to 9.1 m.

There is one single width, single deck, multi-purpose Ro-Ro berth, other berths are used for passenger only services and for lay-bys.

At 150 m. from the base of the Admiralty Pier a jetty 75 m. in length has been constructed, to provide a breakwater for the jetfoil terminal contained to the North of this jetty. The entrance to the jetfoil terminal has been dredged to a depth of 5.0 m. below chart datum. Jetfoils operate daily services to Ostend for foot passengers only.

Train Ferry Berth: Situated on the Admiralty Pier and is operated by Sealink UK for British Rail and SNCF. Trains run direct into the ferries which operate daily services of passengers and freight to Dunkirk throughout the year.

Tidal Basin: This forms the entrance to the Wellington and Granville Docks and is entered between the Admiralty and Prince of Wales Piers. It comprises an area of approximately 12 acres.

The entrance is 140 ft. (42.7 m.) wide, with a depth of 10.8 m. at MHWS. There are 2 berths in the Tidal Basin, Nos. 16 and 17. No. 16 has a length of 300 ft. (91 m.). No. 17, length 360 ft. (110 m.) used for berthing small boats.

A tug haven has been constructed in the Tidal Basin adjacent to Clarence Quay. The jetty 45 m. in length is positioned perpendicular and to the Southern end of Clarence Quay. To the North of the new breakwater is positioned a pontoon 90 m. long parallel to Clarence Quay, providing berths for all harbour craft including the 2 tugs, dredger, patrol launch, work boats and RNLI Lifeboat. Private berth users will not be allowed to use the berth without express permission from the Harbour Superintendent or Duty Marine Officer.

Eastern Docks:

The docks comprise the Eastern Arm and Car Ferry Berths.

Car Ferry and Freight Terminal: Operated by Dover Harbour Board. Berth No. 1, situated at the North end of the Eastern Arm, is a general purpose Ro-Ro berth for all classes of Ro-Ro vessels.

Berths No. 2 and 3, situated either side of Pier A are for large Ro-Ro ferries of length 168 m. and beam 28 m. with double deck and double width loading bridges. Berth No. 4 being situated to the Westward on Pier 'B', Berths No. 5 and 6 situated at Pier 'C', with double lane loading bridges of 23 m. plus covered passenger bridges. The Seacat berth is situated on the East side of Pier D whilst Berth No. 7 is currently under construction on the West side of Pier D, for completion in 1993. The car ferry/freight berths provide berthing for vessels up to 150 m. in length with depths of water of 7.0 m. at MLWS. Berths are connected with loading bridges to enable cars, coaches and freight to drive on direct on board the vessels, operating to Calais, Boulogne, Ostend and Zeebrugge. Shore facilities provide modern reception buildings, a new passenger handling complex, Customs clearance halls, restaurant, banking facilities, shipping operators' offices, spacious assembly car parks.

BULK HANDLING FACILITIES: 2×550 t.p.h. shiploaders for grain operated by Dover Stevedoring Co. Ltd.

CRANES: *Enclosed Docks:* There are 5 electrical portal cranes of SWL 3 tonnes installed at Berths 1, 2 and 3 in the Granville Dock also 2 mobile cranes SWL 20 tonnes available for cargo handling. The 2 mobile cranes may be employed for other duties. Hire charges on application to Dover Harbour Board.

Eastern Docks: 2 × 20 tonnes SWL and 1×40 tonnes SWL container cranes are available for hire. There are 2×40 tonnes mobile cranes available. Hire charges are available from Dover Harbour Board.

CARGO HANDLING FACILITIES: Seven berths equipped for handling scheduled Ro/Ro traffic.

STEVEDORES: No particular ETA required as ship's Agent makes all necessary arrangements.

MEDICAL: Medical assistance can be arranged by Agent to vessels passing Dover Harbour. Doctor will board a vessel in English Channel or on arrival at anchorage in Outer Harbour. Hospital facilities are available.

DENSITY: 1020.

FRESH WATER: Available to all vessels by pipe-line 25 t.p.h.

FUEL: Gas oil available from Shell Mex & B.P. Ltd., and Esso. 24 hours notice required.

CONSULS:

France	Dover 204080
Italy	Folkestone 53692
Denmark	Dover 201201 (office) Dover 203333 (night)
Finland	
Germany	
Iceland	
Netherlands	
Norway	
Spain	
Sweden	

REPAIRS: Facilities available for minor engine repairs. Radio and Radar repairs also possible.

GANGWAY/DECK WATCHMEN: Supplied on request.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Certificates to be obtained for foreign clearance. Register, Load Line, Safety Construction, Passenger and Safety Equipment.

REPATRIATION: All facilities exist.

AIRPORT: Most repatriations by air through London/Gatwick and London/Heathrow.

TIME: Local time: BST (British Summer Time) 1 hour in advance of GMT. Reverting to GMT in Winter months (late March to late October).

HOLIDAYS: Official holidays: 1st January; Good Friday; Easter Monday; May Day Holiday; Spring Holiday (end May); August Bank Holiday; Christmas Day; Boxing Day.

The port is open every day for cargo and passengers, except Christmas Day.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Not available.

BANKS:

Barclays Bank Ltd., Tel: Dover 214516.
Lloyd's Bank Ltd., Tel: Dover 240808.
Midland Bank Ltd., Tel: Dover 201131.
National Westminster Bank Ltd., Tel: Dover 201308.
National Westminster Bank Ltd., (Car Ferry Terminal, Eastern Docks). Tel: Dover 201474 or 202744.
Trustee Savings Bank, Tel: Dover 202037.

SERVICES: Repairs to radar equipment, compass adjusting, supply of charts and crew changes can be arranged outside Dover Harbour through local Agents at all times.

SHIP SUPPLY SERVICE: The Dover Motorboat Co. Limited, a Hammond subsidiary, operates a 24 hours a day launch service to provide vessels off the port with Pilots and stores, etc., telephone (0304) 206809 or alternatively call the Dover Harbour Board Port Control on VHF Channel 74 to contact the Dover Motorboat Co. and allocate a working channel.

SHORE LEAVE: Allowed, subject to Port Passes (see "Identification Cards").

IDENTIFICATION CARDS: Are necessary, plus passes for ship's personnel at Eastern Arm berths having to pass through Eastern Docks Terminal. Passes obtainable from Mooring Party foreman.

GARBAGE DISPOSAL: Facilities are not provided alongside, however upon request, the ship's agent can make arrangements for a skip to be provided and collected as necessary.

WASTE OIL DISPOSAL: No shore tanks. Disposal would be facilitated using road tankers.

SEAMEN'S CLUBS: British Sailors Society, 168 Snargate Street, Dover (Tel: 0304-201410). Facilities include shop and international telephone service.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Dover Harbour Board, Harbour House, Dover, Kent CT17 9BU, United Kingdom. *Tel:* Dover (0304) 240400. *Telex:* (Harbour House) 965619, (Eastern Docks – 24 hours) 965620. *FAX:* (0304) 240465. *Cables:* Harboard, Dover. *Contact:* Captain P.R. White, Manager – Marine Operations. Captain C.Jacklin, Deputy Manager Marine Operations.

DUNBAR: 56.01 N. 02.31 W. (See Plan)

PORT LIMITS: A line drawn across seaward end of entrance channel.
DOCUMENTS: Standard U.K. documents.
APPROACHES: Leading lights bearing 198°, occulting green 6 secs.
PILOTAGE: Local pilotage may be obtained.
ANCHORAGES: Safe anchorage in Castle Bay except in Northerly gales.
RESTRICTIONS: No berthing if heavy swell entering harbour.
MAX. SIZE: LOA 50 m., draft 4 m. at HWS. Vessels lie aground on sandy bottom at LW.
HEALTH: Standard U.K. procedure.
RADIO: Forth Radio.
VHF: None.
RADAR: None.
TUGS: None.
BERTHING: Prior permission must be obtained for vessels of 20 m. LOA or greater.

Cargo unloaded by ship's own gear.
CRANES: None.
MEDICAL: No medical facilities at harbour.
FRESH WATER: Available on quayside by hose connection.
FUEL: From road tanker by prior arrangement.
CONSULS: None.
REPAIRS: Minor repairs possible.
SURVEYORS: Lloyd's at Leith Docks.
GANGWAY/DECK WATCHMEN: By arrangement with Harbour Master.
CARGO GEAR: By ship's gear or mobile crane (by arrangement with Harbour Master).
AIRPORT: Edinburgh (Turnhouse) 35 miles.
TIME: GMT. GMT plus 1 hour in Summer (late March – late October).
HOLIDAYS: None.
POLICE/AMBULANCE/FIRE: Dial 999 in an emergency. Police, Tel: Dunbar 62718; Ambulance, Tel: Haddington 3307.
EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Maritime Rescue Sub-Centre, Forth District, Crail. Tel: Crail 666.
BANKS: Local branches of Bank of Scotland and Royal Bank of Scotland only.
STORING: Small quantities of stores can be loaded from quay. Trucks can come alongside at quay.

AUTHORITY: Department of Water and Drainage, Lothian Regional Council, Alderston House, Haddington, East Lothian EH41 3SY. *Tel:* 062-82-4131. *Telex:* 727 586. *FAX:* 062-822489. *Contact:* T. Brown, Harbour Master, *Tel:* Dunbar 62008.

DUNDEE: 56.28 N. 02.57 W. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived ship" when:

(a) For berthing turn-arrival at Fairway Buoy.
(b) For Laytime – usually "off or at the berth" and subject to Charter-Party terms.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Tobacco Manifest.
1 Health Declaration.
Cargo Manifests.
Bills of Lading.
Derat Certificate.
Lights Certificate.

PILOTAGE: The port is approached by a well-defined main channel with up-to-date navigational aids. To provide information on navigation and safety the Authority operates a Port Control Service which maintains a 24 hour listening watch on VHF Channels 16 and 12.

Pilotage is compulsory in Dundee Pilotage District. Pilots board incoming vessels at either inner pilot station (Lady Buoys) or outer pilot station (Fairway Buoy), depending on weather conditions and/or type of vessel. The pilot boat is only on sea station when shipping is expected and accurate ETAs are essential.

ETA should be given 6 hours before arrival either by radiotelephone link call to Dundee Port Control 24121 or by radiotelegram to "Dockyard Dundee" Dundee or by telex 76644 Dpa G. Amendments should be made up to 2 hours before the original ETA. When within VHF range (approx. 25 miles from Tay Fairway Buoy) ETAs may be confirmed by contacting "Dundee Harbour Radio" on Channel 16 and transferring to Channel 12 to pass messages.

Pilot boats, when on station, keep a listening watch on Channel 16 and transfer to Channel 6 (156.3 MHz) to pass messages.

ANCHORAGES: Pilots are instructed where to anchor vessels. There are 3 deep-water anchorages to accommodate vessels up to 8.5 m. draft. Two anchorages for vessels up to 6.7 m. draft, and other minor anchorages.
RESTRICTIONS: Tide and draft 28.5 ft. at MHWS. Vessels enter 2 hours before HW. 26 ft. at MHWN. Vessels enter 2 hours before HW.
MAX. SIZE: Length 600 ft./700 ft., beam 90 ft., draft 28.5 ft.
HEALTH: Health Declaration on arrival – if clean, automatic Pratique. Suspect disease as per international requirements. Pratique automatic if already called at another port.

Also see "Health – All ports" before first U.K. port.
RADIO: Any UK coast station. Nearest stations – Stonehaven and Forth.
VHF: See "Pilotage" and "Tugs".

BERTHING: (Dundee).
Deep-drafted vessels must arrive at the Fairway Buoy at least 2 hours before HW to berth on same tide.

TUGS: Towage is operated by the Authority's tug – 'Abertay' (1,280 h.p. Bollard pull 17 tons). Tug joins vessel in the vicinity of West Ferry. Tug operates on Channels 16, 12 and 6 (Channel 6 when attending vessels). Tug lines optional, charge made if tugs lines used.
CARGO HANDLING FACILITIES: All types of general cargo are handled, including packaged timber and side-loading of forest products. Grab facilities for bulk material. 4 conveyors are arranged for grain and suitable bulk materials.
Cold Storage: Private cold storage in the vicinity of the port is accessible on application.
Containers: Container handling with ship's gear or mobile cranes and stevedores' transporters.
Cranage: Wide range of cranage, both mobile and portal, with grabbing facilities. Heavy lifts up to 100 tonnes can be arranged.
Grain Handling: Grab facilities. 5 conveyors are available.
Grain Storage: Temporary shed accommodation leased by Grainfax and Port Authority.
Minerals Handling: Lander hydraulic grabs.
Sheds: All riverside berths are equipped with transit sheds not less than 30.5 m. wide, fronted by broad concrete aprons. Total shed area is 39,672 sq.m. Within the harbour area there is extensive storage area and warehouse facilities.
Ro/Ro Berth: At Eastern Wharf. Accepts vessels up to 25 m. beam with stern ramps up to 12.5 m. wide. Linkspan single-lane carriageway 4 m. wide. Road vehicles up to 50 tonnes. Trailer park adjacent. Also 2 Secure Trailer Parks.
STEVEDORES: One ETA to Agent or port suffices for all services.
Full stevedoring facilities are arranged by Dundee Port Authority.
MEDICAL: Advance notice required for ordinary medication for arrivals week-ends. Hospitals and casualty stations available.
TANKERS: Diameter of hoses – 10 in. Slop discharge facilities not available. One tanker berth with depth 9.5 m. at L.A.T. One coastal tanker berth with depth 7.0 m.
DENSITY: 1010 at MLWS. 1015 at MHWS.
FRESH WATER: Available, 24 hour service. Delivery, hose from quays. Rate, 30 t.p.h.
FUEL: Bunkering is available to any vessel by direct pipe-line or by road tanker. Large quantities of any fuel type by coastal tanker, subject to 3 or 4 days' notice.
FIRE PRECAUTIONS: Regulations are handed to Master on arrival.
CONSULS:

Denmark	23044	Italy	65222	Norway	23044
Finland	23111	Netherlands	23111	Sweden	21061
France	21252				

REPAIRS: Dundee can offer fitting-out wharves and heavy lift capacity. Various local firms undertake engine and electrical repairs to vessels. Construction, repair and maintenance services for the offshore oil industry are now well developed.
DRY DOCKS: One dry dock available.
SURVEYORS: Lloyd's and D.O.T.
GANGWAY/DECK WATCHMEN: Recommended for large vessels.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: As required by Department of Transport (Lifesaving, Radio, Registry, Drugs, Crew Agreement, Load Line) also Derat.
CUSTOMS ALLOWANCES: Foreign-going: 25 cigarettes or 1 oz tobacco per day. 8 days allowance granted. Home trade: same as for foreign-going but only 4 days allowance granted. Spirits: quarter pint per day for 4 days, further issue granted after 4 days for foreign-going only.
REPATRIATIONS: Facilities exist.
AIRPORT: Dundee Airport: Only U.K. flights and charter flights available.
TIME: British Standard Time (GMT plus 1 hour). GMT in Winter months.
HOLIDAYS: 1st, 2nd and 3rd January; 1st Monday in April; 1st Monday in May; Last Monday July; 1st Monday October; Christmas Day and 26th December.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: Quay telephones installed.
SHORE LEAVE: At the discretion of the Master.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Garbage skips for normal domestic waste from vessels sited within port. Additional skips can be arranged if required. Charges depend on requirements.
WASTE OIL DISPOSAL: Service available by contacting local agents.
SEAMAN'S CLUBS: None.
REGULATIONS: Absolutely no smoking, penalty £50.
GENERAL:
Electric Power: Electric power to vessels available at repair berths.
Fire Fighting: Tayside Fire Brigade Services.
Mooring: The Authority provide boatmen's services for the mooring and unmooring of ships.
Motor Vehicle Compounds: An area of 1 acre which can be extended.
Navigation Lights: The main estuarial approach light is the Abertay Racon Buoy supported by port and starboard buoys marking the main channel as detailed in Admiralty Chart 1481.
Passenger Cruise Liners: Dundee is a port of call for passenger cruise liners at riverside berths. The city has quick access to some of Scotland's finest scenery and places of historic interest.
Policing: Effective security is provided by Tayside Police.
Ships Stores: Ship supplies are offered by a number of private firms with premises adjacent to the harbour. These include the special requirements of the offshore oil industry.
Steelyards: The port has 4 road transport weighbridges and portable weighbridges in sheds for sampling, etc.
Tidal Reference: Tide heights are related to Lowest Astronomical Tide (Admiralty Chart Datum).
Range of tides at HWN – 2.4 m. Range of tides at HWS – 4.7 m.

13 deep-water berths. Combined frontage 8,000 ft. Vessels of 920 ft have been accommodated. Draft LWOST 5.5 m. – 8.85 m. depending on berth.
CARGO HANDLING FACILITIES: 25 ton dockside crane, grab cranes and elevators. 100,000 sq.ft. warehousing and 4 acres open storage.
Cross Roads Buoy and St. Just Moorings: Max. size of vessel normally permissable on the Cross Roads Buoy, except by special arrangement with the Harbour Master: LOA: 183 m. (600.5 ft.): Draft: No limit. Anchor cable size: 77 mm. SQ (U2) steel.

Max. size of vessel on fore and aft St. Just Mooring normally permissable except by special arrangement with the Harbour Master Length overall: 205 m. (672.5 ft.) Draft: No limit. Anchor cable size 82 mm. SQ (U2) steel.

Caldy and Frigate Buoys: Max. size of vessel normally permissable on either of these buoys except by special arrangement with the Harbour Master: Length overall: 61 m. (200 ft.) Draft: 3.5 m. (11.5 ft.). Anchor cable size: 28 mm. SQ (U2) steel.

Offshore Exploration: Falmouth Docks and Engineering Co. operates an offshore supply base with all services and on an exclusive basis.

STEVEDORES: Falmouth Cargo Handling: Tel: (0326) 212100. Telex: 45175. Fax: (0326) 211674.

MEDICAL: Doctors and hospital facilities available. Agents should be advised in advance of any medical attention required.

TANKERS: 3 Tankers berth at Eastern Breakwater provided draft not more than 8.3 m. There is a tank-cleaning installation available. Tankers of 256 m. with draft 17 ft. forward and 23 ft. aft have been accommodated at Eastern wharf.

Coastal Tankers berth at Boyers Cellars, max. draft 4.9 m.

FUEL AND FRESH WATER: Full marine bunkers service by Falmouth Oil Services (Tel: (0326) 211333). Gas oil is available and water is piped on the Dock Company wharves. At the repair berths, or in Carrick Roads or Falmouth Bay, bunkers and water must be delivered by barge. Water by tug in Carrick Roads or Falmouth Bay.

CONSULS: Denmark, France, Germany, Greece, Netherlands, Norway and Spain represented by G. C. Fox & Co.

REPAIRS: All ship repairs can be carried out by A & P Appledore (Falmouth) Ltd.

DRY DOCKS: A & P Appledore (Falmouth) Ltd. (Tel: (0326) 212100).

Total wharf space: 2,438 m. Minimum depths alongside 6.10 m. to 8.53 m. LWOST. 24 hour access.

Cranage up to 48 tons.

Services: Electricity, water, steam and air.

Gas-freeing and tank cleaning facilities.

Bunkering.

Dry Docks	*Length* (m.)	*Breadth* (m.)	*Depth on sill at HWOST* (m.)

DOCUMENTS:

Stores List.

Crew List.

Health Declaration.

Manifests.

Bills of Lading.

Ship's papers, including Register, Load Line Certificate, Safety Equipment Certificate, Radio Certificate, U.K. Light Dues, if any.

Radio Officer's Report:

2 copies Master's Declaration.

2 copies Crew List.

1 copy Crew Declaration (No "Magazines" permitted).

APPROACHES: Traffic Regulatory Systems in effect. Details of current harbour Bye-laws and General Directions for navigation available. See "Radar/VHF" – "Harbour Operations Service".

PILOTAGE: PROCEDURE AND INFORMATION ON ETAs/ETDs FOR SHIPS REQUIRING THE SERVICES OF AN AUTHORISED PILOT:

Arrival Notification: Ships bound for the Haven Ports of Harwich, Felixstowe, Ipswich and Mistley and requiring a Pilot, shall notify Harwich Operations Control, 8 hours in advance, giving the ETA at the Harwich Approach Buoy (Lat. 51° 56.4′ N., Long. 01° 31.2′ E.), gross tonnage, maximum draft, departure port and destination port.

Confirmation of ETA should be given at least 3 hours before arrival at Harwich Approach Buoy.

Failure to provide the ETA and subsequent confirmation could result in delay to the ship.

In the case of a ship engaged in the short sea trade, the initial ETA may be passed at the time of leaving the last port of call, if passage time is less than 8 hours.

A ship having complied with the above conditions and then having anchored before embarking a Pilot must give Harwich Operations Control adequate notice of requiring the services of a Pilot. Failure to give such notice could result in delay to the ship.

Requests from inward-bound ships for the services of a Pilot for the Rivers Blackwater, Colne, Crouch or Roach may also be passed though Harwich Operations Control.

Departure Notification: Outward-bound ships, or ships moving within the compulsory Area, which require the services of a Pilot, shall give at least 2 hours' notice of their Estimated Time of Departure and update as required by giving 30 minutes confirmation.

Boarding and Landing Arrangements: The pilot boarding point for inward bound ships will be within the voluntary pilotage area, (see below), such that the Pilot is boarded in good time before entering the Compulsory Area.

The boarding position will be agreed with Harwich Operations Control, having due regard to the size and draft of the ship and the prevailing circumstances.

The normal boarding point will be "The Cork Station" in the vicinity of the Harwich Approach Buoy, but deep-draft ships may, by arrangement, board their pilots near the Sunk Light Vessel or the Mid-Bawdsey Buoy, depending on their point of entry into the Compulsory Area.

Boarding and landing will take place from pilot launches operating from Harwich Harbour. The launches will have the word "HAVEN PILOTS" on the side of the wheelhouse, fly the pilot flag by day and, at night, exhibit lights and signals in accordance with Rule 29 of the International Regulations for Preventing Collisions at Sea.

If the pilot launch is unable to operate in the normal locations due to stress of weather, or other unforeseen circumstances, alternative arrangements will be advised by Harwich Operations Control.

GEOGRAPHICAL LIMITS OF THE HAVEN PORTS PILOTAGE AREA (THE COMPULSORY AREA):

The area bounded by the following limits:

(a) As much of the River Orwell as lies below Ipswich Dock.
(b) As far up the River Stour as the tide flows.
(c) To seaward of Landguard Point, the area bounded as follows:
  (i) In an Easterly direction as far as 01° 24′ E.
  (ii) In a Southerly direction as far as 51° 54.5′ N.
  (iii) In a Northerly direction as far as 51° 57.4′ N.

Voluntary Pilotage: The Board will provide pilotage upon request in the area to seaward of the compulsory Area as far as a line drawn between the following points:

(a) Bawdsey Cliff – Lat. 52° 00′ N., Long. 01° 26′ E.
(b) Lat. 52° 00′ N., Long. 01° 41′ E.
(c) Lat. 51° 49′ N., Long. 01° 41′ E.
(d) Lat. 51° 49′ N., Long. 01° 15′ E.

ANCHORAGES: For vessels needing to anchor at the Sunk to await Pilot or berthing:

(i) Recommended Deep Water Anchorage approximately 2.5 miles East of Sunk Light Vessel.
(ii) King's Channel Anchorage approximately 3 miles S.W. of Light Vessel.

For vessels proceeding via Cork:

(i) Recommended Deep Water Anchorage at the Bawdsey Anchorage.
(ii) The Cork Anchorage North of the Harwich Channel Approaches.

Inside Harwich Harbour are the:

(i) Platters Anchorage, South of the Pitching Ground Buoy.
(ii) For small vessels, the Shelf and River Stour Anchorages.

Information on all these anchorages is available from Harwich Harbour Radio VHF Channel 71. See "Radar/VHF" – "Harbour Operations Service".

RESTRICTIONS: Approach Channel dredged to 11.0 m. (below Chart Datum). Deepest water alongside is 13.4 m. (C.D.) at Trinity Container Terminal. At least 0.3 m. keel clearance (except Landguard which is 0.5 m.) required at all times between channel bed and keel of vessel.

MAX. SIZE: General cargo vessels: Dock Basin 39.0 m. wide entrance. Depth 6.7 m. (C.D.). No lock gates. Suitable vessels able to leave on any state of tide.

North Quay: 146 m. + 45 m. = 191 m. in length.
South Quay: 186 m. in length.
East Quay: 132 m. in length.

Container Vessels: Landguard Container Terminal, depth 11.9 m. (C.D.) for 280 m. of quay, 9.75 m. (C.D.) for remainder. Max. draft 9.3 m. – 11.4 m.

Trinity Terminal – Berth No. 1: Depth 11.6 m. (C.D.). Max. draft 11.3 m.

Trinity Terminal – Berth No. 2: Depth 11.9 m. (C.D.). Max. draft 11.6 m.

Trinity Terminal – Berth No. 3, 4 and 5: Depth 13.4 m. (C.D.). Max. draft 13.1 m.

Ro/Ro vessels Ferry Terminal: Ro/Ro Bridge No. 1: Vessels up to 184.6 m. overall, depth 7.3 m. (C.D.) Ro/Ro Bridge No. 2: Vessels up to 151.0 m. length, depth 7.3 m. (C.D.) Ro/Ro Bridge No. 3: Vessels up to 137.2 m. length, depth 7.3 m. (C.D.). Ro/Ro Bridge No. 4: Depth 9.75 m. (C.D.). Vessels up to 213 m. overall.

Tanker Jetty: Vessels 180 m. overall, depth 9.75 m. (C.D.).

All berths subject to siltation between maintenance dredging periods.

HEALTH: Pratique flag in daylight and lighted signals in darkness to be displayed by vessel on arrival. Health Declaration to be given in writing or verbally by Master on arrival. If disease suspected, then report to pilot station who will advise Health Authorities.

Also see "Health – All ports" before first U.K. port.

RADIO: North Foreland, Humber, Niton (or any other radio station convenient to vessel's position).

RADAR/VHF: *Harbour Operations Service:* An Operations Service is operated by the Harwich Haven Authority, and is provided from the Harbour Master's Office, Navigation House, Harwich on a 24-hour basis to provide all vessels using the harbour with navigational information and advice. The following facilities are available:

VHF Radio:	Channel 16	Safety.
	Channel 9	Pilotage and ETAs.
	Channel 71	VTS and Reporting.
	Channel 6	Pilot Launches.
	Channel 69	Tugs.
	Channel 20	Harwich Radar Assistance.
	Channel 11	Harbour Craft.
Telephone:	0255 243000	Harbour Operations.
	0255 243111	Pilot Orders.
Telex:	98472 HAROPS G.	
Fax:	0255 241325	

Dangerous substances in Harbour Areas notifications should be sent by telex or fax 24 hours prior to arrival or at time of leaving last port.

The centre is equipped with comprehensive radio and telecommunications, advanced radar surveillance displays, VHF and direction finding equipment, electronic tide gauges, and wind instruments, to provide full and up to date navigational information to seafarers.

All vessels over 50 gross tons must carry suitable VHF R/T equipment, capable of communicating with the Harwich Harbour Operations Service (call sign "Harwich Harbour Radio") and must maintain a listening watch on Channel 71 (156.575 MHz) while navigating within the harbour and approaches. Vessels entering or leaving the harbour must contact the Operations Service for permission to navigate through the area, in accordance with the procedures laid down in current Harwich Harbour General Directions for Navigation.

Traffic regulatory procedures exist with respect to the Harwich Deep Water Channel and within other areas of the harbour, depending on circumstances. The Harbour Operations Service will keep vessels suitably advised.

TUGS: Up to 5 tugs (Up to 40 tons bollard pull) join vessels in Harwich Approaches, or where ordered by Pilot. Tugs listen on Channel 16 and Channel 71 (24 hours). Main tug working Channel when engaged in towing is Channel 69.

In addition 3 dock tugs up to 11 tons bollard pull are available. Contact on Channel 71 or via Harbour Operations.

BERTHING: All berthing information available through Harbour Operations via Harwich Harbour Radio, who have direct links to Berthing Master's Office at the Port of Felixstowe.

CONTAINER TERMINALS:

Terminal	*Berth* No.	*Length* (m.)	*Depth* (m.)
Landguard	–	440	9.75 – 11.90
Trinity	1	1,704	11.6
Trinity	2		11.9
Trinity	3, 4, 5		13.4

All berths are dredged annually.

Container Handling Equipment:

Landguard:	
Container Cranes:	3 Paceco portainers (1×40 ton and 2×30 tons capacity). 2 Morris ship-shore container cranes (2×40 tons capacity).
Park Gantry Cranes:	12×35 ton Paceco rubber tyred gantry cranes.
Container Park:	26 ha. (ground slots – 3369 TEU's; capacity – 9,000 TEU's).
Reefer Points:	256 (20 ft.).
Trinity:	
Container Cranes:	7 Davy Morris ship-shore container cranes (Post-Panamax) 40 tons capacity. 2 I.H.I./M.G.M. container cranes (Post-Panamax) 40 tons capacity. 2 I.H.I./M.G.M. container cranes 40 tons capacity. 2 Conrad Stork container cranes 40 tons capacity.
Park Gantry Cranes:	(All 35 tons capacity – rubber tyred gan cranes) 23×Davy Morris, 5×M.G.M., 10×Paceco and 4×Morristac.
Container Park:	76 ha. (ground slots – 14,200 TEU's; capacity – 47,900 TEU's).
Reefer Points:	582.

Rail Facilities: All berths are served by rail including 2 Freightli Terminals, one serves the Landguard Container Terminal and the oth serves Trinity Container Terminals.

CARGO HANDLING FACILITIES: *General Cargo Division:* Mob pneumatic grain discharger, discharge rate 30 t.p.h. into silo w capacity of 3,500 tons.

Mobile cranes, capacity 27.5 tons. Scotch derrick crane, capac 32 tons at 90 ft. radius.

Roll-on/Roll-off Division: No. 1 Berth: P & O European Ferries Termina Upper and Lower deck loading ramps. Electric travelling crane, capac 32 tons at 110 ft., depth 23.3 ft.

No. 2 Berth: P & O European Ferries Terminal: One hydraulic loadin ramp designed to carry loads up to 140 tons. Upper loading ram designed to carry loads up to 32 tons. Least depth 25.3 ft. LWOST.

No. 3 Berth: Hydraulic loading ramp designed to carry two lanes traffic with loads up to 140 tons. Electric travelling crane with capac of 35 tons at 95 ft. radius, least depth 25.3 ft.

No. 4 Berth: Allows a combination of Roll-on/Roll-off and containe vessels to be accommodated. The hydraulic loading ramp is designe to carry two lanes of traffic with loads of up to 140 tons.

STEVEDORES: 24 hours notice required by Agent to advise stevedore of vessel's ETA, in order to arrange berthing and allocation of labou All stevedoring arranged between Dock Company and vessel's Agent

MEDICAL: Prior notice desirable through Agent to arrange attention. A services available.

TANKERS: 4 in. and 6 in. connections. No slop facilities, except a required by MARPOL Regulations. No facilities for gas freeing alongsid or in harbour.

One tanker berth available. Vessels up to 180 m. overall, 25,000 ton displacement and max. draft 9.1 m. at C.D.

DENSITY: 1025 salt water.

FRESH WATER: Pipe-line connections to all quays. Delivery approx 25 t.p.h. Tug service available for supplies to vessels at anchor.

FUEL: Marine diesel and gas oil available, pipe-line and barge deliver 24 hours notice required.

FIRE PRECAUTIONS: Standard precautions at all berths.

CONSULS: Royal Swedish Vice-Consul, Harwich 241063; Icelandic Vice-Consul, Felixstowe 285651/4; Netherlands and Germany, Harwic 506666.

REPAIRS: Facilities exist for small repairs only.

DRY DOCKS: None available.

GANGWAY/DECK WATCHMEN: Not compulsory. If required, cos negotiable.

OPENING/CLOSING HATCHES: Work undertaken by crew.

CERTIFICATES:

Valid Derrick and Rigging Certificates.	Safety Equipment.
Ship's Register.	Radio.
Load Line.	Derat.
(Light Dues Receipts).	Construction.

CUSTOMS ALLOWANCES: 100 cigarettes or equivalent in tobacco o cigars per man. 1 bottle spirits.

REPATRIATION: All facilities available.

AIRPORTS: Ipswich – 10 miles; Southend – 70 miles; Heathrow - 90 miles. International flights.

Air UK flights from Norwich to Aberdeen, Amsterdam, Berge Edinburgh, Humberside, Leeds/Bradford and Teesside. Internal and continental flights from Ipswich.

TIME: GMT. In Summer months, April to October, time advanced 1 hou

HOLIDAYS: All normal Bank Holidays, but official notification of por closures for such holidays is given well in advance of relevant dates.

POLICE/FIRE/AMBULANCE: Emergency points on all quays. Tel. 430 or, outside dock area, 999.

TELEPHONES: Shore connections available by prior arrangement fo vessels on regular trades.

SERVICES: Most services available for dry cargo vessels, but no specia tank cleaning or tank washing facilities for tankers.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not necessary if in possession of Seaman's Book or Passport.

GARBAGE DISPOSAL: Skips are placed at strategic points o quayside, and are emptied as and when required by Hales Waste Control, Papermill Lane, Bramford, Ipswich, IP8 4DE (Tel: 0473 83172 who can also arrange to dispose of excessive amounts of waste.

WASTE OIL DISPOSAL: Can be supplied by Southern Economy Fuels Substation Road, Felixstowe, IP11 8SR (Tel: 0394-272236, Fax: 0394 271540). They will collect sludge and waste oil by 20 ton tanker lorr Any reasonable quantity can be accepted. 24 hour/7 days a wee service. Cost on application, depending on water content, no specia berth necessary.

SEAMEN'S CLUBS: Felixstowe Seafarers Centre, The Dock Felixstowe (Tel: 0394-673599). Facilities include games room, poo table, TV, darts, table tennis, food available, shop, internationa telephone, church services, minibus collection, postage facilities. Ope 7 days a week.

CURRENCY: U.K.Pound (U.K.£).

GENERAL: ETA to Agent required 72 hours, 48 hours, and 24 hou prior arrival.

AUTHORITY: Felixstowe Dock & Railway Co., Tomline House, Th Dock, Felixstowe, Suffolk IP11 8TB. *Tel:* Felixstowe (0394) 60450 604789. *Cables:* Dock, Felixstowe. *Telex:* 98277 or 98535 (Operation *FAX:* 0394 604653. *Contact:* D.Harrington, Managing Directo P.Bennett, Executive Director and General Manager. D.Barr, Director o Operations. Captain J.M.Bubb, Port Operations Manager.

FISHGUARD: 52.01 N. 04.58 W. (See Plan)

DOCUMENTS: See "Cardiff".
PILOTAGE: Local Pilot available on request. Pilotage compulsory.
ANCHORAGES: Eastward of a line joining Northern and Eastern breakwaters.
MAX. SIZE: Max. draft 18 ft.
HEALTH: See "Health – All ports" before first U.K. port.
RADIO/VHF: Fishguard Radio, VHF Channel 16 and 14.
TUGS: None.
FACILITIES: Stern loading, car and Roll-on/Roll-off Ferry Port. Also Lift-on/Lift-off crane of 22 tons.
CRANES: 1×6 tons and 1×22 tons.
STEVEDORES: No stevedores – vessels worked by Sealink British Ferries staff.
MEDICAL: Doctors available. Hospital facilities 16 miles away.
DENSITY: 1025.
FRESH WATER: Available alongside quay.
FUEL: Available with prior warning.
GANGWAY/DECK WATCHMEN: Ship's crew.
OPENING/CLOSING HATCHES: Crew.
REPAIRS: Minor repairs by Sealink workshops and contractors.
SURVEYORS:

1. Cargo Surveyor: Captain D. Hughes, tel: Fishguard 873880.
2. Lloyd's Surveyor: Tel: Milford Haven (06462) 4811.

CUSTOMS ALLOWANCES: (Crew allowance) 40 cigarettes. No wine or spirits unless proceeding on leave.
AIRPORT: Cardiff, Swansea and Haverfordwest.
POLICE/FIRE/AMBULANCE: Dial 999. British Rail police and Sealink Port Supervisor on duty 24 hours.
EMERGENCY CO-ORDINATION CENTRE: Coastguard – Tel: Dale 218.
BANKS: Barclays Bank, The Square, Fishguard, Dyfed. Tel: Fishguard 873226. No telex.

Midland Bank, West Street, Fishguard, Dyfed. Tel: Fishguard 872232. No telex.

Lloyds Bank, West Street, Fishguard, Dyfed. Tel: Fishguard 872309. No telex.

STORING: See "Prelims".

1. Vessel can be stored by barge or truck, limited space of approximately 15 ft. width available for trucks.
2. Loading of stores can be carried out from barge with ships equipment.
3. Trucks of limited size can proceed alongside berth.
4. Fork lifts can be used to handle stores.
5. Prior notification to local customs,.
6. Sealink can assist with stores if given prior notification.

SHORE LEAVE: Allowed.
AUTHORITY: Sealink Harbours Ltd., Fishguard Harbour, Goodwick, Dyfed, SA64 0BU, South Wales. *Tel:* Fishguard (0348) 872881. *Telex:* 48167. *FAX:* (0348) 874699. *Contact:* S.F.Buhlman, Port Manager.

FLEETWOOD: 53.55 N. 03.00 W. (See Plan)

LOCATION: The Port of Fleetwood is situated on the Lancashire coast approximately 38 km. (24 miles) North West of Preston and 42 km. (26 miles) South West of Lancaster.
DOCUMENTS:

Manifests.
Bills of Lading.
Ship's papers.
Crew Lists.
Customs Documents.
Health Documents.

PILOTAGE: Pilot to be picked up off No. 1 Fairway Buoy. Ordered through ship's Agent giving 24 hours notice of ETA.
ANCHORAGES: Good anchorage in outer limits of harbour in Lune Deeps in 14 fathoms.
RESTRICTIONS: Vessels under power must not navigate any portion of this harbour above Buoy No. 11 at a greater rate of speed than is necessary to navigate safely, also on passing other vessels, either steam or sail, hopper barges, pontoons in tow, etc., in the channels outside the above mentioned Buoy No. 11 and within harbour limits due care must be taken to pass them at a rate of speed that will not cause risk from displacement or what is commonly called "backwash", and that all vessels must be navigated in this harbour strictly in conformity with Rule 9 (Narrow channels) contained in the Collision Regulations for Preventing Collisions at Sea, 1972.

Vessels bound into Fleetwood must not enter the river without being sure they have sufficient depth of water to ensure their getting to the quays or piers to which they are bound.

In the event of any vessel grounding on the "Tiger's Tail" or in any other part of the Fleetwood Harbour, the Master shall not attempt to refloat the vessel by reversing the engines, or by any other means whatsoever, until all incoming vessels following have passed the stranded vessel and the channel is clear of shipping.

Locks are normally open from 2 hours before HW to 1 hour after HW.
MAX. SIZE: (Within enclosed docks): 107 m. LOA: 14.1 m. beam.

So far as draft is concerned, allowances have to be made for clearing the lock invert. These allowances vary according to the beam of the ship and the following scale may be taken as a guide:

Beam of Vessel (m.)	*Clearance Required* (m.)
11.28	0.69
13.41	1.22
14.02	2.21
14.17 maximum	3.12

HEALTH: See "Health – All ports" before first U.K. port.
RADIO: VHF Port Operations and Information Service. Call sign: Fleetwood Harbour Radio Channel 16 (156.80 MHz): Calling and Safety. Channels 11 and 12: Port Operations.

All movements of vessels arriving for and sailing from the Harbour and Docks are controlled by the Harbour Master using the VHF Port Operations and Information Service located in the Harbour Master's Office on the West side of Fleetwood Harbour. (Lat. 53° 55′ 30″ N., Long 3° 00′ 12″ W.). This service is operated for the 24 hour period, and vessels must maintain a listening watch when approaching or leaving the Port. Messages must be restricted to matters appertaining to general navigation, berthing instructions and the safety of ships or persons within the Port Area. Messages of any other nature will not be accepted.
TUGS: Tug service available.
BERTHING: Under normal conditions the lock gates operate for 2 hours before to one hour after HW.

There is a Roll-on/Roll-off berth in the harbour. This is a twice daily service to Larne for wheeled vehicles and trailer loads and a daily service to Warrenpoint.

Dock	*Quay Length (Total)* (m.)	*Depth of Water (Absolute Min.)* (m.)	*Max. Size of Vessel Length* (m.)	*Beam* (m.)	*Draft* (m.)	*Approx. d.w.t.*
Fish Dock	800	5.5	107	14.1	5.5	3,500
Harbour/	To suit vessel					
Ro-Ro Berth	150	4.5	152	20.3	4.2	5,000
Isle of Man Berth	91	As required	107	—	4.2	—

Fish Dock: Modern facilities for fish handling, marketing and processing are available operated by Fish Handling (Fleetwood) Ltd. and a large number of wholesale fish merchants.

Ro-Ro Berths: Separate berths handling Irish Sea and Isle of Man freight and passenger ferry services are located within the port. Ample land is available for development of Ro-Ro business.

Offshore Supply Facilities: The port has been used as a supply base for oil exploration in the Irish Sea and facilities for offshore operations include a helicopter pad.
MEDICAL: Ship's Agent will organise medical attention if required.
DENSITY: 1015 at half tide; 1025 at high water.
FRESH WATER: Fresh water available through stand pipes. Charge according to consumption (sliding scale).
FUEL: All grades of fuel available.
FIRE PRECAUTIONS: No specific requirement outside usual "No smoking" precautions.
GANGWAY/DECK WATCHMEN: Ship's watchmen required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
REPAIRS: One slipway located in Fish Dock with lifting capacity of 1,050 tons.
REPATRIATION: Arranged through ship's Agent.
AIRPORT: Squires Gate, Blackpool, 10 miles away.
TIME: GMT in Winter. GMT plus 1 hour in Summer months.
HOLIDAYS: Christmas Day and Boxing Day; New Years Day; Good Friday and Easter Monday; Spring Bank Holiday; May 1st; Autumn Bank Holiday.
POLICE/AMBULANCE/FIRE: Police 999; Ambulance 999; Fire 999.
TELEPHONES: Can be arranged through Post Office.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
GARBAGE DISPOSAL: Service available through Wyre Mini Skips (Tel: 872171, mobile: 0860-771530) every working day.
WASTE OIL DISPOSAL: Service available through B & M Salvage Fuels, Fleetwood (Tel: 779650).
SEAMEN'S CLUBS: Royal Naval and Merchant Seamans Dependant's Fund social workers available.
CURRENCY: U.K.Pound (U.K.£).
AUTHORITY: Associated British Ports – Fleetwood, Dock Office, Wyne Dock, Fleetwood, Lancs. FY7 6PP. *Tel:* (0253) 872323. *Telex:* 777296. *FAX:* (0253) 777549. *Contact:* N. Pounder, Port Manager. Captain P.L. Sherry, Pilot/Harbour Master.

FOSDYKE BRIDGE: 52.52 N. 00.02 W.

APPROACHES: Common approach channel shared with Port of Boston.
PILOTAGE: Compulsory. A joint service for the two ports is provided in conjunction with the Port of Boston Authority. Tel: 0205-362114. VHF Channels 16 and 12.
MAX. SIZE: Spring tides: Draft up to 5.0 m.; LOA 58 m. (exceptionally *with prior approval* 59 m. – 60 m.).

Lowest Neap tides: Draft 2.8 m.; LOA 50 m. – 52 m.
VHF: Fosdyke Port Radio operates on Channels 12 and 14. A listening watch is maintained during shipping movements on the River Welland.
TUGS: Service operated by wharfingers.
BERTHING: Private wharf 69.50 m. long giving 1/2 berths alongside, situated on North bank of river, operated by Port of Fosdyke Ltd.
FRESH WATER: Available.
GARBAGE DISPOSAL: A skip is provided for disposal of domestic refuse, etc.
WASTE OIL DISPOSAL: Not available.
SEAMEN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Port of Fosdyke Ltd., Fosdyke Bridge, Boston, Lincs. PE20 2DB. *Tel:* Fosdyke 0205-85240. *Telex:* 37208. *FAX:* 0205-85400. *Contact:* R.A.Waterfield, Port Manager.

AGENT: Welland Ships' Agents, Fosdyke Bridge, Fosdyke, Boston, Lincs. PE20 2DB. Tel: (0205-85) 240. Telex: 37208. Fax: 0205-85400. Contact: R. A. Waterfield, Manager. Tel: 0945-583181 (Home).

FOWEY: 50.20 N. 04.39 W. (See Plan)

PORT LIMITS: The whole of the Fowey River to a line across the entrance to the harbour. A vessel is considered to have arrived on entering the harbour unless she is anchored just outside by the Pilot to await suitable conditions for entering, in which case she is considered to have arrived on being so anchored.

DOCUMENTS:

Crew and Passenger Lists are essential, using IMO forms.
Aliens List is essential.
List of Bonded Stores, including beer.
List of Personal Dutiable Articles owned by Crew.
Bill of Health, if available.
Derat Certificate.
Manifest of all cargo on board.
Copies of Bills of Lading.
Stowage plan, if available.
Normal Ship's Papers.

PILOTAGE: Compulsory within the harbour limits. Vessel requiring Pilot gives ETA as far in advance as possible to Agent. Vessel displays normal signals off port. VHF calling Channel 16, working Channel 9. Pilot cutter (LOA 55 ft.) has a black hull and orange upperworks. The Pilot boards off entrance. Vessels can anchor South of entrance if necessary.

Pilots VHF station open for messages from arriving ships up to 2 hours before time of ETA received by Agent. Pilots telephone No. 0726-870291 (calls are automatically diverted to duty pilot).

RESTRICTIONS: Vessels can enter at any time, if their draft is less than 18 ft. Otherwise according to tide. Depth of ship channel at LWOST – 22 ft.

MAX. SIZE: LOA 540 ft., beam 60 ft. Loaded draft of 28 ft. Vessels of this draft have to be handled at or near high water.

Vessels up to 540 ft. in length are handled, but subject to prior consultation with the Harbour Master and owners of the loading berths.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Land's End Radio, Niton, or Portishead.

VHF: For arriving vessels see "Pilotage".

Fowey Harbour Commissioners "Fowey Harbour Radio" calling Channel 16, working Channel 12, ECC Ports Ltd., loading berths operators, "Fowey Port Radio", calling Channel 16, working Channel 12.

TUGS: Three diesel tugs are available and normally join vessels on entering entrance. Ship's lines usually used. No tug required for vessels under 90 m. in length under normal conditions. Only 1 tug required for vessels under 100 m. length. Two tugs required for vessels over 100 m. length. Harbour Master may require particular vessels to enter with tug assistance.

BERTHING: Vessels waiting for berths are normally moored, using their own anchor with their stern to a buoy. On the berth, vessels require long ropes.

Berth	*Max. LOA (approx.)* (m.)	*Depth of Water at LWOST* (m.)
Jetty No. 3	110	7.0
Jetty No. 4	120	7.3
Jetty No. 5/6	170	6.7
Jetty No. 8	140	8.5

CARGO FACILITIES: The port is specially equipped to handle china clay and ball clay in bulk and to a limited extent in bags. Occasional cargoes of timber are handled. Discharge is by mobile crane. There are 5 berths. Berth No. 4 has a bulk conveyor capable of handling up to about 330 t.p.h., Berth No. 6 up to 500 t.p.h. and Berth No. 8 up to 1,000 t.p.h. Berth No. 3 for liquid slurry coal only. 6 tonne and 3 tonne mobile cranes are available.

STEVEDORES: Earliest ETA possible is required, especially when a vessel arrives over week-end.

MEDICAL: If Medical Officer is required on arrival, advise Agent earliest opportunity. Hospital facilities are available.

DENSITY: River fully salt at all states of the tide.

FRESH WATER: Available at all jetties, delivered by hose and rate very variable.

FUEL: Gas oil only available by Shell bunker barge or by road. As much notice as possible is advisable.

CONSULS:

Finland	J. A. Samuel, c/o S.C.U.K. Ltd., Fowey. Tel. 072683–3161
France	J. A. Samuel, c/o S.C.U.K. Ltd., Fowey. Tel. 072683–3161
Denmark	J. A. Samuel, c/o S.C.U.K. Ltd., Fowey. Tel. 072683–3161
Netherland	J. A. Samuel, c/o S.C.U.K. Ltd., Fowey. Tel. 072683–3161

REPAIRS: Fowey Harbour Commissioners have repair facilities for minor repairs and welding.

SURVEYORS: West Marine Surveyors & Consultants Ltd., Consulting Marine Surveyors, Engineers & Naval Architects, The Old Custom House, Brixham, South Devon. Tel: Brixham (080 45) 2604. After normal office hours: Tel: 0803 842925. Cables: Surveyor, Brixham. Telex: 42962 Survey G.

GANGWAY/DECK WATCHMEN: Not normally employed.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes *or* 100 cigarillos *or* 50 ciga *or* 250 grams tobacco. Drink over 22% alcohol 0.5 litre *or* under 22 alcohol 1 litre *or* 1 litre fortified sparkling wine. 2 litres still wine. 50 gram perfume. 0.25 litre toilet water. Half this allowance for vessels arrivin from home trade ports which for this purpose is from Elbe/Brest rang of ports.

REPATRIATION: Facilities exist.

HOLIDAYS: Saturdays, Sundays, and all Public Holidays.

POLICE/AMBULANCE/FIRE: Telephone 999 or VHF Channel 16.

TELEPHONES: No arrangements made for connection on board.

SERVICES: Compass adjusting can be arranged.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not needed.

DELAYS: There is a possibility of delay in heavy rain.

GARBAGE DISPOSAL: Skips are provided on quays adjacent t loading berths. Special arrangements made by agents and ECC Port for Haul Waste to provide specific services. In Summer months a skip is afloat in the harbour for leisure craft.

WASTE OIL DISPOSAL: Can be arranged by agent with Haul Wast South Coast UK (Tel: 0726 833161).

SEAMEN'S CLUBS: Flying Angel Mission to Seaman is in the dock area adjacent to agent's office. Tel: 0726 833102/833505.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Fowey Harbour Commissioners, Albert Quay, Fowey Cornwall PL23 1AJ. *Tel:* 0726-832471. *FAX:* 0726-83373 *Contact:* Captain M. J. Sutherland, Chief Executive and Harbour Maste Captain D. I. Gammons, Assistant Harbour Master.

GARSTON: 53.21 N. 02.54 W. (See Plan

LOCATION: On the North bank of the River Mersey, 6 miles from Liverpool city centre.

DOCUMENTS, HEALTH: and all general information, refer t "Liverpool".

RESTRICTIONS: Locking into/out of Garston commences 3 hours before HW and ceases 3 hours after for vessels of 250 ft. in length or under. Vessels over this length must enter when the river and dock are level – about 1 hour before HW to half an hour after.

MAX. SIZE: Length 500 ft., beam 63 ft., draft 27 ft.

RADIO: As Liverpool.

VHF: Stalbridge Pierhead is linked to the Mersey Docks & Harbour Co Port Operation Radio/Telephone system. Docking and berthing instructions may be obtained through Channel 20 (call sign "Garston Docks"). Information will also be conveyed through these Channels or through Anglesey Radio on MF R/T.

BERTHING:

Dock	*Quay Length (Total)* (m.)	*Maximum Size of Vessel* *Length* (m.)	*Beam* (m.)	*Approx Draft* (m.)	*d.w.t.*
Stalbridge Dock	975	152	19.2	8.3	10,000
Old & North Docks	1,405	Old 152	19.2	7.0	6,500 (approx.)
		North 122	19.2	5.5	5,000

Storage and Warehousing: Garston provides a covered transit shed 32,614 sq.ft. (3,031 sq.m.) in area, located on the North Dock and a warehouse 5,005 sq.ft. (465 sq.m.) at Stalbridge Dock.

Dock Facilities:

Stalbridge Dock:

	No.	*Capacity*
Cranes	1 (Scotch Derrick)	32 tonnes
	2	10 tonnes
	2	7.5 tonnes
	2	6 tonnes

A belt loading coal shipping appliance, loading capacity 300 tonnes per hour.

High capacity fork and clamp lift trucks available.

Old & North Docks:

	No.	*Capacity*
Cranes	1 (Scotch Derrick)	32 tonnes
	2	7.5 tonnes
	2	6 tonnes

CONTAINER FACILITIES: North Dock Container Berth in operation equipped with 1×35 tonne transporter crane and back-up facilities.

STEVEDORES: *Port Working Hours:* Flexible.

Conventional Cargoes:

(a) Garston Port Stevedores Ltd.,
Dock Road, Garston, Liverpool.
Telephone: 051 427 3835
Fax: 051 427 8110

(b) Mersey Stevedores Ltd.,
Johnsons Lane, Widnes, Cheshire.
Telephone: 051 495 1040
Fax: 051 495 1044
Telex: 628370

(c) North West Stevedores Ltd.,
26-30 South Road, Weston Point, Runcorn, Cheshire.
Telephone: 0928 575926
Fax: 0928 568150
Telex: 629201/627400

DENSITY: 1025.

FRESH WATER: Available Monday to Friday 0800 to 1600 hrs All watering required outside of these hours is by arrangement and must be paid for at overtime rates. Rate of delivery, 10 t.p.h.

OPENING/CLOSING HATCHES: Hatches to be opened and closed by the crew except on request.
AIRPORT: Liverpool Airport, 1 mile distant.
HOLIDAYS: Normal English Bank Holidays. Vessels can be worked on these days but this involves additional payment.
POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.
TELEPHONES: No connection can be made to vessels. Shore base facilities.
DEVELOPMENTS: Provision of a modern Steel Handling Terminal in the Stalbridge Dock by Frank Armitt & Son Ltd. – with 11,000 sq.ft. of covered storage and 2×25 tonne overhead gantry cranes.
AUTHORITY: Associated British Ports – Garston, Port Office, Dock Road, Garston, Liverpool L19 2JW. *Tel:* (051-427) 5971. *Telex:* 628706. *FAX:* (051–427) 5971, Ext. 246. *Contact:* A. Winfield, Port Manager.

GIRVAN: 55.15 N. 04.51 W. (See Plan)

DOCUMENTS: Normal U.K. documentation. H.M. Customs attendance obtained by contacting Harbour Master.
PILOTAGE: By local fishermen only – contact Harbour Master.
ANCHORAGES: To seaward clear of channel approaches. This area is hazardous in gales, particularly from the N.W.
RESTRICTIONS: Draft occasionally restricted at MLWS due to siltation. Harbour Master will advise on water depths available.
MAX. SIZE: LOA 50 m., beam 9 m., draft 3.5 m. Vessels with max. draft will only be moved at or near HW.
HEALTH: Under H.M. Customs control.
RADIO: ETA messages, etc. via Portpatrick Radio Station, Call on 2182 kHz – VHF Channel 16 (British ships may call on 2381 kHz but listen on 1792 kHz).
VHF: Harbour VHF ship to shore available 0900 – 1700 hrs. daily, Monday to Friday inclusive. Calling: Channel 16; Working: Channel 12.
TUGS: None.
BERTHING: South Pier Quay: 107 m. long, depth 2.1 m. MLWS.
Ailsa Berth: 49 m. long, depth 2.2 m. MLWS.
Fish Wharf: 42 m. long, depth 2.1 m. MLWS.
Fish Quay: 62 m. long, depth 2.2 m. MLWS.
Note: Fish Wharf and Fish Quay used only for fishing vessels.
CRANES: No port cranes available. Mobile cranes can be hired from local companies.
MEDICAL: Small local hospital, contact Harbour Master for assistance.
DENSITY: Water brackish, being sea water with fresh water river discharge.
FRESH WATER: Available.
FUEL: Diesel fuel only.
FIRE PRECAUTIONS: Normal safety procedures.
CONSULS: None, nearest at Glasgow.
REPAIRS: Small engine and deck gear repairs may be carried out alongside.
DRY DOCKS: None. 2 slipways, max. length of vessel which can be slipped, 21 m. – 33 m. overall.
SURVEYORS: Not available.
GANGWAY/DECK WATCHMEN: None. If desired would have to come from ship's crew.
HATCHES: Worked by crews.
CUSTOMS ALLOWANCES: Apply to H.M. Customs Officers.
CARGO GEAR: Hire-in mobile cranes or ship's own gear.
REPATRIATION: No arrangements.
AIRPORT: Prestwick, distance 38.4 km. Glasgow, distance 91 km. Internal U.K./Europe/Scandinavian and North Atlantic services.
TIME: Winter – GMT. Summer – March to October, British Summer Time i.e. 1 hour ahead of GMT (dates as announced).
HOLIDAYS: Cargo working unlikely on Christmas Day and New Year's Day.
POLICE/FIRE/AMBULANCE: In emergency dial 999 otherwise telephone numbers are: Police: Girvan (0465) 3587. Fire: Ayr (0292) 267471. Ambulance: Girvan (0465) 2571.
EMERGENCY CO-ORDINATION CENTRE: Marine Rescue Co-ordination Centre, (H.M. Coastguard), Greenock. Tel: Greenock (0475) 29014 or 29988. Telex: 777006.
TELEPHONES: No ship links.
SERVICES: No special services available locally. Compass adjuster available from Glasgow.
BANKS: Local banks only.
STORING: See "Prelims".
3. Yes.
4. Yes.
There is no accommodation for storage.
SHORE LEAVE: Unrestricted after Customs clearance.
IDENTIFICATION CARDS: Clear requirements with Customs.
GARBAGE DISPOSAL: Refuse bin available adjacent to Harbour Master's Office.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
REGULATIONS: No unusual regulations.
DELAYS: Normal breakdown/weather delays.
GENERAL: The harbour is formed at the mouth of the river known as "Water of Girvan". The water in the channel and basin is, therefore, a mixture of sea and fresh water.

A breakwater protects the inner part of the channel on the North side. A timber and steel sheet pile jetty protects the basin from river scour. Access is hazardous in N.W. gales.

In 1988 the harbour channel was deepened to give a minimum depth of water of 3 m. at MLWS. Siltation is a continuing problem and the depth available has been reduced as noted in previous sections.

The harbour is primarily a fishing port. However, it is used regularly by small tankers and cargo vessels of the coasting type, bringing in raw materials for local industry. As may be noted, berthing accommodation is very restricted.
AUTHORITY: Strathclyde Regional Council, Department of Roads, 15 Links Road, Prestwick KA9 1QG. *Tel:* Prestwick (0292) 76716. *FAX:* (0292) 671455 *Contact:* Mr. Neil McProvan.

Mr. R Lietch, Harbour Master,Girvan. *Tel:* Girvan (0465) 3648.

GLENSANDA: 56.34 N. 05.32 W. (See Plan)

LOCATION: Glensanda is on the Western shore of Loch Linnhe some 9 miles North of Oban in approximate position 56° 34′ N., 05° 32′ W. Glensanda is over 6 miles along a track from the nearest road and that road is only a narrow highland lane, thus it is necessary to appreciate that Glensanda is remote and that its services are severely restricted. The only commodity that can be supplied at Glensanda is crushed granite.
PORT LIMITS: The limits of the Company's jurisdiction are from position 56° 35.862′ N., 05° 29.982′ W. on the shore, S.E. to position 56° 34.826′ N., 05° 27.922′ W., then S.W. to position 56° 31.165′ N., 05° 33.975′ W., then N.W. to the shore at position 56° 31.839′ N., 05° 35.312′ W.
DOCUMENTS: Usual U.K. requirements. Customs attend from Oban.
APPROACHES: The approaches to Glensanda Harbour and to the berth are deep and clear. The port is well served by a Pilot, mooring launches, lighthouses and beacons. Generally ships will enter Glensanda Harbour in Loch Linnhe through the Firth of Lorne between the islands of Mull and Lismore. Smaller ships can safely enter Loch Linnhe through the Sound of Mull.
PILOTAGE: The pilot boarding station is one mile off Port Donain on the Isle of Mull (in about 56° 24′ N., 05° 37′ W.). If Masters are willing, they may enter Loch Linnhe and take the Pilot at Glensanda's Southern harbour limit (in about 56° 31′ N., 05° 35′ W.). Pilot boards vessels under 10,000 tonnes d.w.t. at the Inner Pilot Station in Loch Linnhe. Thus the position for boarding the Pilot reflects the Master's wishes and judgement. Masters are required to inform Glensanda of their decisions in this respect. Certain ships are not to berth or unberth without the Pilot being on board. Vessels should not enter Glensanda's harbour limits without the Harbour Master's express permission.

Vessels to call Pilot on VHF Channel 14 when they are one hour from the pilot station.
ANCHORAGE: If the berth cannot take the ship for any reason there are many sheltered and safe anchorages in the vicinity. The Harbour Master recommends anchorages:
South of Lismore at 56° 27′ N., 05° 33′ W. (depth 35 m.)
West of Lismore at 56° 32.5′ N., 05° 31′ W. (depth 60 m.)
RESTRICTIONS: Berthing is generally restricted to the hours of daylight, unless the Harbour Master considers conditions for manoeuvring off the berth in the dark are acceptable. Unberthing is performed without regard to light.
MAX. SIZE: Panamax or 100,000 d.w.t. – 120,000 d.w.t. part load.
VHF: The Quarry Office and Pilot maintain watch on Channel 14.
TUGS: 1 tug (25 ton bollard pull). The tug is available at 14 hours notice for berthing large vessels without bow thrusters.
RADIO: Masters should keep Glensanda well informed of their approach with notices to the Glensanda Harbour Master (cable address "Glensanda Oban") 5 days, 3 days, 2 days and 1 day prior to arrival. Over the last 3 days these ETA's should be timed to reach Glensanda for their opening (0700 hrs.) to permit their day's work to be planned and to be ready for the ship.

Ships are asked to guard Portishead Radio Station whilst on passage to Glensanda as the Agent and Harbour Master will use that station by preference should they have a message for the ship.

Masters are especially asked to telex Yeoman (Morvern) Ltd. (See "Authority") with the following details from their previous port:

1. Ship's particulars.
   - (a) Ship's name.
   - (b) Master's name.
   - (c) Flag.
   - (d) Radio call sign.
   - (e) Satcom number.
   - (f) Marine telex number.
   - (g) Summer deadweight.
   - (h) Gross registered tonnage.
   - (i) Number of hatches.
2. Proposed Stowage.
   - (a) Tonnage to be loaded in each hold.
   - (b) Grade to be loaded in each hold.
   - (c) Sequence and Tonnages in which each hold is to be loaded.
3. Pilot Station.
   Advise if the Pilot is to board off Port Donain (3 miles South of Lismore) or at Glensanda's Southern harbour limits. This decision can be revised as the ship approaches Glensanda to reflect current conditions.

BERTHING: The depth of water at the berth is at least 12.3 m. at chart datum. To this depth may be added the rise of tide in the range of 0.2 m. at low water to a maximum of 4.4 m. at high water (spring tides).
LOADING: *Conditions:* The matter of ballast is of particular interest as manoeuvrability must be maintained. The vessel's propeller and thruster must be fully submerged for berthing.

The air draft of the ship loading arm can be raised to 21 m. above the highest high tide, so high that there is no need to ballast deeply to get a ship below it.

The shiploader is intended to load at 6,000 tonnes per hour and has almost to achieve this speed if demurrage is to be avoided on some contracts of affreightment.

It is Glensanda's experience that large bulk carriers (i.e. Panamax class) can berth and rapidly deballast if they approach with their peak tanks, ballast hold and top wing tanks full and their double bottom ballast tanks empty. If the ballast hold is needed for cargo, it is of no concern if its tank top is damp or even has puddles when it is loaded.

CARGO: The aggregate is manufactured in 4 basic grades, by diameter:
(a) 40 mm. – 20 mm. – for rail ballast.
(b) 20 mm. – 10 mm. – for concrete.
(c) 10 mm. – 5 mm. – for road surfacing.
(d) 5 mm.– dust – for various uses.

These basic grades are frequently mixed to form special categories for specific requirements. The final grades must not be co-mingled. For each final grade, hold separation is required.

Base Grades Diameter (mm.)	*Stowage Factors* (Tonnes per cu.m.)	*Angles of Repose*
(a) 40 – 20	1.37	36°
(b) 20 – 10	1.45	38°
(c) 10 – 5	1.46	39°
(d) 5 – dust	1.56	43°

(i.e. every grade stows at about 24 cu.ft. to 28 cu.ft. per long ton).

For loading aggregate, holds may be damp, as the material is immune to fresh water. On completion of loading, hatches are to be covered to reduce the weight of rain water in the cargo. However, salt water is an unacceptable contaminant and must be avoided. Hatches must be watertight.

The cargo is loaded by automated shiploader. This machine can span the full length and width of all the hatches of a 60,000 ton – 70,000 ton bulk carrier without having to shift the ship. The loader operates at up to 6,000 tonnes an hour and can distribute the cargo without peaks forming. It is operated from the deck of the ship by radio control allowing direct contact between the ship's staff and the loading supervisor.

Loading is performed around the clock on every day of the year except for Christmas Day and New Year's Day. Rain will not interrupt loading but the shiploader will cease work if the wind speed exceeds 48 knots.

Holds are inspected for cleanliness by Glensanda's staff and must be approved before the Notice of Readiness is accepted and permission to start loading is given. Glensanda's Inspectors will be checking to determine that there are no traces of any previous cargoes or loose scale. Some cargoes, such as coal, petcoke, bauxite, alumina, sulphur and salt, can seriously devalue aggregate and any traces of these materials is unacceptable. Although hold washing is not always necessary, for some grades of aggregate and for some trades it is unavoidable. A covering Letter of Instruction will be issued when hold washing is considered necessary. Holds may be washed with salt water and need not necessarily be dry for loading to start. Thus the ballast hold can be loaded as soon as it has been pumped out.

MEDICAL: Emergency medical services are available. Glensanda has a small airstrip. The Yeoman staff includes first aid men and a doctor is available from Oban's small hospital and Port Appin.

DENSITY: 1023 – 1025.

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: If required, surveyors attend from Glasgow.

Belt weight figures used for Bill of Lading.

REPAIRS: Repairs are not to be contemplated, partly because the weather can rapidly deteriorate and partly because there is no service for repairs in the vicinity.

REPATRIATION: Not recommended.

HOLIDAYS: Christmas Day and New Year.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: No facilities.

SEAMAN'S CLUBS: None.

GENERAL: *Visitors:* To visit Glensanda, other than by ship, needs Yeoman's co-operation. Visitors can take a train to Oban or fly to Glasgow and take a car to Yeoman's Rhugh Garbh depot which is some 10 miles North of Oban on the A828 main road towards Fort William. Yeoman's passenger launches ply on a regular schedule between Rhugh Garbh and the Glensanda Quarry. This journey takes about 30 minutes to cover the 8 miles down Loch Creran and across Loch Linnhe to the quarry.

Harbour Conditions: Loch Linnhe is free of swell as its approaches are well protected by the islands of Mull and Lismore.

The waters of Glensanda Harbour are virtually free of tidal streams at any depth. A sluggish stream of up to 1 knot has been irregularly observed during the fall ebb of spring tides.

Glensanda's times of high and low water are observed to follow closely those of Oban. Glensanda has a tide pole clearly visible from the berth. It is noticeable that the level of high water stands for about 90 minutes after each high tide before falling rapidly.

Wind observations have been made from a meteorological station set on a knoll some half a mile from the berth. At the berth the Harbour Master believes winds are less strong and more inclined to blow from the N.E. or S.W. It is difficult to draw any conclusions, but Glensanda is a windy place. Winds tend to vary in strength and direction in an unpredictable manner though S.W. and N.E. winds do predominate. The berth lies along this S.W./N.E. axis.

Services: Glensanda ought not to be depended upon for any services except those to cover the immediate work in hand of loading aggregate.

Cash: By prior arrangement and transfer, the Agent can supply the Master with cash, in Sterling, on arrival.

Notary: A local Oban Notary can accept Notices of Protest, though the time taken to reach his office and to return to the ship may delay vessel's sailing.

AGENCY: *The Glensanda Harbour Agent:* Morvern Shipping Agenc Limited, Rhugh Garbh Depot, Barcaldine, Oban, Argyll, Scotland PA3 1SE. Tel: (063 173) 441. Telex: 777792. FAX: (063 173) 460. Cable "Glensanda Oban".

The Quarry Office maintains radio watch on VHF Channel 14 durin office hours and around the clock when a ship is approaching or is the port.

The Glensanda Harbour Master shares these communication faciliti with the Agent. The Harbour Master's Office and home telephon number is (063 173) 537. He may be reached on VHF radio by callin "Glensanda Harbour Master".

The Agent can provide Masters with details of any other services th are required. H.M. Customs attend ships in the normal manner. Maste can always contact emergency services if the Agent is not availab through the Oban Coastguard on VHF Channel 16.

AUTHORITY: Yeoman (Morvern) Limited, Rhugh Garbh Depo Barcaldine, Oban, Argyll, PA37 1SE. *Tel:* Office (063 173) 44 *Telex:* 777792. *FAX:* (063 173) 460. *Contact:* Captain J.A.Jackso Harbour Master. Tel: (063 173) 537.

GOOLE: 53.42 N. 00.50 W. (See Plan

PORT LIMITS: Goole is a river port with Conservancy jurisdiction to the junction of rivers Humber, Ouse, Trent. However, laytime commences from commencement of next normal working shift after ship is on bert and ship's Agent has issued "Notice of Readiness". This may b 0800 hrs. or 1300 hrs. dependent on time of issue of notice.

Precedence of order of arrival of vessels is determined by arrival time at Ocean Lock Entrance – Goole Docks.

DOCUMENTS:
Bills of Lading/Manifests (prepared by Agents at port of origin).
"Imperfect" Customs Entry.
Request (to work vessel).
*Request for Immigration Officer to be in attendance – if carrying passengers.
*Crew List to Immigration Officer (for foreign personnel).
Ship's Register.
*Ship's Agent will normally notify Immigration Officer.

PILOTAGE: Compulsory from Spurn to Goole, except for vessels claiming exemption by reason of length or by possession of a Pilotage Exemption Certificate.

ANCHORAGES: Bull Anchorage on chart of Humber Estuary, or in Hul Roads, otherwise only on advice of Pilot.

RESTRICTIONS: State of tide, Springs or Neaps. Port entered during tidal hours, 3 hours 30 minutes before HW to 1 hour (approx.) after HW according to draft. Pilots will advise.

Locks: 3 entrance locks, largest being 104 m. long and 24.4 m. wide Depth on sill 8.0 m. (MHWS) and 6.0 m. (MHWN).

MAX. SIZE: Subject to suitable tides, vessels of approximately 100 m overall length, 5.5 m. draft, 24 m. beam and 4,500 d.w.t. (approx.) ca be accepted. It should be noted that vessels with a beam in excess o 13.4 m. will find certain berths in the port inaccessible due to bridgewa restrictions.

HEALTH: Pratique issued by H.M. Customs Waterguard (in absence o Port Health Official). Pratique accepted when entering after calling a another port in the U.K.

Also see "Health – All Ports" before first U.K. port.

TUGS: Tugs available but not normally used. If required, to be arranged through Ship's Agent.

BERTHING: Berthing instructions given to vessel on arrival at entranc locks. No specific requirements.

RADIO: Via Humber Radio, call sign GKZ – call on Channel 16. Give ship's name and call sign and pass message.

VHF:

Station	*Call Sign*	*Channel No.*	*Operational Times*	*Remarks*
Vessel Traffic Services Humber, Queen Elizabeth Dock, Hedon Road, Hull	"Vee Tee Ess Humber"	16 12	Continuous watch maintained	Calling and safety. Navigation and safety information etc. for Rivers Humber, Ouse and Trent.
Blacktoft Jetty	"Blacktoft Jetty Radio"	14	3 hours before HW Goole until 1 hour after HW Goole	Port Operations and berthing instructions for Blacktoft.
Goole Docks	"Goole Docks Radio"	14	Continuous watch maintained	Port operations and docking instructions for Goole.

Also see "Hull".

SPECIALISED CARGO HANDLING FACILITIES: Boothferry Termina for specialised container handling, 26,000 sq.m. hard standing an sheds, equipped with 4 heavy duty fork lift trucks, Liebherr gantry crane a mobile port tower (container crane) and a 70 tonne capacity crawle crane.

1 mobile shiploading conveyor for grain, rate 100 t.p.h.

12×7.5 tonne and 5×6 tonne quay cranes, equipped with suitab grabs for sand, ores, fertilisers, coal, grain, sulphur, scrap, etc.

5 mobile cranes up to 40 tonne capacity and fleet of forklift trucks wi capacities up to 35 tonnes and capable of lifting 20 ft., 30 ft. and 40 f containers.

2×32 tonne Scotch derrick cranes for container handling, one a Stanhope Dock and one at Jubilee Quay East.

50 tonne electric travelling crane for heavy lifts.

2 Ro/Ro ramps for abnormal loads of up to 450 tonnes – otherwis no special facilities needed as water is maintained at a constant leve

Some bulk liquids (creosote, tar), direct to or from road tanker vehicles.

Timmgrain Ltd. operate 2 separate silo facilities which give 12,000 tonnes of storage capacity for grain, maize, maize products, etc.

Damac Bulk Handling Ltd. operate 2×3,000 tonne silos for cement cargoes. Discharge rate 180 tonnes per hour.

STEVEDORES: Arrangements made by ship's Agent who should be given ample notice of time of arrival of vessel.

Port Working Hours:

Monday to Thursday 0800 – 1200 1300 – 1700
Friday 0800 – 1200 1300 – 1600

Overtime available 24 hours a day, 7 days a week.

MEDICAL: Ship's Agent will arrange for attendance of doctor on notification. Doctor's, dentists and hospital services available. Ship's Agent can arrange service required.

DENSITY: Water in Goole Docks is fresh water and is maintained at constant level. Entry is by locks. Density 1000.

FRESH WATER: Delivery by water-boat through hose-pipes. Rate 30 t.p.h.

FUEL: All grades available on reasonable notice being given to Ship's Agent.

FIRE PRECAUTIONS: No specific precautions unless there are exceptional circumstances, when special arrangements can be made with local Fire Service.

CONSULS: France, Netherlands and Denmark.

REPAIRS: All types of deck and engine repairs possible by local ship repairers.

DRY DOCKS: Dry Dock No. 2: 91 m. length, 15.2 m. width at entrance, 4.75 m. depth on sill. One other dry dock. The water in the wet docks at Goole is maintained at a constant level and all dry docks are entered direct from the wet docks.

GANGWAY/DECK WATCHMEN: Necessary. Usually provided from crew. Otherwise by negotiation locally.

OPENING/CLOSING HATCHES: Responsibility of crew.

SHIP CERTIFICATES:

Ship's Register (including load-line)
Ship's Gear Certificates (when gear is used in port)
Radio Safety
Life-Saving
Light Dues
Change of Articles
Derat Certificate

CARGO GEAR: Normally not required, as ample port facilities available.

REPATRIATION: Arranged by Ship's Agent.

AIRPORT: Humberside Airport. Daily services to Amsterdam, Aberdeen, Bergen, Edinburgh, Newcastle, Norwich, Stavanger and Teeside.

TIME: GMT in Winter; GMT plus 1 hour in Summer months.

HOLIDAYS: Facilities available on all Bank Holidays, except Christmas Day, Boxing Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: Contact Port Manager's office.

BANKS: Midland Bank, Tel: 762401. Barclays Bank, Tel: 762431. National Westminster Bank, Tel: 764541.

TELEPHONES: No arrangements for ship connection.

GARBAGE DISPOSAL: Waste disposal skips placed at a number of locations on quays. Skips emptied on a weekly basis.

WASTE OIL DISPOSAL: Disposal by road tanker available through ship's agent.

SEAMEN'S CLUBS: Goole Mariners Club, Bridge Street, Goole. Tel: 0405-764730/762058.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.6061 (26.7.91).

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: May be required to be produced to Immigration Officer or H.M. Customs Offical, especially in the case of foreign flags.

REGULATIONS: Visitors to vessels require permits from Port Authority and Master or ship's Agent. Smoking not permitted ashore in dock area.

AUTHORITY: Associated British Ports – Goole, East Parade, Goole, North Humberside, DN14 5RB. *Tel:* (0405) 762691 (6 lines). *Telex:* 57626. *FAX:* (0405) 767419. *Contact:* C. Silvester, Port Manager.

GRANGEMOUTH: 56.01 N. 03.43 W. (See Plan)

PORT LIMITS: At Grangemouth a vessel is not considered to be an "arrived vessel" until she is tied up at the allocated berth.

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 List of all high duty goods in crew's possession.
1 Cargo Manifest.
All Valid Certificates.

PILOTAGE: Compulsory in river. Pilot boards at Inchkeith. Pilot boat on VHF, also see "Radio".

ANCHORAGES: North of Grangemouth West Buoy, 2 fathoms. Charleston Roads 5 fathoms. East of Inchkeith, up to 8 fathoms.

RESTRICTIONS: 24 hour locking system in operation depending on draft. The height of the tide must always be taken into account when dealing with larger vessels.

MAX. SIZE: Dry cargo vessels: Length 600 ft., beam 90 ft. Tankers: Length 575 ft., beam 90 ft. Draft according to state of tide. Vessels other than tankers max. draft 25 ft. 6 in. Tankers, up to 34 ft. max. draft.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Wick, Stonehaven and Cullercoats coastal stations and Forth Radio.

Port VHF (FM) Communications: Station: Lock Control Office, Lock Entrance, Grangemouth. This centre will maintain a continuous watch. Call sign: Grangemouth Docks.

Channel 16 (156.8) calling and safety. All vessels should maintain a listening watch on this Channel and use it to establish contact with Grangemouth Docks. Once contact is established the Duty Operator will request vessels to shift to the Port Operations Channel.

Channel 14 (156.7 MHz), Port Operations. A working Channel restricted to messages relating to the movement and safety of ships, and in emergency, to the safety of persons.

Channel 10 (156.6 MHz), Inter-ship. A working Channel for tug-to-tug and tug-to-bridge communications.

Channel 6 (156.3 MHz), Inter-ship. A working Channel for communication with other vessels.

Channel 9 (156.5 MHz). A working Channel for tug to tug and tow to tow communications.

No message of a personal character or messages of any other nature than those pertaining to the general navigation and safety of ships and persons within the Port Area can be accepted.

TUGS: Tugs can join vessel at Hen and Chicken Buoy or Lock Gates and should be pre-booked. Tugs' lines used. 2×25 ton bollard pull tugs available.

BERTHING: The water in Grangemouth Docks is maintained at the same level by impounding pumps. On passing through the lock entrance berthing is allocated according to the nature of the cargo and draft of vessel.

The depth of water available at the berths varies in each dock, the max. depths being approx.: Grange Dock 26 ft.; Carron Dock 23 ft.; Old Dock 17 ft.

CARGO HANDLING FACILITIES: Bulk cargoes can be handled at most berths within the port. The East Wall berth has 4×10 ton grabbing cranes, 2×7.5 tonne mobile cranes are available. Other berths have 10 and 6 ton cranes. 1×35 tonne Scotch derrick. Container berth is 1,000 ft. long and has 2×32 ton transporter cranes.

A Ro-Ro berth in operation. Liquid chemicals and LPG Carriers are handled at the LPG berth and BP jetties. No. 1 North Jetty, which is a common user jetty handles chemicals.

STEVEDORES: No particular advice necessary to stevedores. Essential, however, advise Agent 24 hours prior arrival, who will advise stevedores.

MEDICAL: No advance notice necessary. Hospital facilities available in immediate district.

TANKERS: B.P. Refinery (Grangemouth) Limited. Private jetties in Eastern Channel. South Side Jetties "J2" and "J3" 34 ft. "J4" and "J5" 19 ft. 6 in. North Side Jetties "E1" and "E2" 34 ft. No. 1 North Side Jetty, pipe-lines connected to Ross Chemical and Storage Co. are 1.5 in. nitrogen line, 6 in. chemical line, 10 in. heavy fuel line, 2 in. fresh water supply, 8 in. motor spirit line, 8 in. gas oil line. Draft at No. 1 North 32 ft. 6 in.

DENSITY: 1019 average.

FRESH WATER: Available in most berths. Watermen supervise delivery on request. Delivery rate varies depending on berth.

FUEL: All grades available from oil installations.

GANGWAY/DECK WATCHMEN: Not necessary but can be done by ship's personnel.

OPENING/CLOSING HATCHES: Custom of port is crew open and close hatches but stevedores will do so if required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent of 5 ounces tobacco per man and equivalent of 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port more than 3 or 4 days may receive extra allowances.

CERTIFICATES: For Customs Clearance valid Certificates in respect of Radio, Load-Line, Construction, Safety Equipment, Deratisation, necessary.

CONSULS: Norwegian, Danish and Swedish Consuls available locally.

REPAIRS: All types of repairs can be carried out afloat.

DRY DOCKS: Carron Dry Dock: Length 350 ft., breadth 50 ft., depth 22 ft.

SURVEYORS:

(1) Macleod & McAllister Ltd., Old Granary Office, Meadowside Quay, Glasgow G11.
(2) Thomas Nicol and Son, 11 Bothwell Street, Glasgow G2.
(3) S. A. Greer & Co., 15 North Claremont Street, Glasgow G3.
(4) E. K. Wallace & Son Ltd., 11 Bothwell Street, Glasgow G2.
(5) Lloyd's Register of Shipping, 27 Thistle Street, Edinburgh.

REPATRIATION: All facilities exist.

AIRPORT: 1 hour from Glasgow and Edinburgh airports where numerous connections for London thence world wide travel.

TIME: British Standard Time (1 hour ahead of GMT). GMT during Winter months.

HOLIDAYS: First 3 weekdays in January; Easter Monday; 1st Monday May; 3rd Monday July; 2nd Monday September; Christmas Day and 26th December.

POLICE/AMBULANCE/FIRE: In public telephone dial 999 and ask for appropriate service. With dock circuit telephone dial 222 and ask for Police/Fire/Ambulance.

EMERGENCY CO-ORDINATION: Coastguard Fifeness Tel: 033 35 666. Major Port Emergencies are controlled by the Police dial 999 or contact through Harbourmaster Grangemouth Tel: 486839.

SERVICES: Compass adjusting, calibrating, etc., can be done in river. No equipment for tank cleaning but can accept tank washings ashore.

BANKS: Royal Bank of Scotland, La Porte Precinct, Grangemouth.

Bank of Scotland, La Porte Precinct, Grangemouth.

STORING: See "Prelims".

Vessels may be stored by trucks alongside dry cargo berths. There are no facilities for storing, by trucks, vessels berthed at jetties in Eastern Channel.

Trucks may, by prior arrangement, proceed alongside dry cargo berths to store vessels.

Stevedores fork lifts may be employed to handle ship's stores.

Customs regulations are in force for stores remaining on board. Details of stores, including bonded goods such as spirits, etc., must be supplied to Customs on arrival, and a constant check is kept whilst the ship is in Port. Regarding stores loaded aboard, any bonded goods must be presented to Customs for inspection and approval. Restricted amounts only are permitted.

Local riggers may be employed for storing.

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Skips are provided on quayside and are collected as required.

WASTE OIL DISPOSAL: Collection by road tanker by Kelvin Waste.

SEAMEN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Forth Ports Authority, Dock Office, Grangemouth, Stirlingshire FK3 8UE. *Tel:* (0324) 482591. *Telex:* 777432. *FAX:* (0324) 665106. *Contact:* A. McEwen, Port Manager.

GRANTON: 55.59 N. 03.13 W. (See Plan)

DOCUMENTS: See "Leith".

PILOTAGE: Pilot station Firth of Forth located at Granton, boarding station West of Fairway Buoy at Longitude 3° West. Contact with pilot cutters can be made on VHF Channel 16 and R/T 2182 kHz. Pilotage not compulsory for vessels passing South of Inchkeith Island.

ANCHORAGES: Good holding ground at Leith roadstead 8 m. – 19 m. at C.D. Request should be made to Forth Navigation Service for suitable anchorage position.

RESTRICTIONS: The entrance between the breakwaters is 103 m. in width. The rise of tide, 5.182 m. at Springs and 3.658 m. at Neaps, permits the entry or exit of vessels up to 7.07 m. draft at HW.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Forth, Stonehaven and Cullercoats radio stations.

RADAR/VHF: Port and estuary radar service. Contact should be made with "Leith Harbour Radio" for berthing instructions on VHF Channel 12. Forth Navigation Service should be contacted on VHF Channel 71 by all vessels passing Forth Ports Authority seaward limit (line joining North and South Carr Beacons), working on Channels 20 and 12.

TUGS: Sound signal for vessels requiring tug services is four long blasts. Tugs, if required, join the vessel in the roads. Tugs towing gear available, and compulsory.

BERTHING: Middle Pier: Quayage 210 m. max. depth 5.1 m. LWOST. In addition, there is a 122 m. crosspiece at the end of the pier where depth of water is 5.1 m. LWOST. Ro-Ro ramp available.

West Pier: Closed to all traffic.

MEDICAL: No advance notice of medical attention required. All hospital facilities available.

TANKERS: Jetty closed.

FRESH WATER: Available alongside at all berths.

FUEL: All grades available subject 24 hours notice in advance.

CONSULS: See "Leith".

REPAIRS: Facilities available for all minor repairs.

AIRPORT: Edinburgh Airport, served by regular airlines, situated about 6 miles away.

HOLIDAYS: Public holidays observed annually: Third Monday in April; third Monday in September; Christmas Day (25th December); 26th December; 1st, 2nd and 3rd January.

AUTHORITY: Forth Ports Authority, Leith Port Office, 1 Prince of Wales Dock, Edinburgh EH6 7DX. *Tel:* (031) 5544343. *Telex:* 72192. *FAX:* (031) 5551212. *Contact:* Captain J.Landels, Harbour Master – Leith and Granton.

GREAT YARMOUTH: 52.34 N. 01.44 E. (See Plan)

DOCUMENTS: Usual U.K. requirements.

PILOTAGE: A 24-hour service is provided, subject to 8 hours notice and confirmation 2 hours before arrival. Pilots can be contacted on VHF Channel 12.

RESTRICTIONS: When large or awkward vessels are navigating within the port, it may be necessary to hold or slow down other vessels.

TRAFFIC CONTROL SIGNALS:

By Night:

(a) When entrance to the Haven is *prohibited* 3 fixed red lights vertically disposed (3 F.R (vert)) 2.0 m. apart, will be exhibited on the South Pier brick building, the lower being at a height of 11.0 m. above MHWS, arc of visibility 235° (T) through 270° (T) to 295° (T) from seaward.

In the event of it not being possible to exhibit these lights, the night signal for prohibiting entrance to the Haven will be the extinguishing of: The Brush Light, the Leading Lights, the Main Light and the South Pier Lights and/or as advised by Yarmouth Port Radio on VHF Channel 12.

(b) Control of vessels proceeding South down the Haven:
3 fixed red lights vertically disposed (3 F.R. (vert)) 2.0 m. apart are exhibited on the North side of the White Port Control Office Gorleston at the root of the South Pier, to indicate that NO vessel when proceeding down the Haven is to come South of the lifeboat shed on the Gorleston side of the river.

In the event of failure of these lights vessels will be advised by Yarmouth Port Radio on VHF Channel 12.

By Day:

(c) The lights as described in (a) when entrance to the Haven i prohibited also the lights as described in (b) for controlling vessel proceeding South down the Haven will also be exhibited durin the day. In the event of failure, vessels will be advised by Yarmou Port Radio on VHF Channel 12.

TIDAL SIGNAL: When the tide is flooding between the piers, a quic flash amber (Q.Am) is exhibited on the South Pier brick building, arc o visibility from 235° (T) through 270° (T) to 295° (T) from seaward.

Also see "Bridges".

MAX. SIZE: Max. length 138 m., max. draft 5.7 m. HWOST.

With a tidal range of only 1.9 m. and a minimum entrance depth o 4.3 m., Great Yarmouth can be used by vessels up to 4,000 d.w.t. and with a length of up to 120 m.

HEALTH: Usual U.K. procedure. Contact Port Health Officer for Dera Fumigation, Quarantine or Livestock Quarantine.

VHF: Masters of vessels intending to enter the harbour must notify the Harbour Master at least 1 hour before arriving off South Pier, giving ETA, max. draft, gross tonnage, any dangerous cargo and last port o call (Also see "Pilotage"). Masters must also obtain clearance before starting to navigate through the entrance between the piers.

Where possible, VHF Channel 12 must be used for giving information and obtaining clearance to navigate from the Harbour Master.

Yarmouth Radio keeps a continuous watch on Channels 12 and 16. The Haven Bridge operates on Channel 12.

Reporting: All vessels over 50 g.r.t. and any others fitted with VHF must report to Yarmouth Radio when passing Ocean Terminal, Atlas Berth and Turntide Jetty (Breydon Water), giving direction of travel.

TUGS: The port's 550 h.p. tug *Hector Read* has a bollard pull of nearly 7 tonnes and can be used for all harbour work. It is fully equipped with salvage and fire fighting pumps. Contact should be made through the Harbour Master.

BERTHING:

East Side:

Bowling Green Wharf: Length 65 m. Bulk cargoes.
South Quay: Length 475 m. General cargo and Lay-By.
Mayer Newman: Length 98 m. Scrap cargoes.
ABC Wharf: Length 123 m. Repairs afloat.
Atlas Berth: Length 125 m. Ro/Ro berth.
Wood Group Berth: Length 349 m. Offshore vessels and bunkering
Milpark Berth: Length 59 m. Offshore vessels.
Phillips Berth: Length 85 m. Offshore vessels.
GY Warehousing: Length 154 m. General cargo and offshore vessels
Ocean Terminal: Length 70 m. Common user Ro/Ro terminal.
Amoco Berth: Length 131 m. Offshore vessels.
East Quay: Length 160 m. General and bulk cargoes.
Lay-By Berth: Length 100 m. Offshore and general cargoes.
North Discharge Berth: Length 158 m. Lay-by, offshore and general cargoes.
South Discharge Berth: Length 82 m.
B.P. Berths: Length 172 m. Tanker and bunker berths.
Ventureforth Marine Base: Length 320 m. Offshore vessels.

West Side:

Clarkes Quay: Orfeur & Bellin. Length 78 m. Wheat and timber imports.
Bunns Quay: Length 125 m. Fertiliser imports.
Southtown Wharf: Length 73 m. General and bulk cargoes.
British Gas berth: Length 76 m. Offshore vessels.
Turmerics Berth: Length 170 m. Fabrication Yard.
Portland Wharf: Length 120 m. Offshore vessels.
Richards Shipbuilders: Length 152 m. Ship construction repair yard
Palgrave Browns: Length 225 m. General and bulk cargoes.
Yeoman Berth: Length 179 m. General and bulk cargoes.
Bollard Quay: Length 394 m. General cargoes and lay-by.
Gas House/EAE Quay: Length 370 m. Offshore vessels and general cargoes.

CRANES: The Port Authority have 5 mobile cranes, including 3 that can lift up to 24 tonnes and 2 that can lift 3.5 tonnes. All are equipped with grabs and hooks. Truck mobile cranes up to 80 tonnes S.W.L. and higher are available from the Port Authority.

BRIDGES:

Haven Bridge Lights:

1. Western Buttress: At both the North and South ends, 2 fixed red lights vertically disposed (2 F.R. (vert)).
2. Eastern Buttress: At both the North and South ends, 2 fixed green lights vertically disposed (2 F.G. (vert)).
3. At Centre Span: On both the North and South sides, a fixed red light (F.R.).
4. Traffic Control Signals: By Day and Night.

When *passage* through the bridge is *prohibited* from the South going upriver, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Eastern Buttress.

When *passage* through the bridge is *prohibited* from the North going downriver, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Western Buttress.

In the event of failure of these lights, vessels will be advised by the Haven Bridge Master on VHF Channel 12.

Breydon Bridge Lights:

1. Southern Buttress: On both the upriver and downriver ends, 2 flash red lights vertically disposed every 5 seconds (2 Fl.R. 5s (vert)).
2. Southern Dolphins: On both the upriver and downriver, 2 fixed red lights vertically disposed (2 F.R. (vert)).
3. North Buttress: On both the upriver and downriver ends, 2 flash green lights vertically disposed every 5 seconds (2 Fl.G.5s (vert)).
4. Northern Dolphins: On both the upriver and downriver dolphins 2 fixed green lights vertically disposed (2 F.G. (vert)).
5. At Centre Span: On both the upriver and downriver sides, a fixed amber light (F.Am.).
6. When the bridge is lifted above a 45° angle, on each side near the end of the lifting span, a fixed red light is exhibited (F.R.) (Aircraft warning light).

7. Traffic Control Signals: By day and night.

When *passage* through the bridge is *prohibited* going West upriver on to Breydon Water, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited on the main structure of the bridge on the Southern Buttress.

When *passage* through the bridge is *prohibited* going East downriver towards Haven Bridge, 3 fixed red lights vertically disposed (3 F.R. (vert)) will be exhibited above the Control Building.

In the event of failure of these lights, vessels will be advised by the Breydon Bridge Operator on VHF Channel 12.

8. Restricted Visibility – Fog Signal: This is a horn which gives 2 blasts every 30 seconds (2 Bl.ev 30s).

STEVEDORES: There are various stevedoring companies offering a full range of services for offshore and cargo vessels.

MEDICAL: Doctors and dentists can be arranged through Agents. Hospital facilities available.

FRESH WATER: Water is available on most operational quays.

FUEL: BP operate a bunkering facility with a delivery rate for gas oil at up to 50 tons/hr. Storage capacity of about 10,200 tons of which about a third is available for marine use.

Wood Group operate a bunkering facility with a gas oil delivery rate of up to 100 t.p.h. Storage capacity about 3,000 tons.

Ventureforth operate a bunkering facility with a gas oil delivery rate of up to 50 t.p.h. Storage capacity 1,200 tons.

CONSULS: Belgium: Consul, Harwich. Tel: (0255) 252101.
Denmark: Vice-Consul, Great Yarmouth. Tel: 856831.
Finland: London Embassy. Tel: (071) 235-9531.
France: Consul, London. Tel: (071) 581-5292.
Italy: London Embassy. Tel: (071) 235-8643.
Netherlands: Vice-Consul, Great Yarmouth. Tel: 856831.
Norway: Vice-Consul, Great Yarmouth. Tel: 850431.
Spain: London Embassy. Tel: (071) 235-5555.
Sweden: Consul, Felixstowe. Tel: (0394) 673884.

REPAIRS: Several ship repair companies are located in Great Yarmouth and most types of repairs can be undertaken.

DRY DOCKS: Richards (Shipbuilders) repairs ships up to 85 m. long and 12.5 m. beam. Sill depth 4.4 m. at MST. Also a shipbuilding berth.

SURVEYORS: Both Marine and Cargo Surveyors can be arranged through the Agent.

AIRPORT: Flights are available by helicopter and light aircraft from North Denes Airfield, 5 km. from the North of the town.

Air U.K. operate scheduled daily flights from Norwich to British and Continental destinations.

TIME: GMT. Summertime (GMT plus 1 hour) kept from March to October.

POLICE/AMBULANCE/FIRE: Dial 999 in an emergency.

EMERGENCY CO-ORDINATION CENTRE: H.M. Coastguard, Tel: 851338.

SERVICES: Compass adjusting can be carried out.

As this port services the oil industry, many types of oil-related services are available from several companies.

BANKS: Barclays Bank plc. Tel: Gt. Yarmouth 856266.
Lloyd's Bank plc. Tel: Gt. Yarmouth 855177.
Midland Bank plc. Tel: Gt. Yarmouth 843631.
National Westminster Bank plc. Tel: Gt. Yarmouth 857521.

GARBAGE DISPOSAL: Regular collection service from alongside by waste disposal company. Domestic refuse must be double wrapped prior to disposal.

WASTE OIL DISPOSAL: Waste oil disposal by various companies arranged direct or via local ship's agents.

SEAMEN'S CLUBS: British Sailors Society, South Denes Road, Great Yarmouth, Norfolk, Tel: 0493 331222.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5806 (30.4.91).

DEVELOPMENTS: There are plans for the development of an outer harbour.

AUTHORITY: Great Yarmouth Port Authority, 20/21 South Quay, Great Yarmouth, Norfolk NR30 2RE. *Tel:* (0493) 855151. *FAX:* (0493) 852480. *Telex:* 975102 (Gyportg). *Contact:* M. C. M. Boon, Chief Executive. M.L.Goodall, Commercial and Marketing Manager.

Operations and Dangerous Goods: Captain A.Goodlad, Harbour Master. *Tel:* (0493) 855153. *Telex:* 975367 Gyuts. *FAX:* (0493) 653464.

GRIMSBY: 53.34 N. 00.04 W. (See Plan)

VESSEL TRAFFIC SERVICES HUMBER: See "Hull".

NOTICES: See "Hull".

DOCUMENTS: See "Immingham".

PILOTAGE: See "Immingham".

ANCHORAGES: Hawke and Sunk Roads, Haile, Spurn and Bull Anchorages. See "Hull". The Pilots will advise where to proceed to anchor and also provide Pilot.

RESTRICTIONS: See "Berthing" – entrance locks.

MAX. SIZE: Maximum breadth 20.6 m., maximum length of vessel that can be locked 81.7 m. but vessels of greater length can enter docks on HW when all lock gates are open. 0.91 m. clearance under the keel is required. Vessels having a draft of 5.8 m. can normally enter the docks on any tide when the height of water is sufficient to allow 0.91 m. clearance. Vessels with 6.4 m. draft can be taken on spring tides. Vessels can enter usually approx. 3 hours before and 2.5 hours after high water.

Commercial Docks: Max. LOA 145 m., draft 5.8 m., beam 20.6 m.
Fish Docks: Max. LOA 73 m., draft 5.5 m., beam 12.8 m.

HEALTH: Master has to report any "Reportable" illness as detailed in Form "Port 38" to "Porthealth Grimsby". Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio, 2182 kHz, or VHF Channel 16. Also see "Hull".

VHF: See "Hull" – Vessel Traffic Services Humber.

TUGS: Normally join in Grimsby roads. Optional whether use ship's or tug's lines. Tugs operate from Immingham so plenty of notice required.

BERTHING: *Grimsby Docks:*

	Commercial Docks	Fish Docks
Entrance Locks:		
Length	90.0 m.	21.4 m.
Width	21.4 m.	13.0 m.
Sill level MHWN	6.8 m.	6.8 m.
Quay cranes	11 electric – capacity 3 to 7.5 tonnes	1 mobile – capacity 15 tonnes

There are 2 Ro/Ro berths in the Royal Dock, one to/from Esbjerg and a second to/from Norway. There are also 2 Ro/Ro berths in the Alexandra Dock for motor vehicles.

There is a Lo/Lo Terminal operated by Humber Terminals Ltd. on the West side of the Royal Dock. It is equipped with a 35 ton gantry crane. Present users are Floatline with one sailing a week to Netherlands/Sweden and Zambian National Line with monthly feeder service to Antwerp.

STEVEDORES: Vessels are allocated labour in order of arrival so it is only necessary to give the Agent the ETA preferably before noon on the previous day. Normal working hours 0800 – 1700 hrs., Friday 0800 – 1600 hrs. Overtime can be worked 1700 – 1900 hrs. Monday to Thursday. On Saturdays and Sundays as required.

MEDICAL: Hospitals and all other medical facilities are readily available. If immediate attention is required on arrival please advise Agent by radio or telegram.

FRESH WATER: Available at all quays. Rate approx. 20 t.p.h.

FUEL: Normal gas and diesel oils available by both road and barge with at least 24 hours notice. This is also quayside tankage in fish docks.

CONSULS:

Belgium, Vice-Consul	Hull	27464
Denmark, Vice-Consul	Grimsby	357521
Dominican Republic	Grimsby	359101
Finland, Consul	Immingham	571387
France, Consular Agent	Grimsby	47221

Greece, Vice-Consul	Hull	224151
Iceland	Grimsby	357543
Netherlands, Vice-Consul	Immingham	76246
Norway, Vice-Consul	Hull	224151
Sweden, Vice-Consul	Immingham	571387

REPAIRS: Facilities are available for all deck and engine repairs.

DRY DOCKS: Nearest at Immingham.

SURVEYORS: See "Immingham".

GANGWAY/DECK WATCHMEN: Not necessary, but the service is available if Master requires it.

OPENING/CLOSING HATCHES: Responsibility of the crew. The hatch beams can be removed and replaced by the shore cranes but there is an extra charge for this operation.

CUSTOMS ALLOWANCES: 200 cigarettes per 8 days. 1 bottle wine and 1 bottle spirits per 4 days. All seals to be broken.

CARGO GEAR: In accordance with the regulations laid down by H.M. Factories Inspector.

REPATRIATION: Can be arranged if required.

AIRPORT: Humberside, 15 miles from Grimsby, daily service to Amsterdam (3 flights daily), Bergen, Stavanger, Norwich and Aberdeen. Easy access to all major airports via rail, etc.

Leeds Bradford Airport, 3 flights daily to Amsterdam, Aberdeen, Belfast, Norwich, Paris and Edinburgh. One flight to Dublin.

HOLIDAYS: New Year's Day; Christmas Day; Boxing Day; Good Friday; Easter Sunday and Monday; May Day; Spring Bank Holiday (end May); Late Summer Bank Holiday (end August). All except Christmas Day, New Year's Day, Good Friday and May Day can be worked as overtime if sufficient staff are willing.

POLICE/AMBULANCE/FIRE: Port Security 352713; Grimsby Police – Grimsby 359171. Emergency – Police/Fire/Ambulance 999.

EMERGENCY CO-ORDINATION CENTRE: See "Immingham".

TELEPHONES: Not available for connection on board.

SERVICES: Compass adjusting, tank cleaning, etc., are available.

BANKS: See "Immingham".

STORING: See "Immingham".

SHORE LEAVE: Crew are allowed ashore.

IDENTIFICATION CARDS: Some sort of identification whilst crew are ashore is advisable. (Seaman's Book or Passport).

GENERAL: The Grimsby Dock Master can be contacted on VHF Channel 16 and then change to Channel 18 or 9 for speaking.

GARBAGE DISPOSAL: In dock, collection service available alongside vessels using private hire skips for kitchen/galley waste. Contact BIFFA, Tel: 0472 351185. Some port authority skips available on the quayside for dunnage waste disposal only.

On the jetties, garbage skips are available.

WASTE OIL DISPOSAL: In dock, collection service is made available by tanker trucks alongside vessel. Contact Waste Oil Services (Tel: 0472 827112) and BIFFA (Tel: 0472 351185).

SEAMEN'S CLUBS: Danish Mission, 2 Cleethorpe Road, Grimsby, Tel: 0472 342257.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.6289 (21.6.91).

AUTHORITY: Associated British Ports, Port Office, Cleethorpe Road, Grimsby, South Humberside DN31 3LL. *Tel:* (0472) 359181. *Telex:* 52250. *FAX:* (0472) 348275. *Contact:* D. Dunn, Port Manager.

HARTLEPOOL: 54.42 N. 01.12 W. (See Plan)

PORT LIMITS: The Port facilities extend from Hartlepool Fairway Buoy to all berths.

Arrival Time is accepted as time of passing Hartlepool Dock Head or time of anchoring in Hartlepool Bay.

DOCUMENTS: *Ship's Official Papers including:*

Ship's Register.
Ship's Construction Certificate.
Load Line Certificate.
Derat Certificate.
Safety Equipment Certificate.
Radio Equipment Certificate.
U.K. Light Dues Certificate.
Crew List.
Bills of Lading, Manifest and Stowage Plan (Usually sent in advance).
Ship's Stores List.

PILOTAGE: Call by VHF when 2 hours from port and again 30 minutes before arrival. 2 hours required for sailing. VHF Channel 16, 14, 12, 9, 8 and 6. Tel. No. 0642 - 485648.

Pilotage compulsory for:

(a) Vessels of 95 m. LOA and over navigating in Victoria Harbour.
(b) Vessels of 85 m. LOA and over navigating in Impounded Docks.
(c) Vessels requiring services of a tug.

Pilot usually boards in vicinity of Longscar Buoy from a cutter showing the usual international signals.

ANCHORAGE: N.E. of Longscar Buoy but special care must be exercised in vicinity of prohibited anchorages near Ekofisk Oil Pipe-line and River Tees Fairway.

RESTRICTIONS: Small vessels can berth in outer harbour at any state of tide. Deep draft vessels enter in accordance with tide.

Vessels for the enclosed docks enter or depart from 3 hours before High Water to 1 hour after High Water.

Entrance Channel 1.1 km. long., 65 m. wide. Nominal dredged depth 5.7 m. below LAT.

MAX. SIZE: Overall length 190 m. Beam 30.5 m., draft of 8.00 m. Vessels approaching any of the max. sizes must consult Dock Master in advance.

Keel clearance of 1.2 m. required.

HEALTH: New Regulations. The Public Health (Ships) Regulations in force.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio.

VHF: VHF radio watch kept on Channels 16 and 12, working Channel 12.

V.H.F. Station	*Call Sign*	*Channel*
Dock Master's Office	"Hartlepool Harbour Radio"	16,12,11,8.
Tugs "Hart" and "Stranton"	Tug Name	All frequencies
Tees Bay Pilot Cutter	"Tees Bay Pilot"	67,16,14,12,9,6.

TUGS: Two twin screw diesel (1,200 h.p.) tugs available during tidal periods. Tugs ropes available at extra charge.

BERTHING: Victoria Harbour, Deep Water Berth. Length 295 m. Depth 9.5 LAT. Equipped with 5 × 10 tonne cranes. Ro/Ro pontoon available.

Victoria Quay: Length 150 m., depth 9.5 m. 2 × 10 ton cranes and 1 × 7.5 tonne crane.

Irvines Quay: Length 380 m., depth 9.5 m. 3×10 tonne cranes and 1×25 tonne crane.

North Basin (Non-Tidal): Length of Dock 182.87 m. Depth on sill is 3.1 m. below LAT. No Cranes.

Mobile bulk conveyor available in deep water harbour.

STEVEDORES: All stevedoring undertaken by Port Authority on day work basis with voluntary overtime available (including week-ends). Shift working can also be provided.

MEDICAL: Full hospital and emergency services available at all times. Shore Telephone No. 999 or call on VHF 16.

DENSITY: 1025.

FRESH WATER: Available from shore hydrants at 20 t.p.h. Quantities up to 50 tons available by tug.

FUEL: Available by road and bunkering vessels.

CONSULS:

Belgium
Denmark
Finland
French Consular Agency
Germany
Netherlands
Norway
Portugal
Sweden

REPAIRS: Deck and engine repairs available.

SURVEYORS: Hull and cargo surveyors available through Shipping Agent.

GANGWAY/DECK WATCHMEN: Available by private arrangement through Agents.

HATCHES: To be opened and closed by ship's crew.

AIRPORT: Teesside Airport nearby with regular U.K. and Continental Services.

TIME: GMT and BST (GMT plus 1 hour) during Summer months.

HOLIDAYS: Normal Bank Holidays.

EMERGENCY CO-ORDINATION CENTRE: Tees Harbour Office.

STORING: See "Prelims"

1. Yes.
2. Yes – no regulations concerning storing.
3. Yes.
4. Yes.
5. Normal standing regulations.
6. Yes.

IDENTIFICATION CARDS: Seaman's Book or Passport advisable.

GARBAGE DISPOSAL: A skip is provided at the end of the finger pontoon.

WASTE OIL DISPOSAL: No shore facilities.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

GENERAL: *Charts:* B.A. Charts No. 2566 and 2567.

Tidal and Weather Information: Strong winds from the N.W. throu N. to N.E. increases tides. The flood tide sets S.S.E. on the coas therefore strong S.E. winds depress the heights of the tides.

Tidal Variations:

M.H.W.S.	5.05 m.	M.H.W.N.	4.01 m.
M.L.W.S.	0.75 m.	M.L.W.N.	1.75 m.

HARWICH (Including Parkeston Quay and Navya Wharf): 51.56 N. 01.15 E. (See Pla

The Harbour Authority is the Harwich Haven Authority whos jurisdiction extends from the Shipwash Bank to the mouth of the Riv Orwell on one hand and as far up the River Stour as the tide flows o the other.

The Harbour Master's Office is at Navigation House, Angel Ga Harwich (Tel: (0255) 243030. Telex: 987304), at which is based th Harwich Harbour Operations Service maintained on a 24 hour basis.

The Harbour Operations Service (Call sign "Harwich Harbour Radio" maintains a listening watch on Channel 16, and operates on Chann 71.

The service is equipped with surveillance radar, radar informatio available on request.

Sealink Harbours Ltd., at Parkeston Quay, keep a 24 hour listenin watch on Channel 16 and work on Channel 18.

DOCUMENTS:

1 Home Officer Form 1.B.6 may be obtained from H.M. Custo Boarding Officer.
1 C.142 Crew Declaration List.
1 Maritime Declaration of Health ("Q" Flag procedure).
2 Ship's Report by Master.
1 Stores List.
1 Certificate of Deck Cargo Tonnage (if carried).
1 Grain Certificate (if carried).
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List required by vessels other than packet vessels.
1 Landing Card for each passenger.
1 Ship's Certificate of Registry.
1 Mercantile Marine Office Certificate – for British vessels only.
1 Load Line Certificate.
1 Safety Equipment Certificate.
1 Lloyd's Certificate.
1 Derat Exemption Certificate.
1 Ship's Register.
1 Lights Bill.
1 Radio Safety Certificate.

In addition Manifests and Bills of Lading are usually sent to Age direct from loading port.

Dangerous Goods: Notification is required to Harwich Harbour VT 24 hours in advance of the vessel's arrival at the port. Notification ma be made by the following means:

(1) By facsimile – Fax No. (0255) 241325.
(2) By telex – Telex No. 98472.
(3) By telephone – (0255) 243000 (24 hour number) in exceptio circumstances only.

APPROACHES: Traffic Regulatory System in effect.

PILOTAGE: PROCEDURE AND INFORMATION ON ETAs/ETDs FO SHIPS REQUIRING THE SERVICES OF AN AUTHORISED PILOT

Arrival Notification: Ships bound for the Haven Ports of Harwi Felixstowe, Ipswich and Mistley and requiring a Pilot, shall notify Harwi Operations Control, 8 hours in advance, giving the ETA at the Harwi Approach Buoy (Lat. 51° 56.4′ N., Long. 01° 31.2′ E.), gross tonnag maximum draft, departure port and destination port.

Confirmation of ETA should be given at least 3 hours before arri at Harwich Approach Buoy.

Failure to provide the ETA and subsequent confirmation could res in delay to the ship.

In the case of a ship engaged in the short sea trade, the initial ET may be passed at the time of leaving the last port of call, if passa time is less than 8 hours.

A ship having complied with the above conditions and then havi anchored before embarking a Pilot must give Harwich Operatio Control adequate notice of requiring the services of a Pilot. Failure t give such notice could result in delay to the ship.

Requests from inward-bound ships for the services of a Pilot for th Rivers Blackwater, Colne, Crouch or Roach may also be passed thou Harwich Operations Control.

Departure Notification: Outward-bound ships, or ships moving within th compulsory Area, which require the services of a Pilot, shall give at lea 2 hours' notice of their Estimated Time of Departure.

Boarding and Landing Arrangements: The pilot boarding point f inward bound ships will be within the voluntary pilotage area, such th the Pilot is boarded in good time before entering the Compulsory Ar

The boarding position will be agreed with Harwich Operations Cont having due regard to the size and draft of the ship and the prevaili circumstances.

The normal boarding point will be in the vicinity of the Harwich Approach Buoy, but deep-draft ships may, by arrangement, board their pilots near the Sunk Light Vessel or the Mid-Bawdsey Buoy, depending on their point of entry into the Compulsory Area.

Boarding and landing will take place from pilot launches operating from Harwich Harbour. The launches will have the word "HAVEN PILOTS" on the side of the wheelhouse, fly the pilot flag by day and, at night, exhibit lights and signals in accordance with Rule 29 of the International Regulations for Preventing Collisions at Sea.

If the pilot launch is unable to operate in the normal locations due to stress of weather, or other unforeseen circumstances, alternative arrangements will be advised by Harwich Operations Control.

GEOGRAPHICAL LIMITS OF THE HAVEN PORTS PILOTAGE AREA (THE COMPULSORY AREA):

The area bounded by the following limits:

(a) As much of the River Orwell as lies below Ipswich Dock.
(b) As far up the River Stour as the tide flows.
(c) To seaward of Landguard Point, the area bounded as follows:
    (i) In an Easterly direction as far as 01° 24′ E.
    (ii) In a Southerly direction as far as 51° 54.5′ N.
    (iii) In a Northerly direction as far as 51° 57.4′ N.

Voluntary Pilotage: The Board will provide pilotage upon request in the area to seaward of the Compulsory Area as far as a line drawn between the following points:

(a) Bawdsey Cliff – Lat. 52° 00′ N., Long. 01° 26′ E.
(b) Lat. 52° 00′ N., Long. 01° 41′ E.
(c) Lat. 51° 49′ N., Long. 01° 41′ E.
(d) Lat. 51° 49′ N., Long. 01° 15′ E.

ANCHORAGES:

Erwarton: Situated to the North and West of Parkeston Quay with an average depth of 5.5 m. at LW.

Parkeston: Situated to the North of Parkeston Quay, with an average depth of 5.5 m. at LW.

Shelf: Situated on the Western side of the main Channel between the North and South Shelf Buoys. Average depth of 3.7 m. at LW.

Platters: Situated at the Pitching Ground. Average depth 8.0 m. at LW.

Cork: Situated to the North of the Harwich Channel. Area approx. 2 miles×1 mile. Average depth 6.5 m.

RESTRICTIONS: Normal max. draft allowed alongside the berths at Parkeston Quay is 26 ft.

Normal cargo working at Parkeston Quay throughout 24 hours.

MAX. SIZE: Normal max. permissible length 500 ft. Arrangements for larger vessels can be made. Normal max. permissible breadth for Roll-on/Roll-off is 75 ft. Normal max. permissible draft – 20 ft. The height of the tide does not restrict a vessel berthing alongside the quay if her draft is within 20 ft.

HEALTH: Maritime Declaration of Health required ("Q" Flag procedure). Obtain Pratique through H.M. Customs Boarding Officer if no sickness on board.

If there is sickness on board the Customs Official will notify the Duty Port Medical Officer.

If the vessel is from another port in the U.K. Pratique is automatic.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio (call sign GNF) or Humber Radio (call sign GKZ) are the most convenient stations to pass ETA cables, etc., to Agents or receivers

VHF: *Port Operations:*

	Channel 16	Safety.
	Channel 9	Pilotage and ETAs.
	Channel 71	VTS and Reporting.
	Channel 6	Pilot Launches.
	Channel 69	Tugs.
	Channel 20	Harwich Radar Assistance.

Telex:	98472 HAROPS G.	
Fax:	0255 241325	

Dangerous substances in Harbour Areas notifications should be sent by telex or fax 24 hours prior to arrival or at time of leaving last port.

TUGS: 5 tugs are available in Harwich Harbour for use in the area. M.T. "Alfred", M.T. "Trimley", M.T. "Deben", M.T. "Ganges" and M.T. "Victoria" 40 tons bollard pull. Tugs' lines usually used.

24-hour service, 7 days per week. Constant watch on Channel 16 VHF. Additional tugs up to 2,250 h.p. can be obtained from London at 24 hours' notice.

BERTHING: There are 8 berths at Parkeston Quay, of which 2 are Portal Ro-Ro berths and 3 Pontoon Ro-Ro berths. Normally max. draft permissible alongside is 20 ft.

Berthing, etc., by arrangement. Applications for berths must be made through the Port Manager, Sealink Harbours Ltd., Parkeston Quay, giving as much advance notice as possible. Also see "Navyard, Harwich" before "Authority".

STEVEDORES: All labour at Parkeston Quay are members of National Union of Railwaymen, and arrangements for their use must be made through the Port Manager, Sealink Harbours Ltd., Parkeston Quay.

MEDICAL: Prior notice through Sealink Harbours Ltd., Parkeston Quay, desirable to arrange attention. All services are available.

TANKERS: A berth is available for tankers for the purpose of discharging and loading to the local oil refinery.

DENSITY: 1025 (sea water).

FRESH WATER: Fresh water can be supplied from quayside hydrants.

FUEL: Can be arranged by either barge or road tanker.

CONSULS: Dutch, German, Danish, Belgian.

REPAIRS: Minor repairs can be carried out by Sealink Harbours Ltd. workshops at Parkeston Quay. As much advance notice as possible required.

GANGWAY/DECK WATCHMEN: Watchmen are not provided or required by the port, but ships may use their own watchmen.

OPENING/CLOSING HATCHES: To be carried out by ship's crew.

CARGO GEAR: There are 2 transporter cranes, 30 tons SWL and 4×30 ton Goliath rubber tyred gantries. A 35 ton gantry crane is available at Parkeston Quay.

REPATRIATION: All facilities available.

AIRPORT: Nearest is Ipswich, 22 miles; Southend, 70 miles.

HOLIDAYS: All normal Bank Holidays. Only passengers and car travellers are dealt with at Parkeston Quay on these days. Freightliners sail only if loaded before the holiday.

POLICE/FIRE/AMBULANCE: Dial 999 and ask for service required.

TELEPHONES: Arrangements can be made, with advance notice given.

SHIP SUPPLY SERVICE:

The Alexandra Towing Co. (Felixstowe) Ltd., The Dock Office, Felixstowe Dock, Felixstowe, Suffolk.

Felixarc Marine, Felixstowe Dock, Felixstowe, Suffolk.

Orwell & Harwich Navigation Co., The Quay, Harwich, Essex.

IDENTIFICATION CARDS: Seaman's Identity Cards sufficient.

GARBAGE DISPOSAL: Leigh Environmental (Tel: 0206-871111). 0700 hrs. – 1700 hrs. Skips provided alongside. One day's notice required.

WASTE OIL DISPOSAL: Southern Economy Fuels, tanker trucks (20 tons)(Tel: 0394-272236. Fax: 0394-271540). 24 hours service, 48 hours notice required.

CURRENCY: Thomas Cook Foreign Exchange Bureau on Parkeston Quay Station. Tel: 0255-503088. Open daily 0630 hrs. – 2115 hrs.

DEVELOPMENTS: Eastern end of Parkeston Quay to be lengthened in due course to provide more container berths.

NAVYARD, HARWICH:

Operators: Harwich Dock Co. Ltd. Naval House, Kings Quay Street, Harwich. Telephone: Harwich 241341. Telex: 98229. Fax: (0255) 241441. Contact: I.R. Norrington, General Manager. Listens on VHF Channel 16, working Channel 22.

Berths:

Berth No. 1:	Length 42 m.	
Berth No. 3:	Length 160 m.,	depth 8.6 m.
Berth No. 4:	Length 90 m.,	depth 4.5 m.
Berth No. 5:	Length 160 m.,	depth 6.5 m.

(Berths 3, 4 and 5 equipped with Ro/Ro ramps).

Stevedores:

All labour at Navyard is employed by Harwich Dock Co. Ltd. Berths and labour must be booked through Operations Manager (24 hour service available).

Cargo Equipment:

1 Ransome Rapier NCK 60 mobile crane – capacity 35 tonnes.

Other equipment includes 14 tugmasters, 10 forklifts to 45 tonnes.

Other Services:

Telephones, fresh water, bunkers, medical services can all be arranged.

Harwich Dock Company Ltd., provides ships and goods agency services at this and other ports.

Garbage Disposal: Collection service available on request.

Waste Oil Disposal: Collection available by road tanker.

AUTHORITY: Harwich Haven Authority, Navigation House, Angel Gate, Harwich CO12 3EJ. *Tel:* (0255) Harwich 243030. *Telex:* 987304. *FAX:* (0255) 240933. *Contact:* Captain R. W. Shaw, Harbour Master.

HEYSHAM: 54.02 N. 02.55 W. (See Plan)

DOCUMENTS: As for other British ports plus Walney Light Dues.

PILOTAGE: Heysham Pilots. Compulsory for all vessels over 50 m. LOA.

ANCHORAGES: Heysham Lake. 0.5 mile W.N.W. of No. 1 Buoy. Position: Lat. 53° 59.6′ N., Long. 3° 00.0′ W. Depth: 40 ft. at LW.

RESTRICTIONS: Entry possible at all states of tide. Harbour maintained at 4.1 m. below Admiralty chart datum of chart No. 2010.

MAX. SIZE: 525 ft. (160 m.) length, draft 17 ft.

HEALTH: See "Health – All Ports" before first UK port.

RADIO: Heysham Harbour Radio, VHF Channels 16, 14 and 74.

TUGS: None available locally. Tugs on call from Liverpool.

BERTHING: Vessels may be berthed at any time. 2 Ro/Ro ramps, 1 berth exclusively for gas base, 1 general cargo berth North Quay, 2 general cargo berths South Quay and 1 berth West Quay.

CRANES: 1×30 ton portal crane on North Quay; 1×23 tonne portal crane, 4×7.5 ton portal cranes and 1×10 tonnes on South Quay.

DENSITY: Salt water.

FRESH WATER: Available at all quays, except West Quay.

FUEL: Gas oil by road vehicle.

REPAIRS: Small repairs possible, no docking facilities.

GANGWAY/DECK WATCHMEN: Ship's watchmen required.

AIRPORT: Nearest, Liverpool and Manchester; 60 miles.

PROVISIONS: Available locally.

POLICE/AMBULANCE/FIRE: Telephone 999 in emergency.

SHORE LEAVE: No restrictions on landing.

GARBAGE DISPOSAL: Skips and road vehicles available. Charges are variable by arrangement with local contractor. Contact Heysham Port Limited (Tel: 0524 852373).

WASTE OIL DISPOSAL: A waste oil collection service can be arranged with a local contractor (prior notice required). Contact Heysham Port Ltd. (Tel: 0524 852373).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.5847 (22.2.92).

AUTHORITY: Heysham Port Ltd., Heysham, Lancs. LA3 2XF. *Tel:* Heysham (0524) 852373, 852284. *Telex:* 65260. *FAX:* (0524) 853301. *Contact:* Captain P.A.Read, Port Manager. P.L.Fenton, General Manager.

HOLYHEAD: 53.19 N. 04.41 W. (See Plan)

DOCUMENTS:
1 Crew List and where applicable a Passenger List.
1 Pratique issued by Customs.
1 Crew Declaration (C.142 for H.M. Customs).
1 List of Consumable Stores (tobacco, snuff, alcohol).
1 Declaration of Health.
1 Cargo Manifest.
1 Ship's Report.

PILOTAGE: Pilotage compulsory under Sealink Harbours Holyhead Authority. Local Pilot available on request.

ANCHORAGES – PROHIBITED ANCHORAGE: The breakwater affords partial shelter to the outer anchorage and complete protection to New Harbour; there are depths of up to 12.0 m. in the former and of up to 12.0 m. in the latter.

The accommodation for vessels of deep draft in New Harbour is limited. Small vessels should always proceed into New Harbour and anchor in the S.W. part, leaving the outer part and the roadstead for large vessels. The bottom is hard, overlaid with mud but the holding ground is sufficiently good if an adequate amount of cable is veered. During Easterly winds an uncomfortable sea is raised; vessels may then obtain shelter in the Eastern part of outer anchorage. Anchorage is prohibited within 1.5 cables on either side of the track followed by Passenger Ferries from the head of the breakwater to the entrance to Old Harbour; the limits of this area are shown on charts.

MAX. SIZE:
Inner Harbour: Restricted to vessels of 4.5 m. draft and vessels exceeding this draft will only be accepted after consultation with the Port Manager or Harbour Master.
New Harbour: Vessels of approximately 60,000 tons can be accepted alongside the Anglesey Aluminium Jetty where the berth is dredged to 13.5 m. at L.A.T.

Ro-Ro vessels up to 150 m. length and 7.0 m. draft accepted.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: Holyhead Radio, VHF Channel 16, No Port Radar.

TUGS: Available through Agents. Tugs up to 1,375 h.p.

BERTHING: By prior arrangement with the Port Manager.
Ferry Ramps and Services: There are 2 berths available in the port which are used by Sealink Multi-purpose (Car and Ro/Ro traffic) ferries. The main one is termed the 'Station Berth' and as its name implies is an integral part of the rail station complex offering quick and easy rail/ship interchange with all the necessary H.M. Customs, passenger waiting and ticket checking facilities. Two mechanical gangways are available. A similar berth is available at Salt Island (Admiralty Pier) with again passenger waiting and H.M. Customs clearance facilities available on the spot. Transfer for rail passengers can be made by connecting coaches.

	Station Berth	*Salt Island Berth*
Maximum length of ship accepted	130 m.	140 m.
Datum depth of water available	4.6 m.	4.6 m.
Ramp width	3.4 m.	3.0 m.
Maximum weight of vehicles over ramp	40 tonnes	38 tonnes
Maximum width of vehicles at ramp	3.7 m.	3.5 m.

General Cargo Handling: General Cargo berth is used for exports of Aluminium ingots, steel, powdered chemicals and various other commodities. Imports include fertiliser, timber and steel. Vessels using this berth make arrangements with Agent. Storage space available with this berth by prior arrangement. Cranes/forklifts are available for hire.

Length of berth	170 m.	(total quayage)
Depth of water available	4.4 m.	datum

CONTAINER HANDLING FACILITIES: Closed.

Length of berth	135 m.
Datum depth of water available	4.8 m.

STEVEDORES: No stevedores. Vessels loaded and discharged by making prior arrangements with Agent.

MEDICAL: Medical Officer available. Stanley Sailors Hospital situated in close proximity to Harbour.

DENSITY: Salt water (1025).

FRESH WATER: Available at all berths within the Inner Harbour and alongside Anglesey Aluminium Jetty.

FUEL: Fuel oil and diesel oil available provided that adequate warning is given to Agent. Only 1 berth available for bunkering of large vessels of deep draft alongside Anglesey Aluminium Jetty.

Prior arrangements must be made with Sealink Harbours Ltd. in conjunction with Anglesey Aluminium Metals Ltd., telephone Holyhead 763333.

No oiling barge available for bunkering vessels at anchor.

GANGWAY/DECK WATCHMEN: Required at all times when vessels are in port.

REPAIRS: No facilities.

SURVEYORS: Cargo Inspectors can be contacted, if required.

Surveyors representing Lloyd's Register, Bureau Veritas, etc., can be contacted on request.

AIRPORT: RAF Station Valley, Anglesey (6 miles away).

HOLIDAYS: Saturdays, Sundays and all Public holidays.

POLICE/AMBULANCE/FIRE: Tel. 999.

EMERGENCY CO-ORDINATION CENTRE: Maritime Rescue Su Centre, Coastguard. Tel: 0407-762051.

TELEPHONES: No telephone connection for outside vessels. Pub telephone within port limits.

SERVICES: Compass adjusting can be arranged. Agency can b arranged through Port Authority.

BANKS: British banks only available in the Holyhead area, exchang facilities are provided.

STORING: See "Prelims".
1. Vessels can be stored by barge or truck, usually by truck.
2. Vessels can be stored during loading or discharging.
3. Trucks can proceed alongside at the berth.
4. Forklift trucks can be used to handle stores.
5. Customs Regulations, where applicable, in force.
6. Local riggers can be employed, if necessary.

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Garbage disposal can be provided on reques

WASTE OIL DISPOSAL: Waste oil disposal can be provided on reques 48 hours notice required.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Sealink UK Ltd., Sealink House, Holyhead, Gwyned LL65 2DQ. *Tel:* (0407) 762304. *FAX:* (0407) 765118. *Telex:* 61283
Contact: Port Manager/Harbour Master.

HOUND POINT: 56.00 N. 03.22 W. (See Plan

LOCATION: The terminal is operated by B.P.
Position of terminal Lat. 56° 00′ 20″ N., Long. 03° 21′ 45″ W.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Crew's Effects List.
1 Stores List.
All valid Certificates.

PILOTAGE: Pilotage in Firth of Forth is compulsory. Contact "Fort Pilot" VHF Channel 16. Pilot boards large vessels in vicinity of Fairwa Buoy (56° 03.5′ N., 03° 00′ W.) as there is limited depth and manoeuvring space at normal Pilot boarding ground East of Inchkeith For large vessels in ballast, Pilots require gangway/pilot ladde combination rig.

ANCHORAGE: When vessel has to wait for Pilot, berth or tide, "Fort Navigation Service" will assign anchorage. These anchorages are in a line E.S.E. to S.W. of Fairway Buoy. Good holding ground a anchorages.

RESTRICTIONS: Vessels will be berthed at slack water – flood or ebb – only. The same in most cases for unberthing.

MAX. SIZE: Vessels up to 300,000 d.w.t. can berth at Hound Poin Terminal with no defined restriction on LOA. Vessels berth starboar side alongside, heading East.

Max. permitted loading draft 20.72 m. (Neap tides) 21.64 m. (Spring tides). Minimum depth alongside terminal 25.0 m.

HEALTH: See "Health – All Ports" before first U.K. port.

RADIO: *Arrival advice:* For advance notice refer to Charterer's instructions.

RADAR/VHF: Estuary radar service. VHF contact can be made wi Forth Navigation Service Channel 71, working Channels 20 and 12 Hound Point Terminal operates VHF Channel 9; B.P. Grangemouth VHF Channel 16 (calling) and Channel 19.

TUGS: 4 tugs of 35 tonnes bollard pull available. Tugs wires are use

Vessels up to 265 m. LOA normally use 3 tugs for berthing and 2 tug for unberthing. Vessels over 265 m. LOA normally use 4 tugs for berthin and 3 tugs for unberthing.

BERTHING: Hound Point Terminal (leased and operated by Britis Petroleum) is a Sea Island in the Firth of Forth about 13 miles fro Fairway Buoy. The approach channel from Fairway Buoy to berth i marked by buoys and has a guaranteed minimum depth of 66 ft. a LWST.

Maximum of 4 loading arms of 16 in. available for deballasting and or loading. Loading rate about 8,000 t.p.h. by gravity and with 2 arm connected. This rate decreases as tank level drops.

When 4 arms are connected loading rate can be as high a 18,000 t.p.h. by means of booster pumps.

Facilities to receive any amount of dirty ballast are availabl Discharge through 16 in. loading arms into 48 in. line with minimum 5 kg./sq.cm. back pressure.

No need to prepare ship's derricks unless stores are taken on boar

Derrick should be swung clear of manifold area to allow unobstructe arm connection.

API of cargo about 40.0.

Berthing and Unberthing: The number of tugs employed will var according to the size of the vessel and the prevailing weather condition

Berthing is undertaken during daylight or darkness at LWS and i normal circumstances vessels will berth heading East.

Minimum acceptable visibility for berthing and unberthing is 1 mile

Berthing will not be attempted if the wind is in excess of 20 knot (Force 5) blowing onto or off the berth from a direction up to 45° eithe side of a line at right angles to the longitudinal axis of the berth, or if i excess of 30 knots (Force 7) from any other direction.

Berthing will not be attempted if the current is in excess of 1 knot, and a similar 1 knot flood limit applies to the unberthing of vessels if berthed heading West. The unberthing of vessels in excess of 54 ft. draft will also be restricted by the tidal rise, otherwise, any other limit conditions will be assessed at the time of unberthing, the controlling depth being 19.2 m. (65 ft.) in the Approach Channel.

Approach to the berth is made after having stopped some 200 m. off and parallel to the berthing line. Normal practice is for tugs to swing the vessel in this position prior to berthing starboard side to.

Speed of approach equipment is provided to assist in ensuring a safe speed during the final breasting in manoeuvre. The equipment operates a display panel which indicates the distance each end of the vessel is off the berthing fenders by means of 2 white bar lights which diminish in length as the vessel approaches. Speed of approach for each end of the vessel is indicated by 2 "traffic light" systems which show:

Flashing Red – dangerous speed, 8 cm./sec. and above.
Flashing Amber – marginally safe speed, 5 – 8 cm./sec.
Steady Green – safe speed, 5 cm./sec. and below.

A stand-by fire tug on 15 minutes notice will remain in attendance at the specially provided buoy mooring while the berth is occupied. A stand-by pollution tug is also on 15 minutes notice.

Safe Mooring Guidelines: The following table shows recommended mooring layouts:

200,000 – 300,000 d.w.t.
- 4 head/breast lines.
- 4 stern/breast lines.
- 2 spring lines forward and aft.

100,000 d.w.t.
- 2 head and stern lines.
- 2 breast lines forward and aft.
- 2 spring lines forward and aft.

50,000 d.w.t.
- 2 head and stern lines.
- 2 breast lines forward and aft.
- 1 spring line forward and aft.

These layouts do not include synthetic first lines ashore used for manoeuvring vessels equipped with wire mooring systems into position.

The attention of the Master is particularly directed to the following:

(a) Shore moorings are available from each of the mooring dolphins and it is strongly recommended that all vessels should make use of them. Shore moorings are also available from the outer breasting dolphins to supplement the ship's backsprings if required.

(b) Masters shall ensure that mooring lines are in good condition and free of visible defects. Winch brakes or securing devices should be in efficient operating order and should have a holding power at least 60% the breaking load of the mooring lines. A number of vessels are known to have mooring winches with brakes designed to yield as low as 25% of the mooring line breaking load, and this considerably reduces a vessel's mooring capability. It is therefore most important that the holding power of a vessel's mooring winch brakes is advised to the terminal, together with any known defects in a vessel's mooring equipment in order that possibly more limiting "Action Guidelines" may be agreed.

(c) If mixed moorings of wire and fibre lines are used it is important that due to the differing elasticity of these materials their use in the same direction of restraint should be avoided.

(d) As soon as a vessel is secured, brakes on all mooring winches must be firmly applied. Winches shall not be left on automatic tensioning. Full steam pressure must be maintained on deck and available to all mooring winches throughout the period the vessel is alongside. On split drum mooring winches only one layer of rope shall be permitted on the working half of the drum.

(e) An efficient watch must be maintained on the vessel's moorings (including any shore wires used) to ensure that all lines are properly tensioned and tended when required.

(f) The flow booms are vulnerable to damage should a vessel range or move off the berth and it is essential that a vessel shall be held securely alongside throughout the period in the berth. Particular care should be exercised to ensure sufficient transverse restraint from the breast line moorings.

(g) The terminal is entitled to stop operations and/or summon tugs if it appears that a vessel's movement will endanger the flow booms, or in the absence of an alert and efficient deck watch.

(h) All vessels arriving at Hound Point in ballast should, in order to facilitate manoeuvring ability, have their propeller completely immersed. In addition to this requirement, vessels between 50,000 d.w.t. and 120,000 d.w.t. should be trimmed not exceeding 10 ft. by the stern, and vessels over 120,000 d.w.t. not exceeding 12 ft. by the stern.

(i) The ship's accommodation ladder is to be rigged on offshore side for use as a secondary means of escape in the event of an emergency at the terminal. The lower end of the ladder must be maintained about 5 ft. above sea level and adquately lit at night.

(j) Displacement is not to exceed 150,000 tons.

DENSITY: 1020 – 1025.

FRESH WATER: Not available.

CONSULS: See "Leith".

TIME: GMT in Winter. GMT plus 1 hour in Summer.

GARBAGE DISPOSAL: Heavy duty bags supplied to vessel. Garbage is then transported to the terminal by ship's staff and handed into a terminal vessel by B.P. staff for carriage ashore.

A minimum of £75 is charged for this service, but if a sizeable quantity of garbage is transported then additional charge will be levied. Arrangments made via B.P. Berth Supervisor.

WASTE OIL DISPOSAL: Slops can be discharged to shore reception via ballast facilities, but this may be restricted dependent upon the nature of the slops.

No alongside barge facilities available for waste oil.

SEAMAN'S CLUBS: None.

GENERAL: Outside the Firth of Forth, clear of the land on the South side, streams are weak, spring rate up to 1 knot, but at spring tide the velocity at the terminal is up to 3.5 knots (Refer to Tidal Stream Atlas).

DEVELOPMENTS: An additional berth for vessels of 150,000 d.w.t. will be commissioned late 1993.
